

All Public Work Projects are required to use the Louisiana Uniform Public Work Bid Form

All prices must be held firm unless an escalation provision is requested in this bid. Jefferson Parish will allow one escalation during the term of the contract, which may not exceed the U.S. Bureau of Labor Statistics National Index for all Urban Consumers, unadjusted 12 month figure. The most recently published figure issued at the time an adjustment is requested will be used. A request must be made in writing by the vendor, and the escalation will only be applied to purchases made after the request is made.

Are you requesting an escalation provision?

YES _____ NO **X**MAXIMUM ESCALATION PERCENTAGE REQUESTED **0** %INITIAL BID PRICES WILL REMAIN FIRM THROUGH THE DATE OF **06/30/2020**.

For the purposes of comparison of bids when an escalation provision is requested, Jefferson Parish will apply the maximum escalation percentage quoted by the bidder to the period to which it is applied in the bid. The initial price and the escalation will be used to calculate the total bid price. It will be assumed, for comparison of prices only, that an equal amount of material or labor is purchased each month throughout the entire contract.

DELIVERY: FOB JEFFERSON PARISH

INDICATE DELIVERY DATE ON EQUIPMENT AND SUPPLIES

7 to 10 Days

Non-Public Works Bid

AFFIDAVIT

STATE OF Idaho

PARISH/COUNTY OF Cassia

BEFORE ME, the undersigned authority, personally came and appeared: Janeil Norman, (Affiant) who after being by me duly sworn, deposed and said that he/she is the fully authorized President of Rocky Mountain Rec (Entity), the party who submitted a bid in response to Bid Number 5000130297, to the Parish of Jefferson.

Affiant further said:

Campaign Contribution Disclosures

(Choose A or B, if option A is indicated please include the required attachment):

Choice A Attached hereto is a list of all campaign contributions, including the date and amount of each contribution, made to current or former elected officials of the Parish of Jefferson by Entity, Affiant, and/or officers, directors and owners, including employees, owning 25% or more of the Entity during the two-year period immediately preceding the date of this affidavit or the current term of the elected official, whichever is greater. Further, Entity, Affiant, and/or Entity Owners have not made any contributions to or in support of current or former members of the Jefferson Parish Council or the Jefferson Parish President through or in the name of another person or legal entity, either directly or indirectly.

Choice B X there are NO campaign contributions made which would require disclosure under Choice A of this section.

Debt Disclosures

(Choose A or B, if option A is indicated please include the required attachment):

Choice A _____ Attached hereto is a list of all debts owed by the affiant to any elected or appointed official of the Parish of Jefferson, and any and all debts owed by any elected or appointed official of the Parish to the Affiant.

Choice B X There are **NO** debts which would require disclosure under Choice A of this section.

Affiant further said:

That Affiant has employed no person, corporation, firm, association, or other organization, either directly or indirectly, to secure the public contract under which he received payment, other than persons regularly employed by the Affiant whose services in connection with the construction, alteration or demolition of the public building or project or in securing the public contract were in the regular course of their duties for Affiant; and

[The remainder of this page is intentionally left blank.]

That no part of the contract price received by Affiant was paid or will be paid to any person, corporation, firm, association, or other organization for soliciting the contract, other than the payment of their normal compensation to persons regularly employed by the Affiant whose services in connection with the construction, alteration or demolition of the public building or project were in the regular course of their duties for Affiant.

Fluid Transfer

Eagle Composite[®] Oil Flexible Hose

Heavy Duty Flexible Oil Hose

The Eagle Composite[®] Oil Flexible Hose assembly is designed for handling a wide range of fuel and lubricant where light weight and high flexibility is required. It is designed to handle gasoline, high speed diesel, paraffin, kerosene, lubricating oil and 100% aromatics as well as black oils, heavy lubricants and solvents. This hose is manufactured in accordance to EN 13765 / 2010 Type 2.

* All Pre-Made Assemblies are 100% hydrostatically tested, and are received with factory supplied test certificates which are available upon request.

