ITEM(S) FOR:

INSTRUCTONS TO BIDDERS

1. READ THE ENTIRE BID, INCLUDING ALL TERMS AND CONDITIONS AND SPECIFICATIONS
2. ALL BID PRICES **MUST** BE TYPED OR WRITTEN IN INK. ANY CORRECTIONS, ERASURES OR OTHER FORMS OF ALTERATIONS TO UNIT PRICES SHOULD BE INITIALED BY THE BIDDER.
3. THIS BID IS TO BE SIGNED MANUALLY IN INK UNLESS SUBMITTED ELECTRONICALLY IN ACCORDANCE WITH CURRENT STATE STATUTES.
4. BID PRICES SHALL INCLUDE DELIVERY OF ALL ITEMS F.O.B. LAKE CHARLES, LA OR AS OTHERWISE PROVIDED. BIDS CONTAINING "PAYMENT IN ADVANCE" OR "C. O. D." REQUIREMENTS ARE NOT ACCEPTABLE. PAYMENT IS TO BE MADE WITHIN 30 DAYS AFTER RECEIPT OF PROPERLY EXECUTED INVOICE OR DELIVERY, WHICHEVER IS LATER. NO "SHORT PAYMENT" OF INVOICES ARE ALLOWED
5. DESIRED DELIVERY 45 DAYS AFTER RECEIPT OF ORDER OR SOONER

ANY QUESTIONS ABOUT ANY ITEM SHOULD BE DIRECTED TO BUYER AND PURCHASING DEPARTMENT.

THERMO-KOOL/Mid-South Industries, Inc.
WALK-IN COOLER AND FREEZER SPECIFICATIONS

GENERAL SPECIFICATIONS:

The **THERMO-KOOL** walk-in specified shall be prefabricated modular construction. It shall be designed and constructed to allow fast and easy field assembly, disassembly, relocation and enlargement by the addition of like modular panels. Walk-in shall be designed and constructed as shown on plan. Overall size of walk-in shall be **26' 10" x 12' 5" x 7' 7"** to fit exact job site requirements.

PANEL CONSTRUCTION:

Wall and ceiling panel widths shall be within **1" increments up to 46" wide**. Corner panels shall be 90 degree angle, 12" x 12". All panels shall be interchangeable with like panels for fast and easy assembly. **Partition panel placement shall be within 1" increments to meet shelving space requirements.**

All panels shall consist of metal pans formed to precise dimensions. Metal finish to be as specified. Insulation shall be "foamed-in-place" urethane to bond permanently to complete inner surfaces of both interior and exterior metal pans to form strong rigid unit. Panels shall not have internal wood or metal support, framing, straps, or other noninsulating members. Each panel shall be 100% urethane foam insulation exclusive of metal pans. Perimeter structure shall be formed of **DURATHANE**, high density urethane insulation forming tongues and grooves to assure vapor and airtight joints and to prevent pre-installation damage and deterioration of exposed urethane surfaces.

WARRANTY:

Panels shall be covered by a Ten-Year Factory Warranty.

INSULATION:

Insulation shall be 4" or 5" thick rigid, zero ozone depleting HFC 134a blown Class I urethane foam classified according to UL 723 (ASTM-E-84) as tested by Underwriters Laboratories, Inc. The core material has a flame spread of 25 or less and a smoke density of 250.

The urethane foam is foamed-in-place to bond to inner surfaces of metal pans having an average thermal conductivity (K factor) of 0.13 BTU/hr./sq. ft. per degrees/Fahrenheit/inch. As tested in accordance with ASTM C 518-2004, the R factor for both coolers and freezers is 32.

The prefabricated urethane foamed panels shall be supplied with a Class I fire hazard classification according to UL 723 (ASTM-E-84) as tested by Underwriters Laboratories, Inc. Panels shall have a flame spread rating of 25 or less and bear a certifying Underwriters Laboratories, Inc. label.

This rating is not intended to reflect hazards presented by this or any other material under actual fire conditions

METAL FINISHES:

A variety of metal finishes are available for all interior and exterior surfaces. Exposed Exterior and Interior Walls to be **.040 Stucco Embossed Aluminum**, Unexposed Exterior to be **26-**

gauge Stucco Embossed Galvanized, and Interior Ceilings to be White Baked-On-Enamel in the Aluminum Finish.

PANEL LOCKING ASSEMBLIES:

Assembly of walk-in shall be accomplished by “**Insta-Loks**” consisting of cam-action hook arm assembly set in one panel and a self-aligning, self-centering, pin assembly set in the matching panel. All vertical joints must have a minimum of three **Insta-loks**. Rotation of the cam-action hook arm shall pull and lock panels together to form airtight, vapor proof joints. No metal straps or connecting rods shall be used inside the panels. Rotation of the cam-locks shall be operated from inside the walk-in through access ports that are sealed with vinyl snap-in closures.

