

Wastewater... without the waste

For over a decade, Liberty Process Equipment has been working closely with the wastewater industry by supplying "drop-in" quality progressive cavity pumps and 100% interchangeable aftermarket replacement spare parts. Today, more than ever, facility budgets are tightening and waste water treatment plants are feeling the financial squeeze of restricting themselves to purchasing only OEM pumps and parts, however, there is a better solution!

A solution that over 500 currently operating WWTP's in the USA and Canada have and are still utilizing today to keep their purchasing power high even with today's restrained budgets, and that Solution is Liberty Process Equipment's Millennium line of progressive cavity pumps and replacement pump parts for wastewater pumps.

The Millennium series of Heavy Duty Pump is a direct competitor to other more expensive OEM brands with savings up to 45% or more on replacement progressive cavity parts and pumps. In addition, Liberty keeps a large inventory of pumps and pump parts in our facility in Chicago, IL. We ship the day you place your order.

From Rotors and Stators to seals, parts kits and complete pump and pump packages, Liberty Process Equipment is your solution to retaining your current pump's performance and dimensions at an attractive price and quick delivery. Give us a call and see the difference Liberty can make!

Millennium Series

Capacity: Up to 742 GPM
 Pressure: Up to 180 PSI
 Temperature: 20 °F up to 350 °F

- Rotors
- Stators
- Parts Kits
- Gear Joints
- Complete Pumps

G065G1L Series

G090G1L Series

H115G1L Series

J175G1L Series

The Millennium Series of Progressive Cavity Pumps are a Heavy-Duty cast pump that is ideal for industrial applications such as crude oils, mineral processing, waste sludge and slurries and heavy polymers and detergents.

Its robust construction allows for up to 25' of suction lift while its pumping action remains delicate enough for minimal shear to pumped materials.

The Millennium Series offers true versatility with multi-directional pumping capability by being able to be run in either direction while its heavy-duty internal components are designed for optimal service during its operation.

Contact a Liberty Process Equipment representative today for more information about how the Millennium Series can be your solution.
