### Clorox® Total 360™

PFS uses pro-grade equipment to deliver superior coverage of disinfectant on hard to reach areas to keep your facility safe and sanitized for better bacteria, virus and germ protection.

The Clorox® Total 360™ System utilizes innovative electrostatic spray technology to allow Clorox® disinfecting and sanitizing solutions to reach surfaces outside the line of sight, covering what conventional trigger sprays may miss, including the sides, underside and backside of surfaces. It works by using an electrode to introduce an attractive charge to the disinfecting or sanitizing product and atomizes the solution, using an air compressor to generate a quiet, but powerful liquid flow.

"Because the solution's particles are electrostatically charged, they are attracted to surfaces with a force stronger than gravity, allowing the solution to reach and uniformly coat even hard-to-reach surfaces." Clorox Commercial Solutions® Clorox® Total 360™ Disinfectant Cleaner is EPA-registered to kill 19 illness-causing organisms in two minutes or less.

## CORONAVIRUS

# What It Is & What You Can Do To Stay Healthy

Coronaviruses (CoV) are a family of enveloped viruses that was first discovered in the 1960s. They are most commonly found in animals, however, six strains are known to be transmittable from animals to humans. The latest strain, 2019 Novel Coronavirus (or 2019-nCoV), originated in Wuhan, China, last year.

### How does the coronavirus spread?

The virus typically spreads through the air via coughing or sneezing, contact with an infected person or contaminated surfaces and, rarely, fecal contamination. Most people are infected with human coronavirus at some point in their lives. They experience cold-like symptoms for a few days and then recover. However, the 2019-nCoV strain can cause severe symptoms, including fever, cough and shortness of breath, that can lead to pneumonia and possibly death.

The virus can spread quickly from person to person and can lead to widespread outbreaks when infected individuals travel to different countries. At this time, there is no vaccine or specific treatment for coronavirus.

### Controlling Infection

The CDC provides useful guidance and resources for coronavirus infection control measures. These should be implemented when patients are suspected of being infected.

**Hand hygiene:** Wash hands often with soap and water for at least 20 seconds. Use alcohol-based hand sanitizer when soap and water are not available. Avoid touching your eyes, nose and mouth with unwashed hands.

**Respiratory hygiene and cough etiquette:** Cover your nose and mouth with a tissue when you cough or sneeze, then throw the tissue in the trash. Avoid contact with infected individuals. Clean and disinfect surfaces and objects with an EPA-registered disinfectant.

For 2019-nCoV, the CDC also recommends a mask for confirmed individuals, eye protection for healthcare workers and implementing contact and airborne precautions in addition to standard precautions.
