

LUDLOW Series AWWA C508 Swing Check Valves

Lever and Weight • Lever and Spring

3" to 30" for Water, Wastewater and Sewage

LUDLOW SERIES AWWA C508 SWING CHECK VALVE FEATURES

STANDARD FEATURES

- Quick-closing, slam resistant operation, ideal for pump station applications
- Meets design, materials of construction and testing requirements of AWWA C508 (latest revision)
- Heavy-duty 250 PSI rated high strength ductile iron body and cover
- Full waterway design for low headloss
- Corrosion and wear resistant stainless steel body seat
- Rubber-faced disc for durable, drop tight seating
- Oversized stainless steel shaft and bronze shaft bearings designed for high cycle operation
- Lined and coated with NSF-61 certified epoxy for long term corrosion resistance
- Stainless steel cover bolts
- Valve is totally serviceable through top flange

OPTIONAL FEATURES

- Limit switch to indicate valve position. Available in NEMA 4, 4X, 6, 6P or 7 rating

CHECK VALVES DESCRIPTION, OPERATION AND HEADLOSS

Description

LUDLOW Series Swing Check Valves provide long-term, dependable service in water, wastewater and raw sewage applications. LUDLOW Series Swing Check Valves are ruggedly designed to withstand the rigors and frequent operation of pump station use, opening freely when the pump starts and closing quickly and quietly upon pump shutdown to prevent reverse flow. The LUDLOW Series check valves meet or exceed the requirements of AWWA C508, are rubber-seated for zero leakage and are available with either outside lever and weight or lever and spring for installation in horizontal or vertical pipes.

Valve Size	GA		STANDARD SWING CHECK	
	Diameter	Area	Diameter	Area
3	3/4"	.44 sq.in.	5/8"	.31 sq.in.
4	7/8"	.60 sq.in.	3/4"	.44 sq.in.
6	1"	.79 sq.in.	7/8"	.60 sq.in.
8	1-1/4"	1.2 sq.in.	1"	.79 sq.in.
10	1-1/4"	1.2 sq.in.	1-1/8"	1.0 sq.in.
12	1-1/2"	1.8 sq.in.	1-1/8"	1.0 sq.in.
14	2"	3.1 sq.in.	1-1/8"	1.0 sq.in.
16	2"	3.1 sq.in.	1-1/4"	1.2 sq.in.
18	2"	3.1 sq.in.	1-1/2"	1.8 sq.in.
20	2"	3.1 sq.in.	1-1/2"	1.8 sq.in.
24	2-3/4"	5.9 sq.in.	2"	3.1 sq.in.
30	2-1/2"	5.9 sq.in.	2-1/2"	4.9 sq.in.

Pump Check Operation

At pump start, the valve disc swings away from the seat in proportion to the fluid's forward flow velocity, lifting the counterweight or extending the external spring as it does. The design of the LUDLOW Series valve provides a full flow area when the disc has swung away from the seat by as little as 22.5 degrees but can open as much as 60 degrees if the fluid velocity is sufficient.

At pump shutdown, the force of the heavy counterweight or extended spring "pulls" the valve closed through the decreasing forward fluid velocity during pump coastdown so the valve is fully seated before fluid reversal occurs, precluding slam and bang.

The heavy closure devices needed to ensure quiet closure require over-sized hinge shaft and bearings to withstand the forces produced by rapid closure. Figure 1 compares the significantly larger diameter shaft of the LUDLOW Series Swing Check Valve to that of a "standard" swing check. These small shaft diameters could not accommodate the heavy closure devices needed for quiet operation thus increasing the likelihood of slam and bang.

GA Industries offers a broad range of valves designed specifically for the waterworks market

AWWA C504

Rubber Seated Butterfly Valves

- Flanged and Mechanical Joint Ends
- Manual and Automatic Actuation

AWWA C507

Ball Valves

- Metal Seated
- Resilient Seated
- Hydraulic, Pneumatic, or Electric Motor Actuation

AWWA C508

Check Valves

- Cushioned Swing Check
- Rubber Flapper Check
- Globe and Wafer Silent Check
- Ball Check
- Foot Valves

AWWA C512

Air Valves for Water and Sewage

- Air Release
- Air and Vacuum
- Combination
- Vacuum Breaking

AWWA C517

Eccentric Plug Valves

- Flanged, Threaded, and Mechanical Joint Ends
- Manual and Automatic Actuation

AWWA C530

Control Valves

- Pump Control for Water and Sewage
- Surge Relief for Water and Sewage
- Level Control
- Pressure Regulating
- Solenoid Operated
- Anti-Cavitation
