Breanna Lee, ESSER Coordinator  
Forrest County Agricultural High School District  
215 Old Highway 49 East  
Brooklyn, MS 39425

**RE: RFQ Architectural/Engineering Services**

Dear Ms. Breanna Lee,

**Pivotal Engineering, LLC** is pleased to submit this proposal to Forrest County Agricultural High School District for the **Architectural/Engineering Services**. Pivotal's team understands the services to be performed and will make a strong commitment to provide services as described in the RFQ packet. The Pivotal team brings wealth of skills, and experience in data collection, data management, field inspection, cost estimation, planning, civil engineering, environmental engineering, mechanical engineering, construction management, project management and program management. We have the needed experience and capabilities to provide the Forrest County Agricultural High School District with the most effective and efficient approach for the architectural/engineering services and management related, but not limited to, the School Facility Upgrades and Improvements.

We acknowledge the scope of services and are ready to provide quality services within the schedule for all phases of inspection (daytime and nighttime), data collection management (e.g., monitoring incoming inspection data, incoming 311 tickets, QA/QC, summary of findings) and deliverables (e.g., final report, inspection records, electronic file transfers).

Pivotal affirms that there is no conflict of interest with the firm and its proposed team in performing work for the Forrest County Agricultural High School District, nor any possible conflicts that might impair Pivotal's ability to perform if awarded the contract, including any familiar or business relationships that Pivotal including the proposed sub consultants and the firm's Principals have with the Forrest County Agricultural High School District and its employees.

The **Pivotal Engineering, LLC** team would appreciate the opportunity to work with the Forrest County Agricultural High School District. We are grateful for your consideration of our proposal and look forward to the potential opportunity with your team.

I, Avinash Mehta, will serve as representative of Pivotal Engineering, LLC.

Sincerely,

Avinash Mehta, PE | Principal  
Pivotal Engineering, LLC

## Section 1: Introduction

The **Pivotal Engineering, LLC** - here in after called “Pivotal” brings an unparalleled depth of capabilities on Architectural, Civil, Geotechnical, Mechanical, Electrical, Street Lighting, Structural, Environmental Engineering, Construction Management, Construction Inspection, and Topographic Survey experience. Pivotal’s capabilities will provide the Forrest County Agricultural High School District with the most effective and efficient approach for providing architectural/engineering services and management related, but not limited to School Facility Upgrades and Improvements.

The foundation of our team is comprised of both their well-established working relationship and the comprehensive skill set they have collectively. Each Pivotal staff brings a strong background in one or more of the following disciplines:

- Civil Engineering
- Environmental Engineering
- Structural Engineering
- Mechanical Engineering
- Electrical Engineering
- Construction Management
- Construction Inspection

Under the disciplines, each Pivotal staff brings strong technical skills not only in the fundamental of engineering design, but in the latest trends, approaches and software needed for modern solutions. The Team is well established in database management, geographic information systems (GIS), computer-aided design (CAD) and real-time monitoring equipment. Pivotal’s capabilities will provide Agricultural High School District with the most effective and efficient approach for providing high quality services.

As guiding values, Pivotal Staff strives for open communication and continual improvement. With each project, internal processes and methodologies are revised to ensure that planning, design and decision-making conversations are facilitated with efficiency and effectiveness. Each concept is vetted with considerations for innovation, resiliency, added value and technical feasibility. Engineering design must encompass classical theory, industry standards, modern technology and a touch of revolution.

Our integrated staff will provide an optimized concurrent engineering environment that provides an opportunity to substantially reduce the design time and total cost of a project. Benefits of our integrated staff

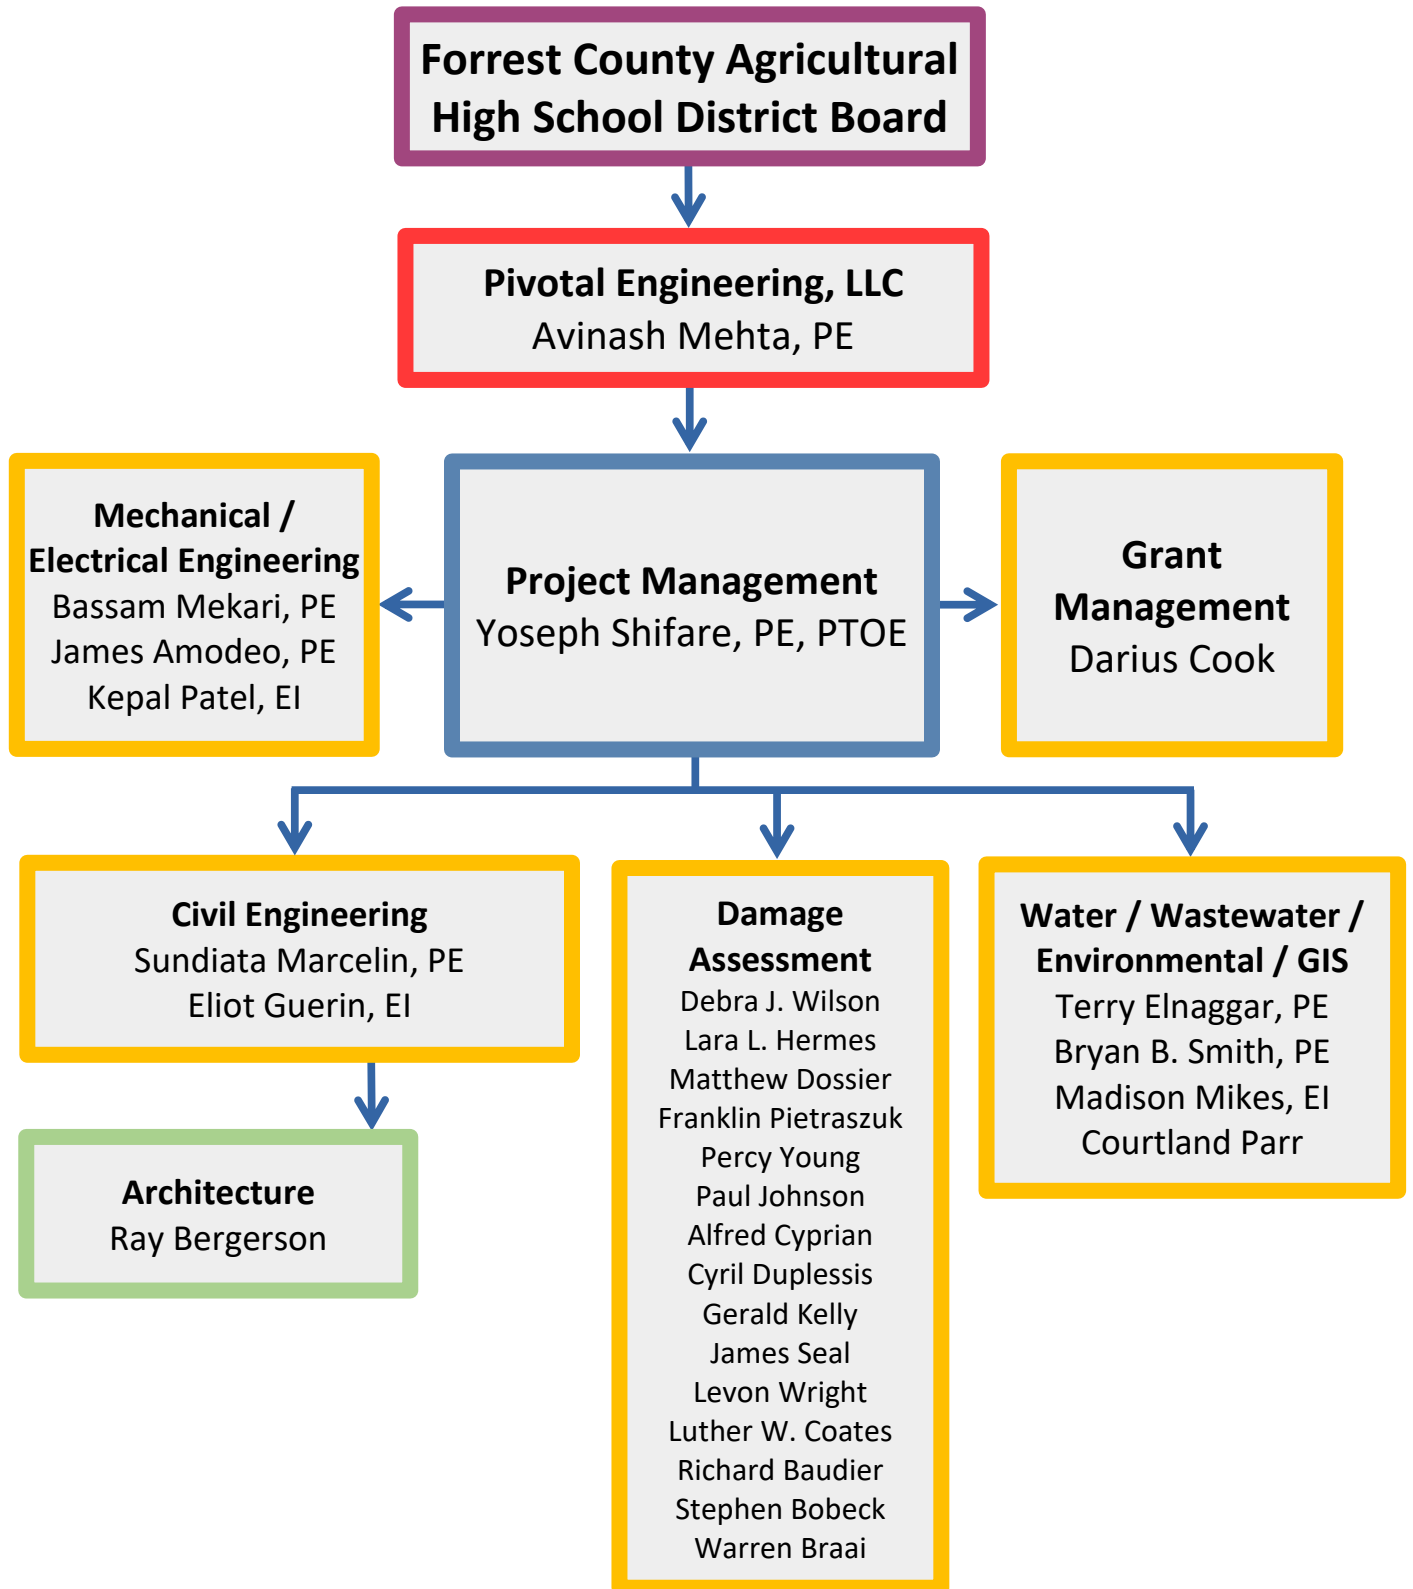

with members of various skilled disciplines enable a simultaneous contribution to an early project definition and increase the likelihood of a reduced lifecycle cost by avoiding costly alterations later in the design process.

Our management team is comprised of experienced managers and task leaders with proven leadership, thoughtfully bringing together capable team members with exceptional technical skills and supporting them with good QA/QC processes. Open lines of communication and weekly internal conference calls will ensure that the project is managed successfully, on time, and within budget and schedule.

Pivotal is committed to defining the project and setting expectations as our first step toward making that project a success. We as a team will apply various techniques for project estimation and cost control including:

- Set Expectations Early, Review Often
- Planning the Project Budget
- Calculating a life cycle cost benefit analysis
- Keeping Track of Costs
- Establishing a Communication Plan
- Effective Time Management
- Project Change Control
- Use of Earned Value to Monitor Both Cost and Schedule

## Section 2 Organizational Chart

## **Section 3: Specialized Experience**

### **3.1 Pivotal Engineering, LLC**

**3.1.1 Company Profile:** Pivotal is a full service engineering design firm based in New Orleans, Louisiana. Pivotal has established a reputation for providing superior service to its clients and delivering quality work on time and within budget. Pivotal's principals and staff have in excess of 200 years of combined experience in architectural, civil, mechanical, electrical, structural, environmental engineering, construction management, construction inspection and program /project management for both public and private entities across the Gulf South Region.

Pivotal Engineering is currently providing these engineering and management services to many municipalities and state agencies in the region including; The City of New Orleans, Jefferson Parish, The City of Shreveport, The City of Kenner, St. Charles Parish, and St. John Parish. These services have also been provided to private clients such as Entergy, Waste Management, and private developers. Pivotal Engineering has in depth understanding of local, state, and federal governmental agencies procedures and regulations.

Pivotal has worked with private developers and government agencies to help deal with the challenges of economic revitalization, infill development and brownfield reclamation in order to accommodate the growing infrastructure needs of urban cities. Our primary focus begins with assisting public sector agencies and private development companies to effectively plan to accommodate growth in an environmentally sustainable manner. We have assisted urban renewal projects throughout all stages of project development including: analyzing zoning issues, planning commission interaction, conducting public hearings, and fostering community visioning and support.

Pivotal is a certified Small Business Enterprise with both the Small Business Administration and the New Orleans Regional Transit Authority. Furthermore, Pivotal is a Disadvantaged Business Enterprise with City of New Orleans, Sewerage &

Water Board of New Orleans, Louis Armstrong New Orleans International Airport, Harrah's New Orleans Casino & Hotel, and the Housing Authority of New Orleans (HANO). Pivotal Engineering is also certified by the Louisiana Department of Economic Development as a Small Entrepreneurship SE (Hudson Initiative) firm.

Pivotal Engineering, LLC is conveniently located in the center of New Orleans. Since its inception, Pivotal's main office of operations has been at 1515 Poydras St. Suite 1875, New Orleans, LA. 100% of the work assigned to Pivotal will be performed from the main office.

### 3.1.2 Experiences with similar projects

Pivotal Engineering team includes senior civil and environmental engineers and technicians with extensive experience and excellence in managing projects from cradle to grave while providing value engineering, which saved our clients hundreds of thousands of dollars. Our staff was essential in helping metropolitan New Orleans in expediting its post Katrina recovery by handling and completing over 50 critical City, Parish and/or FEMA funded projects. The current staff of Pivotal has extensive experience managing a variety of complex projects from conception to construction.

Proven with experience, Pivotal is routinely retained by Fortune 500 companies and government agencies to provide compliance solutions. The following is brief summary the team's experience.

#### Experience with School Design & Construction

##### (1) Lincoln Elementary School for the Arts New School Design; Jefferson Parish, LA

Pivotal was retained by Jefferson Parish School Board to provide engineering services for Lincoln Elementary School. The school building is 85,000 square feet. Our scope was to provide the full MEP design services. The frame was a metal building and had one main community center, a 2 story library, kitchen, Cafeteria and classrooms. The construction budget was \$18,000,000.

