## DIRECTIONS FOR USE

PRO-SPREADER ACTIVATOR is used to give optimum wetting and spreading of insecticides, miticides, fungicides, herbicides and growth regulating hormones. PRO-SPREADER ACTIVATOR may be used on agricultural, forestry, turf and ornamental, industrial, structural and non-cropland sites.

PRO-SPREADER ACTIVATOR is formulated from materials which do not tend to burn foliage or leave harmful residues. Use of correct quantity for smooth wetting reduces the possibility of spot injury from large pesticide droplets.

Read and follow the precautions, restrictions and recommendations on the labels of pesticides used with PRO-SPREADER ACTIVATOR. Use according to the most restrictive label directions for each product in any tank mix.

**COMPATIBILITY:** PRO-SPREADER ACTIVATOR is compatible with most pesticides. However, if the desired combination has not been previously used, a compatibility test is recommended.

**MIXING:** Shake well before using. Fill spray tank  $\frac{1}{2}$  full of water and begin agitation. Add the recommended amount of PRO-SPREADER ACTIVATOR. Add products as directed by label or in the following sequence and continue filling tank: (1) Dry flowables or water dispersing granules, (2) Wettable powders, (3) Flowables, (4) Solutions, (5) Emulsifiable concentrates. Continue agitation until spray solution is completely mixed. Continuous agitation of finished spray is recommended. If spray solution has been allowed to stand, thoroughly agitate and remix before application.

**RECOMMENDATIONS:** Proper quantity to use will vary with the type of equipment, water volume per acre, temperature, type of foliage to be wet, and the pesticide formulation. Also, higher rates than those below may be used if recommended by pesticide labeling. Follow pesticide label directions. However, do not add this product at a rate which exceeds 5% of the finished spray volume.

**AIR or GROUND:** Use 4-32 fl.oz. per 100 gallons of finished spray solution. For improved efficacy, use at least 4 fl.oz. per acre when finished spray volume is less than 20 gallons per acre. For backpack or hand held sprayers, use  $\frac{1}{2}$  fl. oz. per gallon of finished spray solution.

**FOR USE WITH AQUATIC HERBICIDES:** Use 1-2 quarts per 100 gallons of finished spray solution. Consult the pesticide label for proper rates and volumes.

## STORAGE AND DISPOSAL

**DO NOT CONTAMINATE WATER, FOOD OR FEED BY STORAGE OR DISPOSAL.**

**STORAGE:** Store in original container away from children, animals, foods, feeds and seeds. Handle in accordance with Precautionary Statements. In the event of spillage or leakage, soak up the material with absorbent clay, sand, sawdust or other absorbent material. Scrape up and dispose in accordance with Product Disposal.

**PRODUCT DISPOSAL:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

**CONTAINER DISPOSAL:** Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state or local ACRC recycler, visit the ACRC web page at [www.acrcycle.org](http://www.acrcycle.org). Decontaminated containers may also be disposed of in a sanitary landfill.
