WIDE AREA JOHN DEERE MOTOR

DESCRIPTION

John Deere (ONLY ACCEPTING JOHN DEERE BRAND)

- 1600 Turbo Series III Wide-Area Mower Turbocharged diesel engine
- B20compatible
- Rear-discharge decks
- FT4 engine compliant
- The 1600 Turbo Series III WAM is powered by a liquid-cooled, turbocharged, four-cylinder, 60-hp (44.7-kW) at 3000 rpm, PS diesel engine.

A) ENGINE FEATURES INCLUDE:

- 1) 117.3 lb-ft (159 Nm) of torque at 3000 rpm for extra lugging power on hills and in tough mowing conditions
- 2) Large 127.6-cu in. (2.091-L) displacement, which produces the torque needed to handle hills and tough mowing conditions
- 3) Engine is a 16-valve (four valves per cylinder, two intake and two exhaust)
 - a) design: Cold-start device to increase engine timing for improved cold starting
- 4) Full-pressure lubrication for positive lubrication with continuous operation on slopes
- 5) Dual-element air filter that is completely sealed for effective cleaning
- 6) Progressive-type air-restriction indicator to let operator know when the filter needs servicing
- 7) Automotive-type alternator (75 amp) that provides plenty of charge to the battery
- 8) Glow plugs for quick starting in cold weather
- 9) Automotive sensing system, which tells the operator when the engine is ready to start
- 10) Isolated engine mounting, which reduces engine vibration in the operator's station for more comfortable operation
- 11) Direct fuel injection
 - Injects fuel directly on top of pistons for more efficient combustion, less emissions
 - Delivers more power per gallon of fuel
 - Quicker starting and quieter operation
 - Designed to meet California emission standards
 - Features low levels of exhaust and emissions and excellent fuel economy. It meets the necessary Environmental Protection Agency (EPA) Tier 4 standard and meets 97/68/EC EU non-road mobile machinery (NRMM) emissions regulation
 - Electronic engine control and cooled exhaust gas recirculation (EGR) system
 - High-pressure common fuel rail for lower emissions and improved engine responsiveness.

- Deluxe air-intake system
- Hood that is composed of a large, black, cross-link polyethylene-composite center section with green, metal side panels
- The composite center section includes air-intake screens and helps to guide the cooler air from above the machine to the radiator. The design provides a uniform distribution of clean air, as well as minimizing the amount of chaff collection on the exterior screens.
- Additional sealing around the operator station reduces the amount of hot air blowing on the operator, which in turn improves operator comfort.
- The rear bumper helps with hood sealing and reduces the potential for rear hood damage.

B) FLOW OF EXHAUST DURING ENGINE OPERATION

- Exhaust airflow enters into the EGR cooler from the exhaust manifold near the turbocharger
- Cooler takes hot exhaust gases and cools them to where the temperature will not have excessive impact on combustion efficiency
- Based on load, air temperatures, and rpm, the engine control unit (ECU) opens (or closes) the EGR valve, allowing exhaust gases into the intake manifold. The gases mix with the rest of the incoming air from the turbocharger and aftercooler.

C) OTHER ENGINE FEATURES:

- Overhead valve (OHV) for efficient combustion
- Liquid-cooled for more consistent operating temperatures
- Closed crankcase ventilation that burns crankcase hydro-carbon evaporation

D) HYDROSTATIC TRANSMISSION IS USED FOR RELIABLE OPERATION.

E)-DURABILITY FEATURES INCLUDE:

- Large, forged, one-piece trunnion shaft with large support bearings to reduce vibration and noise
- Charge pump used to efficiently deliver oil to the transmission
- Oil cooler to cool transmission oil for longer transmission life
- Pressure-side filtration to allow use of a finer mesh (10 micron filter) than suction filtration systems

F) HIGH-RANGE/LOW-RANGE TRANSAXLE ALLOWS THE FOLLOWING:

- High range has maximum speed of 15 mph (24.1 km/h) for faster transport. Power take-off (PTO) can be engaged for mowing in high range.
- Low range has a maximum speed of 9 mph (14.5 km/h). The wide-area mower (WAM) can mow in both low and high range

G) THE DIFFERENTIAL LOCK IS STANDARD EQUIPMENT:

- It locks both the front drive wheels together for extra traction, when needed.
- Conveniently located pedal allows the operator to engage the differential lock

H) AN INNOVATIVE, EXCLUSIVE AIR-INTAKE SYSTEM

- Draws clean air from the top of the machine instead of the rear. This keeps the radiator cleaner and prevents the engine from overheating.
- The high-capacity cooling system combines the radiator and hydraulic oil cooler. Low-effort controls are conveniently grouped on the right-hand side

K) THE FINGER-TOUCH CONTROLS ARE:

- Left mower deck lift/lower switch
- Front mower deck lift/lower switch
- Right mower deck lift/lower switch
- Electronically-controlled throttle lever
- Electronically-activated power take-off (PTO) switch
- Speed-range lever for high, neutral, and low range
- Four-wheel drive (4WD) lever

