A1-1.1 QUESTIONS AND ANSWERS RECEIVED

Question: Page 1, para. 2.01A of section 16231 requires that the generator system "must be available with Underwriter's Laboratory listing (UL 2200) for a stationary engine generator assembly". Is the specification in fact requiring that the COMPLETE generator set, including weather protective housing be UL 2200 labeled or does the label requirement pertain to only the engine generator set itself and not the housing?

Answer: Specification 16231 does not require the manufacturer to have the enclosure tested in combination with the engine generator. The stationary engine generator assembly itself should bear the UL Mark "FTR", but the enclosure will be unlabeled.

Question: Section 16231 page 4 para. G. Requires 3.5 inch meters. Does the specifier want analog meters or will he accept the digital meters that are standard on most of the generator manufacturers control panel.

Answer: We will not penalize any of the manufacturers for having digital vs analog, as long as the pertinent information is displayed.
