| Allison | | | |
| 7-Speed | | | |
| 2016169 | Transmission: Allison World 4700RDS 7-speed with 2-speed reverse w/o retarder, AND w/o PTO provision. 5th generation. Includes shift control, transmission oil temp gauge, oil level sensor & heat exchanger. Transynd transmission fluid is standard on all Allison 1000, 2000, 3000 & 4000 series transmissions. * Allison 4700RDS 7-spd 2016169 not available on any T880 with MX-13, ISX12 or X15 with the exception for model T880S. * Allison 4700RDS not available with extended rails or FEPTO. * Allison RDS transmissions are restricted to 1550 ft lbs of engine torque when used as a refuse hauler. * This transmission is available with a maximum engine torque of 1850 ft lbs. * This transmission is only available with a REPTO. | \$30,026 | 237# |
| Transmission Equipment | | | |
| 2038252 | Eaton AMT LSM Package - Linehaul Config Low Speed Maneuverability, Rev=Blended Pedal, Drive=Urge to Move, Manual=Standard, Low=Blended Pedal Eaton AMT Low Speed Maneuverability parameters to utilize various Eaton low speed functions depending on transmission shift selection (Reverse, Drive, Manual, Low). Eaton service tool can be utilized to reconfigure parameters individually if customer desires something other than typical Linehaul or Vocational package options. | \$0 | 0# |
| 2038253 | Eaton AMT LSM Package - Vocational Config Low Speed Maneuverability, Rev=Blended Pedal, Drive=Urge to Move, Manual=Standard, Low=Blended Pedal Eaton AMT Low Speed Maneuverability parameters to utilize various Eaton low speed functions depending on transmission shift selection (Reverse, Drive, Manual, Low). Eaton service tool can be utilized to reconfigure parameters individually if customer desires something other than typical Linehaul or Vocational package options. | \$0 | 0# |
| 2410005 | Optional neutral start switch. * The option for a neutral start switch is not compatible with UltraShift, PACCAR, Eaton Endurant or Advantage Automated transmissions. | \$62 | 0# |
| 2410047 | High Capacity Input Shaft Bearing for High PTO Duty Cycle * This option is available with the following transmissions: all 10-speed FR, all 13-speed, RTOC-16909A, RTOCM-16909A, and all 18-speed except the RTLO-22918B. All other Eaton transmissions have this feature as standard. | \$29 | 0# |
| 2410072 | Auto neutral not required this application. * Allison transmission auto neutral functionality exception is applicable only to chassis which specify a split shaft PTO installed at the factory or in the aftermarket. * If the vocation will not include a split-shaft PTO the auto neutral functionality will be required with pick up and delivery service hauling liquid petroleum, liquefied gas, or compressed gas. This is true with services of oil field well service or fire pumper as well. | \$0 | 0# |
| 2410151 | Pushbutton control center console mounted. Class 8 with Allison Transmission. * The shift control is located in the left-most cup holder. | \$0 | 0# |
| 2410212 | Allison Transmission Mobile PTO Operation - Change max output speed to 4500 RPM | \$0 | 0# |
| 2410241 | 1st gear start for Eaton UltraShift. * Optional first gear start replacing second gear start is an UltraShift option. Not an option for the UltraShift Plus -VMS. * Second gear start is the default with UltraShift transmissions other than the UltraShift Plus -VMS. This transmission family often needs special programming for first gear start based upon gradeability results for the vehicle specification. | \$0 | 0# |
| 2410244 | J1939 Park Brake Auto Neutral | \$0 | 0# |

T800: TRANSMISSIONS

| Option | Description | Price | Weight |
|--------------------------------|---|----------|--------|
| Transmission Equipment | | | |
| 2429065 | PTO interlock for parking brakes. * PTO interlock for parking brakes for use with a transmission PTO or a split-shaft PTO. PTO will not engage without park brakes set. | \$149 | 2# |
| 2429078 | Extend underbell housing bracket F/PTO output Flange clearance. | \$69 | 0# |
| 2429082 | Park brake interlock with Transfer Case high/Low * Requires transfer case | \$324 | 0# |
| 2429100 | Chassis will be fitted w/ LH transmission PTO. (Prevents ECU F/Interfering w/ PTO Only). * If a harness between the PTO control and the engine is desired you must either add factory installed PTO controls and 1900086, or 1900089. * PTO installations with 2010+ exhaust systems can be problematic in some instances. A code is required to indicate the PTO requirements for the chassis. * When a PTO will be installed in the aftermarket you may consider coding for air tank clear space to ease the installation process. | \$0 | 0# |
| 2429101 | Chassis will be fitted w/RH transmission PTO. (Prevents ECU F/Interfering W/PTO Only) * If a harness between the PTO control and the engine is desired you must either add factory installed PTO controls and 1900086, or 1900089. * PTO installations with 2010+ exhaust systems can be problematic in some instances. A code is required to indicate the PTO requirements for the chassis. * When a PTO will be installed in the aftermarket you may consider coding for air tank clear space to ease the installation process. | \$0 | 0# |
| 2429102 | Chassis will not be fitted w/transmission PTO. (Prevents ECU F/Interfering w/ PTO Only). * PTO installations with 2010+ exhaust systems can be problematic in some instances. A code is required to indicate the PTO requirements for the chassis. * This code is not intended to be used along with a customer installed PTO info code. If a PTO will be installed in the aftermarket use 2429100 or 2429101. | \$0 | 0# |
| 2444000 | Chrome shift lever for main transmission. * Chrome shift level is not for use with Allison, AutoShift, or UltraShift transmissions. | \$109 | 0# |
| 2450114 | Add Transmission Filter: Eaton UltraShift Plus *Optional below 2050 lb-ft torque. Filter is installed on the transmission by Eaton. * This option is no available with transmissions rated for 2050 ft.lbs. of torque. | \$251 | 0# |
| 2460066 | Optional location transmission oil cooler top/rear for PTO clearance. For Ultrashift Plus only. * For use with Ultrashift plus transmissions only. | \$0 | 0# |
| 2480315 | Severe Service rear transmission support spring(s). * PACCAR MX engines utilize a flywheel housing design that makes this option unnecessary. * Transmission support springs are upgraded when required, except with PACCAR MX engines, when Severe Service is coded. | \$90 | 15# |
| 9490930 | Vent transmission, drive axle & transfer case to filter. * Option to vent the transmission and axle to a firewall mounted filter is not for use on Sisu or Marmon FDAs. These axles have a style of axle venting that will not allow them to be plumbed along with a transfer case or transmission. | \$166 | 8# |
| Auxiliary Transmissions | | | |
| 2154321 | Aux: AT1202 2-speed electric over air shift 3-position rocker switch dash mounted and includes synthetic lubricant | \$20,950 | 522# |

Tridem rear axle without pusher with steer axle GAWR 16,001 - 22,000 lbs. | \$544 | -24# |
| 2607002 | Front Brakes: 14,601-22K Bendix air disc brakes. * Available on Dana D2000/D2200, Meritor MFS20 or PACCAR 20K front axles. * Iron hubs rated at 18K-22K are available for use with air disc brakes rated from 14,601 - 22,000 lbs. Aluminum hubs rated at 20K are available for use with air disc brakes rated from 14,601 - 22,000 lbs. * Specifying air disc brakes on any axle requires that the wheels on all axles be air disc brake compatible, including any lift axles. * This air disc brake is compatible only with the specified 12,000 lb - 14,600 lb front axles. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine with under 29k per axle rear GAWR). Use an RSD-compliant brake code instead. | \$436 | 10# |
| 2607016 | Front Brakes: 16,001-22K Bendix RSD SN7 Disc brake. * Air disc brakes on rear axle requires the use of air disc brakes on the steer axle as well. * Iron hubs rated at 18K-22K are available for use with air disc brakes rated from 14,601 - 22,000 lbs. Aluminum hubs rated at 20K are available for use with air disc brakes rated from 14,601 - 22,000 lbs. * Maximum axle GAWR for this code: 22,000 lbs. * Required with tridem rear axle without pusher with steer GAWR 16,001-18K and 194-239 inch wheelbase. * Required with tridem rear axle without pusher with steer GAWR over 18,000 lbs and 194-315 inch wheelbase. * RSD vehicles with Bendix brakes are not available with multiple lift axles or with tag axles. One pusher (other than 8k or 10k) is allowed. * Splined rotor and iron hubs are required with Bendix SN7 disc brakes. * This code is only available with tridem rear axles | \$821 | 20# |
| 2621078 | Front Brakes: 22K Bendix ES S-cam 16.5x6 in. * 16.5 x 6 inch front brakes for use on single steer axles rated over 14.6K only. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine with under 29k per axle rear GAWR). Use an RSD-compliant brake code instead. | (\$153) | -46# |
| 2641137 | Front Brakes: 20K Meritor Q-Plus 16.5x6 in. * Meritor 16.5 x 6 inch front brakes for single steer axle are not available with 13-3/16 or 335mm bolt circle hubs. Not compatible with request for Extended Warranty * Meritor front brakes are not for use on the D2000 or D2200 axles. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine with under 29k per axle rear GAWR). Use an RSD-compliant brake code instead. | \$163 | -38# |