Application: Recommended for rail tank wagons, tank truck loading and unloading, storage tank transfers and other standard duty applications.

Carcass: Multiple layers of polypropylene fabric, film and polyester barrier layers

Reinforcement: High tensile strength galvanized inner & outer wire

Cover: Abrasion resistant PVC impregnated fabric, black outer cover, yellow stripe

Temperature: -22°F to +212°F (-30°C to +100°C)

End Fitting: SS304 male NPT, Carbon Steel 150" flanges / cams
(*Complies with USCG 33CFR 154.500)

Safety Factor: 4:1

Branding: EAGLE COMPOSITE[®] OIL FLEXIBLE HOSE

Features:

- Complete product compatibility for safe handling of all types of oil based 100% aromatic content and other non aggressive chemicals.
- Light Weight & Highly Flexible makes it easy to handle in loading and unloading.
- Tough PVC outer cover resists to dragging, wear, abrasion, UV and ozone resistance having maximum durability and safety.
- Double end to end electrical continuity prevents static electricity build up and internal arcing.
- Suitable for 0.9 Bar Vacuum rating.

HANDLING & MAINTENANCE

The following recommendations are the *minimum* to which the user must adhere.

Eagle Slings 5000lb capacity
Available 6" through 12" ID

 <p>FIG 1</p>	<p>Traction: Do not use hose in between (FIG. 1). Let it form a small curve (FIG. 2).</p>	 <p>FIG 2</p>
 <p>FIG 3</p>	<p>Torsion: Hose is not manufactured to work in torsion (FIG. 3). During installation it is essential to ensure that the hose is not twisted. Let it follow an ideal lay-line (FIG. 4).</p>	 <p>FIG 4</p>
 <p>FIG 5</p>	<p>Bending Radius: Installation tighter than the minimum bending radius reduces the life of the hose considerably. Moreover it is necessary to avoid bending close to the end fittings (FIG. 5 & 6).</p>	 <p>FIG 6</p>
 <p>FIG 7</p>	<p>Installation: The hoses must be supported to allow normal movement when must under pressure (dimensional variations). Do not rest hose on sharp edges (FIG. 7 & 7B). Take adequate precautions (FIG. 8 & 8B). Do not support hoses with ropes or chains (FIG. 9). Flexible hose supports or polyester slings are recommended. (FIG. 10)</p>	 <p>FIG 8</p>
 <p>FIG 7b</p>	<p>Storage: Hose must be stored in a relaxed condition free from tension, compression or other deformation. Contact with objects that could pierce or cut must be avoided. When not in use, hose should be stored in a dark place preferably, avoiding direct sunlight and rain. It must be protected from rodents and insects. When such a risk is probable, appropriate precautions must be taken.</p>	 <p>FIG 8b</p>
 <p>FIG 9</p>	<p>Norms and Method of Use: Prior to installation it is necessary to check the characteristics of the hose carefully to ensure that type, diameter and length conform to the required specification. (FIG 12) Moreover a visual check must be carried out to make sure that there are no obstructions, cuts damaged cover or any other evident imperfections (FIG 11). Although the hoses are manufactured to guarantee exceptional resistance to abrasion, it is advisable to move them with care, avoiding knocks, dragging over abrasive surfaces or crushing. Furthermore, hoses must not be pulled violently when twisted or knotted.</p>	 <p>FIG 10</p>
 <p>FIG 11</p>	<p>Maintenance : Even when choice, storage and installation is carried out correctly, regular maintenance is necessary. During regular checks, special attention must be paid to couplings and to the appearance of irregularities which can indicate deterioration of the hose. After use, it is advisable to empty the hoses carefully and if necessary, clean thoroughly. We recommend in any case, that the hoses be checked and tested under pressure once a year.</p>	 <p>FIG 12</p>
	<p>NEVER weld reduction couplings or flanges onto original hose fittings. NEVER close or hold the coupling ferrules in a bench vice as they could be deformed. If necessary, hold the hose itself, closing the vice onto the outside spirals of the hose.</p>
