Pro-Spreader Activator

DIRECTIONS FOR USE

PRO-SPREADER ACTIVATOR is used to give optimum wetting and spreading of insecticides, miticides, fungicides, herbicides and growth regulating hormones. PRO-SPREADER ACTIVATOR may be used on agricultural, forestry, turf and ornamental, industrial, structural and non cropland sites. NOT FOR AQUATIC USE IN WASHINGTON.

PRO-SPREADER ACTIVATOR is formulated from materials which do not tend to burn foliage or leave harmful residues. Use of correct quantity for smooth wetting reduces the possibility of spot injury from large pesticide droplets.

Read and follow the precautions, restrictions and recommendations on the labels of pesticides used with PRO-SPREADER ACTIVATOR. Use according to the most restrictive label directions for each product in any tank mix.

COMPATIBILITY: PRO-SPREADER ACTIVATOR is compatible with most pesticides. However, if the desired combination has not been previously used, a compatibility test is recommended.

MIXING: Shake well before using. Fill spray tank 1/2 full of water and begin agitation. Add the recommended amount of PRO-SPREADER ACTIVATOR. Add products as directed by label or in the following sequence and continue filling tank: (1) Dry flowables or water dispersible granules, (2)

Wettable powders, (3) Flowables, (4) Solutions, (5) Emulsifiable concentrates. Continue agitation until spray solution is completely mixed. Continuous agitation of finished spray is recommended. If spray solution has been allowed to stand, thoroughly agitate and remix before application.

RECOMMENDATIONS: Proper quantity to use will vary with the type of equipment, water volume per acre, temperature, type of foliage to be wet, and the pesticide formulation. Also, higher rates than those below may be used if recommended by pesticide labeling. Follow pesticide label directions. However, do not add this product at a rate which exceeds 5% of the finished spray volume.

AIR or GROUND: Use 4-32 fl. oz. per 100 gallons of finished spray solution. For improved efficacy, use at least 4 fl. oz. per acre when finished spray volume is less than 20 gallons per acre. For backpack or hand held sprayers, use 1/2 fl. oz. per gallon of finished spray solution.

FOR USE WITH AQUATIC HERBICIDES: Use 1-2 quarts per 100 gallons of finished spray solution. Consult the pesticide label for proper rates and volumes.

WARRANTY: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use; but neither this warranty nor any other warranty of merchantability or fitness of a particular product expressed or implied, extends to the use of this product contrary to label conditions, or under conditions not reasonably foreseeable to the seller; and buyer assumes the risk of any such use.

Store in original tightly closed container. Keep container tightly closed. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

US. AIHA Workplace Environmental Exposure Level (WEEL) Guides

Components	Type	Value	Form
Poly(ethylene oxide) (CAS 25322-68-3)	TWA	10 mg/m3	Particulate.
Propylene glycol (CAS 57-55-6)	TWA	10 mg/m3	Aerosol.

Biological limit values

No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls

Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

Eye/face protection

Face shield is recommended. Wear safety glasses with side shields (or goggles).

Skin protection

Hand protection

Wear appropriate chemical resistant gloves.

Other

Wear suitable protective clothing.

Respiratory protection

In case of insufficient ventilation, wear suitable respiratory equipment. Respiratory protection not required.

Thermal hazards

Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations

Keep away from food and drink. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
