SPECIFICATIONS

BID NUMBER: 50-00114458

TWO (2) YEAR CONTRACT FOR A DIGITAL BOOK SERVICE FOR A PUBLIC LIBRARY, TO COMPLEMENT AN EXISTING SERVICE.

Jefferson Parish Library requires a digital content service that will host a discovery website, support and provide e-books that the library can purchase and/or license, to add to the library website.

The service must include easy-to-use apps and support many types of computers and portable devices. The library requires an online catalog of downloadable e-book titles that the library can purchase and/or license at any time during the contract period so the library can choose titles based on patron interest, requests and needs.

Digital content must be public library oriented, downloadable e-books, including mainly popular fiction and non-fiction bestsellers, for all ages and reading interests. Titles must be from top publishers, including Hachette, Harper Collins, McMillian, Penguin Random House, Simon & Schuster, Bloomsbury, Perseus, and Scholastic.

Jefferson Parish Library is a public library serving a suburban population of approximately 434,123 with sixteen (16) locations, including two (2) regional libraries and fourteen (14) branch libraries.

The service shall complement an existing digital content service to offer library users an alternate method for accessing e-books.

The two (2) year contract will take effect upon contract ratification.

The annual service and/or hosting fee payment will be on a 12-month (year by year) basis. The library will pay the hosting fee one year at a time. Content added during the year will be paid for as ordered.

The Annual service and/or access fee will be binding as quoted, and will become part of the final contract.

FOR LIBRARY PATRONS

The bidder must provide a digital content service that includes hosting and supporting a discovery website and providing e-books that the library can purchase and/or license, to add to the website.

The bidder must provide free user applications (apps) that are easy to download and allow for reading or listening off line.

The apps must provide full access to the catalog of titles and all functions of the service including discover, checking out, returning, downloading and reading or listening to e-books.

The service must be compatible with most types of computers and portable devices including PCs and Apple computers, Apple devices such as iPhone and iPad, Android phones and tablets, Kindles, Nooks and Windows devices.

User authentication must be stored in the apps so patrons won't have to re-authenticate to search for, check out, read or listen to an e-book.

A user must be permitted to create a personal and private account to keep track of titles that they have checked out, placed on hold, and may be interested in for later use.

A personal account must sync seamlessly across a user's devices and computers, including automatically and manually created bookmarks, allowing a user to read a book on multiple devices without losing their place.

The service must allow for automatic as well as early check-ins or returns.

The service must allow for hold or waiting lists with email and text message notification to the user when a title is available for them to check out.

All features of the service must be accessible 24/7, in the library and remotely.

FOR LIBRARY STAFF

The entire service, including the library's content must reside on a server hosted by the bidder.

Hosting and maintenance of the service will be on a subscription basis while downloadable e-books can be purchased and licensed at any time during the life of the contract.

The bidder must provide a Library Administration Tool that allows staff to set library criteria for check outs, holds and other patron facing functions, purchase content, and access usage reports and purchase orders.

The Library Administration Tool, including the bidder's catalog for choosing content, must be compatible with up to date versions of multiple internet browsers, including Chrome, Firefox and Explorer.

Digital content must be public library oriented, downloadable e-books, for library users of all ages.

The bidder must provide an online catalog of downloadable e-book titles that the library can purchase and/or license at any time during the contract period so the library can choose titles based on patron interests, requests and needs.

The catalog must be updated continuously with new titles as they are published, and it must be searchable by keyword, title, author, subject, genre, age level, format and publication date.

The catalog must include fiction bestsellers, new and backlist popular fiction and non-fiction, for adults, teens, and children, from top publishers, including Hachette, Harper Collins, McMillian, Penguin Random House, Simon & Schuster, Bloomsbury, Perseus and Scholastic.

The catalog must allow for quick and easy online ordering, with current titles added to the library's collection within 24 hours after ordering.

The bidder must provide collection development assistance including suggested titles, bestseller lists, new titles list, subject interest lists, award winners and read-a-like-lists.