The main scope consisted of:

- HVAC consisted of RTUs and Splits with Hot Gas Reheat (307 tons)
- A full Blow Building Management System with a manual bypass
- New fire Alarm System
- Automatic Sprinkler System
- PA System
- CCTV system
- Plumbing

- Electrical

##### (2) MIMOSA Elementary School HVAC Systems Replacement; Luling, LA

The scope consisted of removing all of the outdated DX Split System HVAC units and replace them with a centralized 4 pipes chill water systems (2 – 150 tons screw type, air cooled chillers), update the Power Distribution Grid and increase its capacity to compensate for the increased power demand, change the hot water boilers and all related pumps, ventilate the classrooms as required by ASHRAE and IBC regulations and add few classrooms to the existing floor plans. The project was challenging do to the lack of existing as-built which made our task more difficult since we had to tie in to existing water system, power grid and sewer system. Our engineers performed detailed field inspections in order to determine how to integrate with existing utilities and avoid any potential conflicts. The project was completed without any change orders on time and within schedule.

In the long term, the new system designed will provide a cost savings of approximately \$10,000 - \$15,000 per year to the St. Charles School Board. Pivotal was also responsible for providing staff to conduct baseline, daily, and clearance asbestos air monitoring during the removal of asbestos piping.

Work scope summary consisted of: MEP, Electrical, Architectural, Structural, Civil and Environmental.

### **(3) Ames (Collins Elementary) Montessori School Renovations and Expansion; Jefferson Parish, LA**

This project consisted of renovating an existing portion of the school (Kitchen and Cafeteria) and adding a new 30,000 sq ft wing for classrooms. Pivotal's scope was to provide full MEP design services.

Pivotal personnel were very instrumental in saving Jefferson Parish School Board a \$250,000.00 unexpected Change Order to remove the newly installed 6" Fire Main underground during the Construction Phase and replacing it by an 8" line as requested by the Parish engineering department. Although the civil engineering portion of the work was not part of our scope, the school board contacted Mr. Mekari, currently Pivotal's MEP project manager and asked him if he can look into this issue and resolve it. Mr. Mekari then discovered that the original Civil Engineer bid set showed a 6" underground Fire Line however, his permit set was modified to an 8" Fire Line as demanded by the Parish. Not only the change order was very costly but it was going to delay the school from opening on time which can cause a huge logistical problem to the board. Pivotal's personnel "stepped up to the plate" and were able to prove to the Jefferson Parish Engineering Department that a 6" line would be sufficient although their permit documents that was submitted by the previous Civil Engineer

called for an 8" fire line to be installed. Consequently, Mr. Mekari demonstrated and convinced Jefferson Parish Engineers after several meetings with back up hydraulic calculations and he was able to obtain an actual letter from the NFPA referring to code exceptions for this project that a 6" line would be acceptable by code. Not only this resulted in saving of \$250,000.00 but it also allowed the schedule to be met and the school to open in time.

Another setback in the civil design was also discovered by our team as well in the civil scope three weeks before construction completion and school opening date. The previous Civil Engineer had the wrong slope and invert measurements on the main sewer line thus, the newly installed school sewer line did not have enough slope to tie in to the city sewer line. To resolve this problem, Mr. Mekari recommended a lift station which was the only feasible option. The usual delivery date for a lift station is 6 weeks; however, Pivotal's staff was able to design and locate a temporary lift station to be installed. The lift station was designed, ordered, delivered and installed within that same week and school was able to open on time. Again, this shows the due diligence of our staff and their engineering capabilities.

Our main scope summary consisted of:

- HVAC consisted of RTUs and Splits with Hot Gas Reheat for better humidity control (275 tons)
- Automatic Sprinkler System
- PA System
- CCTV system
- Plumbing
- Electrical Power Distribution and Lighting
- Fire Alarm
- Civil design value engineering

#### **(4) St. Charles Parish School Board Transportation Facility, St. Charles Parish, LA**

St. Charles Parish School Board's East Bank school bus maintenance facility was 50% over capacity of the existing facility, resulting in delays in both service and maintenance as well as making training difficult. Pivotal was retained to develop the conceptual design for an expanded facility. The improved facility will provide additional service bays, parts storage, new training/meeting room, driver lockers, and offices for dispatch, maintenance and accounting. More efficient electrical and mechanical systems will be incorporated into the new facility. The design will also include new fueling facilities and expanded parking areas, as well as a state-of-the-art bus wash station.

#### **(5) R.J. Vial Elementary School Renovations Paradis, LA**

Pivotal was retained by St. Charles Parish for the R.J. Vial Elementary School Project. Pivotal designed the 20,000 sq. ft. classroom renovations to the existing layout. The main scope consisted of adding new fire walls, removing asbestos material, adding new VAV HVAC system, upgrading the electrical network to support the added loads, new lighting and Fire Alarm system.

#### **(6) Albert Cammon Middle School, St. Rose, LA**

The main scope consisted of adding a total of 21,000 sqft to the existing school building. The new additions (2 buildings) consisted of a new locker room for boys and girls with new bathrooms. This locker room connects to the existing gymnasium. The second building consisted of a new classroom wing with 21 classrooms, an art room and a music center. Pivotal

engineering was the prime and the professional of record on this job and handled all of the A/E disciplines in house. Some of our responsibilities consisted of meeting with the teachers to finalize the floor plan during the schematic phase and update the construction budget throughout the different phases to stay within client's budget. Since all of the A/E work was performed in our office, there were no conflicts between the disciplines which resulted in eliminating unnecessary change order during the construction phase. Other responsibilities consisted of conducting site construction meetings during the construction administrations, providing meeting minutes, reviewing and approving pay applications.

Our scope summary consisted of: Architectural, MEP, Civil and Structural designs. The project value was \$3.8 million.

#### **Experience with roadway projects**

Pivotal's engineers have with extensive experience and excellence in performing roadway and bike trail design including street vertical and horizontal geometry, drainage, water, sewer based on the requirements set in CNO, S&WB, LDOTD, AASHTO, FHWA and ADA requirements/specification and standards. In addition Pivotal Engineers have extensive experience in water and wastewater design, environmental site assessments, remediation, air, waste and water permitting and compliance, environmental Study services for a Categorical Exclusion ("CE"), Record of Environmental

Considerations (“REC”), site-specific Environmental Assessment (“EA”) in accordance to the National Environmental Policy Act (“NEPA”). Additional experience includes asbestos and lead inspections and the development of abatement plans.

We ask that you note the following projects that represent the specialized experience under the category of design engineering service:

### **(1) RR016 BW Cooper, Gert Town Dixon Group C, New Orleans, LA**

Pivotal is retained by City of New Orleans to provide roadway full reconstruction including subsurface improvements (drainage, sewer and water line improvement). The project entails roadway rehabs 9 blocks (3245 ft) in the neighborhood of B.W. Cooper, Gert Town and Dixon. This design of multiple streets are required to meet rehabilitation goals set by FEMA and CNO and water line replacement program set by S&WB. The project also included identifying and designing the geometrics of the streets, preparation of capital cost estimates and construction documents for the project.

Pivotal is also responsible for administering the required topographical survey of existing site conditions prior to start of design phase; and for coordinating all efforts with various private & public utility companies, state & local agencies, as well as civic & community organizations. The project was federally funded.

### **(2) RR017 BW Cooper, Gert Town Dixon Group D, New Orleans, LA**

Pivotal is retained by City of New Orleans to provide roadway full reconstruction including subsurface improvements (drainage, sewer and water line improvement). The project entails roadway rehabs to 12 blocks (4,015 ft) in the neighborhood of B.W. Cooper, Gert Town and Dixon. This design of multiple streets are required to meet rehabilitation goals set by FEMA and CNO and water line replacement program set by S&WB. The project also included identifying and designing the geometrics of the streets, preparation of capital cost estimates and construction documents for the project.

Pivotal is also responsible for administering the required topographical survey of existing site conditions prior to start of design phase.

Pivotal is also responsible for coordinating all efforts with various private & public utility companies, state & local agencies, as well as civic & community organizations. This project was federally funded.

### **(3) RR018 BW Cooper, Gert Town Dixon Group E, New Orleans, LA**

Pivotal is retained by City of New Orleans to provide roadway full reconstruction including subsurface improvements (drainage, sewer and water line improvement). The project entails roadway rehabs to 15 blocks (6,075 ft) in the

neighborhood of B.W. Cooper, Gert Town and Dixon. This design of multiple streets are required to meet rehabilitation goals set by FEMA and CNO and water line replacement program set by S&WB. The project also included identifying and designing the geometrics of the streets, preparation of capital cost estimates and construction documents for the project.

Pivotal is also responsible for administering the required topographical survey of existing site conditions prior to start of design phase.

Pivotal is also responsible for coordinating all efforts with various private & public utility companies, state & local agencies, as well as civic & community organizations.

#### **(4) RR019 BW Cooper, Gert Town Dixon Group F, New Orleans, LA**

Pivotal is retained by City of New Orleans to provide roadway full reconstruction including subsurface improvements (drainage, sewer and water line improvement). The project entails roadway rehabs to 6 blocks (2,100 ft) in the neighborhood of B.W. Cooper, Gert Town and Dixon. This design of multiple streets are required to meet rehabilitation goals set by FEMA and CNO and water line replacement program set by S&WB. The project also included identifying and designing the geometrics of the streets, preparation of capital cost estimates and construction documents for the project.

Pivotal is also responsible for administering the required topographical survey of existing site conditions prior to start of design phase.

Pivotal is also responsible for coordinating all efforts with various private & public utility companies, state & local agencies, as well as civic & community organizations.

#### **(5) RR076 Lake Vista Group D, New Orleans, LA**

Pivotal is retained by City of New Orleans to provide roadway full reconstruction including subsurface improvements (drainage, sewer and water line improvement). The project entails roadway rehabs to 5 blocks (1,750 ft) in the neighborhood of Lake Vista. This design of multiple streets are required to meet rehabilitation goals set by FEMA and CNO and water line replacement program set by S&WB. The project also included identifying and designing the geometrics of the streets, preparation of capital cost estimates and construction documents for the project.

Pivotal is also responsible for coordinating all efforts with various private & public utility companies, state & local agencies, as well as civic & community organizations.

#### **(6) RR034 E. Carrollton Group C (Adams St.), New Orleans, LA**

Pivotal is retained by City of New Orleans to provide roadway full reconstruction including subsurface improvements (drainage, sewer and water line improvement). The project entails roadway rehabs to 8 blocks (4,936 ft) in the neighborhood of Adams St. This design of multiple streets are required to meet rehabilitation goals set by FEMA and CNO and water line replacement program set by S&WB. The project also included identifying and designing the geometrics of the streets, preparation of capital cost estimates and construction documents for the project.

Pivotal is also responsible for coordinating all efforts with various private & public utility companies, state & local agencies, as well as civic & community organizations.

#### **(7) RR203 Gentilly Terrace South Group K, New Orleans, LA**

Pivotal is retained by City of New Orleans to provide roadway patch, mill and overlay reconstruction improvement). The project entails roadway rehabs to Gentilly Terrace neighborhood. This design of these streets are required to meet rehabilitation goals set by FEMA and CNO and water line replacement program set by S&WB. The project also included design of mill and overlay reconstruction, preparation of capital cost estimates and construction documents for the project.

Pivotal is also responsible for coordinating all efforts with various private & public utility companies, state & local agencies, as well as civic & community organizations.

### **(8) RR138 Plum Orchard-West Lake Forest Group B, New Orleans, LA**

Pivotal was retained by City of New Orleans for repaving the asphalt roadway from curb-to-curb, replacing damaged portions of concrete with new concrete, patching the roadway with asphalt, repairing damaged sidewalks and driveway aprons, installing ADA compliant curb ramps at intersections, and replacing/repairing damaged underground water, sewer and/or drainage lines.

### **(9) Wright Rd. Improvements, New Orleans, LA**

Pivotal personnel were retained by the City of New Orleans for the design of Wright Road located in New Orleans East. The project entailed the design of a new roadway section, subsurface sewer, water and drainage facilities, the relocation of conflicting utilities, as well as the development of specifications and construction oversight. Pivotal engineering staff has also been required to provide public coordination, agency approvals, oversee contractor compliance, and represent the Owner at various public meetings.

- Reviewed the required topographical survey of existing site conditions prior to start of design phase.
- Designed new drainage network for a 10 years return period.
- Designed new gravity sewer collection system to replace existing system that had been in service for more than 40 years.
- Designed new water main and located it on the median.

- Designed new street for tie-in to side streets.
- Coordinated all efforts with various private & public utility companies, state & local agencies, as well as civic & community organizations.

The project was valued at \$9 million.

### **(10) Ramsey St. Improvements, New Orleans, LA**

Pivotal personnel were retained to perform the design and construction supervision for the required improvements to Ramsey Street. The project entailed the design of a new roadway section, subsurface sewer, water and drainage facilities, the relocation of conflicting utilities, as well as the development of specifications and construction oversight. Pivotal engineering staff has also been required to provide public coordination, agency approvals, oversee contractor compliance, and represent the Owner at various public meetings.

Pivotal was also responsible for the following:

- Designing new drainage collection system that tied into an existing box culvert along adjacent intersection. This was necessary due to the re-occurrence of street flooding during any rain activity that takes place in this area.
- Designing new gravity sewer collection system to replace existing system that had been in service for more than 40 years.
- Designing new street for tie-in to major thoroughfare in the City of New Orleans.

- Coordinate all efforts with various private & public utility companies, state & local agencies, as well as civic & community organizations.
- Construction Management of the overall construction of the above captioned work.

The project was valued at \$3,500,000.

### (11) Pritchard Rd. Extension, Jefferson, LA

Pivotal Engineering is retained by Jefferson Parish to design roadway reconstruction and extension of Pritchard Road. The project scope includes the following:

1. Remove and replace existing 20 ft wide concrete roadway and replace with 26ft wide roadway and extend 130 ft to connect Pritchard Road to Sprig Street.
2. Remove and replace existing drainage piping. The design of drainage pipe networks is completed for a 10 years storm period using LADOTD drainage software.
3. Relocated existing street side ditch with a new ditch and box culvert. Drainage ditch, box culvert and junction box is designed for 10 years storm period.
4. Existing 10" and 18" SFM were required to be vertical and horizontal offset.

