1.1 EXPERIENCE AND QUALIFICATIONS

Base Plastics is well positioned to provide all the Polyethylene products needed by the Jefferson Parish. In addition to our experience in poly manufacturing, our utilization of a proprietary material *Elasticene™* to create our bags and liners, we can down-gauge the thickness of the bag by 40%, while still maintaining the same, if not better, strength of the gauge asked to be quoted. What does this mean? We can reduce the weight of the bag, which reduces the cost of the bag by that same percentage.

Base Plastics has been a technical leader in the plastics industry since 1977 and one of the largest extruders of 100% *Elasticene™* and 100% linear low-density polyethylene. As a small woman-owned business manufacturer, we offer a wide variety of bags, liners, covers, sheeting, tubing, and tarps to industries that include Retail, Construction, Warehouses, Wholesale, Healthcare, Food Service, Manufacturing and Public Facilities/Government. In 2009 & 2013, INC. Magazine awarded API Industries/Base Plastics for being one of 5000 Fastest Growing Private Companies.

Base Plastics offers comprehensive, customer-specific solutions in the area of Polyethylene products. Our teams consist of fully qualified key personnel and corporate resources to provide superior products with better performance and reduced cost characteristics that traditional polyethylene products as well as a full offering of commodity polyethylene.

With 100 plus extruders, we have the capacity to turn around products in a matter of days when needed. In addition, Base Plastics can tailor a customized "Just in Time" warehousing program utilizing our facilities of over 6500,000+ total Sq.-Ft. and a network of nationwide warehouses to accommodate the Jefferson Parish's needs. Due to our ability to expedite timely & custom orders we have been called upon for disaster relief contracts during Hurricane Katrina allowing us to fulfill large quantity of orders for FEMA.

Bags can be individually cut, individually folded, cored on 3" and 1 ½" diameter cored rolls, custom sheets and sheeting are available. 90% of our stock poly is made with an anti-microbial agent that inhibits the growth of bacteria that can cause commonly found on trash liners. Base Plastics offers our customers all types of printing options including custom prints. All of our plastic film products can be manufactured in standard film colors with standard additives.

1.2 ELASTICENE™

Every so often, a technological advance comes along that changes an industry. *Elasticene™* is one of those products. Made of 100% extra strength resins, with no secondary or lower grade resins blended in, *Elasticene™* has been proven to have twice the strength of standard polyethylene. The lighter and stronger traits of *Elasticene™* translate to customer savings of approximately 30% to 40% when compared to standard low-density poly.

We are particularly excited to offer to you this break-through in technology in the polyethylene bag industry: **Super Strength Elasticene™**. The *Elasticene™* products that we are offering are manufactured with the most advanced resin available today. This material exceeds the strength and performance of competitive polyethylene products to date. Our products are produced using 100% pure materials and are not blended with secondary resins.

This new super-strength product benefits the Jefferson Parish in the following ways:

- ✚ **Price**- Less plastic means lower costs.
- ✚ **Environmental Impact** – By reducing the weight of the plastic, less waste is put into a landfill, and eliminates part of the carbon footprint.
- ✚ **Storage Space** – Since each bag is 40-50% lighter, it takes up less space in a warehouse, or, alternatively, allows the Jefferson Parish to hold more product in the same amount of space so fewer orders are required, resulting in less paperwork.
- ✚ **Shipping** – With a lower weight per bag, shipping costs less and requires less space on trucks, allowing to consolidate shipments that would otherwise require one or more trucks onto fewer pallets and trucks.
- ✚ **Quality** – A stronger product means no ripping or tearing of bags & liners.

While you may have been offered alternative materials by other manufacturers, a gauge for gauge, Base Plastics' materials exceed both industry standards and customer expectations.

1.3 GREEN INITIATIVES

Every Year, about 15 million tons of plastic waste gets tossed into landfills. Since standard plastics do not naturally degrade, this waste can cause damage to our environment. As a manufacturer of these products, we understand the need to do our part to reduce the negative effect we have on the planet. In addition to a complete line of LEED-certified bags, we have recently added a line of truly biodegradable materials. Our signature product, *Elasticene™*, is also formulated to help preserve the environment by limiting waste. Finally, our plants itself is green in many ways. Not only have we created a zero-waste life cycle where all the internal plant waste gets reused, we also take in scrap from end users and even smaller plants that we then recycle and use to make new bags. In fact, our plant is one of the largest recyclers of plastic in the Northeast!

Studies have shown that one of the reasons that people are reluctant to change to a "greener" product or to put a lot of effort into recycling their waste is the perceived cost involved. There is also the trust factor: how do you know that the product you are buying is really environmentally conscious? At Base Plastics, we have the answer for all your concerns. Our *Elasticene™* product has been proven to reduce costs by over 30% on average and our recycling

rebate program offers a financial incentive to our customer to help maintain the beauty of our world. For those seeking a truly natural biodegrading product (as opposed to one that needs to be separated from the trash before it decomposes), our bio-degradable line is certified by BPI, the leading certification of bio-based products

2.0 SCOPE OF WORK

To summarize, API Industries/Base Plastics is dedicated to EXCEEDING your EXPECTATIONS with our high-quality products and superior service. Please find along with our proposal the signed Bid Book in its entirety.

Base Plastics is offering in our *Elasticene™* material a 38"x63" in a 2.7 mil "EQUIVALENT" black can liner, 100 per case @ \$38.84 per case, totaling \$3,884.00 for a 100 cases.

We guarantee 100% satisfaction with our polyethylene products and experienced staff makes us the ideal manufacturer for the Jefferson Parish Government.
