TEC Professional Services Questionnaire

K. List the professional in charge, key persons, specialists, and individual consultants anticipated for this Project and provide their relevant information below. If necessary, please attach additional documentation (i.e. resume) that demonstrates the employment history and experience of the Firm's key persons that may assist in the completion of this Project. Please attach additional pages if necessary.

PROFESSIONAL IN CHARGE OF PROJECT:

Name & Title:

James E. Powell, Jr., P.E., P.L.S. - Vice President Engineering Operations

Project Assignment:

Engineering Manager/Company Principal

Name of Firm with which associated:

Kyle Associates, LLC

Years' experience with this Firm:

14 Years with this firm

Education: Degree(s)/Year/Specialization:

BS – 1999 – Civil Engineering

Active registration: Year first registered/discipline:

Year registered: 2004 Branch: Civil Engineering State: LA License No.: 31063
Year registered: 2008 Branch: Civil Engineering State: MS License No.: 18479
Year registered: 2010 Branch: Civil Engineering State: AR License No.: 14120

Other experience and qualifications relevant to the proposed Project:

Mr. Powell has worked in the civil engineering and land surveying field since 2000. Upon graduation from Louisiana State University in 1999, Mr. Powell worked as a project engineer for a civil engineering/land surveying firm in Baton Rouge. His duties included design and plan development, specifications/contract documents, as well as construction management, for several types of municipal and residential/commercial projects including drainage improvements, roadway design/improvements, sewer/water improvements and residential subdivision design.

TEC Professional Services Questionnaire

Since March 2007, Mr. Powell has worked for Kyle Associates as a Senior Civil Engineer/Project Manager and is now a Principal/Partner serving as Vice President Engineering Operations. Mr. Powell is responsible for the management of the production and engineering staff to ensure projects are completed with technical competency and within budget and schedule. He also has responsibilities as a Project Management including the design and construction plan development for residential/commercial developments throughout south Louisiana and Mississippi, several municipal projects in the cities of Slidell, Mandeville, Covington, New Orleans, Baton Rouge, and Abita Springs; as well as the parishes of Jefferson, St. Bernard, St. Tammany, St. Charles, Tangipahoa and Plaquemines. These projects include drainage evaluations/design, hydraulic modeling, large culvert replacement, bridge replacement, parking lots and roadway/drainage improvements, and the construction management aspects of these projects.

Drainage Design and Analysis – Projects included several drainage projects for Plaquemines, St. Tammany, St. Charles, Jefferson, and St. John the Baptist Parish's and the City of New Orleans, including levee reconstruction, subsurface drainage improvements, and drainage lift station, and assistance to St. Tammany and St. John the Baptist Parish with the analysis of proposed drainage improvements for residential and commercial developments as Parish Drainage Engineer.

Roadway Improvements – Projects included construction management of large roadway improvement projects in Jefferson, St. Tammany, Tangipahoa, Plaquemines, St. Charles parishes and cities of New Orleans, Slidell, Mandeville, Baton Rouge. Responsibilities included project management, planning, design, management of field inspection, processing invoices and change orders, and modifying plans due to conflicts encountered during construction.

Residential Subdivision & Commercial Site Infrastructure Design – Responsibilities included the review of subdivision construction plans for conformance with subdivision regulations in various parishes, design and project management of various residential subdivisions and commercial sites (including drainage, paving, sewer, water, etc.) in St. John the Baptist, Livingston, Jefferson, St. Tammany, Tangipahoa, and St. Charles parishes.

Permit Acquisition – Responsibilities include obtaining necessary permits from LA DOTD, LA DNR, LA DHH, U.S. Army Corps of Engineers, and various railroad/utility companies for the construction of drainage, levee, pump station, roadway, water system, and residential/commercial projects.

