Jefferson Parish Department of Purchasing  
Joseph S. Yenni Building  
1221 Elmwood Park Boulevard, Suite 404  
Jefferson, LA 70123

**Re: RFP No. 0443  
To Provide Security Systems Equipment, Maintenance, Repairs, Replacement,  
Installation, etc. of an Existing Security Access and Video Management System for  
the Department of Security**

To Whom It May Concern:

**New Era Information Technologies, LLC (New Era)** and its subcontractor, Benecom Computer Company Inc. (dba Benecom Technologies) are pleased to submit the following proposal for consideration by Jefferson Parish for services related to **Provide Security Systems Equipment, Maintenance, Repairs, Replacement, Installation, etc. of an Existing Security Access and Video Management System for the Department of Security**. This opportunity will allow us to continue to provide the Jefferson Parish Department of Security with Security Services for another two (2) year contractual period. The "New Era Team" as represented in this RFP submittal is a 'one stop shop' which can provide all services of this RFP and offer continuity in the overall Jefferson Parish Security Department.

**Scope of Services -10 points**

The New Era Team understands the scope of services outlined in the Request for Proposals to **Provide Security Systems Equipment, Maintenance, Repairs, Replacement, Installation, etc. of an Existing Security Access and Video Management System for the Department of Security**. That scope includes:

- Provide New Equipment
- Provide Replacement Equipment
- Provide Required Maintenance
- Provide Security Consulting
- Provide Training/Operator Support Services
- Provide On-Site End User Assistance
- Provide Labelled Drawings
- Provide Warranties

### **Project Schedule -10 points**

The New Era Team has provided a tentative project schedule based on a 2-year project duration. Please see schedule detail for more information.

### **Specific Experience-10 points**

New Era is a Jefferson Parish, Louisiana based company that is headquartered in Harahan, Louisiana. The New Era Team has staff members located from New Orleans to Baton Rouge. We can travel to any Jefferson Parish site in an expedited period. New Era has performed computerized business automation, technology services and software development since 2004. We specialize in business automation, re-engineering, consulting, technical services, system development, database design, GIS, and Access Control and Video Surveillance. We have a great amount of experience in mainframe and other legacy type systems as well as developing client server-based applications using Microsoft.net and rapid application development techniques. Our team specializes in providing security services and implementing the latest technological trends. We strive to meet all deadlines and stay within the budget on all projects.

The New Era Team is a trusted part of the current Jefferson Parish Contract and many other contracts and projects.

Benecom Computer Company, Inc. (dba Benecom Technologies) has been in business since January of 1991 and was incorporated in 1993. Our company started out as a computer and network services company and over the years has added to its products and services offerings to satisfy the ever-changing demand of technology from the marketplace.

Benecom Technologies is now a Communication Infrastructure Provider specializing in designing, implementing, and maintaining structured cabling, security access control, wireless, cameras, telephone systems, networks and ID badging. We provide service to New Orleans, and all parts of Jefferson Parish in the private sector, Houma/Thibodaux, Baton Rouge, and all of South Mississippi.

No job is too big or too small. We've had cabling projects on new and existing properties in excess of 1500 drops and currently support a school district for their access control and over 1200 cameras, just to name a few examples. Our response and taking care of the customer is at the forefront of our success.

The New Era Team is an I-Pro (Panasonic) Silver Partner. This is a designation by I- Pro integration partners that provides the New Era Team with exclusive access and pricing of hardware and software. We are proud to be able to continue serving Jefferson Parish with state-of-the-art designs and SSE systems based upon knowledge and partnership with I-Pro.

The New Era Team is licensed with the State Fire Marshal's Office for Security. We have confirmed with the Fire Marshal's Office, that we are properly licensed to continue providing services to Jefferson Parish. Furthermore, we have been interviewed by the Fire Marshal's office to ensure that we are providing services in the correct manner. Our licenses are included in the Appendix. As well our team has a license with the Louisiana State Contractor's (License 74417), which includes a specialty classification in Security, which is also included in the Appendix.

Beginning in 2016, the New Era Team began the support and maintenance of the access controls and video management systems at Jefferson Parish. We started this process with the migration from an aging Lenel based system that was dated back to 2012 to a state-of-the-art Frontier Security system. Once we started digging into the system, we found many components of the system that had not been properly maintained over the years. We immediately began replacing aging components to this system. The first of these components were the old building access control boards. Some of these controllers were manufactured back in the 1990's. These ancient controllers were not eligible for firmware upgrading. We replaced them with new controllers. Besides the boards that we had to replace, we learned that the boards that could accept the latest firmware still had outdated versions of the firmware on them. We updated the firmware on all those controllers to be able to take advantage of the new security enhancements and encryption.

During our analysis, we determined that the access control and camera system was being transported through the Jefferson Parish Business Network and open to anyone to access. The default username and password were still active which meant that anyone with a search engine could find these defaults and potentially compromise the system. We began by disabling the default credentials. We consulted with the Jefferson Parish Security and Electronic Information Systems (EIS) departments to explain how the system was setup and worked together to build a better, more secure design. We have since separated both the access controls and video surveillance networks from the business network.

The New Era Team is authorized to resell and service all peripheral systems required for the complete operation of all SSE systems. This includes, but is not limited to, video monitors, audio speakers, video projectors, intercoms, remote emergency communications systems, and other supporting systems.

#### **Personnel - 10 points**

New Era will provide **Licensed Commercial Contractors, Project Managers, Supervisors, Professional Installers, Professional Technicians** to deliver the services as outlined in the Jefferson Parish RFP 0443.

Key personnel will be made available to the program, in addition to several support personnel. Upon award, the New Era team will work closely with the Program Director to finalize the

proposed organizational chart. As the program progresses, the organizational structure will remain fluid to meet the needs of the Project Management team and Jefferson Parish.

Per the requirements set forth in the RFP, these employees:

- Possess Microsoft Certified Engineers - Kyle Stoufflet (New Era)
- Possess LA State Fire Marshall License (New Era & Benecom Technologies)
- Possess Louisiana State Occupational Contractors License (New Era & Benecom Technologies)
- Possess Louisiana State Licensing Board for Contractors Commercial License, Security (New Era & Benecom Technologies)
- Possess Close proximity to the Parish (New Era is located at 277 Plaque Ct, Harahan, LA 70123)

***SEE ATTACHED APPENDIX FOR LICENSE / CERTIFICATES***

### **Innovative Concepts / Product Quality -15 points**

Thermal Camera with Video Insight Functionality

### **Audio / Visual Capabilities - 10 points**

The New Era Team is authorized to resell and service all peripheral systems required for the complete operation of all SSE systems. This includes, but is not limited to, video monitors, audio speakers, video projectors, intercoms, remote emergency communications systems, and other supporting systems.

### **Responsiveness to the RFP - 5 points**

To the best of our knowledge, this proposal contains all information requested by Jefferson Parish. New Era's Team preparation of this document has been diligent and thorough, and we believe it addresses each item requested through the Request for Proposals.

New Era is willing to perform the services described in the RFP and negotiate a contract with the Parish and agrees to comply with the contract terms set forth in the RFP. New Era affirmatively acknowledges and agrees that the terms of any ensuing agreement shall be binding upon the parties hereto until the work has been completed and accepted by the Parish.

The New Era Team meets or exceeds all insurance requirements listed in Attachment A of the RFP and will continue to maintain the coverages throughout the life of the contract. When selected, the New Era Team will complete the project and exceed expectations. The New Era

Team is committed to performing the services in this RFP and negotiate a contract with the Parish and agrees to comply with the contract terms set forth in the RFP.

### **Financial Profile of Company – 5 Points**

The New Era Group maintains that our continued success is dependent upon a strong, stable and healthy financial background. Our financial stability is a result of sound business practices, putting clients and employees first, and striving for professional excellence.

### **References**

The New Era Group has an exemplary record of work with state and local governing agencies, with significant experience in IT and security support and systems.

Long-standing relationships with governmental agencies and clients are the key to the New Era Team's success. Below are six (6) references representing other governmental entities for whom equal or larger scope of services are either currently being provided or have been provided in the past three years.

## **PREFACE**

New Era Information Technologies, LLC (New Era) is pleased to provide its proposal to supply Security System Equipment (SSE) (all equipment that makes up a complete access control/video management security system), and installation, repair, maintenance, replacement, consulting, design, and engineering for existing and future SSE systems and peripheral systems for the Department of Security.

***To provide these services, New Era will partner with SSE integration firm Benecom Technologies***

For the purposes of this proposal, we will refer to this consortium as "The New Era Team" or simply "New Era".

The New Era Team has worked hand-in-hand on numerous projects since 2012 including our work as the current Contractor of Record for the Jefferson Parish Security Department. The New Era Team brings together extensive experience on both technical and administrative sides of SSE systems. The New Era Team is responsible for the current implementation of the Frontier Access Controls Platform throughout Jefferson Parish. Our team has relevant experience in every technology and security management system listed in the RFP. We have included in our technical proposal items not listed in the RFP as an indicator of our vast knowledge and expertise that will progressively keep Jefferson Parish current with the latest available technologies. Our team specializes in implementing innovative technology as well as supporting existing infrastructures. We work directly with the Department of Security to help plan security endeavors. We provide full-service work scopes supporting all of Jefferson Parish SSE systems.

### **Certifications**

The New Era Team's certifications fulfill every prerequisite as required by the RFP. The New Era Team will deploy employees properly trained by the major manufacturers represented in this RFP. The New Era Team is an i-Pro Certified Silver Partner. Our proposed staff for performance of the scope of work are each qualified to support all i-Pro certifications to ensure master level service across the board.

**We are certified and/or authorized in:**

Louisiana State Board of Contractors (Electrical)  
Louisiana State Board of Contractors (Security)  
Louisiana State Fire Marshal (Security and CCTV)  
National Fire Protection Association  
Frontier Integrated Platform  
Frontier Administrator Module  
Frontier Credential Management Module  
Frontier Mercury Subsystem  
HikVision Platform  
Axis Platform  
Geovision Platform  
Microsoft Certified System Engineer (MCSE)  
Microsoft Certified Technology Specialist (MCTS)  
A+ Certified

The above list of licenses and certifications are in the Appendix.

