**Two Year Contract for  
Collection of Used/Waste Motor Fluids  
from Jefferson Parish Facilities  
for the Department of Environmental Affairs**

**Pre-Bid Conference:**

**A pre-bid conference is not required.**

Successful bidder must furnish all materials and perform all work required in accordance with the specifications outlined herein at no additional costs to the owner.

**Specifications:**

Jefferson Parish is seeking bids from potential vendors to provide as-needed collection of used/waste motor fluids such as gasoline, diesel, antifreeze, motor oil (including: transmission fluid, brake fluid, lubricating oils, compressor fluids, and other motor oils), contaminated/mixed waste fluids, and used oil filters from Parish facilities.

**Service Locations:**

Jefferson Parish currently has 32 locations, managed by four different governmental departments, which produce and store waste motor oil in tanks and in 55-gallon drums. Most of these locations will need to be serviced one to three times per year (see waste oil station spreadsheet for details). Four of these locations will need to be serviced several times a year, in some cases, once or several times per month. These four locations (described below) produce gasoline, diesel, antifreeze, and waste oil filters as well as waste oil.

- **Parish Waste Fluids Drop Sites:** The Parish operates two (2) waste motor fluid collection centers for use by Parish residents. Residents are allowed to dispose of small quantities of waste fluids from autos, lawn mowers, boats, etc., daily at these drop sites. The facilities are located at 400 David Drive, Metairie, LA., and 6440 Lapalco Blvd., Marrero, LA. Each site has separate, permanent containers for used motor oils and used antifreeze. The vendor must service these containers with a vacuum pump. Additionally, each drop site uses 55-gallon drums to containerize gasoline (4 drums) and used oil filters (1 drum). These drums may be emptied at the site and left in place, or they may be removed completely and replaced with empty drums. Finally, although the containers at these sites are clearly labeled and site attendants work to monitor citizens depositing fluids, there have been cases when containers became contaminated with other fluids (e.g. water, diesel, paint, or other household chemicals).
- **Fleet Management:** The Parish has two facilities where maintenance of all local governmental vehicles is performed. These sites are located at 4901 Jefferson Highway, Suite A, Jefferson, LA. and 1501 River Park Road, Bridge City, LA. Both sites produce several thousand gallons of waste oil per year that must be vacuum pumped for removal. The Jefferson Highway location uses 55-gallon drums to house waste gasoline, diesel, and antifreeze for both sites. Despite efforts to maintain drums with only used gasoline,

## **Bid Specifications for Bid # 50-00141133**

some drums at this location hold gasoline that becomes mixed with water or other contaminants such as diesel fuel.

All other locations only produce waste oil.

Additional Parish-owned locations to be serviced may be identified during the contract term.

### **Requested Services:**

Vendor shall provide labor, equipment, transportation, and all else incidental to remove waste fluids from specified locations safely and in compliance with federal, state, and local regulations.

- The Parish will not provide equipment for loading fluids into vendor vehicles.
- The Parish will not be responsible for marking or labeling materials for transport.

Services must be provided at each location on an as-needed basis within seventy-two (72) hours of request by the Parish (including weekend hours).

All fluids shall be sold, disposed of, processed, and/or recycled in accordance with federal, state, and local regulations.

### **Non-Conforming Materials:**

Vendor will be responsible for removing contracted fluids in the event that the fluids become contaminated.

The Parish will be responsible for the extra costs incurred by transportation and disposal of any waste fluids that are contaminated with incompatible materials or hazardous waste upon proof of said contamination.

Vendor must notify the appropriate Parish department in writing if fluid contamination has been detected and has incurred extra charges. Notification must specify the type of contaminant if it can be identified.

Any unsuitable product must be disposed of in accordance with federal, state, and local regulations.

### **Testing and Measurements:**

Vendor must provide its own equipment to measure the quantity and test for the quality of the fluids it removes from Parish service locations.

Vendor measurements and test results will govern the transactions employed for this contract.

Proof of vendor's proper calibration and equipment inspection must be provided to the Parish upon request.

## Bid Specifications for Bid # 50-00141133

### **Emergency Services:**

In the event of an emergency such as severe storm or hurricane, all drums of gasoline and oil filters must be picked up from the Parish Waste Fluids Drop Sites (400 David Dr., Metairie, LA. and 6440 Lapalco Blvd., Marrero, LA.) within 48 hours of notification.

Replacement drums must not be left at the site when full drums are picked up for an emergency. Replacement drums must be dropped off within 48 hours after notification by the Department of Environmental Affairs that the emergency has passed.

