Product Q&A

Urrea Quick Release Pear Head Ratchet, 5249, 7" Long, 3/8" Drive

The design and dimensions on 3/8" ratchets are ideal for doing assembly and maintenance work on electronic, pneumatic/electric, and electricity-controlled equipment. The maximum recommended torque for 3/8" ratchets is 1800 inlb. There are two attachment systems for sockets and accessories; the traditional spring-loaded ball detent, and the QUICK RELEASE system that allows you to attach and detach sockets and accessories to the ratchet. Ideal when working with grease and oil. Main forged Chrome-Vanadium micro alloy steel. Retaining ring which makes it easy to access mechanism. Allows the change of parts with greater ease and less chance of accidental disarming. The teeth were increased, from 24 to 48 teeth, improving the recovering angle of 15° to 7.5°.

Product Specifications

BRAND	Urrea
MANUFACTURERS PART NUMBER	5249
OVERALL LENGTH	7"
GEAR TEETH	48
HEAD TYPE	Pear
DRIVE SIZE INCHES	3/8
COLOR FINISH	Chrome
DRIVE SIZE	3/8"
WEIGHT LBS	0.595
SPECIFICATION	FEDERAL GGG-W-641E, ASME B 107.10M, ISO 3315, SAE AS4283, DIN 3124
LOCKING TYPE	Ball
DESCRIPTION	Ratchet
TYPE	Quick-Release