| Front Springs | | | |
| 12K to 14.6K Capacity | | | |
| 2863012 | Front Springs: Taperleaf 12K w/ shock absorbers w/ maintenance-free elastomer spring pin bushings. Standard with rubber pins except for C500 which has threaded pins. Not available on W900L. * 12K and 12.35K taperleaf front springs cannot be used with tank bodies when a Kenworth Airglide rear suspension is specified. * It is strongly recommended that vehicles which will operate on steep downgrades, twisty roads, or on soft surfaces be specified with 16,000 lbs minimum front spring capacity. * Springs for use with front axle capacity of 12K through 13.2K. * This front spring is not compatible on W900L or W900S. | STD | 0# |
| 2863017 | Front Springs: Taperleaf 12.35K w/ shock absorbers w/ maintenance-free elastomer spring pin bushings. * 12K and 12.35K taperleaf front springs cannot be used with tank bodies when a Kenworth Airglide rear suspension is specified. * It is strongly recommended that vehicles which will operate on steep downgrades, twisty roads, or on soft surfaces be specified with 16,000 lbs minimum front spring capacity. * Springs for use with front axle capacity of 12K through 13.2K. * This spring is not available with low profile 315, 385, 425, or 445 front tires. | \$0 | 0# |
| 2863020 | Front Springs: Taperleaf Lightweight 12.5K w/ shock absorbers w/ maintenance-free elastomer spring pin bushings. Standard with rubber pins. | \$139 | -29# |
| 2864008 | Front Springs: Taperleaf Lightweight 13.2K w/ shock absorbers w/ maintenance-free elastomer spring pin bushings. Standard with rubber pins. | \$159 | -22# |
| 2864012 | Front Springs: Taperleaf 13.2K w/ shock absorbers w/ maintenance-free elastomer spring pin bushings. Standard with rubber pins. Not available on W900L. * 13.2K taperleaf springs are not a good choice for logging service. * It is strongly recommended that vehicles which will operate on steep downgrades, twisty roads, or on soft surfaces be specified with 16,000 lbs minimum front spring capacity. * Springs for use with front axle capacity up to 14.6K. * These front springs are not available on the W900S. * These springs are not for use on the W900L. | \$40 | 9# |
| 2864019 | Front Springs: Taperleaf 14.6K w/shock absorbers 2-leaf. With maintenance-free elastomer spring pin bushings. Standard with rubber pins. Not available on W900L or W900S. * 14.6K taperleaf front spring not for use on W900S or W900L. * It is strongly recommended that vehicles which will operate on steep downgrades, twisty roads, or on soft surfaces be specified with 16,000 lbs minimum front spring capacity. * Springs for use with front axles capacity of 20k or less. * The 14.6,000 lb. taperleaf spring is not available with anti-lock brakes that includes pre-wire for full truck ESP in a mixer or dump truck application. | \$574 | 25# |

T800: FRONT AXLE

| Option | Description | Price | Weight |
|--------------------------------|--|---------|--------|
| Front Springs | | | |
| 12K to 14.6K Capacity | | | |
| 2884000 | Kenworth AG 130 front air suspension 13.2K w/ shock absorbers. Standard with rubber pins. * AG130 front suspension is not available with wirebraid air hoses or -60 degree (arctic) hoses. * Kenworth AG130 air front suspension is available for use with E-1202I, E-1322I, D-1251IL, D-1251LW, D-1301IL, D-1321IL, D-1321LW, MFS MERITOR. Not for use with any class C or D road service. Not for use in logging service. * Not available with ISX12N in 2.1M models. * T660 and T800 front frame will not permit the air dryer to be mounted under the hood when the AG130 front suspension is specified. The air dryer will move to a back of cab location in this case. * The AeroCab style exhaust is incompatible with the Allison 4500 transmission w/o PTO when used in conjunction with the AG130 front air suspension. * With use of the Kenworth AG130 front suspension on T800SH the air tanks cannot be located on the bottom of a battery box module under the cab. | \$1,519 | -13# |
| 15K & Over Capacity | | | |
| 2864016 | Front Springs: Taperleaf 16K w/shock absorbers w/ maintenance-free elastomer spring pin bushings. Three Leaf. Standard with rubber pins except for C500 which has threaded pins. Not available on W900L. * Aluminum front drive bracket is not for use with front springs rated at 16k or greater. * Iron shackle brackets are standard with a spring capacity of 16K or greater , no code required. * Springs for use with front axles capacity of 20k or less. * These front springs are not available on the W900S. * These front springs are not for use on W900L. Available on the W900B with 2007+ engines only. | \$733 | 121# |
| 2865018 | Front Springs: Taperleaf 18K w/shock absorbers w/ maintenance-free elastomer spring pin bushings. Standard with rubber pins. Not available on W900L. * Aluminum front drive bracket is not for use with front springs rated at 16k or greater. * Iron shackle brackets are standard with a spring capacity of 16K or greater , no code required. * Springs for use with front axles capacity of 20k or less. * These front springs are not available on the W900S. * These springs are not for use on the W900L. | \$1,195 | 184# |
| 2866020 | Front Springs: Taperleaf 20K w/ shock absorbers w/ maintenance-free elastomer spring pin bushings. Standard with rubber pins except for C500 which has threaded pins. Not available on W900L. W900B use 2866021. * Aluminum front drive bracket is not for use with front springs rated at 16k or greater. * Iron shackle brackets are standard with a spring capacity of 16K or greater , no code required. * Springs for use with 20K capacity or greater front axles. * The 20K taperleaf front springs are available on the W900 only with the set forward front axle option. * These springs are not for use on the W900L. | \$1,220 | 241# |

T800: FRONT AXLE

| Option | Description | Price | Weight |
|-----------------------|--|---------|--------|
| Power Steering | | | |
| Single Gear | | | |
| 2893881 | Single power steering gear: 16K TRW TAS85 W900B/W990 available, but not available W900S, W900L or T3. * Creep loading of the front axle with pushers raised may compromise park-steer performance with a TAS65, M100P, or HD94 single gear is used with a single lift axle, or a TAS85, SD110 or M110P single gear is used with more than one lift axle. * Iron front drive brackets are required on T4 Series, T660, T800, T880 and W900B models when a single TAS85 power steering gear is specified. The upgraded drive bracket is standard with front spring capacities over 14.6K. * Single light weight steering gears are not for use with 2900702 (setback axle W900S). * Single power steering gear rated to 16K is compatible with front axle capacities up to 20K. * Single TAS85 power steering gear is not available on W900S or W900L. * Steering gear for single front axle installations only. * The creep loading of the front axle [load with lift axle raised] may compromise park-steer performance with a single power steering gear and a non-steerable pusher. Consider using dual steering gears in this application. | \$474 | 18# |
| 2895121 | Single power steering gear: 13.2K Sheppard M100P. * Creep loading of the front axle with pushers raised may compromise park-steer performance with a TAS65, M100P, or HD94 single gear is used with a single lift axle, or a TAS85, SD110 or M110P single gear is used with more than one lift axle. * Single light weight steering gears are not for use with 2900702 (setback axle W900S). * Single power steering gear rated to 13.2K is compatible with front axle capacities under 20K. * Steering gear for single front axle installations only. | STD | 0# |
| Dual Gear | | | |
| 2893622 | Dual power steering gears: 20K TRW TAS65. * Dual power steering gears rated to 20K are not compatible with axles rated at 14.6K or below, except on the W900L. Will derate the D2200 front axle to 20K. * Dual, triple, or quadruple power steering gears require the use of a power steering cooler. * Steering gear for single front axle installations only. * The creep loading of the front axle [load with lift axle raised] may compromise park-steer performance with this capacity power steering gears and three pushers. Consider using larger capacity dual gears in this application. | \$1,563 | 60# |
| 2893662 | Dual power steering gears: 22K TRW TAS65. * Dual power steering gear rated at 22K is available with the D2200 front axle only. * Dual, triple, or quadruple power steering gears require the use of a power steering cooler. * Steering gear for single front axle installations only. * The creep loading of the front axle [load with lift axle raised] may compromise park-steer performance with this capacity power steering gears and three pushers. Consider using larger capacity dual gears in this application. | \$1,563 | 60# |
| 2893882 | Dual power steering gears: 32K TRW TAS85. * Dual power steering gears rated over 29K are not compatible with axles rated below 20K. * Dual, triple, or quadruple power steering gears require the use of a power steering cooler. * For use on W900B with a 2007+ EPA compliant engine. * Steering gear for single front axle installations only. | \$1,940 | 113# |