The following is a list of the specifications and requirements of the RFP that are expected by the Department of General Services and Security Division and New Era's responses to each of these items:

## **TECHNICAL PROPOSAL**

## **TECHNICAL PROPOSAL**

### **Understanding**

The New Era Team has thoroughly read the RFP and all Addenda and understands the circumstances and procedures under this request. We are committed to continue providing our security services to Jefferson Parish under this contract. New Era also understands, based on Attachment C, that there are currently approximately one hundred (100) service locations consisting of approximately one hundred twenty (120) network video recorders, four hundred thirty (430) access control panels, ten (10) iPhones, one thousand (1,000) access-controlled doors, and two thousand four-hundred (2,400) video surveillance cameras, but we understand that this number may be more and will certainly grow. Our annual support cost covers all this plus additional under this contract.

## **SCOPE OF WORK / SERVICES**

### **A. New Equipment**

The New Era Team understands that Jefferson Parish requires new equipment for card access, identification management, and closed-circuit television (CCTV) on an as-needed basis throughout the contract for new installations and to upgrade existing parish-wide SSE. We have been supplying Jefferson Parish with new SSE through our existing contract. We have installed new systems including Jefferson Parish Parks and Playgrounds, Jefferson Parish Pump Stations, and Jefferson Parish Head Start facilities. Our proposal's Qualifications and Experience section includes detailed descriptions of these projects, which directly relate to the RFP's scope of services.

The current CCTV system throughout Jefferson Parish is running predominately on HikVision IP Cameras. The New Era Team has supplied HikVision Cameras to Jefferson Parish for over five (5) years. We initially provided thirty (30) HikVision cameras in the Jefferson Performing Arts Center along with a HikVision Network Video Recorder (NVR). Going forward, New Era is proposing i-Pro Video Insight/MonitorCast. It is a single integrated solution to replace both VMS and Access controls with a State of the Art i-Pro platform with an unbeatable Total Cost of Ownership (TCO). This includes free updates/upgrades.

*New Era is aware of the costs associated with migrating to a new access control system by converting database and boards to an i-Pro System. New Era will absorb the cost of this conversion.*

The New Era Team has included in our proposal the requested set of access control and video surveillance hardware, but based on our partnerships previously stated above, we are able to supply any new state-of-the-art equipment that hits the marketplace. Our team has partnerships with distributors that can supply any type of SSE equipment and software. We have existing partnerships with i-Pro, Anixter, Jenne, Graybar, and Jmac just to name a few. We are continuously researching new technologies to present solutions to Jefferson Parish keeping them at the forefront of SSE technology. Our team has previously presented Jefferson Parish with some of these additional capabilities such as access control and video integration, biometric fingerprint access controls, facial recognition, and smartphone capable systems.

**B. Replacement Equipment**

The New Era Team can provide replacement equipment on the current SSE systems which is comprised of Frontier Security System - Frontier R4.10, Access Control and the current HikVision IVMS-4200 Video Management System. As an i-Pro Security Partner, we have access to all i-Pro products. We are capable of replacing any component in the Jefferson Parish SSE system that may become non-operational and ensure compatibility with all other components. This is all included in our annual maintenance cost.

**C. Required Maintenance**

Without proper system maintenance, numerous deficiencies occur, usually, at the worst possible times. Since our team has taken over the security contract, we have found numerous outdated system components. Certain building controllers were manufactured as far back as the 1990's. Proper maintenance will keep your system running for many years to come. By monitoring soon to fail components, equipment age, and condition, our team can ensure that Jefferson Parish maintains a cutting-edge platform that remains operational. This required maintenance will be applied to all aspects of the SSE systems. This is all included in the annual maintenance cost.

**D. Security Consulting**

The New Era Team is constantly researching and participating in peer groups to stay on the cusp of technology and SSE systems. We strive to ensure that our solutions perform above your expectations. Our team is working with the Jefferson Parish Security Director and staff daily to inform them of the best practices and new emerging concepts. This will allow Jefferson Parish to stay informed and maintain their security technology well into the future. Our team is dedicated to knowledge sharing with Jefferson Parish, our partner, in this security endeavor. We also understand limitations within budgeting and work diligently to keep the most modern technology within your price point. The New Era Team will provide annual software support and maintenance which Jefferson Parish can use to directly contact i-Pro for manufacturer professional end user assistance and provides access to the latest software updates and upgrades. This is all included as part of the annual maintenance cost.

**E. Training / Operator Support Services**

When it comes to training and support, the New Era Team has expert personnel across the board. Not only is our staff certified with Frontier and i-Pro, but we have been conducting training sessions throughout Jefferson Parish for quite some time. Our staff has already worked with Jefferson Parish Security staff to provide hands-on training on the Frontier Security Platform in all aspects of the system. In addition, i-Pro software support includes the ability to contact the manufacturer directly and receive operator end-user assistance and support. Our team will ensure Jefferson Parish is trained on any and all SSE systems, including new functionality that is released. All training, whether it's hands-on, remote, or online, is included in our annual maintenance cost.

**F. On-Site End-User Assistance**

The New Era Team believes in on-site support as well as remote support. We have learned that working hand-in-hand with the customer provides excellent results and customer satisfaction. The RFP calls for a minimum of 100 hours of on-site end user assistance. We are accustomed to providing more than 100 hours of on-site end user assistance and plan to continue that practice. New Era's office is located at 277 Plaque Street, Harahan, LA 70123.

This location is less than two (2) hours travel time from any Jefferson Parish site and less than two (2) miles from the Yenni building. This proximity of our office to the Parish allows us to be on-site at any Parish location in an expedited period of time. Additionally, Benecom's office location is within fifty (50) miles of Jefferson Parish, allowing for a 60-minute response time. We currently have numerous team members in and around the Parish buildings daily to provide quick service turnarounds.

## Corporate Location

New Era Information Technologies, LLC is located at:  
277 Plauche Street  
Harahan, LA 70123

New Era's headquarters are centrally located between both Parish buildings (East Bank- Joseph S. Yenni Building and West Bank – General Government Building).

New Era is 1.8 miles and six (6) minutes from the Joseph S. Yenni Building and 14.8 miles and 34 minutes (34) from the General Government Building.

These numbers have been provided by googlemaps.com

## Joseph S. Yenni Building

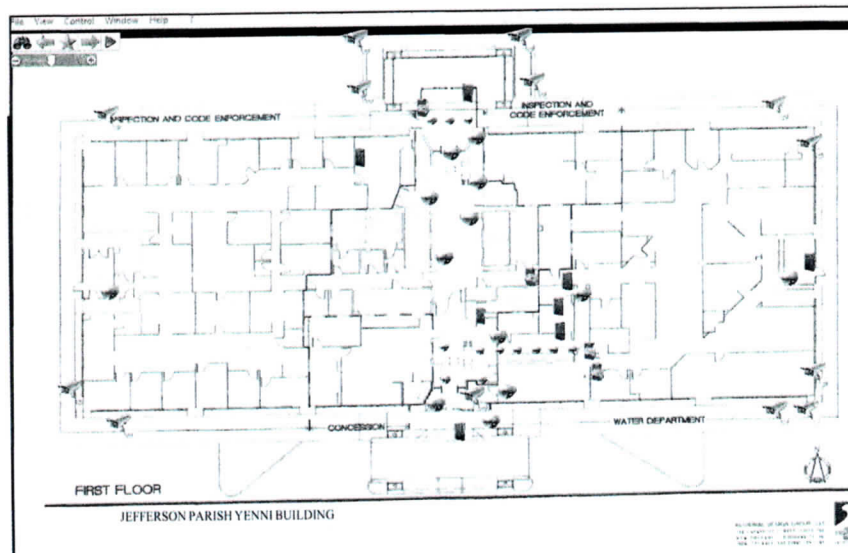

## General Government Building

## G. Labeled Drawings

Our team can create diagrams of your SSE. These diagrams provide a visual representation of your SSE network to ensure that Jefferson Parish personnel can view and reference SSE systems and ensure your SSE systems are well documented. Video surveillance cameras and access-controlled doors can even be added to interactive floorplans through the Frontier software platform.

*Sample Floor Plan*

*\*DRAFTING CHARGES WILL APPLY IF NO DIGITAL FLOORPLANS ARE PROVIDED*

## **WARRANTIES**

The New Era Team shall provide a complete inventory of equipment installed, including description, manufacturer, model, and serial number. Manufacturer's warranty or registration forms will then be submitted. If the manufacturer's warranty is longer than one (1) year, such a warranty shall be provided to Jefferson Parish. Our standard response times to Jefferson Parish includes the following: failures within the warranty period, provide answers to service calls and requests for information within a 24-hour period, repair or replace any faulty item within an additional 23-hour period without charge, including parts and labor. We currently provide support and maintenance on all existing equipment for Jefferson Parish even if we did not install the original equipment. We will continue to provide warranty and support for any additional equipment that we install in the future.

## PRODUCTS

The security system at Jefferson Parish is comprised of a Frontier access controls system and Hikvision video surveillance system. New Era's Proposal is to Convert the Hikvision VMS to a State of the Art i-Pro Video Insight VMS integrated with i-Pro MonitorCast Access Control System

# Proposed Future Video Management System (VMS)

**Video Insight (VI)** by **i-PRO** is a powerful, yet easy-to-use, enterprise video management platform. VI enables organizations in all industries the ability to deploy a highly customizable, analytics-driven security surveillance ecosystem, while maintaining one of the lowest total costs of ownerships (TCO) on the market.

The highly flexible VI solution can quickly conform to almost any site's unique requirements via its plug-in architecture. Through this architecture, users can quickly deploy new capabilities on demand, such as licensed plate recognition (LPR), thermal thermography, vehicle-based surveillance and more, all under one easy-to-learn user interface (UI).

*Figure 1. Video Insight depiction and Compatible Clients*

---

## **Benefits of Video Insight**

### **1. Lower Total Cost of Ownership**

Affordability, flexibility, and a simple licensing model are what sets VI apart from the rest. We provide the most cost-effective enterprise class VMS solution on the market.

### **2. Desired VMS Features**

The Video Insight VMS has a wide range of robust features you'd expect to find in enterprise-level software. Health Monitor, automated failover, unlimited base client/user seats, active directory/LDAP integration and powerful analytics are included.

### **3. High Scalability**

Video Insight's pure 64-bit platform supports an industry-leading number of cameras per server allowing for high scalability. Also, through unlimited access to base viewing and management clients, users of VI can easily expand their site awareness. Furthermore, whether a user wants to integrate VI with their legacy hardware, or even i-PRO's own ASM-based embedded recorders, VI's open architecture makes that possible by allowing for centralized administration, viewing and management through one easy-to-learn UI.