### (12) Labarre Rd. Railroad Crossing Drainage Improvement, Jefferson, LA

Pivotal was retained by Jefferson Parish to provide preliminary and final design phase services for design and construction plan preparation of the Labarre Rd. Railroad Crossing Drainage Improvement. The major scope of the improvement includes:

1. The construction of a box at the south west corner of Labarre and the Norfolk railroad; construction of a box at the south east corner of Labarre and the Norfolk railroad; replacement of sidewalk access across the ditch adjacent to the tracks; and provide handicap ramps across the street from the crossing, due to the tight right of way at the corner. The designer makes sure that the handicap ramp is being built within Parish right of way.

2. The boxes are designed to accommodate all of the existing drain lines in the area in order to preserve current drainage patterns at the crossing.

3. Construction of the box on the east required removal and replacement of ½ of Labarre Road and of the rail road crossing arm.
4. Construction requires deep sheeting, due to proximity of tracks, possibly a coffer dam.
5. Full width of Labarre will be milled and overlaid.

### **(13) Clearview Airline Intersection Improvements, Jefferson, LA**

Pivotal was retained to assist in the Clearview-Airline Intersection Improvements project. The scope of the project includes the following: widening of the median along Airline Drive to provide for triple left turn lanes, modifying the intersection of Airline Drive and Central Avenue, relocating and replacing the 20' transit water line, modifying the existing traffic signal system along Airline Drive at the intersection of Clearview Parkway and Central Avenue, and extending Rosedale to tie into Airline Drive.

### **(14) Southbound Westwood Dr. Rehabilitation, Jefferson, LA**

Pivotal personnel were retained by Jefferson parish through Digital Engineering and Imaging, Inc. for the design of Southbound Westwood Drive from the Westbank Expressway to Lapalco Blvd. The project entails rehabilitation of existing Westwood Drive, which includes removal and replacement of existing PCCP roadway, installation of additional subsurface drainage and modification of existing subsurface drainage, and installation of new sidewalks, handicapped ramps, and driveways as needed.

### **(15) France Rd. North Paving & Drainage Improvements, New Orleans, LA**

Pivotal performed design & construction administration services for France Rd. The project included 1.5 miles of full roadway reconstruction design. The scope of this project is to remove and replace roadway & drainage improvements.

### **(16) Lafitte Greenway, New Orleans, LA**

Pivotal completed and delivered to the City of New Orleans Lafitte Green way project in teaming arrangements with Design Workshop and Dana Brown & Associates which consists of approximately 13,000 ft. of bike/pedestrian trail valued at \$6.5 million. The project included more than 5 acres of land in storm water management design and green infrastructure containing bioswale, rain gardens and detention basins, sidewalk and roadway improvements, drainage improvements, and lighting improvements.

Pivotal Engineering staff performed a drainage analysis to calculate 10-year discharge from the identified contributing areas, and incorporated the approved scope of work into the project which included Architectural, Civil, Structural, and Electrical Design.

### (17) Bayou Road Streetscape, New Orleans, LA

Pivotal completed and delivered to the City of New Orleans Gentilly Boulevard and Bayou Road Streetscape. The project included landscape, sidewalk and roadway improvements, drainage improvements, and lighting improvements.

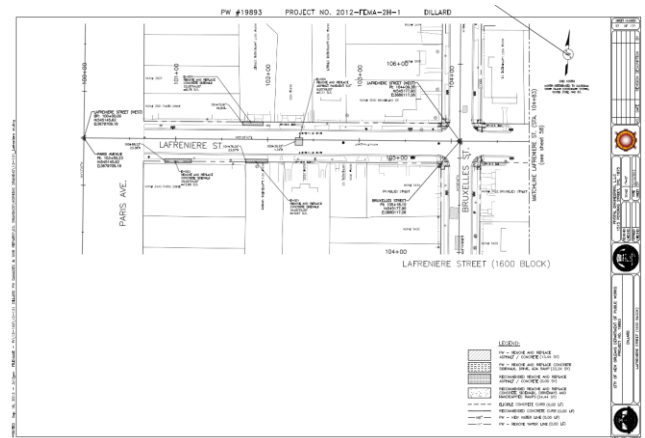

### (18) Dillard Neighborhood Streets, New Orleans, LA

Pivotal personnel were retained by the City of New Orleans to provide A/E Design, and Construction Management services for Dillard Neighborhood Design Project.

The project entails the design of proposed roadway section, subsurface sewer, water and drainage facilities, the relocation of conflicting utilities, as well as the development of specifications and construction oversight. Pivotal

personnel have also been required to provide public coordination, agency approvals, oversee contractor compliance, and represent the Owner at various public meetings.

Pivotal personnel were responsible for administering the required topographical survey of existing site conditions prior to start of design phase.

Pivotal coordinated all efforts with various private & public utility companies, state & local agencies, as well as civic & community organizations.

The total project is estimated at 1.5 million dollars.

### (19) Napoleon Avenue Box Culvert, New Orleans, LA

Pivotal personnel were retained by the Sewerage & Water Board of New Orleans through Schrenk & Peterson Engineering to coordinate and design the utility relocation plans and specifications.

Pivotal personnel were also responsible for review and approval of required topographical survey of existing site conditions prior to start of design phase.

Pivotal personnel designed new reinforced concrete box culvert along Napoleon Avenue between Constance Street and Carondelet Street in New Orleans, LA, and also designed box culvert crossings at St. Charles Avenue/Napoleon Avenue intersection, which is one of the busiest intersection in the Metropolitan New Orleans area.

Pivotal personnel coordinated all efforts with various private & public utility companies, state & local agencies for the safe and expedient relocation of their existing facilities that conflicted with proposed construction. The project is valued at \$50,000,000.

## **(20) Morey, Centanni, and Salvadore Street Improvements, Kenner, LA**

Pivotal personnel were retained by the City of Kenner Department of Public Works to perform the design and construction supervision for the required improvements of the above captioned street. The project entailed the design of proposed roadway section, subsurface sewer, water and drainage facilities, the relocation of conflicting utilities, as well as the development of specifications and construction oversight. Pivotal personnel also provided public coordination, agency approvals, oversee contractor compliance, and represent the Owner at various public meetings.

Pivotal personnel were responsible for administering the required topographical survey of existing site conditions prior to start of design phase.

The design included a new drainage collection system that will tie into an existing drainage system along an adjacent intersection. This was necessary due to the re-occurrence of street flooding during rain activities in this area.

Pivotal personnel coordinated all efforts with various private & public utility companies, state

& local agencies, as well as civic & community organizations, and responsible for construction management of the overall construction of the above captioned work. The project is valued at \$1,200,000.

## **(21) Lower 9<sup>th</sup> Ward, Phase 1 Street and Sub Surface Design Improvements, New Orleans, LA**

Pivotal personnel were retained by the City of New Orleans to provide A/E Design, and Construction Management services for the Lower 9<sup>th</sup> Ward, Phase 1 Street and Sub Surface Design Improvements Project.

The project entails roadway rehabs to 32 blocks in the Lower 9<sup>th</sup> Ward of New Orleans. Pivotal personnel were responsible for the rehabilitation design of multiple streets to meet the required rehabilitation goals set by FEMA and CNO and water line replacement program set by S&WB.

The project also included identifying and designing the geometrics of the streets, preparation of capital cost estimates and construction documents for the project.

Pivotal personnel were responsible for administering the required topographical survey of existing site conditions prior to start of design phase and coordinated all efforts with various private & public utility companies, state & local agencies, as well as civic & community organizations. The project was valued at \$4 million.

## **(22) Study of Safety Measures for Major East Bank Roadways, Jefferson Parish, LA**

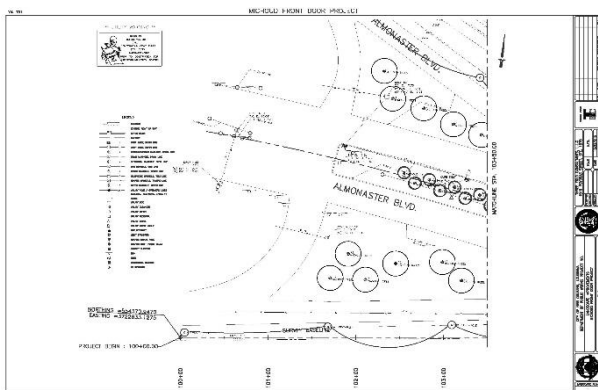

Pivotal Engineering was retained by Jefferson Parish to perform the Study of Safety Measures for Major East Bank Roadways Adjacent to Open Canals. The project entailed a detailed site investigation and documentation of each open canal section bank top width on plans with supporting photographs. Plans also show the recommended improvements as well as the location of accidents for all four segments. Drainage for analysis of the required open canal and box culvert section to accommodate a 10-year

design storm were performed. In addition, as a safety measure, the existing median side edge line striping was suggested to be removed and raised pavement markers be installed for all segments where new guard rails are recommended.

## (23) Michoud Front Door Improvements, New Orleans, LA

Pivotal completed and delivered to the City of New Orleans Michoud Front Door Improvements in teaming arrangements with Stuart Consulting Group. The project included landscape, sidewalk, roadway, drainage and lighting improvements.

## Experience with Street Lighting

### (1) Cousins Blvd Street Lighting Improvement, Jefferson Parish, LA

Pivotal Engineering was retained by Jefferson Parish to perform a preliminary and final design phase services for design and construction plan preparation of the Cousins Blvd. Lighting Improvement (Oakmere Dr. to Woodmere Blvd.). The major scope of the improvement is installation of new street lighting system. These facilities are increasingly becoming hard to maintain and are also energy in-efficient. The proposed project intends to replace these traditional fixtures with energy efficient LED lighting. With the energy efficiency measures proposed, it is expected to reduce the energy use in the range of 25-75% and extend the life of the light fixtures anywhere between 3-25 times their traditional counterparts. The general design requirement of work for this improvement includes but is not limited to the following:

- a.Length of project is approximately 2600 ft (0.5 Mile) on Parish owned roadway
- b.Recommended pole spacing 140-150 ft
- c.Recommended 27.5 ft. poles, 30 ft. mounting height, 6 ft arm – Single Mast type installed on the south side of the roadway (canal side) , with 20-24” base
- d.Recommended LED lighting - ATB2 40BLEDE10 XXXXX R3 4K P7 PCLL in 4K color Temperature
- e.Recommended 2 feed points (240 volt)
- f. Underground junction box (handholds) is not required. Instead dual fuse holders shall be used.
- g.Recommended Helical street light foundation
- h.Wiring in directional bore conduit

### (2) Jamie Blvd. & W. Tish Dr. Lighting Improvements, Jefferson Parish, LA

Pivotal Engineering was retained by Jefferson Parish to perform a preliminary and final design phase services for design and construction plan preparation of the Jamie Blvd. and W. Tish Dr. Lighting Improvement (US 90 to Cambay Dr.). The major scope of the improvement is installation of new street lighting and retrofit existing street light system. These facilities are increasingly becoming hard to maintain and are also energy in-efficient. The proposed project intends to replace these traditional fixtures with

energy efficient LED lighting. With the energy efficiency measures proposed, it is expected to reduce the energy use in the range of 25-75% and extend the life of the light fixtures anywhere between 3-25 times their traditional counterparts. The general design requirement of work for this improvement includes but is not limited to the following:

- a. The following two roadways are included in scope  
 Jamie Blvd. (US 90 to Cambay Dr.)  
 W. Tish Dr. (US 90 to Cambay Dr.)
- b. Length of project is approximately 2000 ft (0.4 Mile) each roadway on Parish owned roadway
- c. Recommended pole spacing 140-150 ft
- d. Jamie Blvd. recommended 27.5 ft. poles, 30 ft. mounting height, 6 ft arm – Double Mast type installed on the median, with 20-24” base (Typ. 3 each)
- e. W. Tish Blvd. recommended 27.5 ft. poles, 30 ft. mounting height, 6 ft arm – Single Mast type installed on the side of the road, with 20-24” base (Typ. 3 each)
- f. Both Jamie and W. Tish include retrofit existing street lighting by removing and replacing fixtures (Typ. 14 each).
- g. Recommended LED lighting fixture - ATB2 40BLEDE10 XXXXX R3 4K P7 PCLL in 4K color Temperature
- h. Recommended 1 feed points (120 – 240 volt) for each roadway
- i. Recommended Helical street light foundation
- j. Wiring in a directional bore conduit

### **(3) Metairie Road Lighting Improvements, Jefferson Parish, LA**

Pivotal Engineering was retained by Jefferson Parish to perform a preliminary and final design phase services for design and construction plan preparation of the Metairie Rd. Street Lighting Improvement (Bonnable Blvd. to Orpheum Ave). The major scope of the improvement is installation of street lighting system. The general design requirement of work for this improvement includes but is not limited to the following:

- a. Length of project is approximately 8,500 ft (1.6 Mile) on parish owned back of curb to property line right of way.
- b. Removal of existing metal pole street lights.
- c. Recommended pole spacing 150 to 160 ft
- d. Recommended Dunwoody Aluminum Pole, mounting height 14ft/16ft with 20” base
- e. Recommended 100W LED lighting
- f. Recommended feed points (120 – 240 volt)
- g. Recommended Helical street light foundation
- h. Wiring (directional bore conduit), Fixtures, and miscellaneous construction
- i. Requires Arborist service, tree protection, root pruning and trenching as necessary

### **(4) West Metairie Road Lighting Improvements, Jefferson Parish, LA**

Pivotal Engineering was retained by Jefferson Parish to perform a preliminary and final design phase services for design and construction plan preparation of the W. Metairie Ave. U-Turns Street Lighting Improvement (Roosevelt Blvd. to David Dr.). The major scope of the improvement is installation of street lighting system. The general design requirement of work for this improvement includes but is not limited to the following:

- a. The following four W. Metairie Ave. intersections and U-turns are included in the scope.
  - Intersection of W. Metairie Ave. and David Drive
  - Intersection of W. Metairie Ave. and Lynnette Drive
  - Intersection of W. Metairie Ave. and N. Bengal Road
  - U turn on W. Metairie Ave. between N. Lester Ave and N. Howard Ave
- b. Recommended pole spacing 150 to 160 ft
- c. Recommended Dunwoody Aluminum Pole, mounting height 14ft/16ft with 20” base
- d. Recommended 100W LED lighting
- e. Recommended 1 feed points (120 – 240 volt) for each intersection
- f. Recommended Helical street light foundation
- g. Wiring (directional bore conduit), Fixtures, and miscellaneous construction.