T800: FRONT AXLE

|--------------------|---|----------|--------|
| Twin Steer | | | |
| Non-Driving | | | |
| 2509140 | Twin Steer Front Axle: 40,000 lbs. Dana Spicer D2000. * A front axle setting code must be present on all C500 twin steer orders. Use code 2900730 or 2900745. * D2000 twin steer axles cannot be used in Export service except on the K500. * MX engine is not available on twin steer chassis except for T880S twin steer. * Narrating desired fuel tank placement relative to the back of cab or centerline of the rearmost steer axle will help ensure that the chassis body requirements are met. * Severe Service Warranty is required for front steer axles rated over 22,000 lbs GAWR, except in Ready Mix Concrete service. * Special delivery requirements may be required on twin steer chassis. See shipping policy TA005. * Steel fenders are required on T800 models used with twin steer configurations. * T800 twin steer and C500 twin steer models are not available with 2017 Efficiency Series X15 engines as the design of the fuel pump on these engines interferes with the power steering pump for the T800/C500 twin steers. * The Alcoa 83462 front wheel interferes with the steer arm in the D2000 axle installation. D2200 is not an issue. * The T800 twin steer option is offered only on chassis with a road use profile of 10% maximum class C and 5% maximum class D roads. If your vocation will exceed these values consider using a C500 twin steer chassis. * The wheelbase on a T800 twin steer chassis is measured from the centerline of the forward steer axle to the centerline of the rear axle group. Steer axle spacing is 72 inches. * Twin steer chassis can use a flat or curved glass in a wide hood, split fender hood, or sheet metal hood configuration. * Twin steer chassis require either 1-piece wide steel fenders or 2-piece aluminum diamond plate fenders. * Wheelbases on twin steer K500 chassis are measured from centerline of the forward steer axle, like a T800, to centerline of bogie. Differs from C500 which is measured from centerline of forward axle group to centerline of bogie. | \$10,294 | 1,508# |

| Tandem Axle Outer End Equipment | | | |
| Brakes | | | |
| 46K & Under | | | |
| 3306001 | Dual rear Bendix air disc brakes for dual rear axles to 46K capacity. * Air disc brakes on rear axle requires the use of air disc brakes on the front axle of the chassis. * Maximum capacity for tandem axle air disc brakes is 46K with aluminum hubs and 52K with iron hubs. * Meritor Ultramount hubs are not for use with air disc brakes or with Sisu rear axles. * Rear air disc brakes are not compatible with Hendrickson PRIMAX with 52K axles, Hendrickson HAS, or Reyco rear suspensions. * Rear air disc brakes require Preset Plus oil seals code 3441972. * Specifying air disc brakes on any axle requires that the wheels on all axles be air disc brake compatible, including any lift axles. * Tandem rear axle air disc brake. The disc brakes require splined rotors. Requires Preset Plus oil seals. Slack adjusters are included. * The static loaded radius of the rear tires cannot exceed 21.9 inches when air disc brakes are specified. This SLR is typical with tires smaller than 48 inches in diameter. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use an RSD-compliant brake code instead. | \$65 | 40# |
| 3306014 | Rear brakes, Bendix RSD-Compliant ADB22X Disc brake for tandem axle, Max GAWR 46k. * Air disc brakes on rear axle requires the use of air disc brakes on the steer axle as well. * Maximum axle GAWR for this code: 46,000 lbs * Maximum capacity for tandem axle air disc brakes is 46K with aluminum hubs and 52K with iron hubs. * Rear air disc brakes are not compatible with Hendrickson PRIMAX with 52K axles, Hendrickson HAS, or Reyco rear suspensions. * Rear air disc brakes require Preset Plus oil seals code 3441972. * RSD vehicles with Bendix brakes are not available with multiple lift axles or with tag axles. One pusher (other than 8k or 10k) is allowed. * The maximum GVWR for a chassis equipped with tandem axles using air disc brakes and a single spring brake is 66K. Dual spring brake installations with yield a higher GVWR limit. | \$65 | 40# |
| 3334004 | Dual Rear Brakes 16-1/2x7 in. to 46K; Bendix ES-extended service S-cam. * Bendix ES 16-1/2 x 7 inch rear brakes are not compatible with rear axles rated over 52K. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use an RSD-compliant brake code instead. | STD | 0# |
| 3334009 | Dual Rear Brakes 16-1/2x7 in. to 46,001 -52K Bendix ES-extended service S-cam. * 16.5 x 5 inch tandem axle rear brakes for use with axles rated under 52K. Not available with request for Extended Warranty. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use an RSD-compliant brake code instead. | \$1,447 | 16# |
| 3334050 | Dual Rear Brakes 16-1/2x8-5/8 in. to 44K; Bendix ES-extended service S-cam. * 16.5 x 8.625 inch rear brakes for use on tandem rear axles rated under 52K. Maximum rear GAWR will be 44K. * Meritor X30 light weight fused drums for use with tandem axles with maximum GAWR of 46K. Not for use with spoke wheels, 16.5 x 8.625 inch rear brakes, or with the LMS brake package. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use an RSD-compliant brake code instead. | \$553 | 32# |

- * On RSD chassis with single rear axles and Meritor brakes, 16.5x7 rear brakes are required with steer axle GAWR of 12,001 - 14,6K.
- * On RSD chassis with single rear axles and Meritor brakes, 16.5x7 rear brakes are required with steer axle GAWR up to and including 12k and drive axle GAWR 21,001 - 23K.
- * On RSD chassis with single rear axles and Meritor brakes, 16.5x8.625 inch brakes are required for chassis with steer axle GAWR 12K or less and drive axle GAWR 21K or less.
- * Specifying Meritor RSD brakes on one axle requires the use of Meritor RSD brakes on all axles.

58K & Above

| | | | |
|----------------|---|-------|------|
| 3304018 | Dual rear brakes for Dana 60 & 70K Axles 18x7 in. replacing 16.5x7in. | \$524 | 584# |
|----------------|---|-------|------|

- * Rear brakes for use on D60-190 or D60-590 rear axles.
- * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine with rear GAWR under 29K per axle). Chassis with rear GAWRs of 29,000 lbs. or more per axle are not subject to RSD (Reduced Stopping Distance) regulations

|----------------|---|-----|----|

- * Rear brakes for use on D60-190 or D60-590 rear axles.
- * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine with rear GAWR under 29K per axle). Chassis with rear GAWRs of 29,000 lbs. or more per axle are not subject to RSD (Reduced Stopping Distance) regulations

T800: REAR AXLE

| Option | Description | Price | Weight |
|--|--|---------|--------|
| Tandem Axle Outer End Equipment | | | |
| Brakes | | | |
| 58K & Above | | | |
| 3354010 | Dual Rear Brakes 18x7 in. 58-70K; Meritor. * 18 x 7 inch brakes used with an 11-1/4 inch bolt circle hub piloted hub are not for use with aluminum rear wheels. If aluminum wheels are required consider 13-3/16 inch bolt circle hubs. * 18 x 7 inch rear brakes are incompatible with 20 inch tube-type tires, or 22.5 inch tubeless tires. * Meritor 18 x 7 inch rear brakes on the RT58-185 rear axle cannot be used when 11.25 inch bolt circle hubs are specified. Consider 13-3/16 hubs with steel wheels. * Meritor P 18 x 7 inch rear brakes for use on Meritor tandem rear axles rated over 52k. Compatible with 13-3/16 inch ball seat hubs, or 6-spoke wheels, or 11-1/4 inch bolt circle hub pilot hubs when only ABS is specified. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine with rear GAWR under 29K per axle). Chassis with rear GAWRs of 29,000 lbs. or more per axle are not subject to RSD (Reduced Stopping Distance) regulations | \$1,521 | 544# |
| 3360000 | Dual Rear Brakes 16x8 in. 48-70K; Sisu S-cam. * Sisu 16 x 8 inch S-cam tandem rear axle brakes. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine with rear GAWR under 29K per axle). Chassis with rear GAWRs of 29,000 lbs. or more per axle are not subject to RSD (Reduced Stopping Distance) regulations | \$0 | 0# |
| Brake Drums | | | |
| 3392002 | Dual rear heavy duty Brake Drums: cast. Use HD Gunite Drum when tandem axle with GAWR over 46,000 lbs is selected. | \$408 | 0# |
| 3392005 | Dual Rear Brake Drums: cast. * Cast drums for tandem rear axles rated under 52k. * This brake drum cannot be used with rear axle capacity of 46,002 lbs or greater. | STD | 0# |
| 3392010 | Dual Rear Brake Drums: cast included w/ axle or brake. * Rear brake drums are included with some tandem axles with capacity exceeding 52K or with a tridem rear axle. | \$0 | 0# |
| 3392026 | Rear Brake Drum: TruTurn Lite 16.5x7 Dual | \$123 | -26# |
| 3392032 | Rear Brake Drum: TruTurn Lite 16.5X8.6 Dual | \$175 | -14# |
| 3392130 | Dual Rear Brake Drums Meritor X30 light weight. Use w/ 16-1/2x7 in. brakes. Limits GAWR to 46K maximum. Requires dual spring brakes. Not for spoke wheels * Meritor X30 light weight fused drums for use with tandem axles with maximum GAWR of 46K. Not for use with spoke wheels, 16.5 x 8.625 inch rear brakes, or with the LMS brake package. | \$311 | -64# |
| 3392131 | Dual Rear Brake Drums Meritor X30 light weight. Use w/ 16-1/2X8-5/8 in. brakes. Limits GAWR to 46K maximum. Requires dual spring brakes. Not for spoke wheels * Meritor X30 light weight fused drums for use with tandem axles with maximum GAWR of 46K. Not for use with spoke wheels, 16.5 x 7 inch rear brakes, or with the LMS brake package. | \$508 | -32# |
| Rotors | | | |
| 3392604 | Splined rotor for dual rear air disc brake for use with aluminum hubs. * Maximum capacity for tandem axle air disc brakes is 46K with aluminum hubs and 52K with iron hubs. | \$3,950 | -208# |
| 3392605 | Splined rotor for dual rear air disc brakes for use with iron hubs. * Maximum capacity for tandem axle air disc brakes is 46K with aluminum hubs and 52K with iron hubs. | \$3,647 | -208# |