### **4. U.S.-Based Support**

i-PRO prides itself on being able to assist customers in a timely manner with a call or email into our local U.S.-based support center. No matter if it's software or hardware related, i-PRO supports their products.

### **5. Wide Range of Supported Cameras**

Being an open platform, VI supports over 5,000 camera models from more than 150 manufacturers.

### **6. Hardware Software Bundling**

Users of i-PRO and Advidia camera hardware and VI server hardware do not require any Video Insight VMS licensing. Users of the new i-PRO AI-enabled cameras have access to our powerful muti-AI plug-in at no cost.

### **7. Competitive Upgrade Program**

**The Competitive Upgrade Program allows you to transition away from your current enterprise VMS solution to VI at a fraction of the cost.** CUP allows you to retain your hardware investments while lowering your TCO.

### **8. Make the Most of Existing Legacy Systems**

VI easily integrates with most existing systems, whether it is access control, legacy IP cameras, or building management, our robust software development kit and application programming interface make it easy to maintain a single interface to manage them all under one umbrella.

## **Video Insight's Key Features**

- **Streamlined Client (VI MonitorPlus)**

With an intuitive UI, Video Insight's main viewing and management client empowers its users with great functionality, customization, and control, all while striving to maximize efficiency.

- **Natively Integrated Access Control (MonitorCast)**

MonitorCast is an enterprise access control application that is fully integrated with VI. The two platforms work together seamlessly, **forming a unified security and access solution**. MonitorCast is easy to use, highly expandable, includes a browser-based management UI, rules manager, real-time reporting and is fully integrated with active directory.

- **Expanded Functionality via New Plug-in Architecture**

Video Insight's plug-in based architecture allows users to expand the functionality of their surveillance system with features designed to meet challenges specifically faced in their vertical.

- **Live Mapping**

With its new live mapping functionality, Video Insight users can now plot their multi-layered facility layouts, along with their external mounted cameras, on a geolocation-based mapping interface. Through this interface, users can also view and immediately respond to critical events via built-in alarm panels that can drastically lower response times to emergency situations (beta release VI 7.9 and full release VI 7.9.1).

## PLUG-INS MODULE

New plug-in architecture enhances the capability of VI, adds greater scalability and improves feature sets. New plug-ins include, i-PRO Active Guard (Multi-AI), vehicle geolocation/tracking, LPR, visual weapon detection, gunshot location detection, thermal thermography and more.

1- Integration with Vaxtor Edge ALPR (7.9)

2- Integration with Databuoy Shotpoint

3- Integration with IPVideo Corporation

*Figure 2. Video Insight Plug-Ins Module*

## NEW VI REDACTION PLUG-IN

In today's environment, student safety and privacy go hand in hand, and facial redaction is key to ensuring both. With the VI redaction plug-in, a user can greatly reduce the time and effort needed when redacting video evidence.

Utilizing the platform, one can quickly upload any MP4 clip for analysis through an Ai-assisted redaction engine that automatically does the heavy lifting associated with the task.

Once the clip has been processed, a user can review the results and manually touch up only those regions that may require extra attention through the addition of static regions of interest, additional masks and inclusion / exclusion zones.

Upon the completion of manual touch ups, the user can export a fully redacted video clip based entirely on their requested parameters in moments.

The VI redaction plug-in should be installed on a workstation that meets or exceeds the following hardware recommendations.

CPU	Intel i7 or Better
RAM	32GB or Better
NVIDIA BASED GPU	RTX 2070 or Better
OS	WIN 10 PRO (Installed on SSD Preferred)

### VI REDACTION PLUG-IN PART NUMBER

**IPSV-RDT-1Y:** One-year VI redaction plug-in activation for one redaction workstation. Workstation must meet the VI redaction plug-in specification requirements.

### OPTIONAL REDACTION WORKSTATION

**NVR-T-1-RDT-V2:** i-PRO WT1-D, Single Intel Octa Core CPU, 32GB RAM, Windows 10 PRO. OS ON, 256GB, M.2 SSD, 2TB HDD, Nvidia RTX2070 Super | Designed for IPSV-RDT-1y (Sold separately).

The VI redaction plug-in is available for purchase via a one-year workstation license.

# VI HEALTH MONITORPLUS

NEVER MISS A SYSTEM FAILURE EVER AGAIN!

VI Health MonitorPlus is an on-premise monitoring application designed to offer visibility to your security platform, ensuring mission-critical infrastructure is always running at optimal conditions. It provides an easy to use interface, with real-time monitoring of resources, that alerts administrators of any issues and system failures.

## FEATURES

### Track Server and Camera Health Availability

VI Health MonitorPlus provides detailed information over the health of your site's cameras along with the CPU, Memory, and Storage usage of each server being monitored.

### Receive Email Notification Alerts

In the event of inactive cameras or unresponsive servers, VI Health MonitorPlus will notify any designated user in real-time, alerting them about the issue, and minimizing downtimes.

### Generate Customizable Reports

VI Health MonitorPlus provides its users with the ability to generate Audit Reports based on date ranges, allowing users to quickly identify trouble spots.

### Scalable Monitoring

Due to its unique architecture, VI Health MonitorPlus can grow and scale based on your needs, no matter the configuration.

### Accessible anytime, anywhere

No matter where you are, you can keep tabs on the health and status of multiple sites through any major web browser of your choice.

Easy to use  
Dashboard

Email Alerts

Accessible from  
anywhere

Encrypted  
Communication  
for secure access

## Centralized visibility of your security system health to help minimize system failures

- Helps ensure the health of your security platform
- Easy Intuitive Dashboard
- Real-time information and alerts to help identify and resolve failure faster
- Centrally monitor security platform from anywhere
- User authentication via SSL encrypted communication for secure access

## SYSTEM REQUIREMENTS

### On-Premise Low Tier - v1.2.1

- 8 GB Memory
- 4 Core Machine
- 500 GB Hard Drive
- Windows 10 Pro or Server 2016, 2019
- SQL Server 2017 Express
- Supports 150 Servers and up to 7500 Cameras,  
10+ Concurrent Users

Dashboard - Provides an overview of the health of the entire security system

Transaction Report - Users can generate reports based on date ranges to quickly identify trouble spots

Figure 3. VI Health MonitorPlus - On-Premise monitoring application designed to offer visibility to your security platform

Out of the Box” features of the the VI total solution Platform available to Jefferson Parish include: **Alarm Notification** - Frontier users can be notified by email or text of alarm activity. **Credential Production** - Custom badge design, image capture and direct badge printing from the MonitorCast application.

**Domains** - Users can be restricted so that they can only unlock specific doors.

**Elevator Control** - Controls access to building floors.

**Guard Tour** – Doors and alarms can be used as checkpoints. Failure to reach a checkpoint in a specified time period can trigger an alarm.

**Key Control** – Key control monitors and controls the tracking of a facility's mechanical keys.

**Multiple Calendars** – This feature provides a method for adding more than one calendar/holiday schedule into MonitorCast. This is useful for facilities spread over large areas with different holiday schedules. At Jefferson Parish, this is useful among the various government entities and departments.

**Two Person / Two Badge** - Two-person access control ensures a specified area always contains at least two badge holders when needed.

While all of i-Pro VideoInsight/MonitorCast many features are not listed, these out-of-the-box features are certain to be beneficial to Jefferson Parish.

The MonitorCast client dashboard can be configured with any number of windows in any position desired. You can move any of the windows around to give each admin user the ability to monitor what their specific job dictates. The dashboard window will show every single person as they are accepted or rejected at an entry point.

#### **A. Video Management System**

An advanced video surveillance system is one of the most effective ways to identify unwanted persons and suspicious activity. It is particularly important for large enterprises/organizations with multiple sensitive areas and expansive or remote facilities that simply cannot be properly secured with fences and on-site guard patrols.

But video security management is about more than just cameras and monitors. Once you capture events, you need an efficient way to review and analyze the activity and respond in real time if you identify a security breach.

Jefferson Parish is currently utilizing mostly Hikvision cameras with a combination of NVR's and DVR's. These systems were mostly put in place before our involvement with the Security contract, but we have been enhancing and supplementing this equipment. The IVMS-4200 HikVision video management software is run only locally at the building where the Security System Equipment is located on local client personal computers (PC's) and local IP data networks (network switches) throughout the Parish. The video footage is saved to local hard drive storage on a digital video recorder (DVR), network video recorder (NVR), or network server (windows) that is also situated locally. This is also where you can view the video through display monitors that are directly connected to the DVR or NVR. The problem with this model is that there is not enough available network bandwidth between these remote locations to download or stream video footage over the network effectively.

These limited network connections dictate that Parish personnel are limited to on-site local viewing of video footage if live or high-fidelity footage viewing is required or if saved footage is required to be downloaded from the DVR or NVR in a timely manner. There are a few different solutions being discussed to address this limitation. If the network design is built out to include high-speed bandwidth, which is currently being discussed, then we have multiple options for bringing the video back to a centralized location. We currently sell, service and support Hikvision NVRs, DVRs, and cameras, **but we highly recommend the i-Pro Video Insight Video Management System.**

Hikvision's software works well for small to medium size environments. They even state this on their own website: "iVMS-4200 is a versatile video management software for the DVRs, NVRs, IP cameras, encoders decoders, etc. It provides multiple functionalities, including real-time live view, video recording, remote search and playback, file backup, etc., for the connected devices to meet the needs of monitoring task. With the flexible distributed structure and easy-to-use operations, the client software is widely applied to the surveillance projects of **"medium or small scale."**

Hikvision's NVR's also have some limitations such that it cannot send video data off-site on a scheduled basis. The video data must be recorded to a second source in real time. This is one of the reasons that it works very well for small and medium-size self-contained, local environments, but has problems scaling to large enterprise environments. Jefferson Parish has grown from a couple of hundred cameras to approximately two thousand three hundred (2,300) in count. This is now an enterprise environment. Our pricing model will reflect Hikvision NVR's because that is the primary system residing in the Parish today. We will continue to support and maintain that system, but we will include more information on the Frontier Video Management System which is the ultimate goal. Please see Innovative Concepts Section for more information on our Frontier Video Management System.