- h. Median concrete removal, hydro seed grass, and new sidewalk, new ADA ramp

### **(5) Causeway Boulevard Lighting Improvements, Jefferson Parish, LA**

Pivotal Engineering was retained by Jefferson Parish to perform a preliminary and final design phase services for design and construction plan preparation of the Causeway Boulevard (Veterans Overpass to 6<sup>th</sup> Street) Street Lighting Improvement. The major scope of the improvement is removal and replacement of existing lighting system. The general design requirement of work for this improvement includes but is not limited to the following:

- a. Length of project is approximately 4,800 ft (0.9 Mile) on parish owned roadway.
- b. Remove and replace existing street lights (see attached map for approx. locations)
- c. Recommended pole spacing 150 to 160 ft
- d. Recommended mounting height max. 40ft (recommended pole height 35 ft)
- e. Recommended LED lighting
- f. Recommended 3 to 4 feed points (120 – 240 volt)
- g. Recommended Helical street light foundation
- h. Wiring (directional bore conduit), E-boxes, Fixtures, and miscellaneous construction

### **(6) Green Acres Rd. Lighting Improvements, Jefferson Parish, LA**

Pivotal Engineering was retained by Jefferson Parish to perform a preliminary and final design phase services for design and construction plan preparation of the Green Acres Rd. Street Lighting Improvement (W. Metairie Ave. to Airline Dr.). The major scope of the improvement is installation of street lighting system. The general design requirement of work for this improvement includes but is not limited to the following:

- a. Length of project is approximately 2,700 ft (0.51 Mile) on parish owned roadway.
- b. Recommended pole spacing 150 to 160 ft
- c. Recommended mounting height 16ft
- d. Recommended LED lighting
- e. Recommended 2 feed points (120 – 240 volt)
- f. Recommended Helical street light foundation
- g. Wiring (directional bore conduit), E-boxes, Fixtures, and miscellaneous construction

### **(7) Live Oak Street Solar Lighting Improvements, Jefferson Parish, LA**

Pivotal will provide preliminary and final design phase services for design and construction plan preparation of the Live Oak Street Lighting Project (US 90 to S. Kenner Rd). The major scope of the improvement is installation of new solar street lighting system. As per the evaluation phase report, the following general design requirements are established:

- a. Length of project is approximately 18,500 ft (3.5 Mile) on Parish owned roadway
- b. Design based on product of Cypress Lighting Technologies, LLC
- c. Pole spacing staggered at 200ft
- d. Pole shall be installed at minimum 6 feet from the edge of travel lane
- e. Single 8 feet long arm shall be used
- f. Fixture mounting height shall be minimum 25 feet
- g. Fixtures shall be all-in-one solar LED Street light (100W) with a minimum 12V 42Ah Lithium battery
- h. Fixture shall be programmable to operate at 30% (30W) when traveling vehicle is not-detected and 80% (80W) when traveling vehicle is detected

Fixture, solar panel and battery shall be warranted for 5 years.

## **Experiences with FEMA, HMGP and CDBG Program Projects**

### **(1) Assessments across Orleans Parish, New Orleans, LA**

Pivotal was retained by the U.S. Army Corps of Engineers/ Recovery Field to conduct Quality Assurance (QA) for Asbestos Surveys for houses slated for demolition from hurricanes Katrina and Rita. Team conducted over 3000 asbestos (QA) inspections and employed over 40 Louisiana certified asbestos inspectors.

Demolition required proper designation of debris and separation of regulated asbestos containing materials (RACM) and compliance National Emission Standards for Hazardous Air Pollutants. Developed a detailed Quality Assurance Project Plan (QAPP) and Contractor Safety Plan. After each survey, shipped bulk asbestos samples to the state certified laboratory for analysis. Upon receipt of the analytical results, inspectors prepared detailed reports for each structure documenting, the location, prime contractor's compliance the Asbestos NESHAP, summary of results, and proper designation of the structure. To assist in expediting report transmittal, a file transfer protocol (FTP) web site and database was established. Inspectors uploaded batches of report to the FTP site and notified the USACE by email.

Pivotal's staff has conducted similar projects under the FEMA guidelines post Katrina. One of such projects is the overall structural evaluation of the damaged structures throughout Orleans Parish where we had to create a data base to log in each property location with the evaluation report. We also created the inspection report which was approved by FEMA and made final recommendations whether to demolish or repair the property based on cost analysis. We also provided similar assessments for all of the NORD parks lightings throughout the City and made repair recommendations, cost estimates and final design documents that were approved by FEMA.

### **(3) St. John Parish Planning and Zoning Building Environmental and Damage Assessment (Isaac), St. John Parish, LA**

Pivotal's personnel provided an Asbestos/Mold inspection and damage assessment of the St. John Parish Planning and Zoning Building immediately after Hurricane Isaac. Pivotal's personnel were deployed within 24-hours of request by the Administration to assess storm damage and provide recommendations for re-occupancy. Pivotal's personnel conducted the physical inspection on 9/3/12 and submitted the final report 9/5/12. Pivotal personnel's commitment to the Parish and its employees allowed for timely occupation of the building.

### **(3) St. John Parish Minor Housing Repair Program (Gustav/Ike), St. John Parish, LA**

Pivotal's personnel provided Project Management and Inspection services for repairs to residential properties throughout St. John Parish. Pivotal personnel deployed 6 inspectors (including 3 LDEQ Asbestos/Lead Inspectors) to conduct inspections on both the east and west bank of St. John Parish. Pivotal's personnel worked closely with the Grants Manager to modify the existing program. A review of the program's policies reflected charges by the program's contractors would exceed both the local and national averages for labor as shown by our RSMeans software. Pivotal's personnel proposed the implementation

of a system of competitive bidding between the contractors. The new system proved valuable. It allowed the Parish to be billed at fair-market rates resulting in the inclusion of more applicants and better allocation of funding. Pivotal's Project Manager provided real-time cost tracking as construction on properties commenced. Every week, the Grants Manager was provided a "Status Listing" which showed the status of each property inspected and under construction. This listing included the Applicant's Information, Program Eligibility, Project Manager's Opinion of Cost, Construction Cost and Inspection Notes. The listing also showed the program's overall funding available, budget projections and average construction cost of each property. These figures allowed the Grants Manager to be well aware of the program's standing upon request from the Parish President, Chief Administrative Officer and Council Members.

#### **(4) Mimosa Park Elementary School Improvements and Inspections, St. Charles Parish, LA**

Pivotal's personnel successfully scoped, designed, and managed the construction of a new 280 ton chilled-water 4-pipe HVAC system and electrical power distribution system for the existing 50,000 square foot campus. In the long term, the new system designed will provide a cost savings to the St. Charles School Board of approximately \$10,000 - \$15,000 per year. Pivotal personnel were also responsible for providing staff to

conduct baseline, daily, and clearance asbestos air monitoring during the removal of asbestos piping.

#### **(5) St. Charles Parish School Board Transportation Facility, St. Charles Parish, LA**

St. Charles Parish School Board's East Bank school bus maintenance facility was 50% over capacity of the existing facility, resulting in delays in service and maintenance and making training difficult. Pivotal was retained to develop the conceptual design for an expanded facility. The improved facility will provide additional service bays, parts storage, new training/meeting room, driver lockers, and offices for dispatch, maintenance and accounting. More efficient electrical and mechanical systems will be incorporated into the new facility. The design will also include new fueling facilities and expanded parking areas, as well as a state of the art bus wash station.

#### **(6) City of New Orleans Mosquito Control Hangar Facility Hurricane Katrina Repairs and Renovations, New Orleans, LA**

Pivotal's personnel provided a Comprehensive Damage Report to be reviewed by FEMA and the City of New Orleans for repairs or replacement of the existing facility. This report was critical in substantiating the City of New Orleans' claim for additional funding to repair the facility. Pivotal personnel included in the design an elevated chemical storage, V-Zone structural enhancements, and MEP upgrades. The end result of our diligent work allowed for a building to withstand wind load of up to 135 mph.

### **(7) City of New Orleans Fire Engine# 10 Hurricane Katrina Repairs and Renovations, New Orleans, LA**

Pivotal personnel's persistence in providing supplemental documentation to FEMA as it related to required building code issues, health and safety issues, and usability of the facility justified the development of four additional revisions to the FEMA PW for this facility. Pivotal personnel were able to successfully substantiate the inclusion of approximately \$220,000 of additional work funded by FEMA.

This work included a new backup generator, new lighting fixtures, new plumbing fixtures, and new air handling units.

### **(8) FEMA HMGP Elevation Program, Washington Parish, LA**

Pivotal Engineering is providing Project Management and Inspection services for repairs to residential properties throughout Washington Parish under the grant from FEMA HMGP elevation program.

- a. Pivotal provide current Flood Elevation Certificate for each property. Coordinate with each homeowner as needed for access.
- b. Pivotal reviewed each FEL to determine the minimum lift required to meet the current BFE plus allowable freeboard.
- c. Pivotal coordinated with each homeowner a date/time to inspect the property. This inspection shall determine the feasibility of the lift, elevation type, site suitability and structural deficiencies that may impose on the lift.
- d. Pivotal utilized data collected from the site inspection to produce the final design detailing the required scope of work for each property and a proposed cost of construction. The scope of work includes structural improvements needed for a successful lift.
- e. Pivotal provided bid packages for each property based on information contained within the inspection report. Pivotal notified pre-qualified contractors from the Parish's pool via email.
- f. Pivotal assisted the Parish in the collection and tally of bids at final submission and provide a written recommendation of award upon review
- g. Pivotal conducted two (2) milestone inspections; 50% and 100% construction completion, during the course of construction. Each milestone inspection report will be accompanied by a report and progress photos. The reports also identified any construction related issues, proposed change orders and homeowner concerns.
- h. Upon substantial completion, punch list inspections is conducted on an as-needed

basis and reported on the 100% construction inspection report.

## **Experiences with Grant Application projects**

Pivotal Engineering team includes senior engineers and administrators with extensive experience preparing grant writing proposals. Pivotal is routinely retained by Fortune 500 companies and government agencies to prepare proposals for various funding sources. The following is a brief summary of the team's experience.

### **(1) Louisiana Department of Natural Resources Revolving Loan Fund Application for the Causeway Boulevard (Veterans Overpass to 6<sup>th</sup> Street) Street Lighting Improvement project; Jefferson Parish, LA**

Pivotal was retained by Jefferson Parish to complete the Louisiana Department of Natural Resources Revolving Loan Fund Application for the Causeway Boulevard (Veterans Overpass to 6<sup>th</sup> Street) Street Lighting Improvement project.

The scope consisted of providing preliminary and final design phase services for design and construction plan preparation of the Causeway Boulevard (Veterans Overpass to 6<sup>th</sup> Street) Street Lighting Improvement. The major scope of the improvement is removal and replacement of existing lighting system. The general design requirement of work for this improvement includes but is not limited to the following:

- i. Length of project is approximately 4,800 ft (0.9 Mile) on parish owned roadway.
- j. Remove and replace existing street lights (see attached map for approx. locations)
- k. Recommended pole spacing 150 to 160 ft
- l. Recommended mounting height max. 40ft (recommended pole height 35 ft)
- m. Recommended LED lighting

- n. Recommended 3 to 4 feed points (120 – 240 volt)
- o. Recommended Helical street light foundation
- p. Wiring (directional bore conduit), E-boxes, Fixtures, and miscellaneous construction
- q. Supplemental Services: surveying

### **(2) the Louisiana Department of Natural Resources Revolving Loan Fund Application for the Green Acres Rd. Street (W. Metairie Ave. to Airline Dr) Lighting Improvement project; Jefferson Parish, LA**

Pivotal was retained by Jefferson Parish to complete the Louisiana Department of Natural Resources Revolving Loan Fund Application for the Green Acres Rd. Street (W. Metairie Ave. to Airline Dr) Lighting Improvement project.

Scope consisted of providing preliminary and final design phase services for design and construction plan preparation of the Green Acres Rd. Street Lighting Improvement (W. Metairie Ave. to Airline Dr.). The major scope of the improvement is installation of street lighting system. The general design requirement of work for this improvement includes but is not limited to the following:

1. Length of project is approximately 2,700 ft (0.51 Mile) on parish owned roadway.
2. Recommended pole spacing 150 to 160 ft
3. Recommended mounting height 16ft
4. Recommended LED lighting
5. Recommended 2 feed points (120 – 240 volt)
6. Recommended Helical street light foundation
7. Wiring (directional bore conduit), E-boxes, Fixtures, and miscellaneous construction
8. Supplemental Services: surveying and Geotechnical investigation

**(3) Louisiana Department of Natural Resources Revolving Loan Fund Application for the Metairie Rd. Street (Bonnabel Blvd. to Orpheum Ave) Lighting Improvement project; Jefferson Parish, LA**

Pivotal was retained by Jefferson Parish to complete the Louisiana Department of Natural Resources Revolving Loan Fund Application for the Metairie Rd. Street (Bonnabel Blvd. to Orpheum Ave) Lighting Improvement project.

The scope consisted of providing preliminary and final design phase services for design and construction plan preparation of the Metairie Rd. Street Lighting Improvement (Bonnabel Blvd. to Orpheum Ave). The major scope of the improvement is installation of street lighting system. The general design requirement of work for this improvement includes but is not limited to the following:

1. Length of project is approximately 8,500 ft (1.6 Mile) on parish owned back of curb to property line right of way.
2. Removal of existing metal pole street lights.
3. Recommended pole spacing 150 to 160 ft
4. Recommended Dunwoody Aluminum Pole, mounting height 14ft/16ft with 20" base
5. Recommended 100W LED lighting
6. Recommended feed points (120 – 240 volt)
7. Recommended Helical street light foundation
8. Wiring (directional bore conduit), Fixtures, and miscellaneous construction
9. Requires Arborist service, tree protection, root pruning and trenching as necessary
10. Supplemental Services: surveying

**(4) Louisiana Department of Natural Resources Revolving Loan Fund Application for the W. Metairie Ave. U-Turns Street (Roosevelt Blvd. to David Dr.) Lighting Improvement project; Jefferson Parish, LA**

Pivotal was retained by Jefferson Parish to complete the Louisiana Department of Natural Resources Revolving Loan Fund Application for the W. Metairie Ave. U-Turns Street (Roosevelt Blvd. to David Dr.) Lighting Improvement project.

