STANDARD INSURANCE REQUIREMENTS FOR BIDDING PURPOSES

All required insurance under this bid shall conform to Jefferson Parish Resolution No. 113646 or No. 113647, as applicable. Contractors may not commence any work under any ensuing contract unless and until all required insurance and associated evidentiary requirements thereto have been met, along with any additional specifications contained in the **Invitation to Bid**. Except as where otherwise precluded by law, the Parish Attorney or his designee, with the concurrence of the Director of Risk Management or his designee, may agree on a case-by-case basis, to deviate from Jefferson Parish's standard insurance requirements, as provided in this Section. Vendors requesting deviation therefrom shall submit such requests in writing, along with compelling substantiation, to the Purchasing Department prior to the bid's due date. Prior to contract execution and at all times thereafter during the term of such contract, contractors must provide and continuously maintain all coverages as required by the foregoing Resolutions, and the contract documents. Failure to do so shall be grounds for suspension, discontinuation or termination of the contract.

For bidding purposes, bidders must submit with bid submission a current (valid) insurance certificate evidencing the required coverages. Failure to comply will cause bid to be rejected. The current insurance certificate will be used for proof of insurance at time of evaluation. Thereafter, and prior to contract execution, the low bidder will be required to provide final insurance certificates to the Parish which shall name **the Jefferson Parish, its Districts Departments and Agencies under the direction of the Parish President and the Parish Council** as additional insureds regarding negligence by the contractor for the Commercial General Liability, Workmen's Compensation Insurance and the Comprehensive Automobile Liability policies. Additionally, said certificates should reflect the name of the Parish Department receiving goods and services and reference the respective Jefferson Parish bid number.

These lists can be custom profiled to meet Jefferson Parish Public Library's needs. Please refer to our response to Section 2.0 Specifications for further details.

Baker & Taylor has been leading the industry in providing libraries customized technical services for over forty (40) years. Merchandisers' Variety Program

The Merchandisers' Variety Program allows the Library to create separate profiles by subject category. The key criteria in title identification for these categories is the prepublication purchasing threshold, which represents Baker & Taylor's anticipated demand for these titles.

The Merchandisers' Variety Program addresses all collection areas, including those that are typically not covered in review journals. There are different thresholds for different categories. Category coverage includes adult fiction genres and nonfiction categories, children's and teen areas, spoken word, Spanish language, music CD and video DVD.

Examples include, but are not limited to:

Adult & Children's Books
 Adult general fiction
 Adult mystery
 Adult romance
 Computer books
 Cooking
 Crafts and hobbies
 Children's chapter books
 Children's concept books
 Children's easy readers

The Merchandisers' Variety Program can stand by itself or be integrated into a library's FirstLook™ profiles so that titles are delivered only one time, supporting efficient selection and integration with all collection development processes.

How Lists Can Be Generated:

Creating lists of titles - Title Source 360™ allows for the creation of multiple lists (also known as Carts). After a user has initiated a search, they can then pick and choose which cart/list they want to add to on a title by title (or complete search result) basis. Title Source 360™ also has market-specific electronic selection lists covering popular genres, industry current events, and titles in high demand. These lists allow the user to look up categories such as "Best Seller list", "Award Winners" etc., view them, add them to an existing cart or to a new cart, and order them via TS360™. E-Lists are displayed by and may be browsed by categories and sub-categories. Each title within a cart/list can contain library specific data (i.e. location, collection type, fund, etc.).

How Bibliographic Tools Interface with Sirsi:

Jefferson Parish will be able to utilize Baker & Taylor's Title Source 360™ to search for materials and create carts. Jefferson Parish will be able to download these carts and brief MARC records

into Sirsi. After running the appropriate reports in Sirsi, these carts can create bibliographic records and order records in Sirsi Acquisitions.

collectionHQ

collectionHQ, used by many of the top library systems in the U.S., U.K. and Australasia, is based on the proven Evidence-Based Stock Management (EBSM) methodology. By analyzing detailed circulation patterns, the methodology provides action plans to help librarians develop and manage collections, saving time and money, improving circulation and aligning the collection with local demand.

collectionHQ's powerful toolset provides valuable insight and clear direction so that librarians can perform tasks that used to take weeks or months in a matter of minutes. From collection maintenance to collection development, collectionHQ eases workloads and frees up staff's time to work on other important areas within the library.

collectionHQ harnesses evidence of a collection's usage. This allows public libraries to analyze their demand and use that to influence subsequent purchases based on the proven EBSM methodology. This allows for detailed spending plans to be quickly created at the branch level.

Additionally, collectionHQ's unique and powerful 'Discovery tool' gives clients access to circulation data collected from over 250 North American Public Libraries. Using 'Discovery', they are able to carry out searches on this data and compare this against their own holdings. They may also identify specific items that are circulating well in other Public Libraries which they do not have in their own collection at present.