PANEL GASKETS:

NSF listed double-bead vinyl gasket shall be applied to the tongue side of all panels, on both interior and exterior. Gaskets shall be impervious to stains, grease, oils, mildew, sunlight, etc.

ENTRANCE DOOR AND FRAME:

Walk-in compartments (cooler and freezer) shall be equipped with a 34” x 76” (contact factory for additional sizes) hinged-type, flush-mounted entrance door mounted in a nominal 4’, 5’ or 6’ frame and located in exact location as shown on drawing. **Door placement shall be within 1” increments to meet shelving space and job site requirements.** Door shall be manufactured to accommodate floor construction. Door and frame shall be listed by Underwriters Laboratories and bear the UL Seal of Approval and be equipped with the following:

Door shall be equipped with a one-piece perimeter PVC accordion type removable gasket with magnetic core at the top and along the side perimeter of the door. An adjustable wiper gasket shall be mounted along the bottom edge of the door.

Latch shall be break-a-way type with cylinder lock and inside safety release handle so the door can be opened from the inside even if locked. A positive action hydraulic door closer shall be included to ensure gentle closing action of door to opening and to ensure positive closing of door. The latch shall be of high pressure zinc die cast with highly polished chrome finish.

Hinges shall be adjustable with built-in spring action. Strap shall adjust horizontally, providing door lift and rotation to keep door square and prevent energy loss from sagging doors. Cam-rise assists closing and reduces gasket wear. Flange shall have a removable cap, allowing lift-off of door without removing hinges.

Door frame shall consist of **heavy reinforced steel “U” channel frame** to encompass entire perimeter of opening, foamed-in-place to give extra support and rigidity to frame and to prevent racking, distortion, warping and twisting. A backup must be welded for added strength.

An armored anti-sweat heater cable shall be run in a breaker strip located behind a removable heavy gauge stainless steel trim for easy access to heater cable. Heater cable shall be run under threshold consisting of heavy reinforcement “U” channel breaker strip and heavy gauge stainless steel threshold.

Door section shall be provided with an operating toggle switch and pilot light mounted on the exterior side of the door frame. (Weathertight switches also available for outdoor walk-in applications.) An incandescent vapor proof light and face mounted inlet box shall be mounted on the interior side of the door frame for 115 volt, 60 cycle, 1 phase A.C. service. All wiring shall be in concealed rigid conduit. A 2-1/2" diameter chrome face, flush mount, dual reading, adjustable dial thermometer shall be provided on exterior of door section to provide temperature reading of -40 degrees C to +150 degrees C.

VINYL STRIP CURTAINS/DOORS:

To minimize infiltration of air when doors are open a vinyl strip curtain or vinyl door shall be provided.

TREADBRITE (OR STAINLESS STEEL) KICKPLATES:

Door shall have aluminum diamond treadbrite (or stainless steel) kickplates 36" high on the interior and exterior. Diamond tread (or stainless steel) kickplates shall be mounted with adhesive and sealed with silicone. **No external fasteners such as screws or pop rivets shall be applied as fastening for the diamond tread (or stainless steel) kickplates.**

FLUORESCENT LIGHT FIXTURES:

If additional illumination is required 4' fluorescent light fixtures (less bulbs) shall be provided in quantity as shown on plan.

HEATED PRESSURE RELIEF VENT:

Freezer shall be equipped with a two-way heated pressure relief vent to equalize pressure between the interior and exterior caused by defrost cycles and opening of door. Electrical service to be 115v/60/1 phase.

FLOOR CONSTRUCTION:

Walk-in floor for cooler shall be fabricated similar to other panels and be designed to withstand uniformly distributed stationary loads of 600 lbs. per square foot. Interior surface of floor panels to be foamed-in-place **Smooth Aluminum.**

THERMO-KOOL DURA-FLOOR:

The Walk-in Freezer floor shall be designed for **additional stationary floor load strength of up to 12,000 lbs. per square foot THERMO-KOOL's DURA-FLOOR shall be provided which shall consist of an interior surface of foamed-in-place 1/8" Aluminum Treadplate with high density urethane support structures foamed-in-place on interior of floor panel and firmly attached to a foamed-in-place plywood subfloor.**

INTERIOR RAMP:

To eliminate a step-up the walk-in shall be equipped with an interior **built-in foamed-inplace ramp** at entrance door. The interior ramp shall have an NSF approved cove and have a non-

skid surface and be equipped with a threshold and heater wire on freezer applications. Interior ramp shall be width of door opening x 24" depth.