T800: REAR AXLE

| Option | Description | Price | Weight |
|--|---|---------|--------|
| Tandem Axle Outer End Equipment | | | |
| Hubs | | | |
| 3403023 | Dual Rear Hubs: Iron hub pilot 11-1/4 in. bolt circle for axles 58K and greater. * 18 x 7 inch brakes used with an 11-1/4 inch bolt circle hub piloted hub are not for use with aluminum rear wheels. If aluminum wheels are required consider 13-3/16 inch bolt circle hubs. * Meritor 18 x 7 inch rear brakes on the RT58-185 rear axle cannot be used when 11.25 inch bolt circle hubs are specified. Consider 13-3/16 hubs with steel wheels. * Rear hub piloted hub for use on tandem rear axles with 58K or greater capacity. Not available with LMS brake packages. | \$0 | 0# |
| 3403460 | Dual Rear Hubs: Iron hub pilot 11-1/4 in. BC. * For use on tandem rear axles rated under 52k. Incompatible with LMS brake package. | (\$77) | 104# |
| 3405010 | Dual Rear Hubs: Iron 335mm hub pilot for Dana 60K and 70K axles only. * For use on D60-190, D60-590, or D70-590 rear axles. | \$1,138 | 104# |
| 3405334 | Dual Rear Hubs: Meritor Ultramount hub pilot; maximum 46K. 335 mm. bolt circle. * Meritor Ultramount hubs are not for use with air disc brakes or with Sisu rear axles. * Meritor Ultramount hubs require the code oil seals included with the hub. they are not applicable to LMS hubs. | \$1,130 | 104# |
| 3407050 | Dual Rear Hubs: Aluminum hub pilot 46K 11-1/4 in. bolt circle. * Rear axle outer end equipment for a tandem axle installation rated up to and including 46,000 lbs. | STD | 0# |
| Spoke Wheels | | | |
| 3425205 | 20 in. 6-spoke wheel for dual rear axle 52K and under. * Spoke wheels for use with tandem rear axles rated under 52k. Not for use with LMS brakes. * Spokes are available for use in export operating areas only. | \$305 | 317# |
| 3427205 | 22 in. 6-spoke wheel for dual rear axle 52K and under. * Spoke wheels for use with tandem rear axles rated under 52k. Not for use with LMS brakes. * Spokes are available for use in export operating areas only. | \$127 | 335# |
| Oil Seals | | | |
| 3441965 | Dual rear oil seals w/ iron hubs w/ 335 mm. hubs, ball seat hubs or spoke wheels. * Meritor Ultramount hubs require the code oil seals included with the hub. they are not applicable to LMS hubs. * Non-LMS oil seals are for use on rear spokes or with Ultramount rear hubs | \$0 | 0# |
| 3441972 | ConMet PreSet Plus Hub package; dual rear axle. * Preset Plus oil seals for tandem rear axles are available for use with aluminum or iron hub pilot hubs on axles with capacity of 52K or less. | STD | 0# |
| Spring Brake & Service Chambers | | | |
| Single on Dual | | | |
| 3485101 | Spring Brake: 3030 long stroke single spring brake on dual axle. This option reduces rear tandem GAWR to 36,000 lbs. * Long stroke brake chambers are not compatible with Neway AD rear suspensions. There is no option for inverted or high mounting these chambers. * Single axle parking brake for use on tandem rear axles. Insufficient for use on full trucks. Not available with a pusher axle. | (\$28) | -20# |

T800: REAR AXLE

| Option | Description | Price | Weight |
|--|--|---------|--------|
| Tandem Axle Outer End Equipment | | | |
| Spring Brake & Service Chambers | | | |
| Single on Dual | | | |
| 3485103 | Spring brakes included w/ rear air disc brakes single spring brake on dual axle installation. Derates tandem to 36,000 lbs. * Single axle parking brake for use on tandem rear axles. Insufficient for use on full trucks. Not available with a pusher axle. * Spring brake code for use with air disc brakes used to specific to single on dual installations where spring brake deletion is acceptable on one of the axles. Tractors rated to 46K only. * The maximum GVWR for a chassis equipped with tandem axles using air disc brakes and a single spring brake is 66K. Dual spring brake installations with yield a higher GVWR limit. | (\$19) | -20# |
| 3485109 | Spring Brake: 3030 high output single spring brake on dual axle installation. * Single axle parking brake for use on tandem rear axles. Insufficient for use on full trucks. Not available with a pusher axle. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use long stroke brake chambers instead. | (\$44) | -22# |
| Dual | | | |
| 3483260 | Spring Brake: 3630 dual for Sisu axle. * Sisu tandem rear axles require 3630 spring brake chambers. This code is not available for use with other axle manufacturers. * Spring brake available for use with Sisu tandem rear axles. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use long stroke brake chambers instead. | \$1,680 | 28# |
| 3485002 | Spring brakes included w/ dual rear air disc brakes. * Neway AD390 rear suspension requires high output spring brakes when used with drum brakes on axles other than Sisu. Sisu rear axles utilize a spring brake that is acceptable for use with this suspension. This doesn't apply to K500. * Spring brakes for use only with, and required for air disc brakes on tandem rear axle chassis. * The air disc brakes require a generic spring brake code. | \$0 | 0# |
| 3485207 | Spring Brake: 3030 long stroke dual 30 square inches travel; replaces standard 2-1/2 in. travel. Helps keep brakes in adjustment longer. * 3030 high output spring brakes for tandem rear axles when no more than one pusher axle is specified. * Long stroke brake chambers are not compatible with Neway AD rear suspensions. There is no option for inverted or high mounting these chambers. * Long stroke brake chambers are required for RSD-compliant chassis with drum brakes. * Spring brakes with 3030 chamber size for use on tandem rear axle with capacities up to 52K. Not for use in fire service. | \$28 | 4# |
| 3485208 | Spring Brake: 3036 dual 30 square inches; 36 square inches spring chamber. * 3036 spring brake chambers for use on tandem rear axle capacities up to 58K. Not available for fire service, see 3636 chamber size. * Multiple lift axles require the use of 3036 spring brake chambers. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use long stroke brake chambers instead. | \$216 | 16# |

Tandem Axle Outer End Equipment

Spring Brake & Service Chambers

Dual

| | | | |
|----------------|--|-------|-----|
| 3485209 | Spring Brake: 3030 high output dual. * 3030 high output spring brakes for tandem rear axles when no more than one pusher axle is specified. * Neway AD390 rear suspension requires high output spring brakes when used with drum brakes on axles other than Sisu. Sisu rear axles utilize a spring brake that is acceptable for use with this suspension. This doesn't apply to K500. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use long stroke brake chambers instead. | STD | 0# |
| 3485210 | Spring Brake: 3636 dual. * Meritor axles rated over 52K should use the 3636 spring brake. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use long stroke brake chambers instead. | \$249 | 24# |
| 3485213 | Spring Brake: 3036 long stroke dual 30 square inches; 36 square inches spring chamber. * 3036 Longstroke brake chambers are not available with Neway ADZ suspensions. * 3036 spring brake chambers for use on tandem rear axle capacities up to 58K. Not available for fire service, see 3636 chamber size. * Long stroke brake chambers are not compatible with Neway AD rear suspensions. There is no option for inverted or high mounting these chambers. * Long stroke brake chambers are required for RSD-compliant chassis with drum brakes. * Not available with Kenworth AG380 rear suspension. | \$276 | 16# |