Having access to this very powerful library circulation data allows selectors to make more informed selection decisions, both quickly and efficiently, with the added peace of mind that decisions have been backed up by hard evidence.

ESP – Evidence-Based Selection Planning

Baker and Taylor, in conjunction with collectionHQ, has developed a new service, Evidence-Based Selection Planning (ESP), that brings the art of Baker & Taylor's collection development expertise together with the science of collectionHQ's data analytics, to create a decision support system integrated with Title Source 360 to equip libraries with the information to select the right titles and quantities, for the right locations.

ESP is a provided service that supports the purchasing of new materials using evidence from collectionHQ and the title identification from Baker & Taylor. ESP identifies the top forthcoming titles based upon past circulation by author, subject and series, determines the locations where copies need to be placed to satisfy patron demand and monitors budgets through the use of collectionHQ spending plans. Pricing of ESP is determined by the library's varying levels of integration with Baker & Taylor and collectionHQ services. Although designed to work together, utilization of collectionHQ is not a requirement for ESP.

BEST SELLER DEFINITION:

Best sellers are titles for which Baker & Taylor has contractual obligations not to release prior to street date. The street date is determined by the publisher/producer and is a data element displayed in Title Source 360™.

It is recognized that publication dates announced by the publishers/producers do not mean “street date”. Publication dates are flexible and serve as a guide from the publishers/producers as to when a title might be for sale. Therefore, any item without a street date in Title Source 360™ will not be defined as a “Best Seller” for the purpose of this agreement.

Baker & Taylor offers further definition of the titles and services included:

Eligible titles:

- Must have an established street date as reported in Title Source 360™.

- Must be delivered to Baker & Taylor by publishers/producers in a sufficient amount of time prior to the designated street date.

Additionally:

- Baker & Taylor monitors pre-publication backorders on a daily basis looking for titles that are building significant backorder volume in the public library market. We have created special monitoring tools and operational workflows to insure that these high visibility/high demand titles are getting special attention in all areas of our operations so that these most popular titles are received at the library before street date.
- Our Collection Development lists cover a wide variety of bestselling editions. As all predicted bestselling titles do not have the same broad-base reader/viewer appeal, all may not qualify as high-visibility titles. Eligible titles for this analysis will be those identified by B&T Buying staff as high-visibility titles. Collection Development will work with the Library to identify any high-visibility titles within the monthly selection lists.
- We recommend final quantity order for each title should be placed 2 months prior to the scheduled street date to ensure delivery of all copies.

Baker & Taylor abides by all the rules and regulations as set forth in the publishing industry. Baker & Taylor will work with our operations team to ensure bestsellers/popular new titles are released in our system as soon as possible based on publisher/producer guidelines. Once titles are released in our system, we will catalog and process materials and ship to the library prior to street date.

Baker & Taylor's Title Source 360™ is fully compatible with SirsiDynix Symphony. Title Source 360™ supports EDI ordering via Sirsi. Selection lists, created from items selected by Jefferson Parish and placed in Title Source 360™ carts, can be delivered to a Jefferson Parish Title Source 360™ ID. From there, they can be manipulated, downloaded, and ordered via EDI like any other cart.

Baker & Taylor offers EDI confirmations with Siri, which will provide Jefferson Parish with confirmations, backorders, and cancellations.

In addition, if the library decides to utilize shelf-ready cataloging and processing services from Baker & Taylor's CLS division, the EDI orders can also be "enriched" which will allow for communication of branch, fund or collection codes to our CLS division.

Electronic invoicing is available for orders placed with Baker & Taylor. The invoice files are available for the library to pick up from our FTP site, <ftp.bakertaylor.com> using Jefferson Parish's login username and password. The library can retrieve confirmations in the .out directory of our FTP site. After the file is retrieved from the FTP site, the file will receive lines of the PO ordered and close order records for materials invoiced in the SIRSI Acquisitions system.

Baker & Taylor has implemented a new standing order module to Title Source 360™ where libraries can easily view and manage all of their popular series, authors, and award winners on standing order. This automated acquisitions update will streamline and increase the speed of the material ordering process.

SECTION 4.0 SHIPPING AND BILLING

All spoken word audiobooks will be packaged (packed and marked) in cardboard boxes in accordance with the best commercial practices. Dunnage to protect cases and disc from being cracked or damaged may consist of paper or plastic materials.

Each box can contain a packing slip – boxes containing a master packing slip are indicated with a capital ‘M’ on the address label. Baker & Taylor has developed a detailed packing list which

enables the library to check in the order title by title, noting the price and quantity. Titles are listed alphabetically, by title. Baker & Taylor's ATS number (authorization to ship) is included on each invoice and packing slip and will allow the library to match the packing slips to invoices.

