✓ **WHY REED?** Quick Release™ tubing cutters were invented by Reed and cover capacities up to 10" (254mm). Reed uses a ball detent or threaded screw for the wheel pin, whereas competitors use a grooved pin and clip which is easily lost and makes wheel changes extremely difficult. Reed has cutter wheels for all plastic applications.

## NEW! Internal Pipe Cutters

Hardened steel, saw-toothed blade (IC1S) or abrasive blade (IC1A) cuts plastic pipe from the inside. Great for cutting below floor level. Cutters fit in standard 3/8" drill. IC1A is great for cutting where the blade may contact concrete or other surfaces. IC1S cuts plastic pipe aggressively and cuts wood for sink lugs.

## Plastic Pipe Saws

Tooth design, tooth set, and hardness simplify cuts on ABS and PVC pipe. Die cast design of handle on PPS12 and PPS18 makes blade change fast and easy. Blades are interchangeable with most manufacturers. Handles on PPS21 and PPS26 are permanently attached. Teeth are sharpened on both sides and are harder than a file - never need sharpening. Saws feature new tooth geometry and unique setting. All four blades allow simultaneous cutting forward and backward...a 50% productivity improvement.