The scope consisted of providing preliminary and final design phase services for design and construction plan preparation of the W. Metairie Ave. U-Turns Street Lighting Improvement (Roosevelt Blvd. to David Dr.). The major scope of the improvement is installation of street lighting system. The general design requirement of work for this improvement includes but is not limited to the following:

1. Recommended pole spacing 150 to 160 ft
2. Recommended Dunwoody Aluminum Pole, mounting height 14ft/16ft with 20" base
3. Recommended 100W LED lighting
4. Recommended 1 feed points (120 – 240 volt) for each intersection
5. Recommended Helical street light foundation
6. Wiring (directional bore conduit), Fixtures, and miscellaneous construction
7. Median concrete removal, hydro seed grass, and new sidewalk, new ADA ramp
8. Supplemental Services: Development of Plan Sheets from Aerials and JP utility sheets in lieu of Survey

The following four W. Metairie Ave. intersections and U-turns are included in the scope.

- Intersection of W. Metairie Ave. and David Drive
- Intersection of W. Metairie Ave. and Lynnette Drive

- Intersection of W. Metairie Ave. and N. Bengal Road

U turn on W. Metairie Ave. between N. Lester Ave and N. Howard Ave

### **(5) Louisiana Department of Natural Resources Revolving Loan Fund Application for the Extension of Cousins Boulevard (Woodmere Boulevard to Lapalco Boulevard) project; Jefferson Parish, LA**

Pivotal was retained by Jefferson Parish to complete the Louisiana Department of Natural Resources Revolving Loan Fund Application for the Extension of Cousins Boulevard (Woodmere Boulevard to Lapalco Boulevard) project.

### **(6) Louisiana Department of Natural Resources (LDNR) grant loan application; Ascension Parish, LA**

Pivotal is retained by Ascension Parish to assist the parish with a professional service to fill and apply the Louisiana Department of Natural Resources (LDNR) grant loan application for the following projects:

1. Butch Gore Memorial Park (6 fields) – Estimated project cost \$385,000
2. Darrow Community Center Playground and Park (1 field) - Estimated project cost \$165,000.
3. Leo Stevens Park and Playground (7 Field) – Estimated project cost \$460,000
4. Jackie Robinson Park (1 Field) - Estimated project cost \$195,000
5. Modeste Park and Playground (1 Field) - Estimated project cost \$165,000

### **(7) Louisiana Department of Natural Resources (LDNR) grant loan application; Ascension Parish, LA**

Pivotal is retained by Ascension Parish to assist the parish with a professional service to fill and apply the Louisiana Department of Natural Resources (LDNR) grant loan application for the following projects:

1. Paul Park and Playground (5 Fields) - Estimated project cost \$360,000
2. Prairieville Park and Playground (1 Field) - Estimated project cost \$215,000
3. St. Amant Recreation Park (3 Fields) - Estimated project cost \$485,000
4. South Louisiana Fairgrounds (LaLa) (4 Fields) - Estimated project cost \$430,000
5. Southwest Park and Playground (1 Field) - Estimated project cost \$165,000

### **(8) LDEQ WWTP Loan Application; Kenner, LA**

Pivotal was retained by The City of Kenner to complete the LDEQ Loan Application for five priority collection system projects. The lift stations will be completely rehabilitated with new pumps, panels, valves/fittings, wetwell coating etc.

### **(9) LDNR Energy Efficiency Application for the Causeway & Green Acres Street Lighting Project; Jefferson Parish, LA**

Pivotal was retained by Jefferson Parish to complete the LDNR Energy Efficiency Application for the Causeway & Green Acres Street Lighting Project.

The proposed project includes installation of energy efficient LED lighting, associated electrical and professional services on Causeway (between Veterans Overpass to 6th St); Green Acres (Airline to W. Metairie). The foot print of the project is 10000 linear feet by 3 feet along crucial thoroughfare on Causeway Blvd and Green Acres impacting school and major local businesses. It is expected that installation of

energy efficient lighting will reduce the energy consumption and associated emission of greenhouse gas (GHG) emission. Green Acres currently has no lightings and the Parish intends to install energy efficient lightings on this street which also provides access to St. Martin's Episcopal School. Installation of energy efficient lighting will typically save 50% on energy bills than conventional lighting and also lower the maintenance cost.

### **(10) Environmental Protection Agency Gulf of Mexico Program Cooperative Agreements 2018 Grant Application for the Bayou Pattasat and Fritchie Marsh Improvements projects; Slidell, LA**

Pivotal was retained by The City of Slidell to complete the Environmental Protection Agency Gulf of Mexico Program Cooperative Agreements 2018 Grant Application for the Bayou Pattasat and Fritchie Marsh Improvements projects.

The scope for the projects consisted of the following:

Bayou Pattasat:

To widen and deepen the existing Bayou Pattasat to allow for more conveyance and storage within the bayou.

Fritchie Marsh:

The construction of an approximately 12,000 foot long force main effluent pipeline along the general route of the W-14 canal from the Terrace Avenue WWTP. The effluent pump station at the Terrace Avenue WWTP would be improved to meet the required hydraulic conditions dictated by the new effluent pipeline.

## Section 4: Personnel Qualification

Pivotal's Key Personnel have proven excellence in managing projects from cradle to grave while providing value engineering, which saved our clients hundreds of thousands of dollars. Our staff was essential in helping metropolitan New Orleans in expediting its post Katrina recovery by handling and completing over 50 critical City, Parish and/or FEMA funded projects. The current staff of Pivotal has extensive experience managing a variety of complex projects from conception to construction.

The majority of Pivotal's staff has extensive design as well as construction experience. This advantage minimizes contractor change orders, expedites project schedules and improves project details. Our Engineers have great track records with helping our clients meet compressed deadlines while eliminating unnecessary expenses yet delivering better than the intended product. We have also proven to our clients our added "Value Engineering" on several projects, which resulted in direct savings of hundreds of thousands of dollars.

### Point-of-Contact:

The detailed resume of each staff is included in the Appendix-A. We ask that you note the resumes of key staff specialized experience under each category included herein.

#### Avinash Mehta, PE Principal- In Charge

##### Education

M.S. Civil Engineering, University of Central Florida, 2003

B.S. Civil Engineering, NMU – India, 2000

##### Professional Associations

LA PE # 35100

##### Experience

Mr. Mehta serves as a Principal of Pivotal Engineering. Mr. Mehta has over 18 years of experience managing civil and environmental engineering projects including project budget, schedule and scope, coordination of resources,

business development and client liaison activities. His experience includes the project management for A&E projects, process and design, civil engineering, water and wastewater engineering, drainage design and permitting, wastewater system design, potable water system design, conceptual planning, and design for coastal restoration projects.

### Project Management:

#### Yoseph Shifare, PE, PTOE Project Director/ Senior Civil Engineer

##### Education

M.S. Civil Engineering, University of Louisville, Kentucky, 2014

B.S. Civil Engineering, University of Asmara, Eritrea, 2001

##### Professional Associations

LA PE # 42747

##### Experience

Mr. Shifare serves as a Project Director of Pivotal Engineering in charge of Civil/Transportation engineering projects. He has over 19 years engineering, project and construction management experience for public infrastructures, industrial, commercial and private facilities. As a project director he designs, lead and manage the day-to-day efforts of engineers on projects that include roadway, traffic, drainage/storm water management, water and wastewater, and landfills. He is responsible to client liaison, manage the strategic aspects of project engagement, review high-level project deliverables, provides leadership, project accounting and ensures the engineering practice meets or exceeds industry standard.

#### Darius Cook Construction Administrator

##### Education

BS, Civil/Environmental Engineering in progress

##### Professional Associations

Louisiana Licensed: Asbestos Contractor, Asbestos Inspector and Lead Inspector

## **Experience**

Mr. Cook is experienced with overseeing the overall construction activities of the project; preparing daily diary reports of the construction activities; keeping daily, weekly and monthly quantities for the job cost tracking; meeting with contractor and owner's representatives to discuss job progress, concerns, project milestone dates, and contract time and scope; and interacting with the client to make sure all concerns and needs are addressed.

## **Technical Support:**

### **Bassam Rossi Mekari, PE Project Manager – Electrical**

#### **Education**

BS, Electrical Engineering, Louisiana State University 1987

MS in Electrical Engineering - 3 hours remaining

#### **Professional Associations**

LA PE # 31801, NFPA Member, ASHRAE Member, American Military Engineers

#### **Experience**

Mr. Mekari serves as a Principal of Pivotal Engineering and the Engineering Manager in charge of all of the electrical engineering projects. He has over 28 years of experience in designing and installing electrical distribution systems for public, commercial, and industrial facilities such as schools, fire stations, justice centers, police stations, street lights, lift stations, PLC automations and thermal reactors. He also designed/built electrical installations throughout the US and worldwide. Mr. Mekari has designed over 100 electrical systems and will be instrumental in the overall electrical design and project management.

### **John “Johnny” A. Mekari, P.E. Senior Electrical Engineer**

#### **Education**

B.S. Electrical Engineering, 1987

#### **Professional Associations**

Louisiana, Electrical Engineering, 25415

Mississippi, Electrical Engineering, 14670

Texas, Electrical Engineering, 87303

#### **Experience**

Mr. Mekari serves as the Senior Electrical Engineer of Pivotal Engineering. He has 26 years Electrical Systems Design & Installations Mr. Mekari serves as the Vice President of Pivotal Engineering for the Baton Rouge Operations. He has developed extensive experiences in designing and installing Electrical Distribution Systems and Control Systems for industrial, commercial and municipal facilities. The footprint of the projects designed by Mr. John Mekari extends to local, national and international levels.

### **Irish Jones Electrical Designer/Contractor**

#### **Education**

5 years of college in Electrical Engineering – University of Texas at Arlington

#### **Professional Associations**

None

#### **Experience**

Mr. Jones serves as the senior electrical designer of Pivotal Engineering. He has over 40 years of experience in designing electrical installations (power distributions) for industrial and commercial applications of all magnitudes. He obtained his first Class A electrical license in 1967 in Georgia. Being an electrical contractor for over 40 years, Mr. Jones has developed an extensive experience in not only designing and laying out electrical designs, but also in supervising the installations in the construction phase. His expertise allows the team to provide

the BEST and MOST ECONOMICAL Electrical Design for any facility. Due to his experience as an electrician and a contractor, Pivotal will not need to depend on the In-plant electrician while conducting the electrical components field investigations.

### **James Amodeo, PE Mechanical Engineer**

#### **Education**

B.S. Mechanical Engineering, S.U.N.Y at Stony Brook, Stony Brook, New York

#### **Professional Associations**

Louisiana / Mechanical / 36489  
Colorado / Mechanical / 36652

#### **Experience**

Mr. Amodeo serves as the Senior Mechanical Engineer for Pivotal Engineering. He has over 18 years of experience in designing and specifying mechanical and plumbing systems for municipal, industrial, commercial, process and manufacturing applications of all magnitudes. Mr. Amodeo is an ASHRAE Member, NSPE Member, and ASME Member.

### **Tarek Elnaggar, P.E. Civil/Environmental Engineer**

#### **Education**

M.S. Civil Engineering, University of California, Berkley, 1988

B.S. Civil Engineering, Louisiana State University, 1985

#### **Professional Associations**

Louisiana/Civil/Environmental  
Engineering/23832 Texas/Civil/Environmental  
Engineering/85089  
Mississippi/Civil/Environmental  
Engineering/14839

#### **Experience**

Mr. Elnaggar serves as a Principal of Pivotal Engineering LLC. He is the lead Environmental Engineer for the company. His experience

includes design and construction management for civil and environmental projects, which include municipal and industrial solid waste permitting, risk assessments, water permitting and compliance, air permitting and compliance, emission inventories and reporting, groundwater investigations, regulatory compliance, environmental process design, permitting, and waste treatment system design.

### **Ignatious Mutoti, PE Quality Assurance/ Control**

#### **Education**

PhD, Environmental Engineering, 2003

M.S. Environmental Engineering, 1998

B.S. Applied Chemistry and Chemical Technology, 1993

#### **Professional Associations**

Civil/ Environmental Engineering, Virginia, PE  
040204016

#### **Experience**

Dr. Mutoti has over 23 years of experience in the field of water and wastewater and has held various positions in the public, academic and private consulting sectors. In the past, Dr. Mutoti has held positions as Chemist and Water/Wastewater Laboratory manager, municipal Water/Wastewater Process Engineer responsible for treatment process optimization and troubleshooting for facilities up to 162 MGD. He has taught both undergraduate and graduate level water and wastewater engineering courses as a professor and has been involved in higher level research projects. Dr. Mutoti has authored and co-authored several journal and newsletter articles and presented at various conferences. He has many years of consulting engineering experience design and operating water and wastewater facilities. In addition, Dr. Mutoti is a certified water and wastewater plant operator, hydraulic & water quality modeler.

## **Data Analysis & QA/QC:**

**Bryan Smith, PE**  
**Data Analyst and QA/QC**

### **Education**

BS / 2011 / Environmental Engineering  
MS / 2014 / Civil and Environmental Engineering

### **Professional Associations**

LA PE # 0043843 / 2019

### **Experience**

Mr. Smith serves as a project engineer at Pivotal Engineering, LLC in support of civil and environmental engineering projects. His projects range from public to private sector and require effort in both the field and the office. He has experience in infrastructure design, project management, permitting, environmental sampling, large-scale disaster recovery, data collection, data management, quality assurance/quality control, data validation, construction cost estimation and Phase I, II, III environmental site assessments. He will serve as the lead data analyst and QA/QC officer.

**Sundiata Marcelin, PE**  
**Civil Engineer**

### **Education**

BS, Civil Engineering

### **Professional Associations**

LA PE # 38589

### **Experience**

Mr. Marcelin serves as a project civil engineer at Pivotal Engineering. He has over 10 years of experience in civil and structural engineering as well as construction management. Mr. Marcelin is also experienced with FEA Analysis and Structural Analysis, Hazard Mitigation Design & Residential and Commercial Design & Permitting. He has extensive experience with data collection and management. He will serve as a data analyst and QA/QC officer for this project.

## **Inspectors:**

**Kepal Patel, EI**  
**Electrical Designer**

### **Education**

B.S. Electrical Engineering/University of New Orleans

### **Professional Associations**

LA EI # 34453 / Electrical Engineering

### **Experience**

Mr. Patel serves as an Electrical Designer for Pivotal Engineering. Mr. Patel designing experience includes CADD work, generally to show the pole location, laying out circuit design from the power source to individual poles, type of foundation used, type of fixture used and include its specifications. Currently, he is working on several JP streetlight projects and his role requires Voltage Drop Calculations, Conduit sizes, Wire sizes, grounding and bonding etc. and thus determine what kind of electrical components would be required for the installations. For this project, he will serve as an asset inspector.