Baker & Taylor will accept the authorized return of items that are damaged, defective, incorrectly shipped, or incorrectly processed. Baker & Taylor's standard return policy complies with the guarantee policy in bid 50-00127789. To make a return, Jefferson Parish would contact their assigned Account Coordinator within the time period specified to obtain an authorization number for your return and a Baker & Taylor issued return tag [return shipping will be paid for by Baker & Taylor]. Once the authorization has been obtained, the library can either have a no charge replacement shipped to the library, or may have the credit applied to the invoice in question. Credit memos will include the purchase order number, account number, title, and ISBN. Restocking fees will not be incurred. Please see the enclosed returns policy, Exhibit 5, for further details on credits and returns along with a sample credit memo.

Baker & Taylor will send all items Free Shipping, FOB Destination with inside delivery.

Orders placed with Baker & Taylor will be based on the supplied unique identifier assigned to each item [ISBN/UPC]. No substitutions will be made for titles.

Baker & Taylor can profile Jefferson Parish's accounts to ensure that each purchase order is invoiced and shipped separately with the purchase order number appearing on the invoice.

Baker & Taylor does not have a replacement policy for individual CD's lost or damaged in circulation. Due to the low overall cost of materials outlined in this bid, we ask that you re-order the item or go directly to the publisher. We have found that the total cost of ownership with our model is lower than with vendors offering replacement policies.

Invoicing will occur on the date cataloging and processing is completed and the materials are either shipped, or placed in storage at a Baker & Taylor facility. Baker & Taylor will submit invoices in duplicate. Titles can be listed alphabetically by title. If at any point the Library changes their requirements titles can also be listed by artist or purchase order number. Standard Baker & Taylor invoices will list the purchase order number, title, quantity, publisher's/producer's list price, discount, extended price, and total price. Processing and cataloging charges will also be listed along with sales tax. Invoices will also include the invoice number, date, account number, the bill to address, ship to address, and remit to address. The invoice number is listed on both the invoice and the packing list. Baker & Taylor's ATS number (authorization to ship) is included on each invoice and packing slip and will allow the library to match the packing slips to invoices. Please see Exhibit 6 for a sample standard spoken word audiobook invoice.

In addition, Electronic Invoicing is available for orders placed with Baker & Taylor. The invoice files are available for the library to pick up from our FTP site, <ftp.bakertaylor.com> using the library login with its username and password. The library can retrieve confirmations in the .out directory of our FTP site.

For shelf ready materials, CLS will employ the appropriate amount of resources to maintain the fastest possible turnaround time. Our average turn around for fully cataloged and processed material (non-rush) is 10 days after receipt of material from the publisher. Baker & Taylor has streamlined its receiving and operational process for street date material to ensure the fastest possible turn time. Our commitment for those titles that have established street dates will be to ship the material 10 days after receipt from the publisher. Materials are typically received from the publisher two weeks prior to street date thereby giving CLS ample time to provide the materials by street date.

Baker & Taylor is capable of setting up accounts to ensure a cancellation period can match a certain requested number of days or order fulfillment requirement. Jefferson Parish will be able to contact their assigned account coordinator via phone, email, or fax to request specific cancellations.

SECTION 7.0 CATALOGING

Baker & Taylor will comply with the cataloging requirements as outlined by utilizing our CLS cataloging methodology.

Customized Library Services' custom cataloging is Baker & Taylor's premier service. Baker & Taylor has performed in-house, online cataloging, editing, and maintenance for libraries since 1989. Our preferred method is to access the Library's ILS using the Z39.50 protocol. Customized Library Services has partnered with The Library Corporation (TLC) to create a state of the art cataloging methodology that leverages Z39.50 protocol for accessing the library's database and a resource pool of records from the Library of Congress and any Baker & Taylor created records. This technology allows our CLS catalogers to have access to the most current version of the library's cataloging records without the overhead of being directly online. Records obtained from the Library's database are saved to a library specific work file located in our secure cataloging utility. The records in the work file are used in the creation of spine labels and as a vehicle for providing item-linking information. Original cataloging (described below as well) will be performed as needed.

Major Features of the CLS Preferred Cataloging Methodology (Z39.50):

Only authorized CLS catalogers have access to the library's database and work file. The cataloger will process material first by searching for a matching record in the library's database and work file simultaneously.

A successful search occurs when our cataloger matches the data elements found in the appropriate record tags. CLS considers the title, author, imprint/publisher, edition and date of publication when matching a record. During the CLS profiling, the project team will document the appropriate attributes for matching records. When a matching record is found, the appropriate item level information (examples: barcode number, list price, collection code, etc.) is keyed and the record is saved to the library's work file.

