BID FORM
Non Public Works

All Public Work Projects are required to use the Louisiana Uniform Public Work Bid Form

All prices must be held firm unless an escalation provision is requested in this bid. Jefferson Parish will allow one escalation during the term of the contract, which may not exceed the U.S. Bureau of Labor Statistics National Index for all Urban Consumers, unadjusted 12 month figure. The most recently published figure issued at the time an adjustment is requested will be used. A request must be made in writing by the vendor, and the escalation will only be applied to purchases made after the request is made.

Are you requesting an escalation provision?

YES _____ NO ☒

MAXIMUM ESCALATION PERCENTAGE REQUESTED _____ %

INITIAL BID PRICES WILL REMAIN FIRM THROUGH THE DATE OF _____

For the purposes of comparison of bids when an escalation provision is requested, Jefferson Parish will apply the maximum escalation percentage quoted by the bidder to the period to which it is applied in the bid. The initial price and the escalation will be used to calculate the total bid price. It will be assumed, for comparison of prices only, that an equal amount of material or labor is purchased each month throughout the entire contract.

DELIVERY: FOB JEFFERSON PARISH

INDICATE DELIVERY DATE ON EQUIPMENT AND SUPPLIES

14 weeks

LOUISIANA CONTRACTOR'S LICENSE NO.: (if applicable) _____

THIS SECTION MUST BE COMPLETED BY BIDDER:

FIRM NAME: Allied Bearing & Supply Inc

ABOUT US

Webster Industries, Inc., headquartered in Tiffin, Ohio, is an innovative leader in the engineered class chain, sprockets, vibrating conveyor and malleable cast iron markets. Since its start in 1876, Webster has evolved into a vertically integrated chain manufacturer that serves a variety of industries. The

company now employs around 300 people nationwide and has facilities in Ohio, Mississippi and Oregon. Throughout its 140 years in business, Webster's focus has consistently been on American materials, American labor and American pride. A strong concentration on customer service, based on seamless vertical integration ensures that Webster's clients receive the highest quality products and service in the industry.

About Us

Our Purpose

Empowering success through teamwork and self-satisfaction

Our Mission

Create superior value for customers through empowered people, product excellence and evolving processes.

[My Saved Chains](#) 0 ▾

HISTORY

For more than 100 years, Webster Industries, Inc., has provided conveying solutions to a diverse range of markets with our extensive variety of products and industry expertise. Towner K. Webster founded Webster in 1876 in Chicago, Illinois, with his "Common Sense" elevator bucket. In 1907, Webster relocated to Tiffin, Ohio, where our corporate headquarters is located today. Throughout the past century, Webster has evolved from producing elevator buckets to being the world's leading manufacturer of engineered class chains, commercial castings and vibrating conveyors. Webster's reputation for high-quality products is rooted in a tradition of manufacturing excellence that is based on American materials, American labor and American pride.

Portland, OR
Meridian, MS

WEBSTER PRODUCTS

CAST CHAINS

Cast chains are manufactured using cast links and heat treated steel pins. They are designed with slightly larger clearances that allow material to easily work its way out of the chain joint. Cast chains are used in a variety of applications such as sewage treatment, water filtration, fertilizer handling, sugar processing and waste wood conveying. They are readily available from stock with standard attachments.

MILL CHAINS

Welded steel mill chains are manufactured with heat treated pins, steel sidebars and barrels. Mill chains are furnished in various configurations of pitch, construction and heat treatment to suit each operating environment. Their simple, yet rugged, construction makes them ideal for the forest products, grain, ethanol and recycling industries. Mill chains are readily available from stock with custom and standard attachments.

COMBINATION CHAINS

Combination chains are manufactured using hardened cast links, steel sidebars and heat treated steel pins. Combination chains alternate steel sidebars and cast links making them ideal for handling stone, gravel, coal and other abrasive materials. They are commonly used in light to medium-duty bucket elevator applications. Combination chains come with a variety of standard attachments for immediate delivery.

DRAG CHAINS

Welded steel drag chains are manufactured with heat treated pins, steel sidebars and our exclusive two-piece welded barrels. The width of drag chains makes them ideal for conveying fine waste products such as bark, sawdust and machining chips. Their rugged construction gives them excellent wear characteristics. Drag chains are available in a wide range of sizes and configurations. They are readily available from stock with standard and custom attachments.

HSB CHAINS

Hardened steel bushed (HSB) chains are manufactured using hardened bushings and heat treated sidebars and pins. HSB chains are available as a more rugged alternative to combination chains. All steel construction gives them higher load ratings as well as longer life. HSB chains are well suited for medium to heavy-duty applications such as cement, gypsum, coal and other abrasive materials. They are readily available from stock with standard attachments.

APRON CONVEYORS

Apron conveyors utilize overlapping steel pans mounted on SBR chains. They are available on nearly all SBR chains and with additional outboard rollers. The pans are available in a wide range of thicknesses and widths depending on the application. Apron conveyors come in two designs, standard or leakproof. Their heavy-duty construction makes them ideal for harsh applications carrying heavy, hot and abrasive materials.

SBR CHAINS

Steel bushed roller (SBR) chains are manufactured with heat treated rollers, hardened bushings and pins and steel sidebars. The roller type construction provides a lower operating friction which helps increase chain life and reduces conveyor design requirements. SBR chains are available in a wide variety of sizes, configurations and designs and can be used in tough industrial applications. SBR chains come with a variety of standard attachments for immediate delivery.

BUCKETS

Buckets are manufactured from cast malleable iron or fabricated steel. Cast buckets are made in a wide variety of standard styles and sizes that resist wear, rust and corrosion. Fabricated steel buckets are laser cut and robotically welded for a precise match with the chain attachment. Additional options such as hardface welds and wear lips are available to resist abrasion. Both cast malleable iron and fabricated steel buckets are used in elevator applications.
