Details

Urrea Professional Tools 4712L SAE Long Socket, 1/4 Drive, 6-Point, 3/8 Deep Well Socket. Urrea 4712L

The Urrea 6-point socket line is made of high-quality steel, resulting in outstanding performance on the job. They feature a chrome-nickel finish to prevent corrosion. The 6-point design provides greater contact with the nut or screw faces thanks to its Super Drive lobular geometry, featuring a 22.5 degree recovery angle. The socket's drive attachment system consists of an internal groove on all four walls, allowing it to easily attach to accessories and ratchets.