The bidder must provide electronic order confirmations, order status updates, electronic invoices via email and online purchase history reports.

The bidder must provide OCLC vetted MARC catalog records for each title to allow linking from the library's online catalog to the digital content website.

The bidder's service must be compatible with the library's integrated library system (ILS) for discovery, library card authentication, and patron account synching.

SUPPORT

The bidder must provide assistance with all aspects of the service and include email and toll-free telephone support for library staff and help websites and webinars for library staff and patrons.

The bidder must update apps, websites and content formats, to be compatible with device and computer operating system updates, and new devices and computers, in a timely manner.

The bidder must provide marketing support including reproducible book marks, posters, graphics for the library's website, templates for press releases and patron handouts, and a wide variety of customizable usage reports.

For Library Patrons

OneClickdigital will provide Jefferson Parish with a digital content service that includes hosting and supporting a discovery website and e-books that the library can purchase and/or license, to add to the website.

Apps are free and easy to use. Reading and listening is available offline after the book has been downloaded

Apps are enabled with full access to allow patrons to complete the checkout process from start to finish

Please see attached list of compatible devices

User re-authentication is not necessary to search or check out books once the initial log in has been completed.

Users have the ability to create a wish list, place books on hold and see titles that have been checked out.

The patrons account allows them to use multiple devices. Users can bookmark their book at any point for use at a later time.

If a book is checked out for the time allotted it will automatically be returned. Users do have the option of returning books before they are due.

The patron can place a title on hold. They can monitor their place in line or remove the hold. When the title becomes available for checkout the user will receive an email notification and have 48 hours to check the book out. If a user signs in to their account when a held title is available, the title will then be automatically added to the users account.

OneClickDigital is available 24 hours a day 7 days a week in the library and remotely.

For Library Staff

All content is hosted on Recorded Books Servers

The service is a yearly subscription platform with the ability to add titles as needed.

If applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income.

Note. If a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

Special rules for partnerships. Partnerships that conduct a trade or business in the United States are generally required to pay a withholding tax on any foreign partners' share of income from such business. Further, in certain cases where a Form W-9 has not been received, a partnership is required to presume that a partner is a foreign person, and pay the withholding tax. Therefore, if you are a U.S. person that is a partner in a partnership conducting a trade or business in the United States, provide Form W-9 to the partnership to establish your U.S. status and avoid withholding on your share of partnership income.

DIGITAL BOOK SERVICE PROPOSAL

JEFFERSON PARISH LIBRARY

CLOUD LIBRARY SOLUTIONS
OCTOBER 15, 2015

October 13, 2015

Melissa Ovalle
Jefferson Parish General Government Building
200 Derbigny Street, Suite 4400
Gretna, LA 70053

Subject: Digital Book Service Proposal Bid No. 50-00114458

Dear Ms. Ovalle:

As you experienced firsthand, the Cloud Library allows your customers to enjoy a digital content lending system that is second to none in the industry. And, unlike other e-lending providers whose products are cumbersome to navigate, your customers continue to enjoy our app's ease of use. This ease of use is the key to enhancing the user experience. Our proposed solution ensures the Jefferson Parish Library and its branches will continue to **maximize use rates, enhance the customer experience and increase digital circulation**.

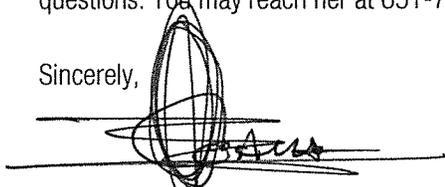

3M Library Systems was recently acquired by Bibliotheca LLC. However, the quality products and people that you have trusted for years as your digital content provider will still be available to the Jefferson Parish Library. Please see the press release on the following page for more information. We believe the integration of 3M Library Systems and Bibliotheca will better serve our customers with an unbeatable selection of products that is not offered by any other company in the library industry.