Brake Equipment

| | | | |
|----------------|--|-----|----|
| 3500006 | Inverted chambers for 16-1/2 x 7 in. brakes; Replaces standard mount w/ higher mount. * Inverted rear brake chambers are only available on Chalmers or Hendrickson beam type rear suspensions. The option will not work with Chalmers low mount suspension requesting 3036 brake chambers. Not available with Hendrickson HMX with saddle height below 17.5 inches. * Recommended for asphalt spreaders. * The option to invert rear brake chambers is not available with an LMS brake package or with axle capacities of 58K or greater. Not for use with air disc brakes. | \$6 | 0# |
| 3500012 | Replace standard mount w/ high mount for rear rear axle brake chambers. * High mount brake chambers are not available with some high capacity rear axles where the chambers are already in the highest possible position. * High mounted rear brake chambers are applicable to high mount Chalmers, standard height Hendrickson HMX except with 3036 chamber size, or Hendrickson beam suspensions other than HMX with 16.5 inch [low] saddle height. | \$0 | 0# |
| 3500021 | Brake cam tube bracket required w/ wide base tires w/ Airslide 380, 400, 400L, 460, 690 & Primaax suspension. * 50R/22.5 or 55R/22.5 rear tires require the use of a brake camshaft tube brace in applications other than with Meritor rear brakes, air disc brakes on rear axle, or with a Reyco rear suspension. * Brake camshaft tube brace is not available with Reyco rear suspensions, rear air disc brakes, axles rated over 46K, or Meritor rear brakes. | \$0 | 4# |

Differential Lock & Crosslock

| | | | |
|----------------|---|---------|-----|
| 3511400 | Driver Controlled Differential Lock (Crosslock) for Meritor Axles 40K to 52K forward rear axle. Under Speed Interlock is standard on T680. * Crosslock for tandem rear axles rated under 58k. Not available on dead axle tandem installations. | \$1,416 | 19# |
|----------------|---|---------|-----|

| Option | Description | Price | Weight |
|--|---|---------|--------|
| Tandem Axle Outer End Equipment | | | |
| Differential Lock & Crosslock | | | |
| 3511401 | Driver Controlled Differential Lock (Crosslock) for FUELite MA40-165. * Bendix eTrac traction enhancement system requires differential lock code 3531001 (Dana) OR 3511401 (Meritor). * Meritor FUELite dead axle tandem requires differential lock code 3511401. | \$1,416 | 0# |
| 3511410 | Driver Controlled Differential Lock (Crosslock) for Meritor Axles 40K to 58K rear rear axle. Under Speed Interlock is standard on T680. * Crosslock for tandem rear axles rated under 58k. Not available on dead axle tandem installations. | \$1,463 | 19# |
| 3511420 | Driver Controlled Differential Lock (Crosslock) for Meritor Axles 40K to 52K forward rear & rear rear axle. Under Speed Interlock is standard on T680. * Crosslock for tandem rear axles rated under 58k. Not available on dead axle tandem installations. * Engagement of both traction control devices may seriously impair the steering of the vehicle. Use code 3573110, 3573111, or 3573112 to provide separate switches and help alleviate the issue. | \$2,631 | 39# |
| 3511500 | Driver Controlled Differential Lock (Crosslock) for Paccar Axles 40K rated, forward rear axle, with cab control. | \$1,374 | 19# |
| 3513045 | No Spin for Meritor Axles: 52-70K capacity forward rear axle. * No-Spin option for tandem axle installations rated at 52K or greater. Not approved for use with AutoShift or UltraShift transmissions. * Traction control device for use only with Meritor rear axles. | \$1,619 | 15# |
| 3532120 | Wheel Differential Lock for Dana Spicer axles DSH40(P)/DSH44(P)/DSP40(P)/DSP41(P)/D40-145(P)(H)(S)/D40-155 forward rear axle. Under Speed Interlock is standard on T680. | \$1,392 | 22# |
| 3532125 | Wheel Differential Lock for Dana Spicer axles DSP40/DSP41(P)/DSH40(P)/DSH44(P)/D40-155 rear rear axle. Under Speed Interlock is standard on T680. * Wheel diff lock option in rearmost tandem axle for use on DS404, DS405, DS454, DSH40,DSH44, DSP40, or DSP41 rear axles. | \$1,463 | 15# |
| 3532130 | Wheel Differential Lock for Dana Spicer axles DSP40/DSP41(P)/DSH40(P)/DSH44(P)/D40-155 forward rear axle & rear rear. Under Speed Interlock is standard on T680. * Engagement of both traction control devices may seriously impair the steering of the vehicle. Use code 3573110, 3573111, or 3573112 to provide separate switches and help alleviate the issue. * Wheel diff lock option in both tandem axles for use on DS404, DS405, DS454, DSH40,DSH44, DSP40, DSP41 or Advantec rear axles. | \$2,688 | 37# |
| 3532171 | Wheel Differential Lock for Dana Spicer axles D60-190, D60-590 and D70-590, forward rear and rear rear axles. Under Speed Interlock is standard on T680. * Rear wheel Diff Lock for use on D60-190, D60-590, and D70-590 rear axles. Controls both rear axles. | \$2,453 | 39# |
| 3532190 | Wheel Differential Lock for Dana Spicer axles D40-170/172(P)/D46-170/172(H)(P)(WT) forward rear axle. Under Speed Interlock is standard on T680. * Traction control device for use with Dana Spicer D40-172 or D46-172 rear axles. | \$1,431 | 55# |
| 3532191 | Wheel Differential Lock for Dana Spicer axles D52-190P or D46-590HP forward rear axle. * Traction control device for use with Dana Spicer D52-190 or D46-590 rear axles. | \$1,225 | 19# |
| 3532192 | Wheel Differential Lock for Dana Spicer axles D40-170/172(P)/D46-170/172(H)(P)(WT) rear rear axle. Under Speed Interlock is standard on T680. * Traction control device for use with Dana Spicer D40-172 or D46-172 rear axles. | \$1,469 | 55# |

T800: REAR AXLE

| Option | Description | Price | Weight |
|--------|-------------|-------|--------|
|--------|-------------|-------|--------|

Tandem Axle Outer End Equipment

Differential Lock & Crosslock

| | | | |
|---------|--|---------|------|
| 3532193 | Wheel Differential Lock for Dana Spicer axles D52-190P or D46-590HP rear rear axle. Under Speed Interlock is standard on T680. * Traction control device for use with Dana Spicer D52-190 or D46-590 rear axles. | \$1,502 | 20# |
| 3532194 | Wheel Differential Lock for Dana Spicer axles D40-170(P)/D46-170(H)(P)(WT) forward rear axle & rear rear axle. * Engagement of both traction control devices may seriously impair the steering of the vehicle. Use code 3573110, 3573111, or 3573112 to provide separate switches and help alleviate the issue. * Traction control device for use with Dana Spicer D40-172 or D46-172 rear axles. | \$2,766 | 112# |
| 3532195 | Wheel Differential Lock for Dana Spicer axles D52-190P, D46-590HP or D52-590P forward rear axle & rear rear axle. * Engagement of both traction control devices may seriously impair the steering of the vehicle. Use code 3573110, 3573111, or 3573112 to provide separate switches and help alleviate the issue. * Traction control device for use with Dana Spicer D52-190 or D46-590 rear axles. | \$2,453 | 39# |

Slack Adjusters

| | | | |
|---------|---|------|-----|
| 3460020 | Manual slack adjusters for dual rear axles under 58K. * For use in Canada or for export operating areas only. Cannot be used with antilock brakes. Cannot be used with LMS brakes. No mismatch between manual-auto on front and rear axles is permitted. | \$7 | -6# |
| 3460090 | Manual slack adjusters for dual rear axles 58K and over. * Manually slack adjusters are available for export operating areas only. | \$15 | -6# |
| 3465002 | Dual Rear axle automatic slack adjusters. * Automatic slack adjusters for tandem rear axles. | STD | 0# |

Miscellaneous

| | | | |
|---------|--|-------|-----|
| 3490902 | Rear air disc brake dustshields for tandem axles; includes pads and rotor shields. * Rear disc pads for use with air disc brakes. | \$733 | 12# |
| 3500022 | Brake cam tube bracket w/ dual tires * Brake camshaft tube brace is not available with Reyco rear suspensions, rear air disc brakes, axles rated over 46K, or Meritor rear brakes. * If the potential for aftermarket rear wheel mounting to switch from dual to super singles exists then a rear camshaft support brace should be specified. This recommendation does not apply to Meritor Q-plus brakes, rear axle air disc brakes, or Kenworth Airglide suspensions with stamped spider brakes. * When used with Meritor axles; A Dualtrac axle is required. | \$88 | 4# |

Tridem Axle Outer End Equipment

Brakes

| | | | |
|---------|---|-------|-----|
| 3304014 | Rear Brakes, Bendix RSD-Compliant HP-ES S-Cam 16.5x7 in. tridem axle drum brake, Max GAWR 69k. * Maximum rear GAWR for this code is 69,000 lbs. * RSD vehicles with Bendix brakes are not available with multiple lift axles or with tag axles. One pusher (other than 8k or 10k) is allowed. | \$969 | 30# |
|---------|---|-------|-----|