### **Bid Requirements:**

**Inclusive Pricing:** Provide bid prices for each material to be serviced on the attached bid form. Prices must include all costs and fees (equipment, fuel, labor, testing, permitting, administration, etc.) required to pick up, transport, and process/recycle/dispose of each fluid/material. Read the following specifications as a guide to filling out the bid form.

- **Price per Gallon of Waste Oil:** Provide a current price per gallon for removal of waste oil. Prices must include all costs and fees (equipment, fuel, labor, testing, permitting, administration, etc.) required to pick up, transport, and process/recycle/dispose of used motor oil.
- **Price for Waste Gasoline, Diesel, and Used Oil Filters:** Provide prices for removing waste gasoline, diesel, and used oil filters by the drum. Prices must include all costs and fees (equipment, fuel, labor, testing, permitting, administration, etc.) required to pick up, transport, and process/recycle/dispose of waste gasoline/diesel and used oil filters.
- **Replacement Drums:** If the vendor intends to remove the drums of gasoline and used oil filters from Parish sites rather than empty and leave them in place, the vendor must fill out the second line item for each material on the bid form specifying the price of the vendor's provision of a replacement drum. If vendor does not plan to remove drums, leave these line items blank.
- **Price for Waste Antifreeze:** Provide a price per gallon for removing waste antifreeze. Prices must include all costs and fees (equipment, fuel, labor, testing, permitting, administration, etc.) required to pick up, transport, and process/recycle/dispose of used antifreeze.
- **Common Contaminated Fluids:** Provide a price per gallon for servicing each of the contaminated fluids listed below. Prices must include all costs and fees (equipment, fuel, labor, testing, permitting, administration, etc.) required to pick up, transport, and process/recycle/dispose of each fluid.
  - Motor oil contaminated with gasoline.
  - Gasoline contaminated with water.
  - Antifreeze contaminated with motor oil.
  - Antifreeze contaminated with gasoline.

### Bid Specifications for Bid # 50-00141133

- **Unknown/Uncommon Contaminated Fluids:** Vendor must NOT fill out this line item on the bid form. It is a place holder for non-conforming materials which will be filled in as necessary in the event of fluid contamination with an unknown or uncommon material.
- **Emergency Service Trip Fee:** To avoid inflating the cost of regular service, the Parish requests an independent quote for the price of emergency gasoline and oil filter pick up from the Waste Fluids Drop Sites. Prices must include all costs and fees (equipment, fuel, labor, testing, permitting, administration, etc.) required to pick up, transport, and process/recycle/dispose both waste gasoline and used oil filters in emergency conditions and within the 48-hour time frame required. This quote must be given as cost per trip and include picking up both materials in the same price. This quote should not include the price of the replacement drums but must include all costs for the extra trip transporting the replacement drums to the Drop Sites after the emergency has passed.

Vendor must provide, upon departmental request, before award, copies of any and all required federal, state, and local permits for the transport of specified waste fluids.

All drivers shall be properly licensed to haul these wastes and licenses must be made available upon request.

Vendor must provide, upon departmental request, before award, copies of any and all applicable LA Department of Environmental Quality permits, including the Used Oil Storage and Transfer Permit, for processing, recycling and disposal sites to be used as transport destinations.

Vendor must provide samples of manifests (one if universal, several if different for each fluid) to be used in governing service provision.

#### **Contract Terms:**

##### **Invoicing and Payment:**

Invoices must be submitted to Parish departments on a monthly basis.

Each Parish department will pay separately for services rendered to their facilities. Billing information is listed on the second sheet of the attached waste fluid spreadsheet.

Invoices with relevant manifests attached must be provided to each Parish department for payment for services rendered to their facilities.

Invoices must reference manifest numbers and accurately reflect the information on the manifests in order for payment to be processed.

Payment will only be processed after services are rendered and proper invoices and manifests have been received by the appropriate department.

## Bid Specifications for Bid # 50-00141133

One copy of the manifest will be left with a Parish employee or approved agent at the pick-up location and one copy of the manifest will be sent with the invoice to the associated Parish department's billing address or with the royalty check to the Department of Environmental Affairs.

A unique manifest will be filled out for each fluid removed from each Parish service location (even if more than one fluid is picked up in a trip).

The manifests must certify the type of material collected, date material is collected, and quantity collected, the site collected from, and the destination of the materials collected.

All manifests must be signed by a Parish employee or authorized agent certifying that service was provided. Failure to do so will result in delay of payment or non-payment for services.