Key benefits to continuing our unique digital content relationship include:

- ✓ **No Learning Curve.** As an existing Cloud Library customer, you will not experience the downtime associated with installing a new digital content lending service. By going with another vendor, you can expect a less than seamless implementation that could take months. With our existing service, your staff and customers will **continue to enjoy** their digital content lending service **without interruptions**.
- ✓ **Quick and Easy.** We designed the Cloud Library with the customer experience in mind. Our app enables your customers to browse, check out and read digital content from a single application. Unlike other vendors, we are an **industry leader** for **ease of use applications**. For example, our Cloud Library app allows your customers to synchronize bookmarks and notes across devices. Thus, notes they make while reading a title on a PC or Mac are available when they read the title on a smartphone or tablet.
- ✓ **Drive User Rates.** You know that a **community-friendly collection** is important to the continued success of your existing digital collection. Heather McCormack, our highly experienced Collection Manager, and our team will continue to help your library system further drive customer interest and usage rates. As always, we will help your staff build an ongoing digital collection that is current, vast and community-friendly.

We look forward to continuing our long-term and strategic relationship as your digital content lending partner. And, we welcome the opportunity to discuss our proposal in person. Regan Dewey is your account representative, and she is happy to answer any questions. You may reach her at 651-707-4296 or rdewey@mmm.com.

Bibliotheca Announces Significant Expansion

October 6, 2015

Bibliotheca is excited to announce that their shareholders, One Equity Partners (OEP), today completed the purchase of 3M Library Systems North American business, and entered into agreements to purchase the assets of 3M's remaining global Library Systems business. The new Bibliotheca Group will combine the best of both worlds to help libraries captivate their communities, providing innovative library-focused solutions that connect with people at home, at the library, and on the go.

Each business brings unique products and services to the market, which combined will provide libraries with an unparalleled portfolio of solutions to help them serve their community at home, at the library and on the go.

Going forward, Bibliotheca will combine with the former 3M Library Systems business and will transition it to a single Bibliotheca brand. The new Bibliotheca Group is committed to continued investment in products and staff and will continue to expand into new regions with innovation-led products.

The completed sale transfers 3M's former North America Library business, including the security (EM), productivity (RFID & AMH) and cloud (eBooks) solutions, all of which will be joined with the existing Bibliotheca product set to create the single largest 'best of breed' solution set globally.

Dr. Simon Plankenhorn, Managing Director Bibliotheca Group, commented: "Ever since the incorporation of the Bibliotheca Group in 2011 we have been focused on assembling the greatest team of people and the most innovative product set within the library industry. The news today brings together two strong businesses in the industry and makes Bibliotheca the most experienced and dedicated library company in the world. We are delighted to have concluded the deal and extremely excited to kick off the North America integration as soon as possible".

Matt Tempelis, who joins Bibliotheca from 3M and was previously the 3M Library Systems business leader added, "We're excited for the opportunity to create a company that can continue to deliver innovative, high quality products to libraries across the globe. The combined company has the scale needed to accelerate our product development pipeline. As before, we will continue to listen to the needs of our library customers while delivering the highest possible levels of service and quality that customers have expected."

Transferring customers will see no change to their existing support and maintenance contracts and will benefit from a combined product range, knowledgeable industry experts, and the confidence that they are an extremely valued customer of the largest global company dedicated exclusively to libraries.

About Bibliotheca

Bibliotheca was formed in the spring of 2011 when the three leading independent companies of Bibliotheca (Switzerland), Intellident (UK) and Integrated Technology Group, ITG (North America) merged to create a single, global entity. In January of 2012, the Group was extended further with the acquisition of Trion AG, one of Europe's leading AMH suppliers. Bibliotheca is financially backed by One Equity Partners, a division of JP Morgan Chase & Co. The formation of this Group creates the world's largest company dedicated to the development, deployment and support of RFID-based solutions, with particular focus on public, private and academic library markets. A built-in dictionary, options to bookmark pages, create notes in your individual notebook, text-to-speech capability, and the ability to increase/decrease font sizes to name a few ensure a wonderful reading experience.