If a record is not found in the library's database or work file, the CLS Bibliographic Database is searched, followed by LC MARC and the resource databases of TLC. The CLS Bibliographic Database contains all CIP records upgraded to full MARC standards by CLS catalogers, as well as new records created by CLS original catalogers.

If the record is not found in the above resources, the Library may also choose to have CLS search OCLC on their behalf for records not found in the library's catalog. Once a record is located in

OCLC it is saved to the Library's work file and the record is updated to the Library's specifications. The option of utilizing OCLC will also help to minimize the Library's need for original cataloging. Please note that the process of using OCLC is available upon CLS' receipt of a signed third party agreement which grants permission to our catalogers to access OCLC on the library's behalf. There are no additional charges from CLS for this service. However, it should be noted that all corresponding OCLC charges will be the responsibility of the Library. On a weekly basis, an electronic file is sent to OCLC to update the library's holdings for all contributed records.

When a full matching record is found in one of the resource databases, it is upgraded to meet the library's specifications and the appropriate item tag is keyed. The record is then saved to the library's work file.

If the matching record found is not a full level record, the record is upgraded to meet LC standards and is saved to the CLS Bibliographic Database. The record is then further edited to meet the library's specifications and the appropriate item record is keyed. The record is then saved to the library's work file. The exception to a full level record would be that some AV pre-pub records are not upgraded to full MARC standards. However, these records are upgradeable to the Library's local standards. If a matching record cannot be found in the multi-database search string, a request is forwarded to an original cataloger in the CLS department. Our original catalogers will create a record according to RDA rules. LC authority files are used to validate author and subject headings. Once the record is created, it is saved into the CLS Bibliographic Review File. Once the record has been reviewed and approved, it is saved in the CLS Bibliographic Database. The library's assigned cataloger is notified and the record will be edited to meet the library's specification and appropriate item tag is keyed. A sample MARC record is enclosed in Exhibit 7.

Every title sent to the library will have a full MARC record with the appropriate item tags. The records will either be new additions to the library's catalog, edited and modified to the library's standards, or existing records from the library's catalog.

When the cataloger has completed the order, the call number and bibliographic information are extracted directly from the MARC record for us in the digital media processing phase.

The file of records will be put on the B&T FTP server for the library to retrieve and load. Records are compatible with the Library's ILS. The records are maintained on the Library's work file for historical reference.

Discount and pricing information has been submitted via pages 6-9 of the Jefferson Parish Invitation to Bid. Your discount will be applied to the publisher's list price at the time of invoicing. Please note that a publisher's list price is subject to change without notice. Further details regarding pricing and discounts have been outlined within Baker & Taylor's Exhibits 1-3.

SECTION 8.0 PROCESSING

Baker & Taylor will comply with the physical processing requirements as outlined by utilizing our processing methodology.

The CLS department has over 300 trained in-house professionals staffed to handle the library's customized requirements. These staff members are dedicated to meeting the library's requirements and exceeding your expectations. Our commitment to excellence and doing the job right the first time is unmatched in our industry. After cataloging is complete, the processing department completes the physical processing of each item. The processors review the processing instructions gathered at the site visit. Following the DMP (digital media processing) instructions for spoken word audiobooks, the original vendor artwork is digitally reproduced to your exact specifications. As a result, all of the artwork information and all of your vital label details, such as branch and barcode information, now fit on a single custom printed sheet that is inserted into a sturdy case. DMP also helps reduce the risk of theft as the new artwork now has your library information permanently

embedded. B&T also offers eye-readable and scan-able disc hub labels and multi-disc set processing.

RFID

CLS Shelf Ready Processing can also include the application and linking of RFID tags. Baker & Taylor's Customized Library Services has been providing RFID services for print and audiovisual material since 2001 and we have linked, printed and/or applied tags for millions of items. As the number of vendors and product offerings has grown with regard to RFID technologies, CLS too has grown in our vendor relationships and linking and application capabilities. We currently work with 3M, Arcus, Bibliotheca, Envisionware, FE Technologies, ITG, Lib Convert, Libramation, MKStaff, PV Supa and Tech-Logic. As this is a developing technology with unlimited potential for library use, Baker & Taylor's Customized Library Services will continue to support the needs and requirements of our customers.

After the material is fully processed, it is ready for the final and most important stage in our CLS process, back audit.

Back Audit

The back audit team is the final step in ensuring the material we ship to the library is of the highest quality and is in compliance with the library's profiled specifications. The CLS back auditors inspect each order by cross referencing the completed processing and the processing instructions gathered at the site visit. Once the library's material passes this stage, the order is ready to be staged for delivery to the library.