LOCKING BAR:

The walk-in shall be equipped with additional security by means of a **foamed-in-place concealed locking bar**. Locking bar to include provisions for a padlock so the door cannot be removed if the hinges are removed and inside safety release mechanism to prevent entrapment inside the walk-in.

COLUMN SURROUND/OFFSET CONFIGURATION:

All panels which are included in column and offset configurations shall be constructed in accordance with specifications for all walk-in panels. **All column and offset panels shall be foamed-in-place** tongue and groove panel construction secured in place by "insta-lok" fasteners and shall **lock in place to all ceiling, floor and adjacent panels. Field cutting will not be allowed.**

REFRIGERATION:

Basic refrigeration components shall consist of a condensing unit of the Scroll type. Condensing units shall be factory assembled and UL approved. The condenser shall be air-cooled. Refrigerant for medium and low temperature systems shall be R448-A.

1 ½ HP, Remote Pre Assembled Refrig. System Model RFO180E4SEANT 208-230/60/3 Medium Temperature, base, weather hood, winter controls, Scroll, Air-cooled, R448A (15 MCA, 20 MOPD, 8.7 compressor RLA) with 2 RL6A052ADA 115/60/1 coil (0.8 amps) with Dual Speed EC motor.

3 ½ HP, Remote Pre Assembled Refrig. System Model RFO350L4SEA 208-230/60/3 Low Temperature, base, weather hood, winter controls, Scroll, Air-cooled, R448A, Std. Defrost Kit (32.2 MCA, 35 MOPD, 10.9 Compressor RLA) with RL6E105DDASC 208-230/60/1 Coil (1.0 fan amps, 9.8 heater amps) with Dual Speed EC motor.

Evaporators shall be forced air type with air flow parallel to the walk-in ceiling. Evaporators shall be a standard low profile series. All evaporator coil components shall be housed in heavy gauge aluminum housing. Units shall have drain pan with drain pipe connection.

Condensing unit voltage to be as specified by job site requirements.

Units shall have drain pan with drain pipe connection. Evaporators shall be equipped with an automatic electric defrost system including coil heaters, time clock, fan delay control, drain line heaters and liquid line solenoid.

The basic components shall be supplied as specified in either Remote, Remote Preassembled, Top Mount Quick Connect, Remote Quick Connect, or Side Mount Self-Contained and shall include condensing unit, evaporator coil, control kit (pressure control, thermostat, liquid line drier, sight glass, suction line vibration eliminator, expansion valve and evaporator coil mounting kit), defrost timer, fan delay control and liquid line solenoid. All parts shall be factory mounted.

If specified Remote all major components provided for field installation, tubing, electrical hook-up, drain line and refrigerant charge by qualified refrigeration, electrical and plumbing contractors.

If specified Remote Preassembled the system requires tubing, electrical hook-up, drain line and refrigerant charge supplied by qualified refrigeration, electrical and plumbing contractors.

If specified Top Mount Quick Connect the system shall have quick-connect lines and be pre-charged for fast, easy and economical job site installation. System requires electrical connection and drain line by qualified refrigeration, electrical and plumbing contractors.

If specified Remote Quick Connect the system shall be supplied with applicable quickconnect line kit and be pre-charged for fast, easy and economical job site installation. System requires electrical connection and drain line by qualified refrigeration, electrical and plumbing contractors.

A low ambient kit and weatherproof housing shall be supplied with condensing units. The low ambient kit shall consist of a crankcase heater and headmaster valve.

DRAIN LINES:

All evaporator coils shall be provided with proper sized drain lines, supplied and field installed by contractor. Drains shall be trapped outside of walk-in. Drain shall be heated and insulated to prevent freezing. All plumbing to be in accordance with applicable codes.

Contractor shall be responsible for providing units completely installed and operational. Cooler to operate at +35 degrees Fahrenheit and Freezer to operate at -10 degrees Fahrenheit.

NSF CONSTRUCTION:

The walk-ins provided in the above specifications shall be constructed in accordance with National Sanitation Foundation, Standard No. 7. The NSF approval seal shall be affixed to the serial plate of the walk-in.

QUALITY INSPECTION REQUIREMENTS:

Walk-ins shall be set up at the manufacturer's facility prior to shipment and a quality control inspection performed on the product. A digital photograph of the walk-ins set up at the manufacturer's facility shall be provided for the Food Equipment Contractor's permanent records.

INSTALLATION, OPERATION AND MAINTENANCE INSTRUCTIONS:

The walk-ins shall be supplied with a complete set of installation, operational and maintenance instructions to cover erection of the walk-in, installation operating procedures and routine maintenance schedule.
