Company Introduction

King Consulting Engineering, LLC (KCE) is a Consulting Firm headquartered in New Orleans, Louisiana specializing in Engineering and Design, Project Management, and Construction Administration. Firmly grounded in the Electrical Discipline, KCE also provides complete multidisciplinary engineering services via partnerships with Civil, Structural, Mechanical, and Geotechnical Engineers to meet the diverse needs of our clients. Founder and Principal Engineer, Kerwyn King, P.E. has served the city of New Orleans and surrounding areas for over 15 years providing engineering and consulting services on projects across multiple industries.

ARCHITECTURAL

MUNICIPAL

INDUSTRIAL

ENERGY

RESIDENTIAL

We work with clients across the country.

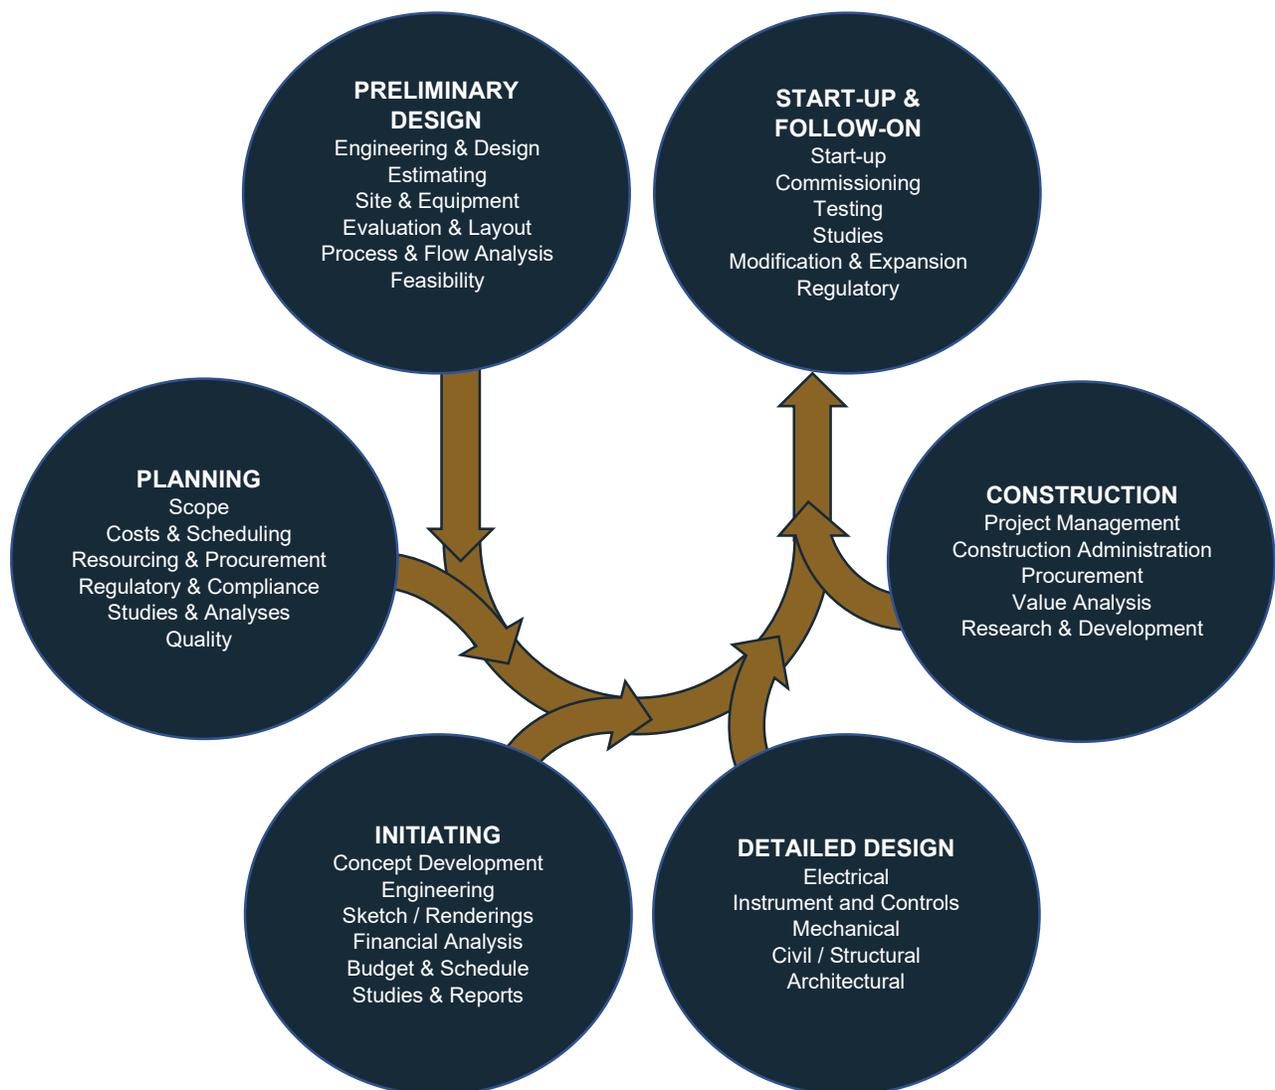

KCE's multi-discipline capabilities provide a significant advantage in project development from concept through final construction. An integrated approach of site planning, environmental concerns, geotechnical analysis, multi-discipline engineering and design, and construction services facilitates successful and cost effective project development.

