**ARTICLE 12 - LOUISIANA PREFERENCE (NOT APPLICABLE ON SERVICE CONTRACTS OR CONTRACTS WHERE FEDERAL TRANSIT ADMINISTRATION FUNDS ARE EXPENDED)**

In accordance with the provisions of LA. R.S. 38:2251 et. Seq., preference is hereby given for materials, supplies, or equipment which is manufactured, processed, produced, or assembled in Louisiana, quality being equal to other materials, supplies, or equipment offered by competitors outside of the State of Louisiana. However, the Lafayette City-Parish Consolidated Government can only make full and proper determination of a bidder's entitlement to a preference based upon consideration of all pertinent information related to said claim. Accordingly, for the Lafayette City-Parish Consolidated Government to fairly evaluate the bidder's claim for a preference, it shall be the bidder's duty and responsibility; to supply the Lafayette City-Parish Consolidated Government with the following declarations and information when submitting a bid which claims entitlement to a preference

Bidders who claim a preference on materials, supplies, or equipment which are Louisiana products and which are equal in quality to other materials, supplies, or equipment must meet the following conditions in order to qualify for such preference:

1. The cost of the Louisiana products must not exceed the cost of the other materials, supplies, or equipment which are manufactured, processed, produced, or assembled outside the state by more than ten percent (10%); and
  2. The bidder of the Louisiana products must agree to sell the products at the price of the lowest bid offered on such products; and
  3. In the case where more than one bidder offers Louisiana preference products which are within ten percent (10%) of the lowest bid, the bidder offering the lowest bid on Louisiana products is entitled to accept the lowest bid offered on such products.
-

The bidder shall confirm in the space provided on the bid form that a preference is being claimed and attach to the bid form a written letter detailing exactly why a preference is entitled, including but not limited to describing how its products are produced or manufactured, and the process which qualifies it for a preference.
4. Any bidder who fails to comply with each and every one of the requirements set forth herein shall be deemed to have waived its right to be considered for a preference, and such bid shall be considered as though no preference was available to the bidder.

### **ARTICLE 13 - ERASURES**

Bidders should avoid making erasures, delineations, and other corrections on bids, since such may make it difficult for the Lafayette City-Parish Consolidated Government to ascertain the information contained in the bid. In the event that a bidder must make such corrections to said bid, the corrections should be made in such a manner that the information contained on the bid form can be fairly and reasonably discerned and ascertained by the Lafayette City-Parish Consolidated Government. The Lafayette City-Parish Consolidated Government shall have the right to reject any bid in the event that it is unable to reasonably determine the information and quotations supplied by the bidder therein.

### **ARTICLE 14 - PRICES**

Such errors must be clearly shown by objective evidence drawn from inspection of the original work papers, documents, or materials used in the preparation of the bid sought to be withdrawn. If Lafayette Consolidated Government determines that the error is a patently obvious mechanical, clerical, or mathematical error, or unintentional omission of a substantial quantity of work, labor, material, or services, as opposed to a judgment error, and that the bid was submitted in good faith it shall accept the withdrawal and return the bid security to the contractor.

A contractor who attempts to withdraw a bid under the provisions of this Section shall not be allowed to resubmit a bid on the project. If the bid withdrawn is the lowest bid, the next lowest bid may be accepted. If all bids are rejected no withdrawal of the bid which would result in the award of the contract on another bid of same bidder, his partner, or to a corporation or business venture owned by or in which he has an interest shall be permitted. ## STANDARD SPECIFICATIONS – AI-Based Video Vehicle Detection System

This bid is for 10 Video Vehicle Detection systems to be mounted on our Traffic Signals. The standard specifications for one of these systems shall provide 3 major components:

1. Fisheye Video Camera
  - Camera shall include all equipment necessary to install on standard mast arms or poles.
2. Video Detection System Processor
  - Processor shall consist of an AI GPU server/processor with deep learning-based object detection and classification algorithms, tracking algorithms, application software, and all associated equipment required to setup and operate in a field environment.
  - System processor shall be able to utilize a single fisheye camera. The processor must be able to provide advanced detection for each approach utilizing a single camera. The processor shall utilize and demonstrate tracking-based algorithms to provide real-time vehicle, pedestrian, and bicyclist detection outputs. The processor shall be able to detect either approaching or departing vehicles in multiple traffic lanes simultaneously. The processor shall be able to issue detection calls based on vehicle class (car, light truck, heavy truck, bus, motorcycle, bicyclist, pedestrian). The processor shall be able to communicate detection calls to the traffic controller using NTCIP and SDLC standard. The processor shall provide flexible detection placement anywhere within the field of view of the camera. A single detection template shall be able to replace one or more conventional detector loops. The processor shall operate at a level of performance comparable to properly operating inductive loops, excluding issues of occlusion due to limitations imposed by camera placement. The processor shall trigger a state of “all call” to the controller in the event of an equipment failure or system malfunction.
3. Software
  - System shall include software that provides a GUI (graphical user interface) that allows viewing of live traffic, creation of reports, notifications, and viewing of traffic analytics. The software shall support modifiable assignment of a Phase and detector number to each road and crosswalk. The software shall support placed detection boxes, direction of travel assignment, speed, and wait times of tracked objects (vehicles, bicycles, pedestrians, etc). The software shall be able to provide real-time notifications when an event of interest occurs (stopped lane, wrong direction travel, etc.) via email, text, and in-browser notifications.

The bid shall consist of all materials, equipment, software, and incidentals necessary for the vendor to furnish the product, and for LCG to install and test the product, complete and ready for service.

Ethernet Cables, SDLC Cables, and Network switches are NOT needed in this bid.