The current *Hikvision Video* recording system and the *i-Pro Video Insight* Management system support and meet the requirements of the following:

OPEN ARCHITECTURE  
NON-PROPRIETARY WORKSTATION AND SERVER HARDWARE  
NON-PROPRIETARY NETWORK INFRASTRUCTURE  
NON-PROPRIETARY STORAGE SCALABLE VIDEO  
SOLUTION CAMERAS  
CAN BE ADDED ON A UNIT-BY-UNIT BASIS  
SUPPORTS ANALOG-TO-DIGITAL VIDEO ENCODERS  
SUPPORTS IP CAMERAS  
SUPPORTS H.264, H265 AND OTHER VIDEO COMPRESSION  
FORMATS SUPPORTS ONVIF (OPEN NETWORK VIDEO  
INTERFACE FORUM) CAMERA BIT RATE, FRAME RATE, AND  
RESOLUTION CAN BE SET INDEPENDENT OF OTHER  
CAMERAS IN THE SYSTEM  
ALTERING THESE SETTINGS WILL NOT AFFECT THE  
RECORDING AND DISPLAY SETTINGS OF OTHER CAMERAS  
MULTIPLE VIDEO STREAM TECHNOLOGY

## **CONTRACTOR SPECIFICATIONS**

The New Era Team met and understands all the specifications of the RFP. The New Era Team has been in the Access Control and Closed-Circuit Television business dating back to 2004. Our occupational license is attached in the Appendix. Our team has inventory of all the main components of the Jefferson Parish Security System Equipment apparatus. We have relationships with vendors and we will strive to have any additional components within two (2) business days.

The New Era Team is aware and complies with all regulations, and project requirements, of Jefferson Parish. All are qualified to accomplish work promptly and satisfactorily. Should Jefferson Parish ever feel that we are not operating at this level, we urge you to contact our Project Manager Leader, Jamie Gaudet. Our staff follows manufacturer guidelines to ensure that we are in accordance with their specifications. We use riser and plenum rated cabling and always ensure that we use plenum when required by code and often even when not required by code. We take pride in the fact that we provide extremely neat and well-organized wiring projects. Examples of this include our work at the Jefferson Parish Correctional Center (JPCC) facility where space is very limited, but we strive daily to keep the project clean and to the satisfaction of jail personnel

The New Era Team ensures that all conduit and armored cable will be secured and properly installed. We will never leave any junction boxes or device enclosures accessible. We will always use tamper proof screws for anything that is publicly accessible. We can produce electronic drawing mark-ups from existing floorplans. A benefit of our electrical certifications, we always ensure that all our work is in accordance with reference National Electric Code (NEC) codes and meets specifications. Our team is dedicated to producing a fully maintained and properly operating system. This helps us keep the system functional for years into the future.

The New Era Team understands the importance of customer signoff. We further understand the requirements for a 14-day advanced notification of a point-by-point inspection based upon a documented test plan, presence of owner's representative during signoff, and acceptance of completion checklist. Completion checklist is only deemed acceptable when the entire checklist can be completed in a single pass. As shown in our documentation and training sections, we will always provide hands-on training, all documentation and manuals and complete system support as part of our annual maintenance contract with no additional costs to Jefferson Parish.

## **QUALIFICATIONS & EXPERIENCE**

## **QUALIFICATIONS & EXPERIENCE**

New Era is a Jefferson Parish, Louisiana based company that is headquartered in Harahan, Louisiana. The New Era Team has staff members located from New Orleans to Baton Rouge. We can travel to any Jefferson Parish site in an expedited period. New Era has performed computerized business automation, technology services and software development since 2004. We specialize in business automation, re-engineering, consulting, technical services, system development, database design, GIS, and Access Control and Video Surveillance. We have a great amount of experience in mainframe and other legacy type systems as well as developing client server-based applications using Microsoft.net and rapid application development techniques. Our team specializes in providing security services and implementing the latest technological trends. We strive to meet all deadlines and stay within the budget on all projects.

On August 11, 2004, New Era agreed to a contract to provide supplemental computer services for the Parish to the Department of Electronic Information Systems (EIS) for the development and maintenance of software applications, computer room operations, and related services under the guidance of the Director of Electronic Information Systems Department. In 2012, 2015 and 2018, New Era was awarded additional contracts to handle the supplemental technical support of Jefferson Parish. New Era's personnel have completed the following projects and services:

The New Era Team has experience with Microsoft SQL Server since it was part of Sybase SQL Server back at version 6.0. Our team has been working with SQL Server as their primary database for numerous years. We have intimate experience with versions 6.0, 6.5, 7.0, 2000, 2005, 2008, 2008 R2, 2012, 2014, 2016 and most recently 2019. We currently manage production environments in versions 2005 – 2016. Our staff, specifically Korey Alleman and Rob King maintain and support all of the SQL Server databases throughout Jefferson Parish Government. The Frontier system database is a Microsoft SQL Server 2014 database. We are currently in the process of migrating/upgrading the current Frontier SQL database from 2014 to 2019. This data is of course backed up daily due to its important security significance.

The New Era Team is a trusted part of the current Jefferson Parish Contract and many other contracts and projects. Benecom is an Industrial/Commercial Contractor, with a Louisiana commercial contractor's license in the classification of Security and tower construction.

The New Era Team is an i-Pro Silver Partner. We are proud to be able to continue serving Jefferson Parish with state-of-the-art designs and SSE systems based upon knowledge and partnership with i-Pro.

The New Era Team recognizes the challenges of sustaining a high-performance team by building an environment where all employees can do their best work, contribute to their fullest, and develop their potential and talents.

The New Era Team is licensed with the State Fire Marshal's Office for Security. We have confirmed with the Fire Marshal's Office, that we are properly licensed to continue providing services to Jefferson Parish. Furthermore, we have been interviewed by the Fire Marshal's office to ensure that we are providing services in the correct manner. Our licenses are included in the Appendix. As well our team has a license with the Louisiana State Contractor's (License 74477), which includes a specialty classification in Security, which is also included in the Appendix. Our team is certified on the i-Pro platform, which is a requirement for being partner.

## **RELEVANT PROJECT EXPERIENCE**

### ***Jefferson Parish Access Controls & Video Management Systems Maintenance***

Beginning in 2016, the New Era Team began the support and maintenance of the access controls and video management systems at Jefferson Parish. We started this process with the migration from an aging Lenel based system that was dated back to 2012 to a state-of-the-art Frontier Security system. Once we started digging into the system, we found many components of the system that had not been properly maintained over the years. We immediately began replacing aging components to this system. The first of these components were the old building access control boards. Some of these controllers were manufactured back in the 1990's. These ancient controllers were not eligible for firmware upgrading. We replaced them with new controllers. Besides the boards that we had to replace, we learned that the boards that could accept the latest firmware still had outdated versions of the firmware on them. We updated the firmware on all those controllers to be able to take advantage of the new security enhancements and encryption.

During our analysis, we determined that the access control and camera system was being transported through the Jefferson Parish Business Network and open to anyone to access. The default username and password were still active which meant that anyone with a search engine could find these defaults and potentially compromise the system. We began by disabling the default credentials. We consulted with the Jefferson Parish Security and Electronic Information Systems (EIS) departments to explain how the system was setup and worked together to build a better, more secure design. We have since separated both the access controls and video surveillance networks from the business network.

### ***Frontier Access Control Software Upgrade – 4.7 to 4.10***

Through ongoing consultations with Jefferson Parish Security and Electronic Information Systems (EIS) divisions, the New Era Team is currently in the process of providing upgrade assistance with the Frontier Access Controls software system, hardware system, and migrating/upgrading the current Frontier SQL database from 2014 to 2019. This data is of course backed up daily due to its important security significance. EIS will provide a new virtual environment on a Jefferson Parish supplied server hardware system and the New Era Team and Frontier engineers will assist. Once all of this is complete, Jefferson Parish Government will be on the most up-to-date version of the Frontier Access Controls software system.

### ***Jefferson Parish Parks & Recreation Installation***

The Jefferson Parish Parks and Playgrounds Installation Project involves the installation and configuration of Access Controls and Video Surveillance systems at many Jefferson Parish public playground and park sites. The goal of the project is to ensure public safety and security at these sites. The projects begin by assessing all vulnerabilities, consulting with the Jefferson Parish Security and Parks and Recreation Department and designing systems that would address the Security System weaknesses in the most comprehensive and cost-effective manner. Access Controls are installed at egress and ingress locations, including locations accessible only to credentialed Jefferson Parish employees and volunteers, such as concession stands and press boxes. Video Surveillance is installed at crucial and non-crucial locations including bathroom entrances, concession stands, public seating areas and areas normally out of view to provide a complete landscape. Information Cabling Technology (ICT), including ethernet, fiber optics, coaxial and wireless Point-to-Point (P2P) systems, are installed to connect the Access Controls and Video Surveillance systems to the data network. The systems are then connected back to Jefferson Parish's IP Business Network through authenticated user login credentials to gain remote access.

### ***Jefferson Parish Drainage Pump Station Video Surveillance Installation***

The Jefferson Parish Pump Station Video Surveillance Installation Project was completed to replace an older, existing analog based Video Surveillance system with a more extensive IP, digital based Video Surveillance system. The project began by assessing the existing system and designing a more robust system that would address the security concerns of the Jefferson Parish Security and Drainage Department. Raceway (conduit) was installed since no existing raceway infrastructure existed. Raceway installation included fastening to a mostly concrete building infrastructure. Video Surveillance Cameras and Information Cabling Technology (ICT) was then installed to connect the Video Surveillance system to the data network. The systems were then connected back to Jefferson Parish's IP Business Network to gain remote access to the systems through authenticated login credentials.

### ***Jefferson Parish Performing Arts Center***

The New Era Team completed a project in 2016 to buildout the network and security camera system in the Jefferson Parish Performing Arts Center. This project involved running all CAT 6 cabling throughout the facility. Due to the size of the facility, we connected one side of the building to the other with single mode fiber to ensure that the ticket office would not have a lack of network speed or resources. Our team installed all Cisco switches throughout and connected all the end-

user cable drops to the various VLAN's throughout. We also designed and installed the wireless networking throughout the facility which is comprised of a Ruckus Wireless system with twelve (12) Access Points throughout. There have been numerous events in the facility where both the customers and the vendors utilized the wireless network without any issues. We also installed the 10 TV monitors that reside in the building. All of these connect back to the HDMI matrix switch that we installed which will allow the management to send different video feeds to the TVs at any time. The security camera network and video recording system are comprised of 30 Hikvision cameras and a Hikvision NVR. In 2017 we upgraded the system and added nineteen (19) cameras and access controls on an additional door along with another video recorder.

This project included 240 cable drops throughout the facility, 42 of those drops are dedicated to cameras. Besides having indoor and outdoor surveillance cameras, we also have cameras inside the individual rooms to give users the ability to monitor the animals throughout the facility. This project also includes access controls which are tied back to the Jefferson Parish Frontier Access Control System. There are multiple doors, walk-through gates and driveway gates that are controlled by this system. This includes a Frontier Video Server as part of this project to tie into the Frontier Security System. Currently three (3) doors at the facility have access controls/video surveillance integration implemented.