T800: REAR AXLE

| Option | Description | Price | Weight |
|--|---|---------|--------|
| Tridem Axle Outer End Equipment | | | |
| Brakes | | | |
| 3304015 | Rear Brakes, Bendix RSD-Compliant HP-ES S-Cam 16.5x7 in. S (Heavy Duty) tridem axle drum brake, for GAWR 69,001 - 78k. * Maximum axle GAWR for this code: 78,000 lbs. Minimum GAWR: 69,001 lbs * RSD vehicles with Bendix brakes are not available with multiple lift axles or with tag axles. One pusher (other than 8k or 10k) is allowed. | \$3,092 | 20# |
| 3306003 | Rear Bendix air disc brakes for tridem rear axles to 69K capacity. * Air disc brakes on rear axle requires the use of air disc brakes on the front axle of the chassis. * Rear air disc brakes are not compatible with Hendrickson PRIMAXX with 52K axles, Hendrickson HAS, or Reyco rear suspensions. * Specifying air disc brakes on any axle requires that the wheels on all axles be air disc brake compatible, including any lift axles. * The air disc brakes require a generic spring brake code. * The maximum GVWR for a tridem rear axle chassis equipped with air disc brakes is 141K. * The static loaded radius of the rear tires cannot exceed 21.9 inches when air disc brakes are specified. This SLR is typical with tires smaller than 48 inches in diameter. * Tridem rear axle air disc brake. The disc brakes require splined rotors. Requires Preset Plus oil seals. Slack adjusters are included with the brakes. | \$111 | 60# |
| 3306016 | Rear brakes, Bendix RSD-Compliant ADB22X Disc brake for tridem axle, Max GAWR 69k. | \$99 | 60# |
| 3334305 | Tridem Rear Brakes 16-1/2x7 in. to 69K; Bendix ES-extended service S-cam. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use an RSD-compliant brake code instead. | \$0 | 0# |
| 3354069 | Rear Brakes, Meritor Q+ RSD-Compliant S-Cam 16.5x7 in. tridem axle drum brake, Max GAWR 69k. * For RSD chassis with single rear axles and Meritor brakes, 16.5x8.625 brakes are not available for any of the following configurations: Steer axle GAWR of 12,001 - 14,6K. * Maximum rear GAWR for this code is 69,000 lbs. * Meritor brakes are not available on any RSD-compliant chassis with tridem rear axle with GAWR over 69,000 lbs. * Meritor brakes are not available on RSD chassis with lift axles.. * Meritor brakes are not available on RSD chassis with over 16,000 lb steer axle GAWR. * On RSD chassis with single rear axles and Meritor brakes, 16.5x7 rear brakes are required with steer axle GAWR of 12,001 - 14,6K. * On RSD chassis with single rear axles and Meritor brakes, 16.5x7 rear brakes are required with steer axle GAWR up to and including 12k and drive axle GAWR 21,001 - 23K. * On RSD chassis with single rear axles and Meritor brakes, 16.5x8.625 inch brakes are required for chassis with steer axle GAWR 12K or less and drive axle GAWR 21K or less. * Specifying Meritor RSD brakes on one axle requires the use of Meritor RSD brakes on all axles. | \$870 | 24# |
| 3354300 | Tridem Rear Brakes 16-1/2x7 in. to 69K; Meritor Q-Plus S-cam. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use an RSD-compliant brake code instead. | \$472 | 24# |
| Brake Drums | | | |
| 3392003 | Tridem rear heavy duty Brake Drums: cast. Use HD Gunitite Drum when tridem axle with GAWR over 69,000 lbs is selected. | \$612 | 0# |
| 3392027 | Rear Brake Drum: TruTurn Lite 16.5x7 Tridem | \$211 | -42# |

Tridem Axle Outer End Equipment

Differential Lock, Crosslock & No Spin

| | | | |
|---------|--|---------|------|
| 3511425 | Driver Controlled Differential Lock (Crosslock) for Meritor Axles to 69K forward rear, center rear & rear axle. * Crosslock for tridem rear axles. Provides lock for all axles in the group. * Engagement of both traction control devices may seriously impair the steering of the vehicle. Use code 3573110, 3573111, or 3573112 to provide separate switches and help alleviate the issue. | \$3,710 | 52# |
| 3511428 | Driver Controlled Differential Lock (Crosslock) for Meritor Axles to 69K center rear & rear axle. * Crosslock for tridem rear axles. Locks only second and third axles in the group. * Engagement of both traction control devices may seriously impair the steering of the vehicle. Use code 3573110, 3573111, or 3573112 to provide separate switches and help alleviate the issue. * Traction control device for use only with Meritor rear axles. | \$2,519 | 35# |
| 3532189 | Wheel Differential Lock for Dana Spicer Axles T69-170/172HP forward rear axle & rear rear. * Engagement of both traction control devices may seriously impair the steering of the vehicle. Use code 3573110, 3573111, or 3573112 to provide separate switches and help alleviate the issue. * Traction control device for use on tridem rear axles. * Tridem axle traction control for use with T69-172P rear axles. | \$2,652 | 112# |
| 3532196 | Wheel Differential Lock for Dana Spicer Axles T69-170/172HP forward rear, center rear axle & rear rear axle. * Engagement of both traction control devices may seriously impair the steering of the vehicle. Use code 3573110, 3573111, or 3573112 to provide separate switches and help alleviate the issue. * Tridem axle traction control for use with T69-172P rear axles. | \$4,012 | 167# |
| 3532197 | Wheel Differential Lock for Dana Spicer Axles T69-170/172HP center rear axle & rear rear axle. * Engagement of both traction control devices may seriously impair the steering of the vehicle. Use code 3573110, 3573111, or 3573112 to provide separate switches and help alleviate the issue. * Tridem axle traction control for use with T69-172P rear axles. | \$2,635 | 112# |
| 3532202 | Wheel Differential Lock for Dana Spicer Axles T78-190P/590P forward rear, center rear axle & rear rear axle. * Engagement of both traction control devices may seriously impair the steering of the vehicle. Use code 3573110, 3573111, or 3573112 to provide separate switches and help alleviate the issue. * Tridem axle traction control for use with T78-190P rear axles. | \$3,932 | 59# |

Slack Adjusters

| | | | |
|---------|--|-----|----|
| 3465003 | Tridem Rear axle automatic slack adjusters. * Automatic slack adjusters for tridem rear axles. * Rear slack adjusters for use on tridem axle configurations. | \$0 | 0# |
|---------|--|-----|----|

Miscellaneous

| | | | |
|---------|--|---------|-----|
| 3490903 | Rear disc brake dustshields for tridem axle includes pad and rotor shield. | \$1,099 | 19# |

| 3465900 | Rear slack adjusters included w/ axle or air disc brakes. * Slack adjusters are included with many tandem rear axles rated over 52K, LMS packages, or with air disc brakes. | \$0 | 0# |
| 3486000 | Spring Brake Location: Forward Rear, Code Separately For Spring Break * In order to define single spring brake location, must have a single on dual spring brake code selected. | \$0 | 0# |
| 3490047 | Dustshields for drum brakes: all rear axles. * Dust shields are not available with Marmon, Sisu, Clark, SPRC, or Kessler. They are integrated into the axle. * Rear axle dust shields are not for use with air disc brakes on the same axle. * Rear axle dust shields are recommended on all chassis that will operate in Canada. * Rear axle dust shields are required on chassis registered in Canada requesting a Severe Service package. | \$120 | 11# |
| 3491495 | Hubodometer. | \$260 | 3# |
| 3495144 | Rear Meritor Platinum Shield Brakes Addon Platinum shield is only a shoe change. * Available with Meritor 16.5" drum brakes only. | \$96 | 0# |
| 3495225 | FMVSS-136 Stability Control Schedule Review Chassis meets FMVSS-136 requirements and must be equipped with Electronic Stability Control. Reference Option code placed on order. | \$0 | 0# |
| 3495352 | Bendix Collision Mitigation System Following Distance Alerts- CONFIGURATION 5 | \$0 | 0# |
| 3510000 | Tapered axle shaft holes. * A sales code for tapered axle shaft holes is not required for D46-590, D52-190, D52-590, RT58-185, RT58-380, RT70-380 series rear axles. These axles are standard with the feature. * A sales code for tapered axle shaft holes is not required for S21-172, S23-172, S23-190, S26-190, D40-172/P, D46-172 series rear axles. These axles are standard with the feature. * Tapered axle shaft holes replacing straight (3510000) are applicable to Dana Spicer and Meritor axles only. Not available with PACCAR axles. | \$59 | 0# |
| 3512125 | Additional lube pump for rear rear axle for Meritor RT58-380 & RT70-380. * Additional lubrication pump for the rearmost axle on RT58-185, RT58-380 and RT70-380 tandem drive axles. | \$864 | 11# |
| 3532600 | Crosslock included w/ axle for Sisu rear axles. Warning - engagement of traction control devices on both axles may seriously impair the steering of this vehicle. * Crosslock for use only with Sisu or Axle Tech rear axles. * Engagement of both traction control devices may seriously impair the steering of the vehicle. Use code 3573110, 3573111, or 3573112 to provide separate switches and help alleviate the issue. | \$0 | 0# |
| 3533000 | Raised oil levels for rear rear axle for use on 12% or greater continuous grades. * Raised oil level in Eaton rear axles is available for vocations with some class B/C/D road service. Incompatible with Kenworth AG380 or Hendrickson air suspensions. * Raised oil levels for rear rear axles for use on 12% or greater continuous grades. | \$68 | 20# |
| 3573100 | Xlock/differential lock plumbed to low side of low side of transmission (manual). * Crosslock plumbed to low side of the transmission requires a code for a traction control device. Not for use with Allison automatic, Ultrashift or Autoshift transmissions. | \$129 | 0# |