**Eliot Guerin, EI**  
**Civil Designer**

### **Education**

B.S. / 2018 / Civil Engineering

### **Professional Associations**

2018 E.I./Civil Engineering

### **Experience**

Mr. Guerin is a civil designer with two (2) years of experience at Pivotal Engineering, focusing on roadway, sanitary sewer, and storm drainage design. So far, he has done design in these areas for several projects which span municipal utilities to school infrastructure. In addition, Mr. Guerin has 6 months of experience at Zachry Group over the course of two internships, one of which was at an active construction site, and contributed a significant amount of estimating work for new power plant. For this project, he will serve as an asset inspector.

## **Courtland Parr** **Project Engineer**

### **Education**

Bachelors of Science in Petroleum Engineering /  
2019

### **Experience**

Mr. Parr serves as a project engineer at Pivotal Engineering. His experience includes preparing groundwater reports, sampling, and reporting. His experience also includes working in AUTOCAD produce relevant concentration isopleth maps for different parameters. For this project, he will serve as an asset inspector.

## **John G. Scott Sr.** **Data Collection/Inspector**

### **Education**

Mississippi State University Certification for Lead  
Inspector/2012

### **Professional Associations**

U.S. Army Corps of Engineers Certification for  
Construction Quality Management

### **Experience**

Mr. Scott has the ability to read and interpret construction documents such as plans, specifications, submittals, and RFI's have enable me to work on a daily basis with project engineers, construction managers, general contractors, and sub-contractors as lead quality assurance inspector on federal, state government, public works, and commercial projects. His knowledge of construction inspection and quality control includes asphalt paving, compaction testing, concrete (foundations, roadway, sidewalk), backfilling, equipment inspection, grading, reinforcing steel inspection, site work preparation (clearing and grubbing), and utilities installation (drainage, sewer and water). For this project, he will serve as an asset inspector.

## **Stephen G. Bobeck** **Data Collection/Inspector**

### **Education**

Diploma, Pope John Paul II High School

### **Professional Associations**

NJSAT – Asphalt Paving Construction  
Technologist

### **Experience**

Mr. Bobeck has fifteen years of experience as a construction inspector for various projects that include cast- in-place structural concrete for bridge and building structures and numerous heavy asphalt paving jobs. As Field Technician Manager, Mr. Bobeck has overseen the installation and testing of various driven pile foundations including timber-concrete composite and precast pre-stressed concrete piles. For this project, he will serve as an asset inspector.

## **Grady Geiger, Jr.** **Data Collection/Inspector**

### **Education**

Tulane University, Civil Engineering Program

### **Professional Associations**

U.S. Army Corps of Engineers

### **Experience**

Mr. Geiger has forty-seven years (47) of Construction Inspection Experience. William Grady Geiger, Jr. was employed by U.S. Army Corps of Engineers as a Senior Civil Engineering Technician for 35 years. He achieved GS-11 level. While there he performed government estimates of project components in electrical, architectural and various other engineering disciplines. For this project, he will serve as an asset inspector.

**Gerard Kelly**  
**Data Collection/Inspector**

**Education**

Delgado College – New Orleans, LA  
Associates Degree Civil Engineering

**Experience**

Mr. Kelly has more than 30 years of experience in the construction in industry as inspector for projects with installation and repair of underground utilities in and around the New Orleans area with emphasis on: Sewer, sewer force mains, water mains, drainage, electrical conduit and related structures, Asphalt, concrete roadways and related bases, Dirt work, Cast in place bridges and precast bridges, Deep work ie: lift stations, pipe and structures. He also has experience in Estimating, submitting proposals, monthly estimates, purchasing, change orders, quantity verifications, and cost control reporting and Field QC management. For this project, he will serve as an asset inspector.

**Debra Jacques Wilson**  
**Data Collection/Inspector**

**Education**

High School Diploma, Picayune Memorial High School

**Professional Associations**

None

**Experience**

Ms. Wilson has more than twenty (20) years of experience with FEMA cost estimation, inspection and grant management. She brings a wealth of knowledge in methods and implementation of large-scale inspection projects. She has a proven track record for delivering high-quality products on time and under budget. She has extensive experience with FEMA cost estimation software. For this project, she will serve as an asset inspector.

**Lara Hermes**  
**Data Collection/Inspector**

**Education**

B.S. from University of Houston

**Professional Associations**

None

**Experience**

Ms. Hermes has over fifteen (15) years of experience in the areas of disaster recovery and facility assessments. She played a strong role in FEMA inspections, post-Hurricane Katrina. From there, her experience in the disaster recovery/damage assessment industry has strengthened through continual, progressive work experience. She has served on large projects as the lead disaster damage assessor. For this project, she will serve as an asset inspector.

**Matthew Dorris**  
**Data Collection/Inspector**

**Education**

High School Diploma

**Professional Associations**

None

**Experience**

Mr. Dorris has over eight (8) years of experience in disaster recovery, property assessment and construction management. He brings years of experience in environmental remediation, disaster recovery and facilities assessment.

**Josef Franklin Pietraszuk**  
**Data Collection/Inspector**

**Education**

Bachelors of Fine Arts

**Experience**

Mr. Pietraszuk has over twenty (20) years of experience in the areas of construction management, disaster recovery, site inspection (including reporting and photographic

documentation) and FEMA requirements. He has worked extensively with FEMA for disaster recovery efforts and grant management work. He has provided inspection services for large-scale damage assessment programs. For this project, he will serve as an asset inspector.

## **Section 5: Approach to Agency Coordination and Quality Assurance/ Quality Control Plan**

### **5.1 Past Performance with Public Agencies**

Pivotal Engineering is currently providing engineering and management services to many municipalities and state agencies in the region including State of Louisiana, City of New Orleans, Jefferson Parish, City of Shreveport, City of Kenner, St. Charles Parish, and St. John Parish. In testimony to our performance history we offer the following specific references:

- I. Nguyen Phan, P.E., Chief Engineer City of New Orleans DPW. (504) 658-8000
- II. Khalid L. Saleh, Ph.D, Senior Design Engineer, City Of New Orleans DPW, (504) 658-8208
- III. Neil Schneider, CCM, P.E. Director of Capital Projects, Jefferson Parish Department of Capital Projects (504) 736-6833
- IV. Mike Lockwood, Director of Sewerage, Jefferson Parish Department of Sewer (504) 736-6661
- V. Mitchell Theriot, P.E. Director of Drainage, Jefferson Parish Department of Drainage (504) 736-6753
- VI. Mark Drewes, PE; Director of Public Works, Jefferson parish, Department of Public Works, (504) 736-6783
- VII. Angela DeSoto, PE; Director of Engineering; Jefferson Parish, Department of Engineering, (504) 736-6500
- VIII. Myra Alexis-Valentine, Grants Administer, St. John Parish, (985) 652-9569

Architectural and Engineering Services are also provided to private clients such as Entergy, Waste Management, and private developers.

Pivotal Engineering has in depth understanding of local, state, and federal governmental agencies

procedures and regulations. As described above on Section 3, Pivotal past performance satisfies the required criteria.

### **5.2 Approach and Resources for Successful Project Completion**

Pivotal Engineering is well equipped to deliver projects that satisfy all components of design, construction, community engagement and environmental awareness. To achieve the expected outcomes, Pivotal Engineering focuses on the key aspects: logistics, administration, scope, budget, timeframe, technicality, social responsibility, and environmental awareness. These aspects are summarized below:

#### **■ Approach to Agency Coordination:**

The Team will identify responsible agencies as early as practical. The Team will notify Forrest County Agricultural High School District and address technically any issues of concern regarding the project's scope, potential infrastructure, environmental, social, or economic impacts that could substantially delay or prevent an agency from granting a permit or other approval that is needed for the project. The team will assure that stakeholder agencies are fully engaged in the scoping of the project and the decisions regarding alternatives to be evaluated in detail in the design.

The Team understands an agency's role in the development of the project and may include the following as they relate to areas of expertise:

- a. Provide meaningful and early input to address concerns and impacts.
- b. Identify issues that could substantially delay or prevent granting of permits/approvals.
- c. Identify opportunities for collaboration, including participating in coordination meetings and joint field reviews, as appropriate.
- d. Provide timely compliance with review and comment on preliminary documents to reflect the views and concerns of their respective agencies, alternatives considered and anticipated impacts and mitigation.

▪ *Capacity to Create and Lead Multi-Disciplinary Team:*

Pivotal Engineering's management team is comprised of experienced managers and task leaders with proven leadership, thoughtfully bringing together capable Team members with exceptional technical skills and supporting them with good QA/QC processes. Open lines of communication and weekly internal conference calls will ensure that the project is managed successfully, within budget and schedule.

The Team has the ability to assist in Engineering Staff Augmentation and reinforce Forrest County Agricultural High School District to evaluate the projects' design and ensuring compliance with all applicable design guidelines and specifications. Furthermore, review of the projects' constructability, inspection, testing reports, cost estimates, meetings participation, contract processing and handling during all phases of the projects can be accomplished by Pivotal accurately. Further, our Team can carry out schematic design services such as outlining and developing general design criteria for enhancement, performing conceptual plans, and preparing and submitting grant applications.

Personnel assigned to this project have an extensive experience in street reconstruction projects, landscaping, widened sidewalks, walkway improvements, handicapped ramp design, curb and gutter improvements, bridge assessment and design, park and green spaces design, lightening enhancement, and all other related projects. Extensive design experience and a full range of technical and engineering capabilities reinforce the team to successfully complete any related projects as needed by Forrest County Agricultural High School District. Pivotal has the capability to be in charge of all phases of the referenced projects from the beginning (pre-bid conferences) to delivery of the finished work.

The Team will prepare and submit all the required documents conforming with the City's format, content, and comments. All the drawings and electronic files will be delivered in a format

compatible with the City's CAD and software system requirement and have signature and stamp associated with Louisiana registered Civil Engineer.

Furthermore, the Team has a comprehensive knowledge in drainage asset cleaning, CCTV, sewer and storm-water pipes repair and rehabilitation, water-flow design, and survey. Any modifications, improvements, renewal and repair of the infrastructures can be fulfilled by Pivotal with great precision.

*Team's Ability to Meet Schedules and Deadlines:*

The Team has the required technical personnel to assure Forrest County Agricultural High School District that all work will be performed in accordance to the contract scope of work and in strict conformance with the latest codes, guidelines and standards. The Team has the manpower, equipment, and expertise to execute any given project within a reasonable time frame. The Team is comprised of Companies that have a reputation of project delivery both on time and within budget.

▪ *Outreach Methods used in the past projects:*

Pivotal Engineering Team has worked closely with Forrest County Agricultural High School District and other agencies throughout the state of Louisiana coordinating inputs from government agencies, stakeholders and community groups. The outreach was conducted through agencies collaboration meetings, workshops for stakeholders regarding design and management, and community meetings to disseminate the plan for community feedback. The Team understands making this process as extensive as possible will help with community buy-in for green infrastructure implementation and make the implementation of regulations for the betterment of the environment. Pivotal Engineering acknowledges the meaningful role that a community has in project development and overall success and is committed to maintaining

symbiotic relationships with communities throughout project life and beyond.

The Greater New Orleans (GNO) area is a wonderfully unique and diverse region. Not many places on the earth have this blend of conditions of topography, soil, rainfall, native vegetation and engineering stormwater management system. As the GNO area moves into the era of resiliency, special attention must be given to the approaches and guiding values of the solutions. Pivotal has completed many projects, within Orleans Parish, that have allowed adequate time for thorough and extensive investigation of the regional conditions. From roadway projects to environmental remediation activities, Pivotal has investigated the region through all environmental media (soil, water and air) as well as built infrastructure (water/wastewater plants, pump/lift stations, roadways, drainage, etc.). Pivotal is committed to pushing the agenda of stormwater management through technical and social consideration for local conditions, community engagement and longevity. Pivotal understands that solutions should build upon existing knowledge and industry standards not yet adopted in the parish as well as innovative ideas and approaches. The future is bright for Orleans Parish and Pivotal desires to remain a “pivotal” component to the development of our future infrastructure.

### **5.3 Quality Control & Quality Assurance Plan:**

As outlined in this Statement of Qualifications, the Team not only presents the number of professional and support personnel available to perform these types of engineering tasks, but also demonstrates the breadth and diversity of the capabilities of the staff. Beyond this diversity of capabilities, the Team’s key personnel staff has combined experience of greater than 500 years of experience in all phases of project delivery, including Survey, Architectural, Civil, Geotechnical, Mechanical, Electrical, Structural, Environmental Engineering, Construction Management, Construction Inspection and Program/Project Management. These professional qualifications include city, state, and federal

certifications in safety, management, and a list of other certifications.

The integrated Team will provide a direct line of communication internally and to anyone who is a representative of Forrest County Agricultural High School District to the assigned Project Principal and Manager. The integrated Team will provide cell lines as the first line of communication, followed by e-mail transmissions and office lines as last resorts. The Team will not let calls or e-mails go unanswered more than 24-hours. Pivotal has had huge success as it relates to our client’s reliance on us as their consultant of choice.

Our management Team is comprised of experienced managers and task leaders with proven leadership who can thoughtfully bring together capable Team members with exceptional technical skills, and support them with good QA/QC processes. Open lines of communication and weekly internal conference calls will ensure that the project is managed successfully within budget and schedule.

Pivotal maintains a comprehensive program to ensure that our projects bring the most value to our clients and are of high quality. Each Pivotal project has a comprehensive QA/QC plan to make sure our procedures and documentation conforms to our corporate policies and our client’s requirements. QA/QC is much more than providing reviews and checking computations. Quality is a mindset that is shared by every member of the Pivotal Team. It starts by clearly understanding expectations and making a commitment to meet them every day and with every deliverable. Each project review also includes some elements of internal value engineering. Our senior staff focuses not only on accuracy and completeness, but on value, optimization, simplicity, operations, maintenance, power cost, and constructability.

Our principals and staff have gained this experience not only through many years of providing services to this variety of clients on a very diverse portfolio of projects, but also through focused continuing education. Pivotal Engineering’s principals and staff have all been

given accolades on their technical competence and knowledge of administering the contract plans and specifications per agency policy and procedure.

Pivotal believes that quality products and services result from having sound business practices, retaining talented staff, and focusing on being responsive to our client's needs. Our clients respect us for our philosophy of "doing the right things for the right reasons."