### ***Jefferson Parish Fire Departments***

In 2016, New Era was awarded a project to complete a network, access controls system and video surveillance system buildout across all firehouses in Jefferson Parish. This project included installation, configuration, and maintenance of eighty (80) cameras and associated network video recorders across fourteen (14) buildings. We worked with the fire department and showed them the different options and solutions that we could provide for them. They are using iClass Proximity readers with mobile access controls for smartphones at their headquarters.

### ***Jefferson Community Action Program Head Start Centers***

New Era conducted site surveys and security consulting at six (6) head start centers in Jefferson Parish. Cabling for the project was installed along with cameras and NVRs at each location. This project consisted of forty-five (45) Digital Watchdog cameras and 6 Digital Watchdog NVRs across the 6 locations.

### ***Jefferson Parish 24th Judicial District Court (JDC)***

New Era worked with the Jefferson Parish 24th JDC IT director on their security camera upgrade project. We have completed this project which consisted of installing and commissioning forty-nine (49) cameras and four (4) network video record (NVR) units throughout. We did all the cabling for this project as well under their initial budget and design.

## TEAM RESUMES

The New Era Team is comprised of key personnel with extensive experience totaling over 150 years in the following fields of expertise:

- Project Management
- Network Infrastructure
- Frontier Access Control
- Mercury Subsystem
- Closed Circuit Television
- Microsoft
- Cabling & Wiring
- Consulting
- User and IT Training
- Documentation
- Installation and Maintenance
- Remote & On-Site Support

## Proposed Team Members

The New Era Team proposes the following team members to assist at any time throughout the course of this contract:

All New Era/Benecom's personnel are residents of the state of Louisiana.

Kyle Stoufflet, Microsoft Engineer

Korey J. Alleman, Frontier Database Specialist

Grant E Crawford, Frontier, Technical Engineer

Jamie Gaudet, Project Manager, CCTV Specialist, Senior IT Analyst

Rob King, SQL Database Engineer

Stephen Strickland, Lead Wire Installer

With our current staff and current project list, we have the capacity to meet all requests under this RFP. We are also always looking for experience and motivated individuals to increase the value of our team and to ensure that we can continue to meet ALL our clients' needs. New Era currently holds contracts with Jefferson Parish Government, Jefferson Parish School Board as well as the St. John Parish District Attorney's Office.

---

**Jamie F. Gaudet**  
**New Era, Project Manager, CCTV Specialist /& Senior IT Analyst**

Experienced in maintaining large networks of equipment and end users. Systems administrator with in-depth knowledge of a wide spectrum of hardware and software. Having particular expertise in system security, Mr. Gaudet is poised to be an asset in supporting the Security New Era Team.

From hardware installation through user training and network setup to ongoing technical support, Mr. Gaudet is an established IT Professional who can help customers through every phase of their technology system's needs. His technical knowledge allows him to maintain deep familiarity with individual customers' systems, thus allowing himself to troubleshoot problems quickly and effectively while understanding equally well the proficiency levels of the many users at each customer's location.

Finally, Mr. Gaudet has twenty (20) years of extensive experience with large governmental systems with hundreds of workstations and even more end users. Operating in an environment of intense pressure is also commonplace for Mr. Gaudet. Having assisted with administrative and technology transitions, while keeping business functions operating efficiently.

**EDUCATION / CERTIFICATIONS:**

LA General Contractors License, Security No 74477

Delgado Community College, 1995

Herzing College, 2001

Louisiana State Fire Marshall CCTV / Camera, Certification, 2021 – 2023

CompTIA A+ Certification, March 2001

i-Pro Certification, 2022

**EXPERIENCE:**

***Jefferson Parish Security***

***2021 - Present***

Mr. Gaudet was a key team member in supporting the implementation and integration of a security system for the client including camera installation, access control card readers configuration and viewership. He worked directly with the client to prioritize scheduling and implementation of playground, public works, libraries, court buildings, Emergency Operation Center (EOC), and the government support buildings.

***Jefferson Parish IT Support Technician***

***2014 – Present***

Mr. Gaudet supported and maintained functionality of a Metropolitan Area Network for over 1500 workstations, laptops and electronic devices while connected to hundreds of printers and scanners. He set-up New World System on PCs for viewing and saving documents to AS400. He set-up and

trained users on archiving email to maximize the finite. He worked with Electronic Information Systems (EIS) director on upgrading and installation of new battery backups for the Ames Complex. Mr. Gaudet installed and repaired PCs and printers for a staff of hundreds of end users. He also assisted in the transition of new administration in Jefferson Parish President's office by setting up new users, coordinating network drops, and providing technical support.

***City of Kenner, Louisiana***

***2003 - 2014***

Managed and maintained Area Network supporting over 600 end users with approximately 420 workstations and switches varying in size and type. Mr. Gaudet rebuilt computers that had hardware or software failures. He maintained over one hundred fifty (150) printers and scanners.

***Treasure Chest Casino, Kenner, LA***

***1997 - 2005***

Monitored all aspects of entertainment complex and administrative area using Pelco camera system with 80 cameras, including several PTZ cameras and multiplexors. He answered multi-line switchboard, organized and completed logs of every activity performed by officers as security dispatcher. Mr. Gaudet also handled customer and employee issues during daily operation of Treasure Chest Casino as well as all management related issues as Stand-up Supervisor. Worked with Treasure Chest Casino management and Kenner Police in daily security operations. Dispatched officers to required locations and maintained high level of surveillance on all aspects of entertainment complex and Casino. He trained all new officers on ID checks, radio protocol, escorting cash, all other administrative tasks.

**SKILLS:**

VI MonitorCast  
Cambium Wireless  
Microsoft Office (All Versions)  
Microsoft Office 365  
Windows (All Versions)  
Cat 3/5/6 wiring and termination of homes and office buildings  
Ubiquiti Wireless Controller and access points  
Troubleshoot phone connections at Demarc  
Rosetta Stone Language Learning Software  
Drake Tax Software  
Bailsafe Bail Bond Software  
Sophos Anti-virus  
Symantec Endpoint Protection  
Trend Micro Business Security  
Mcafee Anti-Virus  
Xerox Centralized (managed) print and scan solutions  
Various Spy-ware and Malware removal programs  
Knowledge of Lanier, Savin, Ricoh, Gestetner, Sharp, Toshiba and Kyocera devices

---

**Grant E. Crawford**  
**New Era, Security System Analyst**

Mr. Crawford's ten (10) years of experience in the Communications Construction industry includes Access Controls, Video Surveillance, Phones, Cabling, Wireless, Personal Computers, Servers, Electrical, Gate Openers, and other systems. While performing his role as Lead Service Technician for the New Era Team in support of the Jefferson Parish Security contract, Mr. Crawford's activities are based around Troubleshooting, Service, and Maintenance.

**EDUCATION / CERTIFICATIONS:**

L.W. Higgins High School, Marrero, LA  
Louisiana State Fire Marshall, Security Technician, 2021  
Frontier Access Controls, Certification, 2021  
HikVision Level 1 Certification, 2021  
SignaMax Cabling Certification, 2018  
i-Pro Certification 2022

**EXPERIENCE:**

***Jefferson Parish Security***

***2015 - Present***

The current Jefferson Parish security contract requires maintenance and service to be performed on all security related systems throughout the Parish. Mr. Crawford has acted as lead service technician for this project for over five (6) years and is familiar with all systems requiring maintenance and service. Daily tasks include responding to service request tickets, hands-on training, equipment service, software configuration, and general maintenance.

Mr. Crawford is a key member in the mass conversion of the Jefferson Parish Access Control System to complete the Frontier security configuration system software. He also performed the maintenance, repair add-ons, removals, and moves of their equipment. Mr. Crawford also plays an integral part of the industrial automation.

**SKILLS:**

Access Controls – Setup and Configuration, Troubleshooting, Service, Maintenance, Frontier, GeoVision, VI MonitorCast, Identocard, Keyscan  
Video Surveillance – Frontier, HikVision, GeoVision, Troubleshooting, Service, Maintenance  
Door Hardware – HID, Assa Abloy, Schlage, Troubleshooting, Service, Maintenance  
Gate Openers – Cabling and Hardware, Troubleshooting, Service, Maintenance  
Phones – iPhones

**Korey J. Alleman**  
**New Era Frontier Database Specialist**

As a designer, developer, implementer and administrator of an enormous variety of complex IT projects, Korey Alleman has an unparalleled track record of technology successes in multiple settings. From desktop to server, he is thoroughly familiar with every type of hardware component; his software capacities are even more wide-ranging. Mr. Alleman now brings his knowledge and experience to managing and overseeing the **Frontier Database**. Among the many types of projects Mr. Alleman has successfully managed are various web applications, Linux and Microsoft server administration, Oracle spatial database management, and integration of multiple applications and hardware into seamless, efficient user systems. He has particular expertise in Geographic Information Systems (GIS) and mapping technologies; this skill enables him to take large, detailed data sets and convert them into graphic displays that greatly facilitate the ability to analyze data, identify needs and opportunities, and make action-oriented decisions that produce the desired results.

Mr. Alleman also has extensive experience with the integration, upgrading and migration of complex, multi-user systems. His vast hardware and software knowledge enables him to analyze systems strengths and weaknesses, as well as future capacity needs, and to design and implement system solutions with minimal disruption and ultimately a maximization of productivity. Few IT specialists in southeast Louisiana can match his ability to see the big technology picture.

**EDUCATION:**

University of New Orleans, New Orleans LA  
Bachelor of Science in Computer Science, May 21, 1998

**EXPERIENCE:**

***Jefferson Parish Frontier Project*** ***2021 - Present***

The Jefferson Parish Frontier Project is the management of the SQL Server Environment for the Frontier Security Software. Current stage in the project is the creation of new SQL Server 2019 server and the migration of the database from SQL Server 2014.

