RE: Shaw Sports Turf's Proposed Turf System for Ridgeland High School's Stadium Field

To Whom It May Concern:

Shaw Sports Turf's proposed turf system for your stadium field is our **Legion Pro 2.0** synthetic turf system over the **Brock PowerBase** shock pad. The Legion Pro turf system is a 15,800 denier hybrid product consisting of 10,800 denier Bolt monofilament fiber (Manufactured by Shaw Industries) and 5,000 denier slit-film fiber (TenCate XP) tufted through a single needle into our **Ultraloc** backing. It has a 2.0" pile height and 46 ounce face weight with an 8 oz multi-layer primary backing and a 20 ounce urethane secondary backing.

Best regards,

A handwritten signature in blue ink, appearing to read "W. Vinson", with a long, sweeping horizontal stroke extending to the right.