Patrons and staff may access MackinVIA directly at www.mackinvia.com (logos and widgets are available for library webpage) or through the library's Library Management System. Through the use of customized MARC records for your digital purchases, you will be able to discover any eBook in your LMS and then click on the user-friendly link which is provided in the 856 tag of your records. In addition, MackinVIA can be accessed from home or off-site with a single username and password. Any eBooks with download capability can be checked out to a device and read later when internet connectivity isn't available.

MackinVIA can be utilized without any individual user information using a general login and password that can be assigned initially. Individual users can create an individual Backpack account to checkout titles, save favorite eResources, and store notes/highlights about a title. Backpacks require only a User ID, password and first name. Individual email addresses may be entered but are optional.

The Merriam-Webster dictionary feature offers three different levels for the administrator to choose from. Within the MackinVIA eReader, simply clicking and highlighting allows the reader to instantly find a definition for a word in the resource, or type in any word in the search box for a complete definition.

The screenshot shows the MackinVIA eReader interface. At the top, it displays the title 'Anne of Green Gables' by 'Montgomery, L. M.' and navigation icons. The main text area shows 'CHAPTER I Mrs. Rachel Lynde is Surprised'. A paragraph of text follows, with the word 'decorum' highlighted. A small dictionary pop-up window is open over the highlighted word, showing the definition: 'de*co*rum (di-'kôr-əm), noun : proper behavior Grandpa insisted on decorum during the ceremony.' The pop-up also includes a search box with 'decorum' entered and the Merriam-Webster logo.

MackinVIA Backpacks can be established (set up) for individual patron access and management of digital content. Individual Backpack accounts allow patrons to store and manage eResources – save favorite eResources in one place, check out and request Mackin-hosted eResources and store notes about eBooks and databases.

Favorites to save titles for future reading.

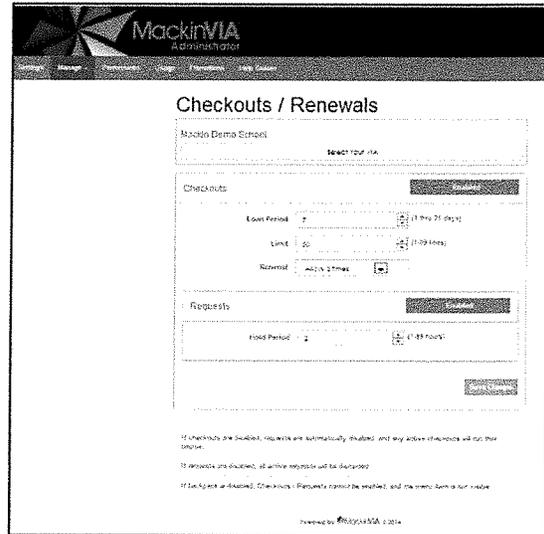

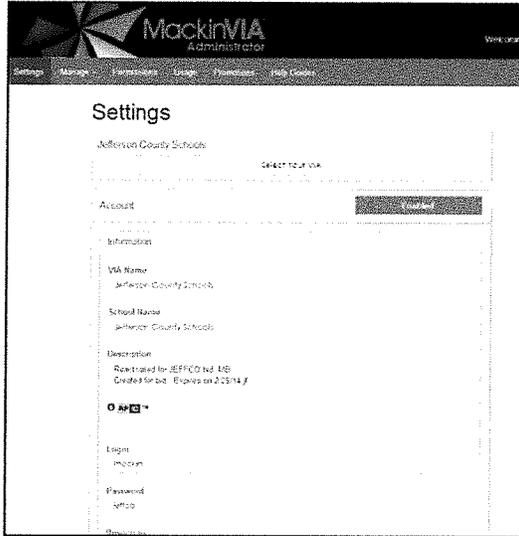

Notebook to view the notes they have made about eResources.