***Jefferson Parish ESRI Project*** ***2012 -Present***

The Jefferson Parish ESRI Project began as a migration project of GIS Oracle Spatial data from the GeoMedia Professional GIS Software to ESRI ArcGIS products environment. On the project Oracle 11g Database Server was configured to use the ArcSDE 10.1 GeoDatabase Server and store data in Oracle Spatial format. During the project Oracle Spatial data was imported using ArcGIS Data Interoperability Extension to evaluate and create data that is compatible with ArcGIS for Server and Desktop Mapping products. GeoDatabase Feature Layers were created and edited using Polygon, Line, Point, Annotation, and other feature types using ArcGIS for Desktop 10.2.2 software for data infrastructure items such as buildings, addresses, parcels and public works items like manholes and lift stations. Other task included the setup and configuration of ArcGIS for

Server, Image Server Extension, and Webserver WebAdapter for the creation and use of ArcGIS web server services for both the public and Jefferson Parish intranet Web Maps. Today, the project is still moving forward with the migration to a new Oracle 19c RAC Database Server with upgrades to the ESRI 10.9 Enterprise Architecture of servers including ArcGIS Server, ArcGIS Image Server, ArcGIS Datastore Server, ArcGIS Portal Server, and ArcGIS Monitor Server. The current phase includes the upgrade to ESRI ArcGIS Desktop 10.8.1 and ESRI ArcGIS Pro 2.8 for all client PCs.

#### ***Jefferson Parish Oracle Project***

***2005 -Present***

The Jefferson Parish Oracle Project is an ongoing project for the use of the Oracle 19c Database and Application Server. It has involved the creation of an Oracle Real Application Cluster system installing and configuring of a Three-Node cluster on three HP Oracle 8 Enterprise Linux Servers with a Standby DR Site Single Database server using DB-Visit Standby server synchronization software, plus Off-site DR Oracle Cloud Database servers using Data Guard. The administration of the database software includes the backup and recovery of the database instances using Oracle Recovery Manager (RMAN). The project includes the configuration and use of Oracle Enterprise Manager Grid Control to monitor and aid as the Oracle Database Administrator and Oracle Application Server Administrator for Jefferson Parish. The project includes the configuration and administration of Oracle Mobile Database Server to replicate data between Client Applications using Berkley DB offline databases used by Inspection and Code Enforcement to perform home inspections and sync back to the main Oracle 19c Database.

#### ***Jefferson Parish Software Development Project***

***2004 -Present***

The Jefferson Parish Software Development Project is an ongoing project for custom designed software used by several departments throughout Jefferson Parish. It has involved the development of VB.Net web-based and desktop software for the Department of Code Enforcement to perform regulatory and complaint field inspections as well as the import of photographs for those inspections into an OpenText eDocs Document Management Server. It was developed using ArcGIS Mapping Technology for the integration of GIS Maps to pinpoint locations in the creation and management of complaints and permits. The system integrated SQL Server replication using both a SQL Server Database and SQL Server Compact Database to store data between the field computers and internal database servers. The project entailed the creation of a Web Application called CERVIS using ASP.NET to create and monitor violations for zoning, weed control and abandoned building sections of Code Enforcement. The web system integration ArcGIS for Server web services using both ESRI Mapping Technology and WebAdaptor web maps for attachment to the complaints to pin point accurate property and parcels on the complaints. The system has been upgraded over the years to replace the SQL Server replication with Oracle Replication using Oracle Mobile Database Server and Berkley DB databases.

#### ***Jefferson Parish Network and IT Support Project***

***2006 -Present***

Provides help desk support in all PC related matters including word processing, spreadsheets and database applications, network problems, printing problems and hardware problems, train users

using application software including OpenText eDocs DM, Microsoft Word and Microsoft Excel, develop database applications using Microsoft Access and Oracle database development tools and maintains the parish wide local and wide area networks, which include 12 locations and over 450 PC's. I assist Jefferson Parish employees with selecting, procuring, and installing software and hardware solutions for performing their day-to-day duties, researches and recommends software for specific applications, and resolves computer related problems incurred by Jefferson Parish personnel including: Hardware, network, operating systems (including Windows and Red Hat Linux) and application software.

**SKILLS:**

VB.NET, ASP.NET, C#, C++, Java, JavaScript, Perl & More  
Windows and Unix Operating Systems  
LAN & WAN Engineering and Management  
MySQL, SQL Server and Oracle Administration and Development  
Crystal Reports, Visual Studio, OpenText EDocs DM  
GeoMedia Professional & ESRI GIS Mapping Software

**Kyle Stoufflet**  
**New Era, Microsoft Engineer**

**EDUCATION / CERTIFICATIONS:**

Delgado Community College, New Orleans, LA  
Associate of Science Degree in Computer Networking

**Microsoft, Systems Engineer (MCSE), Certification**

**Microsoft, Systems Administrator (MCSA), Certification**

**Microsoft Certified Professional (MCP), Certification**

A+ CompTIA, Computer Service Technician, Certification

N+ CompTIA, Networking Service Technician, Certification

**EXPERIENCE:**

***Jefferson Parish Public School System (JPPSS)***

***2017 - Present***

I have been working at the East Bank IT support site, supporting all Clients and IT support staff and hardware. We have teachers and support staff walk in and tickets from Hewlett Packard (HP) Open View. Also provides He repairs and images all PC and servers from Dell, Lenovo, and HP. Configure all Computers, Ports and Printers remotely with support staff at seventy-five (75) locations. We Support all software and email set ups. Mr. Stoufflet is also responsible for the inventory of all PCs for JPPSS by assigning and returns of teacher's laptops.

***Adams & Reese***

***2016 - 2017***

[www.adamsandreese.com](http://www.adamsandreese.com)

**LAN Administrator**

Help desk opens every morning at 7:30 am. Take care of 12 sites with 375 employees. Answer about 20 to 30 calls a day and support them by remote desktop. Make and administer all Active Directory, Exchange, SQL (iManage) database user accounts and groups. Configured and administrator all ShareFile accounts with Clients. Make and install Imagines on all PC from the Symantec Altiris server and set up on the domain with all software and Antivirus software. Install SCCM client and update all patches and software from SCCM server. Configure Outlook 2010 Email for client with Database plugin (iManage) ready for us. Help Support the Citrix environment with client's apps and connectivity. Support Cisco VPN AnyConnect Secure Client, Support print server with 160 printers, update drivers and firmware as needed. Manage all Video Meetings and sharing of data between sites by Polycom RMX Manager, provision and setup Cisco IP phones for all offices. Set up all clients Personal Phones with Email and VNP remote access. Admin also did the Firms inventory for all Computers, Servers, Monitors, and Printers.

***EPA NASA Stennis Space Center******2013 - 2016***[www.epa.gov/gmpo](http://www.epa.gov/gmpo)**LAN Administrator**

I was assigned to the EPA NASA Stennis Space Center site as network administrator (Admin.) I have a security clearance for NASA (MBI) and AAA-RSA SecurID Token. Admin is responsible for fifty (50) users with full network and server administration, also responsible for asset management for all computers, servers, printers, switches and routers. Admin would reimage/configure pc, place on domain, add software, and allow remote login for remote users VPN. Admin would receive help desk tickets in Remedy and input data on how tech fixes this issue and close the ticket. Admin managed a major roll out of Exchange "Outlook 2010 client" including updating PC's to Win 7 and then to Outlook client 2013. Admin was responsible to configure Active Directory, groups, users, rights, VPN access PKI smart cards, Email, Office 365, and MOC (Skype for Business) and help clients (Power User) with any other IT issues. Troubleshoot in areas of server 2008 sr2, Windows XP, Win 7. Maintain all backups with Veritas Backup Exec. Admin is going thought a major rollout with Windows 7, Exchange 2013 from Lotus notes to all of the EPA.

***URS CORP******2011 – 2012***[www.urscorp.com](http://www.urscorp.com)**LAN Administrator**

I was assigned to URS as network administrator (Admin) under a temporary contract while the current network administrator was on medical leave. Admin was responsible for 220 users with full network and server administration, also responsible for asset management for all computers, servers, printers, switches and routers. Admin configured PC's with an Altiris server that would reimage/configure pc, place on domain, add software, and allow remote login into the clients PC. Admin would receive emails in Lotus notes and log all tickets worked in a Lotus notes database. Admin managed a major roll out of Exchange "Outlook 2010 client" including updating PC's to Win 7 and Outlook 2010. Admin was responsible to configure Active Directory, Email, and MOC and help client (Power User) with any other IT issues. Troubleshoot in areas of server 2008 sr2, Windows XP, Win 7. Maintain all backups with Veritas Backup Exec and replace, update license for software (AutoCAD) and other engineering, application software. Admin went thought a major rollout with exchange to all of URS, updated servers to 2008 sr2. Admin Rolled out over 100 new PCs (HP Desktops), so URS could update Email services and Engineering software (AutoCAD).

**SKILLS:**

Skillpath & CompuMaster

---

**Stephen Strickland**  
**New Era, Lead Wiring Installer**

Mr. Strickland has over fifteen (15) years of experience which includes designing and installation of Fiber Optic cabling for lighting and effects and network wiring and minor construction. Stephen is currently the Lead Wiring Installer for New Era in the Jefferson Parish Correctional Center.

**EDUCATION / CERTIFICATIONS:**

Jesuit High School, 2001  
University of New Orleans, 2007  
i-Pro Certification, 2022

**EXPERIENCE:**

***Jefferson Parish Correctional Center***

***2022 - Present***

After New Era Performed an Assessment of the JPCC (Jefferson Parish Correctional Center) concerns regarding Security Cameras, New Era was tasked with the wiring and installation of security cameras throughout the whole of the JPCC. Part 1 of the project was running wires and installing cameras in the remaining detention pods of the North Wing. Currently he is leading a New Era Crew wiring and installing cameras in the South Wing. The final part will be wiring and installation of cameras in the West Wing

***Nexus Group South LLC***

***2009 – 2021***

Worked with Harvey Gulf International Marine, Pool Corp. University of St. Thomas installing network and telephone systems, infrastructure upgrades, corporate build outs.

Mr. Strickland also successfully performed the following tasks:

- Diagnostic Repair Issues
- Installed Category 5/6 Fiber Links
- Coordinated Directional Boring Crews
- Installed Network infrastructure (Racks, Cable, Jacks)
- Ran Multiple 100 Pair Cables Between Buildings
- Installed Pool Corp IT Headquarters Infrastructure
- Installed Harvey Gulf IT Headquarters Infrastructure
- Installed University of St. Thomas Infrastructure
- Installed Lighting and Control Systems for Boyd Gaming and South Point Casino

**SKILLS:**

Fiber Optic Cable Installation

Category 5/6 Wiring

LED Lighting and Control Systems, Fog Effects, Incandescent Lighting

---

**Dustin Benedic**  
**Benecom Technologies, Structured Cabling & Security Manager**

Dustin's 16 years of experience in the Low Voltage industry includes being a lead field technician and/or project manager on numerous structured cabling projects, video surveillance projects, access control projects, and a variety of other projects including intrusion detection systems, cell boost systems, analog/digital/VOIP phone systems, and A/V systems. Currently he manages a department with 14 low voltage technicians and remains well versed with all current low voltage technologies. Dustin current roles include management of staff, account executive for numerous customers, Project Management, Lead Technician (when necessary), performing site surveys, estimating, and systems design & implementation.