Profile of Professional Services

King Consulting Engineering is firmly grounded in the Electrical Discipline as it relates to a wide variety of project developments. KCE can provide complete services from concept development and planning, to initial data acquisition and site surveying/evaluation, and finally complete design and and/or system analysis, including producing complete construction packages and/or analysis reports.

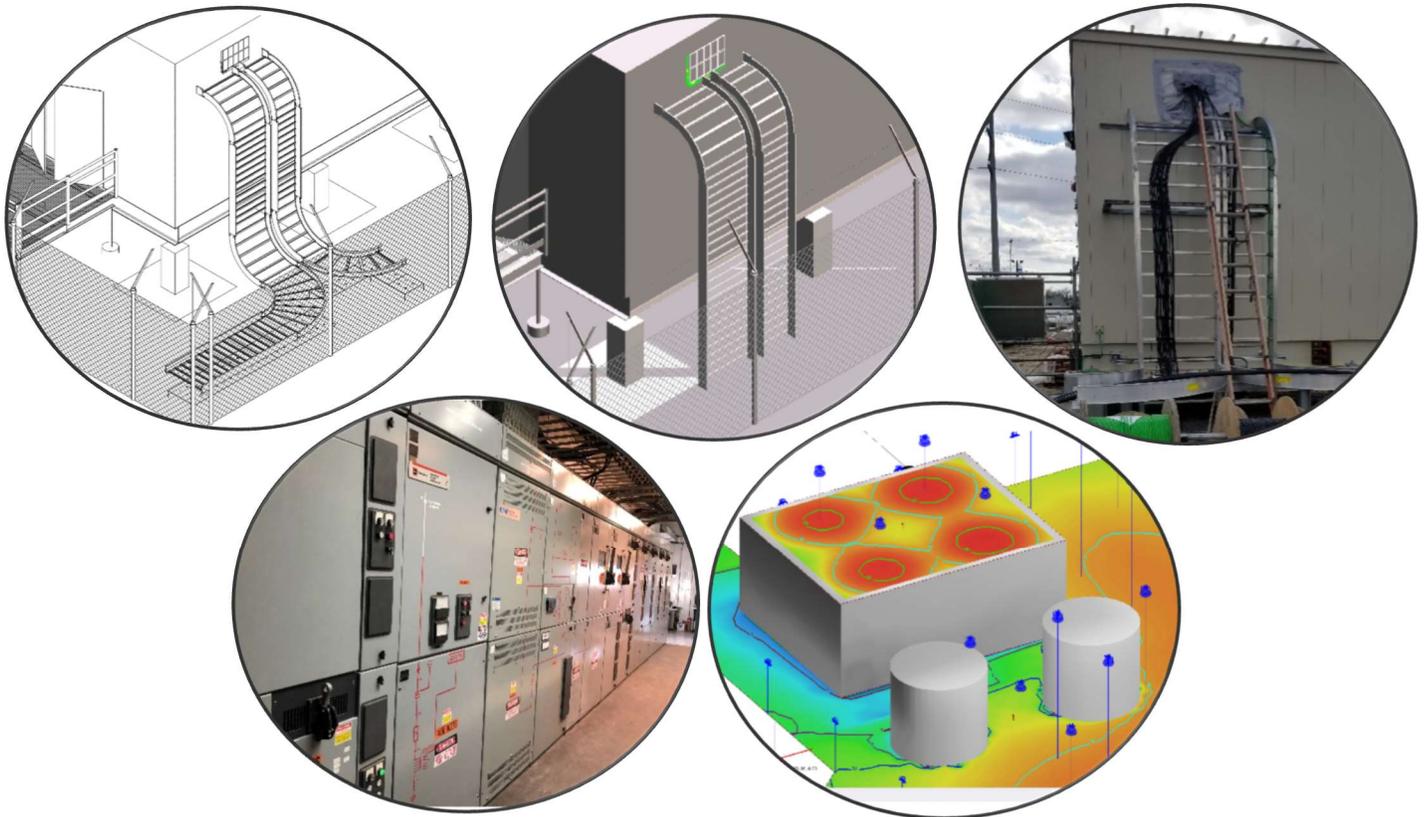

Specific electrical engineering services provided by King include, but are not limited to the following:

- Electrical System Design and Analysis (Studies)
- Electrical Equipment & Facilities Specification and Layouts
- Electrical Heat Tracing
- Electrical Grounding, Lightning Protection, and Surge Suppression/Protection
- Power Factor Correction
- Hazardous Area Classification
- Interior and Exterior Lighting Systems
- DC Power Systems and UPS Systems
- Emergency Power Systems
- Life Safety Systems
- Load, Short Circuit, and Coordination Studies (SKM and ETAP)
- Arc Flash Analysis
- Transient Stability Analysis
- Motor Starting and Control
- Cathodic Protection System Design and Analysis
- Electrical Project and Construction Management
- Testing/Factory Acceptance Testing and Commissioning

Please visit www.king-engineers.com for complete list and details of services provided.
