Net shall attach at only two points on the sliding Winch Rail, which shall be mounted in profiled grooves running infinitely over the full range. Net tensioning device shall be mounted on the Winch Rail, and shall be a low profile, non-slip, threaded rod-type worm drive linear-actuator type utilizing conical toothed steel gears for safety and durability. The range of this gear mechanism shall be 17-1/2". Gear mechanism shall be completely encased in anodized aluminum. Net shall attach at only two points on the sliding End Rail, which shall be mounted in profiled grooves running infinitely over the full range. A two position (lock/off) lever lock shall be used to provide slip-free adjustment of the net height; screw-in adjustment knobs shall be deemed unacceptable. Uprights shall adjust to allow for Men, Women, and Juniors heights, as well as for badminton and tennis set ups. Uprights shall have floor-protective molded plastic caps. Hand cranks shall be permanently attached. Standards and winch shall carry no less than a limited lifetime warranty. Entire system shall meet or exceed all NCAA and NFHS requirements for competition.

### **INTERNATIONAL NET WITH RATCHET TENSIONER ✓**

#### **MODEL NO. SNAVB1298A**

Net shall be 9.8 meters in length and 1-meter maximum width. Netting shall be 10 centimeter square mesh, black nylon, KNOTLESS. Wide side tapes with sewn-in wooden dowels for equal net tension. Top cable shall be 1/8" steel, specially sewn into 50-millimeter white nylon binding. Bottom tension rope shall be nylon, covered by 30-millimeter white nylon binding.

### **NET ANTENNAE WITH SIDELINE MARKERS ✓**

#### **MODEL NO. SNAVB12**

Net antennae shall be 3/8" in diameter fiberglass rods, 71" long, with alternating red and white bands. Sideline markers shall be white nylon reinforced vinyl 2 1/2" wide with full-length pocket to contain antennae. Attachment to the net shall be full-length Velcro closures.

### **CABLE COVERS ✓**

#### **MODEL NO. VB35P**

Cable covers shall be made of 1/2" thick polyurethane foam. Shall be covered in 14 oz. reinforced polyester laminated white vinyl.

### **UPRIGHT SAFETY PADS ✓**

#### **MODEL NO. SNAVB51P**

Each upright pad shall be a single piece, 72" in height and 26" in width. Padding shall be comprised of cross-linked polyethylene foam, 1.25" thick. Covering shall be nylon-reinforced vinyl. ## **SNA SPORTS GROUP-**

### **BETTER EQUIPMENT FOR A BETTER GAME.**

*The SNA story begins over 30 years ago when Jim Peterson founded this company in Grand Rapids, Michigan. Jim and a small group of friends all shared a passion for providing superior sports equipment for teams at the recreational, collegiate and professional level. With a special emphasis in volleyball and basketball, they entered the market as innovators, bringing products to the North American market that later became industry standards-from the first aluminum volleyball posts to the first shatterproof backboard design in basketball.*

*By 2000, the company established itself as a top contender for equipment design that elevated athletic performance in both basketball and volleyball. That summer, Jim served as company representative for the portable basketball goals at the 2000 Games in Sydney.*

*Today, our innovation and performance as a company continues. We've grown to be far more than a volleyball and basketball company. In 2016, we recognized that growth by changing our name to SNA Sports. While growth has brought change, the things we value have remained the same. Our team still partners with every client to outfit your athletic department with the products that best suit your needs. And we continue engineering and installing better equipment to bring all kinds of athletes a better game.*

*That's who we are, and who we'll always be.*

*Since 1986 - Celebrating 34 years of excellence*
