Fehr Load Rated Anchor Shackles.  
Hot Dipped Galvanized and Drop Forged with an Oversized Alloy Pin.  
Safety Factor of 5:1.  
Stamped with Working Load Limit and Marked for Traceability

Fehr Brothers offers a variety of long lasting and robustly designed shackles to meet your needs including load rated anchor shackles, chain or ‘Dee’ shackles, safety shackles, commercial shackles, and a range of stainless steel shackles.

The rounded design of anchor shackles allows them to take loads from many directions without developing significant side load. The screw pin allows for easy attachment and detachment with a hole in the pin for securement. Our anchor shackles form an integral part for many applications including industrial, agriculture and marine rigging systems.