Checkouts to see a list of titles they currently have checked out, along with due dates.

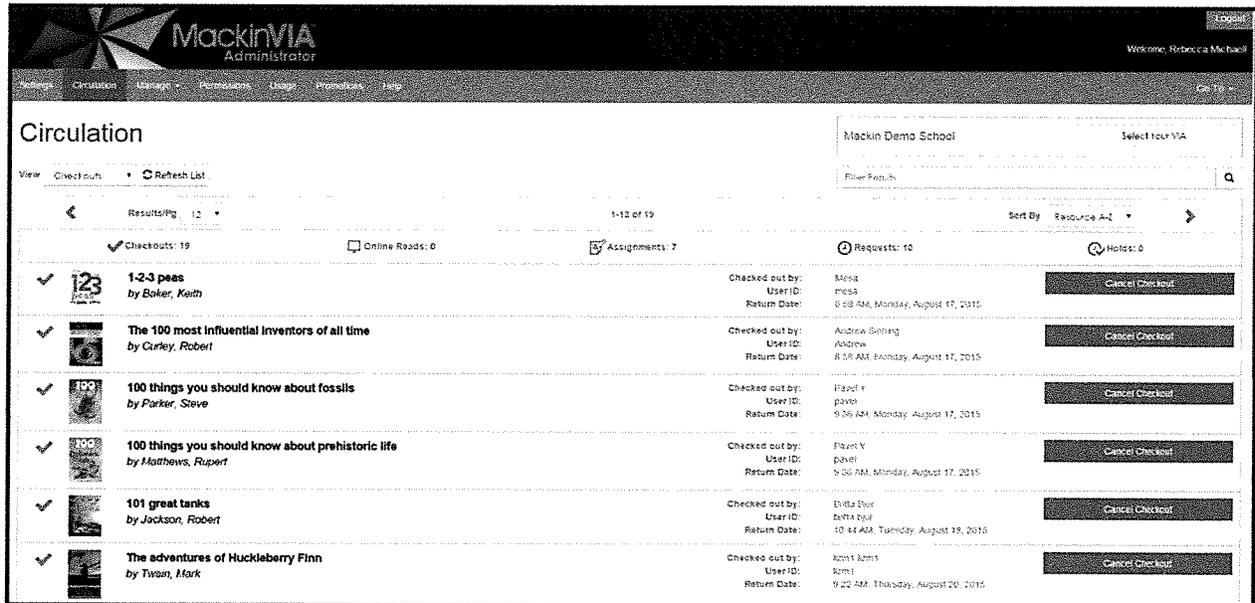

Requests is where users can see a list of titles they've requested to checkout because they were unavailable (ie, single-user titles for which they are on a waiting list).

Administrative Features.

There are many administrative features available for each MackinVIA account, including homepage layout, available search parameters, dictionary options and more. The administrator can change the name that is displayed on the MackinVIA homepage for local customization. Administrators can also determine checkout length and request hold periods.

MackinVIA's newest features details current circulation for all digital products, allowing Administrators to see a "snapshot" of all items currently checked out, being read online, on request by a user, or on hold:

The Subscription manager reflects all MackinVIA digital materials that were purchased on a subscription basis, their current expiration date, and the ability to purchase / renew the subscription. The Subscription manager also sends automated emails at the first of each month as a reminder for Administrative users to renew materials that may be expiring soon.

MackinVIA Authentication Integration –

Mackin has developed an integration with SyrsiDynix to offer a MackinVIA solution with eResource Central, a central place for librarians to manage digital resources from multiple providers. The partnership between Mackin and eRC will allow libraries to dynamically update their local title metadata and will let patrons download, preview, and see available eResources all from the library catalog.

MackinVIA is fully capable of importing information to populate, and authenticate, users and their credentials through Active Directory or LDAP. You can also utilize the Backpack Management feature available in the Administrator's MackinVIA to load your own file of patron information with usernames and passwords or Mackin can set up access utilizing LDAP and use current Student Information Management System (SIMS) accounts to create individual backpacks.

