

Company Profile

Company

Signs Plus is a **woman-owned**, family-run business with 27 years of experience in the sign industry. As a leading supplier of LED signs in the United States, Signs Plus provides LED signs to meet a wide range of project objectives. From indoor LED signs used to direct visitors in the lobby of a busy building — to multiple Full Color Outdoor LED signs deployed across a single network — we can assist with all phases of your LED sign project.

Signs Plus partners with the most respected LED sign manufacturers in the US. We're able to offer you CHOICES for your LED sign projects — because we believe every project is unique and not every LED sign is right for every application. Evaluating your project criteria and objectives and recommending the RIGHT LED sign is what we do best.

Signs Plus works with a highly qualified network of installers throughout the US. We're able to offer the deep discount pricing of a national company with the expertise of a sign professional, who is local and familiar with the unique needs of your area.

All our projects are backed by the extraordinary technical expertise, customer service, and project management of a team comprised of our own staff and professionals.

Principals

Rob Klinger joined Signs Plus in 1995. He is currently the President of our second generation, family-operated business. Rob was born in Warren, Ohio and relocated to Sarasota, Florida with his parents and sister in 1978. Rob has a Bachelor of Arts degree in Political Science from Jacksonville University.

Sally Klinger co-founded Signs Plus with her husband, Bob Klinger, in 1988. She has worked with Signs Plus as the Vice-President and Comptroller since that time.

Bob Klinger co-founded Signs Plus with his wife, Sally Klinger in 1988. Bob worked with Signs Plus as the President until 2008. He now provides consultation on various aspects of the business.

Company Profile

Our Community

For more than 10 years, Signs Plus' employees have generously donated their time and money to our local Adopt-A-Family organization. The matching contributions of Signs Plus have enabled more and more families to be sponsored each year. Additionally, in the past year we have collected non-perishable food for a local food bank as well as participating as a sponsor in a grass roots event that's raised over \$30,000 and increased awareness of hunger in our community.

Services & Expertise

Since 1988, Signs Plus has had the privilege of providing over 11,000 quality outdoor signs for institutions across America. We have signs in all 50 states, the Caribbean and parts of South America. We are not interested in just selling you an LED sign, but making sure you understand the technology and how it can best benefit your organization.

- Knowledge - we understand the technology and want to make sure you do as well
- Quality - our LEDs will withstand the extreme outdoor stress that Mother Nature serves up
- Technical Expertise – we partner closely with our clients to guide them through the process of choosing the RIGHT sign products for their project to ensure the best return on their investment.
- Competitive pricing - we pride ourselves on being able to provide a high quality product at a competitive price your organization can afford.

Sustainability / Green Energy

LED displays are significantly more energy-efficient than signs using incandescent or fluorescent bulbs. As solid-state devices, they have a typical life expectancy of 12 to 15 years. LED's also run cooler and at a lower voltage than fluorescent and neon lamps. This translates into reduced energy consumption and lower maintenance costs.