| Option | Description | Price | Weight |
|------------------------------|---|----------|--------|
| Miscellaneous | | | |
| 3573101 | Xlock/differential lock plumbed to low side of transmission (automatic); includes plumbing and wiring. * Crosslock plumbed to low side of the transmission requires a code for a traction control device. * Option available on Allison RDS or OFS transmissions only. | \$393 | 2# |
| 3573110 | Separate flip valve for dual axles: differential lock or crosslock. * Engagement of both traction control devices may seriously impair the steering of the vehicle. Use code 3573110, 3573111, or 3573112 to provide separate switches and help alleviate the issue. * Flip valve, switch and wiring can be used for tandem or tridem - controls 2 of the 3 axles. Requires a code for a traction control device. | \$63 | 0# |
| 3573112 | Flip valve, wiring and light separate for wheel differential lock or driver controlled differential lock for forward rear, center rear & rear rear axles. * Engagement of both traction control devices may seriously impair the steering of the vehicle. Use code 3573110, 3573111, or 3573112 to provide separate switches and help alleviate the issue. * Supplies three separate controls for tridem axle Cross lock or Diff lock. Do not use in combination with another style of controls, only one optional control code per order is permitted. | \$221 | 0# |
| 3580002 | Fabricated torque rod brackets replace cast brackets. Required w/ Sisu 58K plus axles and Neway AD252. * Fabricated torque rod brackets replacing the standard cast brackets are for use on Neway AD252 rear suspensions with a Sisu axle rated at 58,000 lbs or greater. | \$9,348 | 0# |
| Pusher Axles | | | |
| Non-Steerable Pushers | | | |
| Suspensions | | | |
| 3808025 | Non-steerable pusher axle: Watson-Chalin AL2200 23K Standard track. * Factory and customer installed pusher axles are not available with single rear axles. * This pusher should not be combined with a wide track rear axle in most cases. Contact Kenworth Application Engineering with any concerns. | \$15,142 | 2,296# |
| 3808026 | Non-steerable pusher axle: Watson-Chalin AL2200 21K Wide track. * Factory and customer installed pusher axles are not available with single rear axles. * The overall width of wide track pusher axles exceeds the overall width of a standard track rear axles. Combining rear track widths is not recommended. | \$16,927 | 2,309# |
| Brakes | | | |

Customer-Installed Lift Axles

Kenworth-Offered Lift Axles

Customer-Installed Information Codes

| | | | |
|---|--|-----|----|
| 3840218 | Customer-installed: Steerable pusher information. Watson Chalin 20K SL2065. Kenworth will provide frame and driveline layout the same as for a factory installed axle. The rail will be drilled for the installation. Clearances and design are based upon the Kenworth standard tire and a location code. | \$0 | 0# |
| * Factory and customer installed pusher axles are not available with single rear axles. | | | |
| 3840219 | Customer-installed: Non-steerable pusher information. Watson Chalin AL2200. Kenworth will provide frame and driveline layout the same as for a factory installed axle. The rail will be drilled for the installation. Clearances and design are based upon the Kenworth standard tire and a location code. | \$0 | 0# |
| 3840220 | Customer-installed: Non-steerable tag information. Watson Chalin AL2200. The rail will be drilled for the installation. | \$0 | 0# |

Clear Frame Request

| | | | |
|--|--|---------|----|
| 3840005 | Clear frame: For 1 customer-installed steerable Kenworth offered pusher axle. Kenworth will provide frame and driveline layout the same as for a factory installed axle. The rail will not be drilled for the installation. Clearances and design are based upon the Kenworth standard tire, the selected lift axle type, and a location code. Type and axle spacing required. | \$1,328 | 0# |
| * Vehicles with lift axles have special engineering needs. It is not uncommon to be asked to add wheelbase, an additional driveline centerbearing, or to relocate components on these chassis. | | | |
| 3840010 | Clear frame for 2 customer-installed steerable Kenworth offered pusher axles. Type and axle spacing required. | \$1,328 | 0# |
| * Contingent on acceptable frame strength and creep loading. GAWR and GVW may need to be limited to be compliant. | | | |
| * Vehicles with lift axles have special engineering needs. It is not uncommon to be asked to add wheelbase, an additional driveline centerbearing, or to relocate components on these chassis. | | | |
| 3840015 | Clear frame: For 3 customer-installed steerable Kenworth offered pusher axles. Type and axle spacing required. | \$1,528 | 0# |
| * Contingent on acceptable frame strength and creep loading. GAWR and GVW may need to be limited to be compliant. | | | |
| * Vehicles with lift axles have special engineering needs. It is not uncommon to be asked to add wheelbase, an additional driveline centerbearing, or to relocate components on these chassis. | | | |
| 3840020 | Clear frame: For 1 customer-installed non-steerable Kenworth offered pusher axle. Kenworth will provide frame and driveline layout the same as for a factory installed axle. The rail will not be drilled for the installation. Clearances and design are based upon the Kenworth standard tire, the selected lift axle type, and a location code. Type and axle spacing required. | \$1,328 | 0# |
| * Vehicles with lift axles have special engineering needs. It is not uncommon to be asked to add wheelbase, an additional driveline centerbearing, or to relocate components on these chassis. | | | |

Non-Kenworth-Offered Lift Axles

Clear Frame Request

| | | | |
|--|--|---------|----|
| 3840300 | Clear frame: For 1 customer-installed non-Kenworth offered steerable pusher. Kenworth will provide clear frame 34 inches ahead and 24 inches behind the coded location. Intermediate, centerbearing and forward suspension crossmembers may be located within the clear frame area. The driveline will be installed as if there were no lift axle on the truck. The lift axle installer must address any driveline clearance issues. | \$1,328 | 0# |
| * Vehicles with lift axles have special engineering needs. It is not uncommon to be asked to add wheelbase, an additional driveline centerbearing, or to relocate components on these chassis. | | | |

Customer-Installed Lift Axles

Non-Kenworth-Offered Lift Axles

Clear Frame Request

| | | | |
|----------------|---|---------|----|
| 3840305 | Clear frame: For 2 customer-installed steerable non-Kenworth offered pusher. Kenworth will provide clear frame 34 inches ahead and 24 inches behind the coded location. Intermediate, centerbearing and forward suspension crossmembers may be located within the clear frame area. The driveline will be installed as if there were no lift axle on the truck. The lift axle installer must address any driveline clearance issues. * Vehicles with lift axles have special engineering needs. It is not uncommon to be asked to add wheelbase, an additional driveline centerbearing, or to relocate components on these chassis. | \$1,328 | 0# |
| 3840310 | Clear frame: For 3 customer-installed steerable non-Kenworth offered pushers. Kenworth will provide clear frame 34 inches ahead and 24 inches behind the coded location. Intermediate, centerbearing and forward suspension crossmembers may be located within the clear frame area. The driveline will be installed as if there were no lift axle on the truck. The lift axle installer must address any driveline clearance issues. * Vehicles with lift axles have special engineering needs. It is not uncommon to be asked to add wheelbase, an additional driveline centerbearing, or to relocate components on these chassis. | \$1,528 | 0# |
| 3840350 | Clear frame: For 1 customer-installed non steerable, non-Kenworth offered pusher. Kenworth will provide clear frame 29 inches ahead and 24 inches behind the coded location. Intermediate, centerbearing and forward suspension crossmembers may be located within the clear frame area. The driveline will be installed as if there were no lift axle on the truck. The lift axle installer must address any driveline clearance issues. * Vehicles with lift axles have special engineering needs. It is not uncommon to be asked to add wheelbase, an additional driveline centerbearing, or to relocate components on these chassis. | \$1,328 | 0# |
| 3840400 | Clear frame: For 1 customer-installed steerable non-Kenworth offered tag axle. Kenworth will provide clear frame 34 inches ahead and 24 inches behind the coded location. Intermediate and suspension crossmembers may be located within the clear frame area. * Roll-off/back body types are generally prohibited with tag axles. OAR review can be requested when customer need dictates the tag axle. | \$1,328 | 0# |
| 3840411 | Clear frame: For 1 customer-installed non-steerable, non-Kenworth offered tag axle. Kenworth will provide clear frame 29 inches ahead and 24 inches behind the coded location. Intermediate and suspension crossmembers may be located within the clear frame area. * Roll-off/back body types are generally prohibited with tag axles. OAR review can be requested when customer need dictates the tag axle. | \$1,328 | 0# |

