Bay Pest Control is licensed in the states of Louisiana and Mississippi. Bay Pest Control has provided pest control services since 1955. (60 + years).

The President of Bay Pest Control, Bruno Milanese, is a **certified Entomologist with over 35 years of experience** in the pest control industry.

Bay Pest Control is a member of the Professional Pest Management Association, National Pest Management Association and the Entomological Association of America. Bay Pest Control is certified by the National Pest Management Association to provide Integrated Pest Management to facilities as a Quality Pest Control Professional, a Green Pest Control Professional, a Food Processing and Handling Pest Professional and is Integrated Pest Management for schools certified.

Bay Pest Control will provide Jefferson Parish Public Works Department of Sewerage, West Bank Treatment Plants with an Integrated Pest Management program. Bay Pest Control shall adhere to the strictest standards of integrated pest management. All requirements can be met by Bay Pest Control.

At the beginning of every service each building will be thoroughly inspected on both interior and exterior. Bay Pest Control is inspecting for visible evidence of insects, insect droppings or insect/rodent entry points. Bay Pest Control will also inspect each building quarterly for evidence of termites. Depending on what is found will determine the course of action.

The following steps will be applied to all buildings. Integrated Pest Management begins with sealing all entry points. Depending on the area and hole, Bay Pest Control will use stainless steel screen, steel wool and steel reinforced foam or caulking. Any of these applied correctly, and in a manner that is aesthetically pleasing, will keep insect pests out.

In the event additional treatment is needed to control an infestation, insect specific non-toxic baits will be used (gel baits, granular baits, liquid baits, dust baits, bait blocks, pre baited glue traps, etc.) All baits will be applied according to label directions and for the specifics of the facility. Special care will always be used to apply all products in a manner and location that is inconspicuous but will still achieve the desired result.

In the event that all of the above has not attained the tolerance threshold, Bay Pest Control will apply the least toxic, most effective insecticide, rodenticide, termiticide (as appropriate) needed to control the infestation. These products come in a variety of compound mixtures, (dust, granules, liquids etc.) and will always be applied according to label directions for a facility. When appropriate, Bay Pest Control will use insect growth regulators to not only control the current infestations but to help reduce/eliminate any future infestations.

Bay Pest Control currently services several public facilities, hospitals, universities, power plants and many other sensitive accounts. Bay Pest Control is well versed in servicing government buildings and would be an excellent provider of pest control services for Jefferson Parish Public Works Department of Sewerage, West Bank Treatment Plants.