Quality is integrated into Pivotal's day-to-day business activities through our Quality Management System (QMS). The programs, policies, and business processes that comprise the QMS have four key elements:

- a. Focus - Management actively promotes quality in our business activities and defines responsibilities for maintaining a quality focus.
- b. Service - Staff members are trained, available, and committed to providing quality services.
- c. Delivery - Processes and procedures are in place that promotes quality in the delivery of our products and services.
- d. Improvement - Continual improvement is achieved through performance measurement and identification of areas for improvement.

Pivotal's senior management demonstrates its commitment to quality through establishing responsibilities for quality at all levels of the company, from company principals to members of management to the project team. Responsibilities are documented in Pivotal's QA/QC Program procedures. These procedures define how Pivotal delivers products and services to our clients.

▪ *Experience in creating and working with multi-disciplinary project delivery team:*

Pivotal Engineering's management Team is comprised of experienced managers and task leaders with proven leadership, thoughtfully bringing together capable Team members with exceptional technical skills, and supporting them with good QA/QC processes. Open lines of communication and weekly internal conference

calls will ensure that the project is managed successfully, within budget and schedule.

The Pivotal's approach to the assigned project includes integrated and comprehensive engineering services that include facility inventories, development of design criteria, assessment of major engineering components, preparation of specifications, and plans and associated construction cost.

▪ *Approach to Coordinating Project Delivery Tasks:*

The Team will use an Integrated Project Delivery (IPD) approach that integrates staff, systems, team company's structures, and professional practices into a process that collaboratively harnesses the talents and insights of all participants to optimize project results, increase value to the owner and the community, reduces waste, and maximize efficiency through all phases of design, bid, and construction.

The Integrated Project Delivery is assembling a team that is committed to collaborative processes and is capable of working together effectively. In order to accomplish this, the Principal Project Manager will:

- a. Identify the Team's roles that are most important to the project.
- b. Consider interests and seek involvement of select additional parties, such as agency official(s), local utility companies, and other stakeholders.
- c. Define (in a mutually understandable fashion) the values, goals, interests and objectives of the project to the larger program goals.
- e. Identify the Team's organizational and business structure best suited to IPD that is consistent with the Team's capacity and constraints. The choice should not be rigidly bound to traditional project delivery methods but should be flexibly adapted to the project.
- f. Develop project agreement(s) to define the roles and accountability of the Team members. The project agreements should be synchronized to assure that company's roles and

responsibilities are defined identically in all agreements and are consistent with the agreed Team organizational and business models. Key provisions regarding compensation, obligation, and risk allocation will be clearly defined and should encourage open communication and collaboration.

## **Section 6: Team's Current Workload**

The team has the needed technical personnel to assure Forrest County Agricultural High School District that all work will be performed in accordance to the contract scope of work and in strict conformance with the latest Codes, guidelines and standards. The Team has the manpower, equipment, and expertise to execute any given project within a reasonable time frame.

Pivotal Engineering is comprised of engineers, managers, designers, data analysts, inspectors and administrators with a collective reputation of project delivery both on time and within budget. Our current workload will allow for quick assignment of technical resources to the project at hand. In addition, the team has the required management and field personnel readily available to begin the necessary services upon written notification. Further, the integrated team will provide a direct line of communication internally and to anyone who is a representative of Forrest County Agricultural High School District to the assigned Pivotal project principal and manager. The integrated Team will provide cell lines as the first line of communication, followed by e-mail transmissions and office lines as last resorts. The Team will not let calls or e-mails go unanswered more than 24-hours and with this have seen huge success as it relates to our client's reliance on us as their consultant of choice.

## E. RESUMES OF KEY PERSONNEL PROPOSED FOR THIS CONTRACT

(Complete one Section E for each key person.)

Irish Jones	ELECTRICAL DESIGNER	a. TOTAL 40+	b. WITH CURRENT FIRM 8

15. FIRM NAME AND LOCATION (City and State)

**PIVOTAL ENGINEERING, LLC (New Orleans, LA)**

16. EDUCATION (DEGREE AND SPECIALIZATION)

**5 years of college in Electrical Engineering  
– University of Texas at Arlington**

17. CURRENT PROFESSIONAL REGISTRATION (STATE AND DISCIPLINE)

18. OTHER PROFESSIONAL QUALIFICATIONS (Publications, Organizations, Training, Awards, etc.)

Mr. Jones serves as the senior electrical designer of Pivotal Engineering. He has over 40 years of experience in designing electrical installations (power distributions) for industrial and commercial applications of all magnitudes. He obtained his first Class A electrical license in 1967 in Georgia. Being an electrical contractor for over 40 years, Mr. Jones has developed an extensive experience in not only designing and laying out electrical designs, but also in supervising the installations in the construction phase. His expertise allows the team to provide the best and most economical electrical design for any facility. Due to his experience as an electrician and a contractor, Pivotal will not need to depend on the in-plant electrician while conducting the electrical components field investigations.

(Complete one Section E for each key person.)

12. NAME <b>Courtland Parr</b>	13. ROLE IN THIS CONTRACT <b>ENVIRONMENTAL PROJECT MANAGER</b>	14. YEARS EXPERIENCE	
		a. TOTAL 1+	b. WITH CURRENT FIRM 1+

15. FIRM NAME AND LOCATION (City and State)

**PIVOTAL ENGINEERING, LLC (New Orleans, LA)**

16. EDUCATION (DEGREE AND SPECIALIZATION)

Bachelors of Science in Petroleum Engineering / 2019

17. CURRENT PROFESSIONAL REGISTRATION (STATE AND DISCIPLINE)

N/A

18. OTHER PROFESSIONAL QUALIFICATIONS (Publications, Organizations, Training, Awards, etc.)

Mr. Parr serves as an Environmental Project Manager at Pivotal Engineering. His experience includes compliance reporting, multi-media environmental sampling and disaster recovery management. His experience also includes working in AUTOCAD Civil3d and GIS.

## 19. RELEVANT PROJECTS

a.	(1) TITLE AND LOCATION (City and State) <b>Hurricane Laura – Disaster Recovery</b> (West Lake, LA)	(2) YEAR COMPLETED	
		PROFESSIONAL SERVICES 2020	CONSTRUCTION (If applicable) N/A
	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input checked="" type="checkbox"/> Check if project performed with current firm Mr. Parr is the project manager for a large-scale disaster recovery project in Lake Charles, Louisiana. This project is ongoing. He has managed data from hundreds of vac trucks, including volumes, date/time, company and asset ID information. He has maintained a database of site information as well as a working file containing the overall volume of material.		
b.	(1) TITLE AND LOCATION (City and State) <b>Entergy Nelson Ground Water Reports</b> (West Lake, LA)	(2) YEAR COMPLETED	
		PROFESSIONAL SERVICES 2020	CONSTRUCTION (If applicable) N/A
	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input checked="" type="checkbox"/> Check if project performed with current firm Mr. Parr prepared ground water reports for five industrial facilities in Westlake, Louisiana. Activities include groundwater sampling, reviewal of laboratory reports (including sample results and QA/QC results). Additionally, he performs statistical analysis via LDEQ-approved software as well as report generation. He manages the historical database for sample results.		
c.	(1) TITLE AND LOCATION (City and State) <b>Entergy Nelson SRA Pond Dioxin Furan Investigation Scoping</b> (West Lake, LA)	(2) YEAR COMPLETED	
		PROFESSIONAL SERVICES 2020	CONSTRUCTION (If applicable) N/A
	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input checked="" type="checkbox"/> Check if project performed with current firm Mr. Parr spent time going to the field to collect soil samples to test for Dioxins. Following going to the field to collect samples, he assisted in the reporting by taking data from the lab and putting it into tables and also working in AutoCAD to create maps that revealed the locations of the soil samples.		
d.	(1) TITLE AND LOCATION (City and State) <b>Nelson Unit 6 Settling Pond Permit Renewal</b> (West Lake, LA)	(2) YEAR COMPLETED	
		PROFESSIONAL SERVICES 2020	CONSTRUCTION (If applicable) N/A
	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input checked="" type="checkbox"/> Check if project performed with current firm Mr. Parr completed the permit renewal for the type 1 surface impoundment at the Entergy Nelson Site in Westlake, Louisiana. This included creating numerous maps in AutoCAD required by the DEQ for the permit application. Spent time searching through the EDMS to find out pertinent information about the facility in order to complete attachments necessary for the renewal.		
e.	(1) TITLE AND LOCATION (City and State) <b>Nelson Wastewater Neutralization Basin Permit renewal</b> (West Lake, LA)	(2) YEAR COMPLETED	
		PROFESSIONAL SERVICES 2020	CONSTRUCTION (If applicable) N/A
	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input type="checkbox"/> Check if project performed with current firm Mr. Parr Completed the permit renewal for the type 1 surface impoundment at the Entergy Nelson Site in Westlake, Louisiana. This included creating numerous maps in AutoCAD required by the DEQ for the permit application. Spent time searching through the EDMS to find out pertinent information about the facility in order to complete attachments necessary for the renewal.

The project entails roadway rehabs to 8 blocks (4,936 ft) in the neighborhood of Adams St. He is responsible for designing horizontal and vertical roadway alignment, drainage, water, sewer, geometrics of the streets, CADD Design, preparation of capital cost estimates and construction documents for the project.		

## E. RESUMES OF KEY PERSONNEL PROPOSED FOR THIS CONTRACT

(Complete one Section E for each key person.)

12. NAME <b>Ignatious Mutoti, PE</b>	13. ROLE IN THIS CONTRACT <b>SENIOR ENVIRONMENTAL ENGINEER</b>	14. YEARS EXPERIENCE	
		a. TOTAL 26	b. WITH CURRENT FIRM 7+

15. FIRM NAME AND LOCATION (City and State)

**PIVOTAL ENGINEERING, LLC (New Orleans, LA)**

16. EDUCATION (DEGREE AND SPECIALIZATION)

Phd Environmental Engineering, University of Central Florida, 2003  
M.S. Environmental Engineering, University of Sydney, Australia, 1998  
B.Sc. Applied Chemistry and Chemical Technology, University of Zimbabwe (1993)

17. CURRENT PROFESSIONAL REGISTRATION (STATE AND DISCIPLINE)

Licensed Class 2 Wastewater Treatment Plant Operator (Virginia)  
Virginia PE 0402040167

18. OTHER PROFESSIONAL QUALIFICATIONS (Publications, Organizations, Training, Awards, etc.)

Dr Mutoti has over 26 years of experience in the field of water and wastewater and has held various positions in the public, academic and private consulting sectors. In the past, Dr. Mutoti has held positions as Chemist and Water/Wastewater Laboratory manager, municipal Water/Wastewater Process Engineer responsible for treatment process optimization and troubleshooting for facilities up to 162 MGD. He has taught both undergraduate and graduate level water and wastewater engineering courses as a Professor and has been involved in higher level research projects. Dr. Mutoti has authored and co-authored several journal and newsletter articles and presented at various conferences. He has many years of consulting engineering experience design and operating water and wastewater facilities. He is a very competent design engineer, and water and wastewater plant operator, hydraulic & water quality modeler, and has good AutoCAD skills.

### 19. RELEVANT PROJECTS

	(1) TITLE AND LOCATION (City and State)	PROFESSIONAL SERVICES	(2) YEAR COMPLETED
a.	<b>Veolia West Bank Wastewater Treatment Plant – S&amp;WB</b> (Jefferson Parish, LA)	2015	CONSTRUCTION (If applicable) N/A
	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input checked="" type="checkbox"/> Check if project performed with current firm  Dr. Mutoti serves as the Project Manager for the Veolia West Bank Wastewater Treatment Plant. The scope of work is to install a new ATS at the plant's main 4160V electrical feed to prove switching between the main Entergy utility feed and the existing emergency generator. It replaces the existing inoperable system.		
b.	<b>St.Brides Green Water Treatment Plant Upgrade</b> (Chesapeake, VA)	2009	CONSTRUCTION (If applicable) N/A
	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input type="checkbox"/> Check if project performed with current firm  Dr. Mutoti served as the Project Manager and Principal Engineer for the design of water treatment facility, a new 500 gpm well, modifications to an existing 600 gpm Well, 500,000-gallon elevated storage tank, SCADA system and sequence of operation, construction administration and start-up and O&M Manual. The project was estimated to be 4.2 million dollars.		
c.	<b>Tampa Bay Water/AWWARF Project</b> (Orlando, FL)	2001	CONSTRUCTION (If applicable) 2004
	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input type="checkbox"/> Check if project performed with current firm  Dr. Mutoti's participated in a \$3 million dollar AWWARF pilot study that was conducted by the University of Central Florida to determine the effects of blending multiple source waters on distribution water quality in Florida. The project is estimated to be 3 million dollars.		
d.	<b>State Fair of Virginia Water Supply Improvements</b> (Caroline County, VA)	2006	CONSTRUCTION (If applicable) 2008
	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input type="checkbox"/> Check if project performed with current firm  Dr. Mutoti served as the Project Manager and Principal Engineer for the above mentioned project. The project was estimated to be 4.2 million dollars. Specifically, the project included connecting to the Hanover County's drinking water system via a mile and half 8-		

inch water line, designing a 500,000 gallon ground storage tank for fire flow water, a 250,000 gallon ground storage tank for drinking water, a pressure and disinfectant booster station.		
(1) TITLE AND LOCATION <i>(City and State)</i>  <b>Oakland Park and Purkins Corner WWTP Upgrades (King George County, VA)</b>	(2) YEAR COMPLETED	
	PROFESSIONAL SERVICES 2009	CONSTRUCTION (If applicable) 2012
(3) BRIEF DESCRIPTION <i>(Brief scope, size, cost, etc.)</i> AND SPECIFIC ROLE <input type="checkbox"/> Check if project performed with current firm  e. Dr. Mutoti served as the Project Manager and Principal Engineer for the above mentioned project. Scope for these two extended aeration package plants include pilot study to determine operational and design requirements to achieve Chesapeake Bay nutrient limits and removal metals. The pilot study also identified design deficiencies, mechanical and electrical shortfalls that required design improvements. Scope of work for the engineering design included preliminary and final design for the identified improvements and assisting the Authority with DEQ negotiations for consent order. Design of requirement improvements have been completed is the two projects have been bid. Value engineering may be required before the planned improvements can be constructed. Improvements at the two wastewater treatment plants also included, energy efficiency, and flow equalization.

a. Name, title & domicile <b>Ray Bergeron</b>	b. Position or Assignment for this project <b>Chief Architect</b>
c. Name of firm by which employed full time <b>Pivotal Engineering, LLC</b>	d. Years experience: 44
e. Education: Degree(s) / Years / Specialization B.S., Architecture, 1963	f. Active registration: Year registered: <u>2005</u> Branch: <u>Architecture</u> State: <u>LA</u> License No.: 4280

## • Background

Mr. Bergeron has over 40 years of professional experience, working on various projects across the Greater New Orleans and Baton Rouge Area for the state of Louisiana, and the Southeastern United States ranging in costs from \$100,000 to \$25,000,000. During his career, Mr. Bergeron was responsible for the design of numerous office buildings, hotels, restaurants, retail facilities, health and medical facilities, institutional, recreational, and interior designs, as well as single family and multi-family dwellings.