**EDUCATION / CERTIFICATIONS:**

Holy Cross High School, New Orleans, LA –

2006 BICSI Technician - 2016

LASFM – Life Safety & Property Protection – Security Endorsement -

2011 ESA Level 1 Certified Alarm Technician - 2011

TWIC Card – 2016

Leviton Copper and Optical Fiber Communications Certification - 2021 Paxton Access Control  
Certified Installer - 2018

Hanwha Wisenet Certified Professional – 2018

**EXPERIENCE:**

***Benecom Technologies***

**2006 – Present**

**SKILLS:**

Knowledge of industry codes and standards

Cat5e, Cat6, Cat6A – Cabling and Hardware, Termination, Testing, Troubleshooting, Design

Fiber Optic Cabling – Cabling and Hardware, Fusion Splice, Mechanical Termination, Optical  
Time Domain Reflector(OTDR) testing, Troubleshooting, Design, Fluke OTDR, LanTek IV

Video Surveillance – Cabling and Hardware, System Setup and Configuration, Troubleshooting,  
Service, Maintenance, Design, Wisenet Wave

Access Controls – Cabling and Hardware, System Setup and Configuration, Troubleshooting,  
Service, and Maintenance, Design, Paxton Net2, Paxton 10

---

**Christopher Bass**  
**Benecom Technologies, Lead Install Technician**

Mr. Bass' 7 years of experience in the Low Voltage industry at Benecom includes being a lead field technician and/or project manager on numerous structured cabling projects, video surveillance projects, access control projects, and a variety of other projects including intrusion detection systems, cell boost systems, analog/digital/VOIP phone systems, and A/V systems. Currently he co-manages a department with 14 low voltage technicians and remains well versed with all current low voltage technologies. Mr. Bass' current roles include co-management of staff, Project Management, Lead Technician, performing site surveys, estimating, and systems design & implementation.

**EDUCATION / CERTIFICATIONS:**

Salmen High School, Slidell, LA,  
2007 United States Navy, 2009

**David Dufrene**  
**Benecom Technologies, Technical Engineer**

David has been with the company for over 22 years and his wealth of experience in all aspects of technology has been a tremendous asset when it comes to servicing of many of our private and public sector clients. He works in the network, telephony, and security environment and supports our other staff when it comes to troubleshooting cable & wiring issues and assists with network connectivity.

**EDUCATION / CERTIFICATIONS:**

1990  
East Jefferson High School  
1990 - 1992  
R.E.T.S. Training Center  
Electronic Engineering Technologies  
Printer training with Hewlett Packard,  
Panasonic NEC Certifications for voice & data

**EXPERIENCE**

***Benecom Technologies***

**2000 - Present**

Worked as a Network and Telephony Technician. Administered Microsoft Server, Microsoft SQL Server, IBM AS/400 NEC SV9100. Handled all aspects with the VoIP Phone Systems and Univerge Blue Hosted Phone System

***Computer Services of America (CSA)***

**1997- 2000**

Worked as a Network and Printer Technician.  
Current Dos, OS2 and Unix Support  
Microsoft Server and Citrix  
Administration

***Al Hanner Office Equipment***

**1991 1997**

Repaired and installed Copiers, Printers and Fax Machine. Also worked as an administrator for Santa Cruz Unix and Novell NetWare

**SKILLS:**

Proficient using remote management and network troubleshooting. Proficient with phone support troubleshooting. Ability to setup and manage vLans and Routers. Proficient with Active Directory Management.

**Christopher G. Hoselle**  
**New Era Desktop Specialist**

Although Mr. Hoselle has only been employed in the field of IT for a short period of time, his eagerness to learn new and exciting technologies is exemplified in his approach to new projects. Chris has designed a cyberdeck to analyze networks and setting up his own E-ink display to show resources for troubleshooting devices. He is also setting up his own cisco lab to experiment with potential new cutting-edge IT solutions. He also has a keen interest in the command line and coding, he wants to learn and know everything he can in the green screen world. His knowledge coupled with his pleasant demeanor is ideal for this project as he can provide support in a diverse number of IT specialties.

**EDUCATION / CERTIFICATIONS:**

University of New Orleans, New Orleans LA  
Bachelor of Science in Computer Science, May 21, 1998  
CompTIA A+ Certification

**EXPERIENCE:**

***Jefferson Parish Desktop Technician***

***2021 - Present***

Support Jefferson Parish technicians in providing troubleshooting expertise in real time support. Assist IT with issues including hardware, software, and enforcing end user policy. This encompasses all Jefferson parish employee end users. Responsibilities include ensuring end user devices are working and that they are being utilized properly. I also have to maintain current awareness of threats and be prepared with a solution.

***Verapro***

***2020 - 2021***

Assisted users in installing various Operating systems. Built VMware to help future generations of call center support. Helped troubleshoot networks, hardware, and software issues. Created legacy trouble shooting record documenting new issues that were encountered, and the steps/actions taken. Performed special projects during down time to help make some of our work more automated and functional. One notable one was an Active Directory Permissions issue that was important for remoting into certain users' device to provide an IT solution to the problem.

**Robert T. King**  
**New Era SQL Database Specialist**

Also, a designer, developer, implementer and administrator of a variety of complex IT projects, Robert King has technology successes in multiple settings. His expertise in Database management and administration in both Oracle and SQL goes back over 20 years with experience in both Private Sector and government projects at both local and federal level. His vast wealth of knowledge in Databases, Cloud Computing, Unix and Linux and Web Applications provides New Era first class support in those areas and a welcome addition to assisting Korey Alleman in those projects and also the Frontier database.

**EDUCATION:**

**University of Missouri-St. Louis**

Bachelor of Science in Business Administration  
Management of Information's Systems

**EXPERIENCE:**

***Jefferson Parish Oracle Project***

***2019 - Present***

The Jefferson Parish Oracle Project is an ongoing project for the use of the Oracle 19c Database and Application Server. It has involved the creation of an Oracle Real Application Cluster system installing and configuring of a Three-Node cluster on three HP Oracle 8 Enterprise Linux Servers with a Standby DR Site Single Database server using DB-Visit Standby server synchronization software, plus Off-site DR Oracle Cloud Database servers using Data Guard. The administration of the database software includes the backup and recovery of the database instances using Oracle Recovery Manager (RMAN). The project includes the configuration and use of Oracle Enterprise Manager Grid Control to monitor and aid as the Oracle Database Administrator and Oracle Application Server Administrator for Jefferson Parish. The project includes the configuration and administration of Oracle Mobile Database Server to replicate data between Client Applications using Berkley DB offline databases used by Inspection and Code Enforcement to perform home inspections and sync back to the main Oracle 19c Database

Rob was hired in 2019 by New Era to assist Korey Alleman in the management and administration of the Oracle project. Among the many things he handles are: Oracle Linux 8 RAC setup and configuration, SQL Server administration with high availability configuration, Migrated Oracle 12c RAC Standard Edition database to 19.3 RAC Enterprise Edition, Migrated proprietary locally managed application from a local system to Azure Cloud environment, Designed new RAC database servers, network, and application server for migration from Oracle 12c to 19c, Performed Oracle database tuning, monitoring, and patching, Troubleshot slow database performance and implemented the necessary system changes, Ensured Linux Operating Systems remained at the

current patch level , Established and documented sound backup, recovery policies and procedures utilizing RMAN and DB visit, Assist development teams with application/database setup and configuration, Implemented database security procedures, Setup and maintained performance tuning on ESRI geospatial databases, Oracle Database Replication, installation, configuration and upgrading of Oracle server software, Manage, create, and implement high availability RAC databases with a disaster recovery plan, and Automated RMAN backups, geodatabase statistics gathering, alert log monitoring, and unused user locking.

### **SKILLS:**

**Database:** Oracle Database (8.17/9i/10g/11g/12c (12.1.0.2)), Oracle 9i Developer Suite, Oracle Application Server 9i/10g, Oracle Portal, MySQL, Quest TOAD/Tora, Microsoft SQL Server 2008, SQL Express, Microsoft Access

**Oracle:** Oracle Enterprise Manager, Automated Storage Management, Real Application Clusters (RAC), Partitioning, Recovery Manager (RMAN), Oracle Flash Recovery Area, Patching, Migration, Diagnostics, Oracle Mobile Platform, SQL Loader

**Cloud Computing:** VMWare ESX, VMWare vCenter, Amazon Web Services Practitioner Course

**Enterprise Management:** Peoplesoft 8 Human Capital Management package

**Operating Systems:** UNIX (Solaris Sunsoft/2.5.1-5.9), Linux (Red Hat 4-9/9AS/ES, CentOS 5.3-5.6, SuSE 6.2-8.1, Mandrake 7-9.1, Fedora, Windows 2000-2012 (Professional/Server)

**Web and Application Server:** Oracle Web DB, Oracle Application Server, WebSphere 8.5.5.5, Microsoft Internet Information Server (IIS) 4.0/5.0, CGI, and PERL, Apache, Tomcat HTML, ZEND Studio, Active Server Pages (ASP), JavaScript, Java, Microsoft FrontPage, Allaire Homesite, NetObjects Fusion

**Languages:** UNIX/Linux Shell Script, SQL, PL/SQL, PHP, Visual Basic, TCL, PERL, HTML, ASP, VBA, JavaScript, WAP/WML, ASP.NET, C/C++

**Mapping:** ArcGIS, ESRI

Worked as a Systems Analyst. Also diagnosed, troubleshot & resolved network & system problems. Maintained & administered Computer networks & environments. Established specs. and coordinated Production with software programmers. Replaced old cabling at the hospital

**SKILLS:**

Expertise on numerous card systems and software as they relate to student & employee badging. Installation & repair of ID card printers and assist in design and modification of software PC and server support and connectivity to card systems  
Assist in rollouts of Video Surveillance equipment

## **INNOVATIVE CONCEPTS**

## Thermal Camera Technology

# MOBOTIX THERMAL CAMERAS WITH VIDEO INSIGHT FUNCTIONALITY

i-PRO introduces the MOBOTIX M16/S16 thermal cameras with Video Insight's plug-in thermal feature functionality. With so much focus on maintaining the health of those entering businesses, schools, retail stores and other public facilities, this solution allows you to take the proper safety precautions for your staff and guests. Using the combined functionalities of MOBOTIX and Video Insight, an alarm is triggered when the pre-set temperature threshold is detected. Additionally, you can define up to 40 regions of interest to set up temperature readings, edit the temperature threshold and review detailed thermal readings at any time.