L) HYDROSTATIC POWER STEERING

- Makes it easy to turn the machine, reducing operator fatigue
- Allows quick steering action, two and a half turns lock-to-lock, for excellent maneuverability
- Two-pedal foot controls
- Convenient two-pedal hydrostatic control system
- Allows the operator to select speed and direction with just a touch of the toe while resting heel on platform
- Twin Touch™ pedal design that allows the operator to change direction without having to lift his foot off the platform

- Large pedal surface, which provides increased operator comfort
- Keeps both hands free for steering and operating controls

M) BRAKE IS EASY TO USE

- Push-pull-type parking brake release allows the operator to simply pull out the knob and depress the foot brake to engage. To disengage, simply push the foot brake pedal and push the knob in to initiate release.
- Brake provides stopping power to both drive wheels.
- The stop brake is used for a parking brake.

N) DIFFERENTIAL LOCK

- Locks both front drive wheels together for added traction
- Increases traction and flotation in poor traction conditions
- The differential lock is located on the left side of the platform; this allows for easy use of the Twin Touch foot pedals (on the right side) while engaging the differential lock at the same time
 - The high-/low range lever allows the operator to select the desired speed range.
 - The machine must be stopped to shift between ranges.
 - Shifting to the neutral position allows the operator to by-pass the hydraulic drive for towing.
 - The 4WD lever allows the operator to engage 4WD in reverse. 4WD is automatically engaged when wheel slip occurs in forward drive.

O) ELECTRONIC CRUISE CONTROL

- Beneficial when mowing open areas or when transporting
- Located on the steering column

1) Cruise control operation:

- To engage, simply push forward on the cruise control switch and hold until the foot is removed from the forward pedal.
- For an emergency stop, cruise can be released by pushing on the master brake pedal or turning the cruise control switch off.

P) MOWER DECK LIFT SWITCHES

The mower deck switches allow the operator to vary mowing widths, engage and disengage the wing-deck blades, and service and transport the machine.

- Allows the operator to adjust the steering column to the most comfortable position and provides additional clearance for entry to the operator station
- Standard 20-W halogen headlights are located low in the column for the best illumination

Q) HIGH-BACK, AIR-RIDE SEAT

- 1) An air-ride suspension seat is standard equipment and provides maximum operator comfort across a wide range of operator traits. Key adjustments include the following:
- 2) Weight and height adjustment allow for proper ride and suspension height.
- 3) Fore-aft seat slide adjustment helps account for a wide range of heights.
- 4) Fore-aft suspension travel to improve directional changes during operation.
- 5) Back angle tilt adjustment is available for the back portion of the seat.
- 6) Lumbar adjustment provides proper back support.
- 7) Standard, adjustable armrests are made of a durable material that provides adequate support and surface area for the operator's arms.
- 8) High seat-back profile features body-contoured seat cushions.
- 9) Cushions are ideal for those who seek proper back support. The highly-resilient contoured foam construction allows for all-day mowing comfort.
- 10) A raised seat ensures a commanding view to the front and side mower decks.
- 11) The retractable seat belt is convenient to use.
- 12) The comfortable seat, along with ample legroom in the operator's platform, convenient pedal locations, and adjustable steering column make operator comfort on the John Deere 1600 Turbo Wide-Area Mower among the best in the industry.
- 13) The standard air-ride seat with adjustable armrests is designed with comfort, safety, and ergonomics in mind, ensuring relaxed, healthy sitting for hours on end. The standard high-back, air-ride seat has many high-quality features
- 14) Adjustments are provided for operator armrests, lumbar support, and back angle, and air suspension is adjustable for the operator's weight and ride. The armrests are standard and the seat pads are replaceable.

15) The four-post ROPS structure includes the following:

- Two front posts
- Rear ROPS
- Welded top and bottom assemblies
- Molded canopy
- The four-post ROPS provides the ability to meet bid requirements that call for a four-post ROPS and offers the ability to use a weather enclosure. It also meets the International Organization for Standardization (ISO) 21299 standard.
- The wing decks rise to a narrow 84-in. (213.4-cm) width and can be locked into transport position. A machine transport speed of 15 mph (24.1 km/h) means the operator can spend less time transporting and more time mowing.

NOTE: The power take-off (PTO) can be engaged while in the transport position.

- Proper trailering strap areas
- Fasten the machine to the trailer with heavy-duty straps, chains, or cables. Fasten the rear strap to the tow loop behind the rear axle. Fasten the front strap to tie down holes on the operator's platform. Both the front and rear straps must be directed down and outward from the machine. The rear, frame-mounted bumper provides for excellent rear protection and effective hood sealing for engine cooling. To operate, pull out on the bottom of the engine cover latches on the left and right side of machine behind the operator's seat. Unhook the tops of the engine cover latches from the hooks on the engine cover. Push down on the bumper lever and rotate the bumper to the right side of the machine.