In addition, MackinVIA also offers these further options for streamlining patron authentication and automating Backpack management:

- SIP2 – MackinVIA logins are authenticated real-time against the district's SIP server.
- Automated FTP Import – a CSV file of patron data is uploaded to Mackin's secure FTP site; we load the file into MackinVIA to create, update or deactivate Backpacks.
- LDAP – MackinVIA logins are authenticated real-time against the district's directory server.
- Single Sign On (SSO) – MackinVIA is updated (periodically or real-time) by the district's single sign-on solution; patrons only need to login one time into the network.

Training and Support

Mackin is pleased to provide free, ongoing onsite training for all library staff whether in a group or individual setting as needed. Additionally, Mackin provides online webinars and other training sessions occasionally throughout the year. Personal webinars can be scheduled anytime as needed at no additional charge. Our Customer Service department is also pleased to assist with just one call or live chat.

The MackinVIA Guides & Promotions page is available both within MackinVIA Administrator access and directly at <http://www.mackin.com/ELIBRARY/VIA-MATERIALS.aspx>. This page has a wide variety of guides, videos and promotional materials (such as posters and bookmarks) to help you understand how to use MackinVIA as an administrator, patron or staff member and also how to promote MackinVIA.

Promotions

Mackin is continually searching for exciting ways to create extra value for our customers. The Promotions tab highlights the latest MackinVIA promotions – whether it's free eBooks from our publisher partners or other special offers. Promotional information can be found at <https://www.mackin.com/corp/resources/promotions/>.

Services

Mackin has a wide array of free services to assist you with managing library collections.

Mackin provides full MARC21 electronic records for every title you order—books, eBooks, audiobooks, CDs, and DVDs. If a title requires original cataloging, our master-degreed catalogers produce a complete MARC21 record. All records have full annotations, LC and/or Sears subject headings and an interest level range. Reading level, reading program levels, reviews and awards are added when applicable.

RDA (Resource Description Access) went into effect on April 1st, 2013 and all materials published after that date are cataloged using the RDA cataloging standard. RDA replaced the AACR2r (Angle American Cataloging Rules 2nd edition revised) standard.

Therefore, Mackin Educational Resources, following industry standards, provides a mix of AACR2r and RDA MARC records. However, if you do not wish to receive RDA formatted records, we are able to provide all of your records in AACR2r format.

COLLECTION ANALYSIS: Our Collection Analysis service is a great way to look at the strengths and potential weaknesses of each library's collection. The analysis can be done online at any time – simply set individual parameters (such as books per patron goals, date of print minimums, etc), upload the MARC records, and review the results. Those results will show the current status of the collection and how it compares to both an exemplary collection and stated goals. The final report will include charts, lists and graphs to compare current results with past analyses to see growth as well as a list of suggested titles to consider for weeding. The online analysis offers easy links to view details of titles in each Dewey section and makes searching for new titles as simple as one click. Collection Analysis can be performed for a single library, and/or all branches.

To view online, simply login and go to My Mackin > My Collection Analysis > Collection Analysis Results:

Sample Elementary Summary

In putting the analysis together, we first indicate the average age and number of titles in each part of your collection, then we compare it to a brand new "exemplary" collection that would meet size standards for the number of students in your school. You should then be able to see some of the potential problem areas in your collection and where the collection may fall short of standards. Obviously, what is exemplary for one school may not be completely right for another school, but this does give us a good starting point. You know better than we how your collection is used, so please adapt these recommendations as you see fit.

The following summaries highlight the areas that seem the most in need of attention in the report on the next few pages. Please look at your report closely to determine detailed size, age and weeding needs.

