DESCRIPTION TECH SPECS ACCESSORIES ALTERNATES

- 135° modified split point
- Self-centering point eliminates drill walking
- Manufactured from top-quality high-speed steel to reduce breakage and chipping for increased toughness and longer tool life
- Drill size equals the shank size
- Gold finish
- Made in USA
- The three-flat shank design provides a positive grip that prevents the drill bit from slipping in the drill chuck

CAUTION: Any cutting tool may break or shatter under improper use. Government regulations require use of safety glasses and other appropriate safety equipment at all times in the vicinity of use.

DESCRIPTION TECH SPECS ACCESSORIES ALTERNATES

Item# : 84731

- 135° modified split point
 - Self-centering point eliminates drill walking
 - Manufactured from top-quality high-speed steel to reduce breakage and chipping for increased toughness and longer tool life
 - Drill size equals the shank size
 - Gold finish
 - Made in USA
 - The three-flat shank design provides a positive grip that prevents the drill bit from slipping in the drill chuck
- CAUTION: Any cutting tool may break or shatter under improper use. Government regulations require use of safety glasses and other appropriate safety equipment at all times in the vicinity of use.

DESCRIPTION TECH SPECS

- Manufactured of soft wood for good grip and moisture absorption

For safety reasons, and to prevent possible OSHA violations, we recommend that a file never be used without a tight-fitting handle. Serious accidents can result from an exposed tang.

CAUTION: Protect yourself from product breakage and flying particles. Always wear eye and face protection, and make sure machine guards are in place. Comply with ANSI B7.1.

DESCRIPTION TECH SPECS

DESCRIPTION **TECH SPECS** **ACCESSORIES** **ALTERNATES**

- Specially-treated black oxide coating reduces loading of soft materials, prolongs tooth sharpness and tool life, and resists rusting
- Precision cut for uniform tooth height and sharpness
- Scientifically heat-treated for maximum hardness and edge-holding ability
- Unique cleaning process to eliminate grit and grime normally found in the bottom (gullets) of file teeth – eliminates excess clogging for faster filing
- American pattern
- Graduated coarse, fine and extra fine teeth (wavy teeth) are standard on files with a double cut (except round shapes), reduces chattering and lasts longer
- Wavy teeth work equally well on steel, iron, aluminum, brass, bronze, copper, slate and wood
- Tool sharpening files
- Sharpens mill saws, shears, lawn mowers, axes, farm tools and circular saws
- Can be used for lathe work and general filing
- Single cut on body and edges
- Width tapers slightly toward point

File Handles are for Regency® files only

For safety reasons and to prevent possible OSHA violations, a tapered file should never be used without a tight-fitting handle. A handle will not only help prevent accidents, it helps make the job easier and more enjoyable.

CAUTION: Protect yourself from product breakage and flying particles. Always wear eye and face protection, and make sure machine guards are in place. Comply with ANSI B7.1

DESCRIPTION

TECH SPECS

RESTRICTIONS

ACCESSORIES

- Made in USA
 - Variable Pitch
 - Teeth vary in size, spacing, gullet depth and number of teeth per inch along the whole length of the blade
 - Allows each tooth to enter the workpiece at a different cutting angle than the tooth before it, cutting into the workpiece underneath the cut made by the previous tooth, which makes for better chip formation. This allows you to cut faster and results in a smooth-cut finish
 - Less friction results in less heat buildup, particularly when cutting materials such as stainless steel that tend to work-harden easily
 - Each variable pitch blade size is able to cut a wider range of thicknesses, materials and shapes than straight pitch blades – reducing time required for blade changes
 - Bi-Metal Construction
 - A matrix alloy tool steel cutting edge is electronically welded to an alloy spring steel back
 - Cuts tough materials up to Rc 45, yet remains shatterproof
 - Can be tensioned to 30,000 PSI in a Hardflex® frame for greater performance
 - Withstands heavy feed pressures, side pressures and shocks without stripping teeth
 - Resists fatigue due to high friction cutting temperatures
 - Teeth stay sharper longer
 - Wavy Set
 - Groups of teeth are offset to the left and right throughout the blade
 - Less likely to strip than raker set teeth, because the set extends from below the gullets
 - On thin wall material, waviness increases the contact area, giving better accuracy
 - Better choice when the workpiece thickness varies, or for thin materials which may catch or bind teeth
 - The angle of each tooth changes gradually, thereby increasing the contact area and distributing the load
- CAUTION: Any cutting tool may break or shatter under improper use. Government regulations require use of safety glasses and other appropriate safety equipment at all times in the vicinity of use.

DESCRIPTION TECH SPECS

- All flaring tools listed are recommended for soft materials such as aluminum and soft copper
- No. 454W, No. 456, and No. 375 will also flare steel, stainless steel, hard copper, and brass
- No. 456R and No. 377 will flare steel, stainless steel, hard copper, and brass thru wall thickness of .035 inches
- No. 345 is a precision designed tool for producing 45° flares in soft copper, brass, aluminum, and mild-steel tubing. A hardened, smooth cone provides fast 45° flares either single or double lap. A single clamp screw provides for easy clamping and removal of tubing.

Product Name : Williams® - 1/2" Drive Deep Impact Socket, 13/16"
Drive Type : Square
Drive Size : 1/2"
Style : Deep
Number of Points : 6
Size : 13/16"
Measuring System : SAE
Type : Socket
Wrench Style : SUPERTORQUE®
Overall Length : 3.25"
Drive End Diameter : 1.25"
Working End Diameter : 1.25"
Bolt Clearance Depth : 2"
Bolt Clearance Diameter : 0.78125
Finish : Black Oxide
Locking Type : Pin
UNSPSC #: 27112825
TAA Compliant: Yes

DESCRIPTION

TECH SPECS

Individual Impact Sockets

- Black industrial finish
- SUPERTORQUE® lobular openings for greater turning power without deforming the fastener
- Designed for maximum engagement on 6 point fasteners
- Suitable for use with pneumatic and electric impact wrenches
- Specially heat-treated for impact use to provide long life, safety and durability
- Made in USA