Mr. Bergeron has the ability to create cost efficient design while maximizing the aesthetics. To assure that the many facets of the design process are properly implemented, Mr. Bergeron effectively coordinates with all other disciplines whose input and expertise is critical to the successful completion of the project.

His past professional affiliations include president of the New Orleans Chapter A.I.A. in 1984, President of the Lakeside Kiwanis in 1983, and Chairman of the Jefferson Parish Building Code Task Force 1987-88. He was also Chairman of the Business Development Committee of the Jefferson Parish Economic Development Commission, and a Commissioner on the board of Civic Environmental Planning in Fairfax County, Virginia

## • Projects Experience

**Albert Cammon Middle School New Wing and Locker Room Additions; St. Charles Parish School Board; St. Rose, Louisiana:** Mr. Bergeron served as project Chief architect responsible for the developing design, design development and construction documents for Albert Cammon Middle School Renovations and Expansion. The project construction cost is 3.9 million.

### Served as Chief Architect on the following projects:

- St. John the Baptist Parish Park and Recreation Facility; Edgard, LA
- St. John the Baptist Parish Senior Citizen Center; LaPlace, LA
- St. John the Baptist Senior Citizen Center; Edgard, LA
- St. Charles Parish; Regional Library; Destrehan, LA
- St. Charles Parish; Regional Library; Luling, LA

**Request for Qualifications  
Architectural/Engineering Services  
Exhibit "A"  
Proposal Requirements**

Each individual or firm should submit the following information as part of its proposal for Architectural Services. Proposals that do not meet the requirements may be deemed not responsive and may be disqualified from the evaluation process. The District reserves the right to waive any informality or defect in any proposal and to negotiate further with any party submitting a proposal.

**Introduction:**

- Present a written narrative of information about your firm including the education and experience of all members of your firm who may be assigned to work with the District. Please include the names of employees available to service the needs of the District or any awarded projects. Also include information on how long your firm has been in business and for how long your firm has been providing K-12 school construction/renovation services.
- Experience of in-charge architect(s), engineer(s), and inspector(s)/project manager(s) of your firm in building educational facilities and other buildings.
- Experience working on projects funded with Federal and State funds, including but not limited to projects involving or including project funding from the Mississippi Development Authority, Department of Finance and Administration, Mississippi Dept. of Education, U.S. Treasury Department, U.S. Department of Education, U.S. Dept. of Labor, GEER, ESSER and FAR.

**Education/Licensing:**

- Please specify the individual or individuals who will be assigned to the needs of Forrest County Agricultural High School District and include specific education and/or licensing information.

**Experience in Public School Field:**

- Provide a detailed listing of your firm's experience in providing architectural/engineering services, particularly in the area of K-12 public schools, to include types of construction and length of service relationships. Please emphasize any educational projects in the state of Mississippi.

**Insurance Coverages:**

- Provide your firm's current insurance coverages and confirm that insurance coverages listed in Exhibit "B" will be in place and active prior to initiation of all contracts.
- The party selected hereunder must supply certificates of insurance as listed in Exhibit "B" of this RFQ prior to being awarded a contract.

**List of Completed Projects:**

- Provide information regarding K-12 school building/renovation projects completed within the last four (4) years to include information on whether each project was completed within the required timelines, the length of time to complete the project from beginning of design through final completion, the dollar amount over/under budget, and number of change orders per construction contract. Your firm is also welcomed to submit other information on other additional commercial and education building projects to show additional experience.

**Project Oversight:**

- Provide a detailed narrative of how your firm will ensure the management and oversight of any project awarded hereunder and how it will be handled in the best interest of the District.
- To the extent not already covered, provide information on the capacity of your firm to oversee projects and provide all needed reports with other workload within the time frame established by the District and as required by the funding sources for any project awarded.

**Interview:**

- The District may schedule an interview with one or more parties submitting a proposal, if deemed necessary, within one to two weeks following receipt of proposals and prior to making a recommendation to the Board.

**References:**

- Provide at least three (3) client references (with contact information) on K-12 facility projects your firm currently services or for whom your firm provide services on K-12 facilities within the last four (4) years.
- Provide at least three client references (with contact information) for other public or commercial facilities currently under your services.

## Exhibit "B"

### Minimum Insurance Requirements to be Provided Upon Initiation of Contract

Architect shall purchase and maintain in force at all times during the full term of the contract, the following minimum insurance covering: Bodily injury and property damage liability insurance in at least the following types with the minimum identified.

Professional Liability— Professional liability insurance in an amount of \$1,000,000.00

Commercial General Liability — Combined single limit in an amount of \$1,000,000.00 per occurrence with \$2,000,000.00 aggregate

Commercial Automobile Liability— Covering owned, non-owned, and hired automobiles/vehicles—combined single limit in amount of \$1,000,000.00

Workers' Compensation Limits Statutory— State of Mississippi with a waiver of Subrogation.  
—Employer's Liability-\$100,000.00 each accident; \$500,000.00 disease Policy Limit;  
\$100,000.00 Disease each employee

**Architect will require all of the above coverages for all contractors who submit bids, with the exception of professional liability, and the following bonds of all contractors on construction projects prior to issuing a construction contract:**

#### Bonds Required of Contractors:

Fidelity bonds shall be secured on all of the Contractor's employees in amounts not less than \$5,000.00 per individual and \$25,000.00 per occurrence.

A performance bond shall be executed in the amount of the contract conditioned on the faithful performance of the work according to the plans, specifications, and contract documents.

All insurance must be written by insurance companies that are rated in the A.M. Best Key Rating Guide-Property 7 Casualty, with a policy holder's rating of "A". The Forrest County Agricultural High School School District is to be named as additional insured in each policy and a waiver of subrogation shall be provided to the Owner. Architect shall provide notification, in writing, thirty (30) days prior to the termination date.

I do certify that my firm and contractors will have the required minimum insurances and bonds in place and active prior to initiation of all contracts.

## **Exhibit "C"**

### **Other Requirements**

1. Any employees of the architect firm, the Contractor or Subcontractors reasonably expected to come into contact with District students will be required to comply with all State and Federal requirements and District policies that are required for student and safety purposes, including but not limited to the Drug-Free Workplace Act of 1988.
2. Architects/Contractors must comply with the Mississippi Employment Protection Act. Architects/Contractors must represent and warrant that they will ensure their compliance with the Mississippi Employment Protection Act (Senate Bill 2988 from the 2008 Regular Legislative Session) and will register and participate in the status verification system for all newly hired employees. The term "employee" as used herein means any person that is hired to perform work within the State of Mississippi. As used herein, "status verification system" means the Illegal Immigration Reform and Immigration Responsibility Act of 1996 that is operated by the United States Department of Homeland Security, also known as the E-Verify Program, or any other successor electronic verification system replacing the E-Verify Program. Architects/Contractors agree to maintain records of such compliance and, upon request of the owner, to provide a copy of each such verification to the owner. Architects/Contractors further represent and warrant that any person assigned to perform services hereunder meets the employment eligibility requirements of all immigration laws of the State of Mississippi. Architects/Contractors understand and agree that any breach of these warranties may subject Architects/Contractors to the following: (a) termination of this Agreement and ineligibility for any state or public contract in Mississippi for up to three (3) years, with notice of such cancellation/termination being made public, or (b) the loss of any license, permit, certification or other document granted to Contractor by an agency, department or governmental entity for the right to do business in Mississippi for up to one (1) year, or (c) BOTH. In the event of such termination/cancellation, Architects/Contractors would also be liable for any additional costs incurred by the owner due to contract cancellation or loss of license or permit.
3. The Architects/Contractors must warrant that they have no "conflict of interest" in administering contracts. The Architects/Contractors represent as a part of this proposal and any resulting contract that such entity has not retained any person or agency on a percentage, commission, or other contingent arrangement to secure this contract.
4. The Architects/Contractors must certify that neither they nor their principals: (a) are presently debarred, suspended, proposed for debarment, declared ineligible or voluntarily excluded from covered transactions by any federal department or agency; (b) have, within a three (3) year period preceding this Agreement, been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain or performing a public (federal, state or local) transaction or contract under a public transaction; violation of federal or state anti-trust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements or receiving stolen property; (c) are presently indicted of or otherwise criminally or civilly charged by a governmental entity

with the commission of fraud of a criminal offence in connection with obtaining, attempting to obtain or performing a public (federal, state or local) transaction or contract under a public transaction; violation of federal or state anti-trust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements or receiving stolen property, and (d) have, within a three (3) year period preceding this Agreement, had one or more public transaction (federal, state or local) terminated for cause or default.

**Exhibit "E"**  
**Drug Test Certification**

The undersigned does hereby certify to the Board of Trustees for the Forrest County Agricultural High School District ("District") as follows:

That I am a representative of Pivotal Engineering, LLC  
("Architect" or "Contractor"), currently under contract ("Contract") with the District;  
that I am familiar with the facts herein certified and am authorized and qualified to  
execute this certificate on behalf of Architect (Contractor).

Architect (Contractor) certifies that all of its employees, as well as, employees of  
subcontractors, who may come into contact with students during the term of the  
contract with the District have all had drug tests as specified in School Board Policy  
GBRL. None of these employees are in violation of School Board Policy  
GBRL-Drug-Free Workplace.

A complete and accurate list of Architect's (Contractor's) employees and of all of its  
Subcontractors' employees who may come in contact with District pupils during the  
course and scope of the Contract is attached hereto.

Architect (Contractor) acknowledges that he has reviewed School Board Policy GBRL of  
the Forrest County Agricultural High School District found at  
[www.forrestcountyahs.com](http://www.forrestcountyahs.com).

## NOTIFICATION OF CRIMINAL HISTORY

A person or business entity that enters into a contract with a School District in the State of Mississippi, must give advance notice to the District if the person or owner or operator of the business entity has been convicted of a felony. This notice will include any/all employees of the entity who have been convicted of a felony. The notice must include a general description of the conduct resulting in the conviction of a felony.

The Forrest County Agricultural High School District may terminate a contract with a person or business entity if the District determines that the person or business entity failed to give notice as required.

Any party submitting a proposal should include with its proposal the following certification:

### Certification

September 11, 2014

To Whom It May Concern:

Please allow this letter to serve as a letter of recommendation for Pivotal Engineering LLC. The City of Shreveport has enjoyed our association with this company and Tarek Elnaggar in particular.

Pivotal Engineering personnel have performed outstanding compliance and inspections service for the City of Shreveport for over 10 years. Pivotal is always available on short notice to assist with project needs. Pivotal has done an excellent job and has always responded very quickly to the City's needs with high quality work.

The City of Shreveport looks forward to continuing to work with Pivotal Engineering on future projects. Please feel free to call/email if you should have any questions about this company or their personnel.

Sincerely,

Kia C. Price,  
Director  
Purchasing & Procurement Department  
St. John Parish Council  
1801 West Airline Highway  
LaPlace, LA 70068

**Subject: Letter of Reference**

To whom it may concern:

I have worked with Darius Cook of Pivotal Engineering on two projects for the St. John Parish Council in the past three years; the Minor Housing Repair Program and Canals Clearing and Grubbing Environmental Review. I can say that I was extremely please with him and his staff and was satisfied with the final products. The projects required matters to be address with extreme detail, and a constant presence by the Consultant. Mr. Cook and his staff worked diligently with the Contractors to meet contract deadlines, and meet and greet homeowners as the Parish liaison to address possible issues or concerns.

On behalf of St. John the Baptist, I recommend the services of Mr. Darius Cook to organizations that's in need of disaster response/recovery services. With the program being one of the largest of its kind, Mr. Cook and his staff confronted the challenge gracefully. They are highly experience at what they do and are an excellent partner to communities in need of rebounding from catastrophic events.

Should you have additional questions on Mr. Cook's performance, please contact me at 504-442-2760 or via e-mail @ [m.alexisv@sjbparish.com](mailto:m.alexisv@sjbparish.com). I would be happy to work with this group again and recommend them for other work.

Thank you,

A handwritten signature in blue ink, reading "Myra Alexis-Valentine".

**Subject: Letter of Reference**

To whom it may concern:

I have worked with the Pivotal Engineering team on five separate projects over the past 7 years; Lusher Elementary Restroom Renovations, Ashe Cultural Arts Center Renovations , Tenant Improvements, Nunez Community College Fine Arts Center, and Good Work Network Project. I have had only good experiences with Bassam and the rest of the Pivotal staff. Several of these projects have had challenging schedules, specific project requirements, and/or multiple agency approvals, which requires a detail oriented and trustworthy consultant.

I would be happy to work with this group again and recommend them for other work.

Sincerely,

A handwritten signature in blue ink, appearing to read 'R. Zabala', with a stylized flourish at the end.

LA Environmental Support

September 15, 2014

Reference: Pivotal Engineering, LLC

Subject: Letter of Recommendation for Environmental Services

To Whom It May Concern:

I am writing to recommend Terry Elnaggar and his staff at Pivotal Engineering, LLC as a candidate for the execution of environmental services.

Mr. Elnaggar has assisted Entergy and its subsidiaries with environmental assessment, compliance testing, reporting and permitting associated with LAC 33:VII for over (20) twenty years in Louisiana. During his tenure as one of the principals at Pivotal Engineering, LLC he has done an excellent job providing timely and economically sensible deliverables to meet Entergy's regulatory needs with high quality work. Terry has an excellent relationship with the regulatory agencies ensuring that deliverables are compliant with their requirements.

Entergy looks forward to continuing to work with Pivotal Engineering, LLC. If you have any questions, or require additional information, please feel free to contact me at 504 576-6037 or by email at [gvonbod@entergy.com](mailto:gvonbod@entergy.com).

Sincerely,

  
Gus M. VonBodungen