- With the information you supplied, we were able to successfully categorize 99.5% of your MARC records. If you would like to improve this percentage please contact your Mackin Collection Analyst at 1-800-245-5540.
- Throughout the collection, the average copyright date is 1995 or 15 years old.
- The average age is 9 years older than recommended.
- You currently have 12858 titles in your collection, of which 12795 were classified.
- When looking at the overall balance of each Dewey section, additional titles needed are 2309.
- Overall your books per student is 20, while your goal is 20 books per student. This calculation does not include the "Unclassified" Category.
- Size deficits are greatest in the Easy, 300s and 500s.
- The oldest areas are the 500s, 600s and Reference.

COLLECTION DEVELOPMENT: Our Master-degreed librarians continually create and update online book lists to fit every library's unique needs. We currently have thousands of book lists available online at Mackin.com – with content ranging from award winners to state standards to hot topics or subject areas. Mackin also provides custom collection development lists on demand to meet individual needs, complete with review sources, reading levels, and annotations. Working with more than 18,000 publishers allows us to find the best, most appropriate titles for your collections. Lists can be printed and mailed, emailed in PDF or Excel, or posted to your online Mackin.com account for easy adjustment of quantities and/or priority indicators.

TITLEMATCH: Included as part of our free Collection Management features is TitleMatch, which helps users manage their collection in real time. Once MARC records have been uploaded, TitleMatch assists with the online search process by looking for possible duplicates - as you add titles to your list, titles that are already in your collection are highlighted so that you won't accidentally order duplicates. TitleMatch allows you to view matches in a collection for single or multiple locations *and* will tell you if your titles are on a list or previous Mackin orders.

TWO (2) YEAR CONTRACT FOR A DIGITAL BOOK SERVICE FOR A PUBLIC LIBRARY, TO COMPLEMENT AN EXISTING SERVICE.

Jefferson Parish Library requires a digital content service that will host a discovery website, support and provide e-books that the library can purchase and/or license, to add to the library website.

The service must include easy-to-use apps and support many types of computers and portable devices. The library requires an online catalog of downloadable e-book titles that the library can purchase and/or license at any time during the contract period so the library can choose titles based on patron interest, requests and needs.

Digital content must be public library oriented, downloadable e-books, including mainly popular fiction and non-fiction bestsellers, for all ages and reading interests. Titles must be from top publishers, including Hachette, Harper Collins, McMillian, Penguin Random House, Simon & Schuster, Bloomsbury, Perseus, and Scholastic.

Jefferson Parish Library is a public library serving a suburban population of approximately 434,123 with sixteen (16) locations, including two (2) regional libraries and fourteen (14) branch libraries.

The service shall complement an existing digital content service to offer library users an alternate method for accessing e-books.

The two (2) year contract will take effect upon contract ratification.

The annual service and/or hosting fee payment will be on a 12-month (year by year) basis. The library will pay the hosting fee one year at a time. Content added during the year will be paid for as ordered.

The Annual service and/or access fee will be binding as quoted, and will become part of the final contract.

A user must be permitted to create a personal and private account to keep track of titles that they have checked out, placed on hold, and may be interested in for later use.

A personal account must sync seamlessly across a user's devices and computers, including automatically and manually created bookmarks, allowing a user to read a book on multiple devices without losing their place.

The service must allow for automatic as well as early check-ins or returns.

The service must allow for hold or waiting lists with email and text message notification to the user when a title is available for them to check out.

All features of the service must be accessible 24/7, in the library and remotely.

Hosting and maintenance of the service will be on a subscription basis while downloadable e-books can be purchased and licensed at any time during the life of the contract.

The Library Administration Tool, including the bidder's catalog for choosing content, must be compatible with up to date versions of multiple internet browsers, including Chrome, Firefox and Explorer.

Digital content must be public library oriented, downloadable e-books, for library users of all ages.

The bidder's service must be compatible with the library's integrated library system (ILS) for discovery, library card authentication, and patron account synching.

SUPPORT

The bidder must provide assistance with all aspects of the service and include email and toll-free telephone support for library staff and help websites and webinars for library staff and patrons.