TEC Professional Services Questionnaire

KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:
Name & Title:
Franklin M. Kyle, III / President
Project Assignment:
Landscape Architect
Name of Firm with which associated:
Kyle Associates, LLC
Years' experience with this Firm:
23 Years with this firm
Education: Degree(s)/Year/Specialization:
BS – 1984 Landscape Architecture MBA – 1989 – Business Administration
Active registration: Year first registered/discipline:
Year registered: 1987 Branch: Landscape Architecture State: LA License No.: K-170
Other experience and qualifications relevant to the proposed Project:
<p>Mr. Kyle has been involved in engineering and project management for over twenty years as a designer, project manager, and director of landscape architecture and land planning. His experience includes transportation master planning, landscape architecture, land use analysis, directional pedestrian signage and informative traffic signage, map directories, urban, regional, and non-motorized/motorized vehicle pathways, site design, zoning analysis, municipal engineering, and geographic information systems. Mr. Kyle has designed roadway projects and land use development in Louisiana, Tennessee, and Mississippi. These projects require a vast knowledge of infrastructure design and management skills to successfully implement the project goals.</p> <p>In addition to the functional aspects of transportation enhancement, Mr. Kyle has been involved in applying GIS technologies to projects in various related fields. His experience utilizing computer mapping has been used in the analysis and development of strategy and goal maps, land use and roadway suitability, and market analysis. Additionally, data on geology, environmentally sensitive areas, habitat preservation, and municipal and infrastructure facilities have been incorporated into the GIS for methodology development and implementation. Many projects include program designs involving wetlands and flood sensitive areas. Mr. Kyle has completed the Wetlands Delineation Training Course based on the Corps of Engineers outline for delineation education.</p>

TEC Professional Services Questionnaire

As a landscape architect and project manager, Mr. Kyle has provided design development services for commercial sites and multi-use master plans. Concurrently, Mr. Kyle has directed parish zone ordinance development, environmental sensitivity analyses, municipal redistricting and feasibility studies. In addition, he has worked as manager for ecological remediation/reclamation projects maintaining the responsibility of public hearings, permitting, and coordination with applicable government agencies.

In 1998, Mr. Kyle created Kyle Associates, LLC, a multi-disciplinary design firm. Bringing in an experienced professional civil engineer as a partner, he is utilizing his 28 years of experience in the multi-discipline design industry to create a more efficient organization where the client benefits through increased efficiency in operation: quicker response to projects and great value for higher quality work. To date, this organization is serving the engineering needs of both private and municipal clients in the southeast Louisiana and coastal Mississippi region, providing quality engineering, planning, and facility/program management solutions tailored to the specific needs of individual clients.

TEC Professional Services Questionnaire

KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:
Name & Title:
Thomas Dyer, P.E. – Senior Structural Engineer
Project Assignment:
Project Structural Engineer
Name of Firm with which associated:
Kyle Associates, LLC
Years' experience with this Firm:
3 Years with this firm
Education: Degree(s)/Year/Specialization:
Bachelor of Science Civil Engineering / 2004
Active registration: Year first registered/discipline:
Year: 1997 Branch: Civil Engineering State: LA License No.: 36743 Year: 2003 Branch: Civil Engineering State: TX License No.: 133147 Year: 2003 Branch: Civil Engineering State: FL License No.: 82904
Other experience and qualifications relevant to the proposed Project:
<p>As a professional, Mr. Dyer has provided design services for federal, municipal, commercial and industrial agencies with both national and local engineering firms. These services have included structural engineering design for schools, office buildings, water resource projects, maritime infrastructure, and bulkhead design. Mr. Dyer has also performed construction design and layout, site design, and site planning. When providing these services, he has coordinated and maintained relationships with both public and private clients as well as architectural firms where his goal was projects constructed within budget, accurately, and on time. Mr. Dyer has nearly 30 years of experience in structural and civil site design.</p> <p>Mr. Dyer has extensive experience is in all areas of structural planning, engineering design and analysis, preparing plans and specifications. He has structural design experience in most types of architectural buildings including educational, residential, institutional, and commercial. Some examples of these include primary and secondary schools, college buildings, banks, civic centers, condominiums, custom homes, shopping centers, libraries, agricultural buildings, office buildings, restaurants, medical facilities, hotels as well as many others. She has also worked on projects that include historic restorations, and site structures such as flag poles, light poles and billboards. His industrial experience includes cat walks, heavy equipment foundations, foot bridges,</p>

TEC Professional Services Questionnaire

and pipeline bridges. He has designed foundations using a number of systems including spread footings, timber piles, concrete piles, composite piles, auger cast piles, drilled piers, chain walls, sheet piling, mat and raft foundations, and others. He has a considerable amount of experience in high wind applications.

Mr. Dyer has also worked on other types of projects that include historic restorations in the New Orleans area. He has evaluated the structural integrity of existing structural members and provided reinforcement details in response to existing structural conditions. He has participated in addition projects where she has explored the structural options for the proposed expansion along with possible modifications of the existing building. The structural aspects of the project usually include careful investigative demolition to verify the key existing conditions. He has also worked in the design of new foundations for existing houses that have to be elevated.