For health and safety that is a step above, the right choice is MOBOTIX and Video Insight.

## KEY FEATURES

- Ability to pre-set temperature threshold
- Live and thermal views
- Celsius or Fahrenheit temperature settings
- Event alarm is triggered when threshold is detected
- Define up to 40 regions of interest for temperature readings
- Ability to review detailed thermal readings

## Intelligent Analytics (AI/Edge)

i-PRO's intelligent analytics helps users to reduce the learning curve and resources required to operate the security system. From improving the accuracy of alarms and notifications to reducing the overall system bandwidth and storage requirements, i-PRO Intelligent analytics has you covered.

- Change your surveillance system from reactive to proactive and anticipate situations before they occur
- i-PRO surveillance users can gain added sight awareness with intelligent analytics via scene analysis
- Optimized feature solutions for schools, municipalities, and commercial facilities
- i-PRO analytics may be deployed either at the edge or server level providing a flexible deployment

## Analytics at the Edge

AI VMD

### AI-VMD

AI-VMD can identify between objects. The cameras actively read the scene and uniquely differentiate between cars, motorcycles, bicycles, and people. Additionally, AI-VMD offers users intelligent functionality such as line-cross detection, scene-change detection, loitering detection and directional detection.

AI People/Vehicle/Face Detection

### AI People/Vehicle/Face Detection

These analytics allow you to detect people, vehicles and faces, and it sends the metadata and best images to the server. They are compatible with i-PRO's multi-AI system, a search function that quickly finds people or vehicles through the video management software, Video Insight and Genetec.

AI Sound Classification

### AI Sound Classification

AI sound classification allows you to detect suspicious sounds, such as gunshots, screaming, vehicle horns or glass breaking.

\*External microphone is required

AI Privacy Guard

### AI Privacy Guard

When deployed on i-PRO AI engine cameras, AI privacy guard protects the privacy of individuals within the scene by applying a mosaic over their face in real time.

Non-Mask Detection

### Non-Mask Detection

Proprietary image processing and deep-learning technologies combine to create a unique application that allows any AI-engine-enabled i-PRO camera to recognize face masks and detect when a person is not wearing one via a pop-up alarm notification.

AI Occupancy Detection

### AI Occupancy Detection

When deployed on an i-PRO AI engine camera, AI occupancy detection will be able to detect the crowd congestion and send the pop-up alarm notification.

## **Server-Based Analytics**

### **Facial Recognition**

FacePRO Facial Recognition

#### **FacePRO Facial Recognition**

This solution automatically matches a person's face, using live or recorded video from i-PRO cameras, to a database of enrolled faces, notifying in real time when a face matches. It also allows face-based searching through recorded video.

### **Gunshot Detection**

Gunshot Detection

#### **Gunshot Detection by Databuoy (ShotPoint)**

This third-party integration uses acoustic sensors to monitor the environment. ShotPoint can precisely locate the event on a map and instantly communicate the information to the user via real-time notifications.

### **Weapon Detection (Visual)**

Visual Weapon Detection

#### **Visual Weapon Detection by ZeroEyes**

This third-party integration utilizes AI technology to monitor video images for weapons. In the case of an alert, ZeroEyes will confirm your alarm and launch a live alarm window notification to VI MonitorPlus client.

### **Vehicle Search (Finder)**

Vehicle Search

#### **i-PRO's Vehicle Search Solution**

The vehicle search server software identifies six vehicle types (sedan, van, SUV, trailer-truck, bus, and pick-up) and 10 vehicle colors (green, blue, brown, purple, yellow, red, pink, black, silver/gray, and white), allowing a user to quickly search through hours of recorded video to pinpoint a vehicle in question and create a report of where it was last seen and the direction it was heading.

### **Vape Detection**

Vape Detection

#### **HALO | Vape Detection**

The Halo smart sensor integrates with VI MonitorPlus to receive instant notifications when hazardous chemicals are detected, such as smoke, vape cigarettes (including products containing THC). This smart sensor can also detect gunshots, AQI conditions and spoken keyword triggers.

### **License Plate Recognition (LPR)**

License Plate Recognition

#### **VI License Plate Recognition**

The Video Insight license plate recognition plug-in allows you to automate any live license plate reading to rules or actions in VI (to enforce parking restrictions and more).

### **Area Scan Sensors**

Optex Red Scan Sensor

#### **Optex Red Scan Sensor - Area**

Red Scan series sensors can be added to Video Insight VMS the same way as a camera. These unique sensors utilize laser technology to check for motion in sensitive unreachable areas. Once triggered, this integration provides an alert notification with live windows, email notification, PTZ camera action, or any event designated in VI's rules manager by a user.

## Why i-PRO

## WHY i-PRO EXTREME SHOULD BE YOUR TOP CAMERA CHOICE

We provide industry-leading solutions to capture, record, manage and analyze surveillance video. We offer a complete comprehensive lineup of video surveillance products and solutions with the highest image quality, mission-critical reliability and the lowest total cost of ownership in the industry.

Our goal is simple: to make your life easier. We've reengineered our hardware and software into a plug and play platform that delivers enhanced point-to-point data security and enterprise level management all wrapped in powerful, intuitive applications.

### AT-A-GLANCE

- i-PRO Camera Quality
- 5 Year Warranty
- Color Night Vision
- Intelligent Auto (IA)
- H.265 Smart Coding
- Secure Communication
- Easy-Kitting Box Design
- Bundled with Video Insight Camera License
- Compatible with Major VMS's
- US-Based Support

### TECHNOLOGIES

# AFFIDAVIT

PARISH/COUNTY OF **Jefferson**

\_\_\_\_\_, (Affiant) who after being by me duly sworn, deposed and said that he/she is the fully authorized **President** of **New Era** (Entity), the party who submitted a proposal in response to RFP Number **0443**, to the Parish of Jefferson.

**Affiant further said:**

**(Choose A or B, if option A is indicated please include the required attachment):**

Attached hereto is a list of all campaign contributions, including the date and amount of each contribution, made to current or former elected officials of the Parish of Jefferson by Entity, Affiant, and/or officers, directors and owners, including employees, owning 25% or more of the Entity during the two-year period immediately preceding the date of this affidavit or the current term of the elected official, whichever is greater. Further, Entity, Affiant, and/or Entity Owners have not made any contributions to or in support of current or former members of the Jefferson Parish Council or the Jefferson Parish President through or in the name of another person or legal entity, either directly or indirectly.

there are **NO** campaign contributions made which would require disclosure under Choice A of this section.

Affiant further said:

Debt Disclosures

**(Choose A or B, if option A is indicated please include the required attachment):**

Choice A \_\_\_\_\_ Attached hereto is a list of all debts owed by the affiant to any elected or appointed official of the Parish of Jefferson, and any and all debts owed by any elected or appointed official of the Parish to the Affiant.

Choice B X There are **NO** debts which would require disclosure under Choice A of this section.

Affiant further said:

Solicitation of Campaign Contribution Disclosures

**(Choose A or B, if option A is indicated please include the required attachment):**

Choice A \_\_\_\_\_ Attached hereto is a list of all elected officials of the Parish of Jefferson, whether still holding office at the time of the affidavit or not, where the elected official, individually, either by **telephone or by personal contact**, solicited a campaign contribution or other monetary consideration from the Entity, including the Entity's officers, directors and owners, and employees owning twenty-five percent (25%) or more of the Entity, during the two-year period immediately preceding the date the affidavit is signed. Further, to the extent known to the Affiant, the date of any such solicitation is included on the attached list.

Choice B X there are **NO** solicitations for campaign contributions which would require disclosure under Choice A of this section.

Affiant further said:

That Affiant has employed no person, corporation, firm, association, or other organization, either directly or indirectly, to secure the public contract under which he received payment, other than persons regularly employed by the Affiant whose services in connection with the construction, alteration or demolition of the public building or project or in securing the public contract were in the regular course of their duties for Affiant; and

That no part of the contract price received by Affiant was paid or will be paid to any person, corporation, firm, association, or other organization for soliciting the contract, other than the payment of their normal compensation to persons regularly employed by the Affiant whose services in connection with the construction, alteration or demolition of the public building or project were in the regular course of their duties for Affiant.

Affiant further said:

Subcontractor Disclosures

**(Choose A or B, if option A is indicated please include the required attachment):**

Choice A X Affiant further said that attached is a listing of all subcontractors, excluding full time employees, who may assist in providing professional services for the aforementioned RFP.

Choice B \_\_\_\_\_ There are **NO** subcontractors which would require disclosure under Choice A of this section.

## Leviton Authorized Network Installer Certification

### Benecom Technologies - New Orleans, LA

Has met Leviton's Certification Program selection criteria and has successfully completed the program certification requirements. Therefore, **Benecom Technologies** is hereby certified as a Leviton Authorized Network Installer. Installations performed by **Benecom Technologies** that are compliant with TIA/EIA and/or ISO requirements are eligible to receive Leviton Network Solutions Extended Product and Performance System Limited Warranties.

**Benecom Technologies** has agreed to conform to all Leviton specified, TIA/EIA and/or ISO compliant installation practices in force at the time of installation. In addition, **Benecom Technologies** agrees to install Leviton approved products and category compliant cabling in compliance with program policies and related industry standards.

TIA/568 Series and ISO standards compliant links and channels are covered under Leviton Network Solutions Extended Product and Performance Warranties when installed by Authorized Network Installers. Leviton approved cable manufacturers must be used to obtain system warranties.

**Benecom Technologies** agrees to adhere to the Terms & Conditions of Leviton Network Solutions certified contractor program, and the Terms & Conditions of the programs Extended Product and Performance System Limited Warranties for the duration of their participation in the program. In no event shall Leviton be liable for special, indirect, incidental, consequential or punitive damages (regardless of the form of action, whether in contract or in tort, including negligence, gross negligence and strict liability), including, without limitation, lost profits, lost revenue, loss of data, technology, rights or services, interruption of business, costs of procurement of substitute products or other economic damage arising from the failure of a system installed by a Leviton certified contractor.