The type of work Mr. Dyer performed has given him a tremendous edge in understanding how to design and detail efficient, cost effective, and constructible buildings, while keeping the architectural intent of the building intact, in focus, and at the forefront where it should be. In addition, he is very familiar with designing and detailing buildings in our very specialized high wind and flood environments along the coast. He is familiar with all of the design codes applicable to building design such as the IBC, ASCE 10, ASCE 24, ACI 318, ACI 530, AISC, NDS, and others.

Mr. Dyer has extensive experience with ACAD, RAM, REVIT, STAAD, Advanced Structural Analysis, Foundations, Advanced Structural Steel Design, Steel Bridge Design, Concrete Design, Highways and Transportation, Mechanics of Materials, Surveying, Geotechnical Engineering, Soil Mechanics, Hydraulics, Dynamics, Statics, Thermodynamics, Fluid Mechanics, Electrical Circuits, Environmental Engineering, Project Management, Senior Design (structural team), Water & Wastewater Systems.

N. Use this space to provide any additional information or description of resources supporting Firm's qualifications for the proposed project.		
<p>Additional Information and Resources of Kyle Associates, LLC</p> <p>In 1998, Kyle Associates was formed as a multi-disciplined engineering and planning firm, specializing in public works design, planning, preparation of construction documents, bidding services, construction administration, and resident inspection. The firm has strategically directed its growth towards planning, engineering, and construction services through the staff it has acquired and the projects it has completed. Currently, Kyle Associates has completed many projects relating to the one being advertised in this RFQ throughout southeast Louisiana and Mississippi for many governmental agencies and private clients.</p> <p>The firm has provided engineering and planning services in Jefferson Parish since its inception for both the Parish directly and as a subconsultant to other firms. Kyle Associates has executed numerous projects throughout the Parish not only for the Streets Department but for other Parish departments as well. The firm is well versed with Parish design guidelines and has the experience to perform the work according to the needs of the Parish.</p> <p>All professional services performed under the Professional Landscape Architectural Services contracts are founded in socio-economic principles relating to the physical space needs of new facilities and improvements to existing facilities, enhancements to parkways and transportation corridors, park improvements, pedestrian areas, and any other landscaping throughout the Parish. A successful plan incorporates sustainable assets placed in service in an economically efficient manner. All work is developed in keeping with sound planning and architectural/engineering solutions.</p>		

TEC Professional Services Questionnaire

The landscaping projects for Jefferson Parish require both professional design expertise and management expertise. They also require the firm's personnel to have excellent organizational skills, excellent communication skills, and knowledge of the layers of jurisdictions that are required for a project to become successful. Construction administration preparation of construction documents for bidding, and bidding services on projects such as this, require additional attention to details. Conformance to the plans and specifications, and resolution of conflicts due to field conditions must be addressed quickly and with a high level of expertise in that field. Kyle Associates has that expertise.

Continuing Education and Experience

A continuing education program ensures that every staff member maintains the latest technology and methods used at their respective positions - for all positions - and training in related fields is encouraged so the project the designers will have a complete understanding of the design problem and solution. The landscape architectural and construction administration staff at Kyle Associates comes from diverse landscape planning backgrounds, offering a broad range of experience and technical competence. This training allows Kyle Associates to implement the best of several solutions during the construction administration and inspection service phase, providing the owner with a timely and superior project.

Quality Control

To ensure the client is provided the highest quality construction administration, an internal Quality Control System, is in place and used on all work produced by the firm. Successful implementation is based on project management. The QCS involves the team concept where one registered professional is placed as lead construction manager. This professional oversees the resident inspectors on-site, daily logs and reports, and monitors the project schedule. Periodically, another team member reviews the project progression and inspection reports, which offer a fresh look into the project status, which quickly identifies shortcomings in the construction process. It also utilizes the diverse experience of the entire staff. The principal in charge manages teams and all projects are reviewed on a weekly basis. Lines of communications are open in all directions. To assist in quality control, the latest in computer technology including both hardware and software are employed.

It is imperative that the manpower and skills are available to immediately begin a project and successfully complete it on schedule. With 15 fulltime employees, Kyle Associates has the manpower and capacity available to immediately begin work on **landscape projects** for the Parish. As these types of projects require daily management and quick response, **Kyle Associates has the necessary capacity to undertake the work and complete it within the strict parameters established by Jefferson Parish.**

Kyle Associates, LLC is not currently nor has the firm been involved in any litigation with Jefferson Parish.

O. To the best of my knowledge, the foregoing is an accurate statement of facts.