Air System For Customer-Installed Lift Axles

| | | | |
|----------------|--|---------|-----|
| 3828801 | Kenworth-installed: Air system & controls for 1 customer-installed lift axle. Must Code 38283XX Location. * Air system and controls for a single after market installed lift axle. Must also code for a zero cost control location. * Controls and air system for customer-installed lift axle requires a lift axle location code * Customer installed pusher air systems include the cost for the controls. The request must be accompanied by location for the controls. * Kenworth-Offered Lift Axles require additional Customer-Installed Information code(s) and Lift Axle Location (Pusher and/or Tag) code(s). Non-Kenworth-Offered Lift Axles require additional Lift Axle Capacity code(s) and Lift Axle Location (Pusher and/or Tag) code(s). * Requests for factory installed controls for aftermarket lift axles require the special air system to assure that air volume and applicable valves are covered. | \$1,278 | 68# |

Lift Axle Control Locations

| | | | |
|----------------|--|--------|----|
| 3828300 | Pusher or Tag: gauge/ flip valve and pressure regulator dash-mounted. * The log book holder under the dash occupies the same space as the valve for pusher controls in dash [control is mounted under dash]. * When specifying the pusher control location be aware that some localities require that any lift axle controls be located outside of the cab. Locating pressure regulator inside the cab will raise frame strength requirements substantially. | \$0 | 0# |
| 3828310 | Pusher or Tag: gauge/flip valve dash-mounted; gauge mounted left of driver; pressure regulator under cab. * Air line fitting left of driver's seat not available with fire extinguisher or PTO/pusher controls LH side of drivers seat due to occupying the same space. * Allison transmissions are incompatible with items mounted on the floor LH side of the drivers seat. * Pusher control codes are available with single or multiple lift axles. One set of controls for each coded axle, unless accompanied by the code that combines to a single set of controls for all axles [3828410]. * Pusher controls located under the cab floor are not available with extinguisher LH of drivers seat. * Requests for factory installed controls for aftermarket lift axles require the special air system to assure that air volume and applicable valves are covered. * When specifying the pusher control location be aware that some localities require that any lift axle controls be located outside of the cab. Locating pressure regulator inside the cab will raise frame strength requirements substantially. | (\$22) | 0# |

| Option | Description | Price | Weight |
|------------------------------------|--|-------|--------|
| Lift Axle Control Locations | | | |
| 3828315 | Pusher or Tag: gauge dash-mounted; flip valve and pressure regulator mounted BOC(S) lower LH side. * Lift axle controls on the lower LH side of cab or sleeper back interfere with independent BOC/S DPF/SCR. Dual independent exhaust is not allowed. * Pusher axle controls located on the rear cab sill interfere with ladder style frame access steps when used with an extended daycab. * Pusher control codes are available with single or multiple lift axles. One set of controls for each coded axle, unless accompanied by the code that combines to a single set of controls for all axles [3828410]. * Pusher controls located under the back cab sill are not compatible with Russian compliance. * Requests for factory installed controls for aftermarket lift axles require the special air system to assure that air volume and applicable valves are covered. * The clear back of cab [CBOC] DEF tank cannot be used with low left hand back of cab components such as pusher controls. * When specifying the pusher control location be aware that some localities require that any lift axle controls be located outside of the cab. Locating pressure regulator inside the cab will raise frame strength requirements substantially. | \$0 | 0# |
| 3828320 | Pusher or Tag: gauge/flip valve dash-mounted; gauge and pressure regulator mounted BOC(S) lower LH side. * Lift axle controls on the lower LH side of cab or sleeper back interfere with independent BOC/S DPF/SCR. Dual independent exhaust is not allowed. * Pusher axle controls located on the rear cab sill interfere with ladder style frame access steps when used with an extended daycab. * Pusher control codes are available with single or multiple lift axles. One set of controls for each coded axle, unless accompanied by the code that combines to a single set of controls for all axles [3828410]. * Requests for factory installed controls for aftermarket lift axles require the special air system to assure that air volume and applicable valves are covered. * The clear back of cab [CBOC] DEF tank cannot be used with low left hand back of cab components such as pusher controls. * When specifying the pusher control location be aware that some localities require that any lift axle controls be located outside of the cab. Locating pressure regulator inside the cab will raise frame strength requirements substantially. | \$0 | 0# |
| 3828321 | Pusher or Tag: gauge/flip valve dash-mounted; pressure regulator bundled and strapped to the frame. * Requests for factory installed controls for aftermarket lift axles require the special air system to assure that air volume and applicable valves are covered. | \$0 | 0# |
| 3828410 | Single set of controls for multiple pusher axles; must code for pusher control location. * The option to have multiple lift axles use a single set of controls is applicable only when the all lift axles on the chassis are the same type. | \$0 | 0# |

T800: REAR SUSPENSION

| Option | Description | Price | Weight |
|------------------------|---|-----------|--------|
| Single | | | |
| 31K & Under | | | |
| 3630023 | Rear suspension: single Kenworth Airglide 230 23K 4-bag air suspension w/10.5 in. ride height. Includes shocks and torque rods. Includes air suspension dump valve. * Air suspensions used on dump trucks, trailer dumps, or with no tilt fifth wheels will require the feature which automatically dumps the air from the suspension when PTO is engaged. This allows the suspension to deflate while hoist is up and helps alleviate any imbalance that can occur with air bags inflated. * Air suspensions, with the exception of Hendrickson PRIMAAX 3752027, are not available for use in mixer service. * The AG230 rear suspension is limited in application. Services of logger, concrete ready-mix, mining hauler, mining service, heavy equipment transport, refuse packer, and oil field rig move are not permitted. Refer to DealerNet for detailed information. * The Kenworth AG230 is not available with dual leveling valves or over inflation valve. * This rear suspension is for use with Dana S21/S23/S26 series or Meritor RS23- 160/161 rear axles. * This rear suspension is not available with body types of concrete mixer, booster-axle mixer, logger, oil field rig-up, refuse loader/packer, stone slinger, super dump, transfer dump, coil tubing unit, cotton module, crane/boom, or self-loading logger are not permitted. Refer to DealerNet for detailed information. * This rear suspension is not available with trailer types of end dump or logger. Refer to DealerNet for detailed information. | (\$3,773) | -343# |
| 3632270 | Rear suspension: single Hendrickson HAS230 23K. W/aluminum crossmembers & gussets. Air suspension w/10 in. height. Maximum torque is 1350 lb-ft. Includes air suspension dump valve. * Air suspensions used on dump trucks, trailer dumps, or with no tilt fifth wheels will require the feature which automatically dumps the air from the suspension when PTO is engaged. This allows the suspension to deflate while hoist is up and helps alleviate any imbalance that can occur with air bags inflated. * Air suspensions, with the exception of Hendrickson PRIMAAX 3752027, are not available for use in mixer service. * Engineering review and/or vendor approval will be required for Hendrickson air suspensions used as fire trucks. * Hendrickson air suspensions are not available with body types that have a high center of gravity such as logger, mixer, roll-off, concrete pump, oil field rig-up, oil well service, drilling derrick, or crane/boom operation. * Hendrickson HAS single axle rear suspensions cannot exceed 1350 ft. lb. engine torque. * Hendrickson HAS suspensions are not available with rear axle ratios numerically greater [slower] than 4.60. * Hendrickson HAS suspensions are not available with refuse packer applications. * Rear air disc brakes are not compatible with HAS or Reyco rear suspensions. * Rear air disc brakes are not compatible with Hendrickson HAS or Reyco 102 rear suspensions * Without an EDGE kit the Hendrickson HAS230 can be used with engine torque up to 1050 ft lbs. The EDGE kit option 3832020 is required when engine torque exceeds this limit. Reference TE1461. | (\$5,408) | -313# |

T800: REAR SUSPENSION

| Option | Description | Price | Weight |
|------------------------|---|-----------|--------|
| Single | | | |
| 31K & Under | | | |
| 3634030 | Rear suspension: single Neway ADZ123 23K. Air suspension w/ 10 in. ride height & single leveling valve. Includes air suspension dump valve. * Air suspensions used on dump trucks, trailer dumps, or with no tilt fifth wheels will require the feature which automatically dumps the air from the suspension when PTO is engaged. This allows the suspension to deflate while hoist is up and helps alleviate any imbalance that can occur with air bags inflated. * Air suspensions, with the exception of Hendrickson PRIMAAX 3752027, are not available for use in mixer service. * Dual leveling valves required on Single or Tandem ADZ suspensions with the following intended services: Logger w/ full truck, snowplow, mining hauler, mining serv w/ full truck, refuse hauler, oil field rig move, fire truck, construction. OR with the following body types: Roll-on/roll-off, end dump, tank. * Meritor stamped spiders are not available on Neway ADZ suspension, which requires cast spiders. * Neway ADZ suspension combined with Accuride 9" steel wheels are not compatible with any 315/80R22.5 tire. * Neway ADZ suspensions are not compatible with 12R24, 14R20, 14R24, or 14R25 tires. * Single Neway ADZ available with Dana rear axle S21/23/26-172/190 or Meritor rear axle RS23-161 and RS26-185. * Steel wheels with Michelin XDN2 GRIP 315/80R22.5 tires or Goodyear G289 315/80R22.5 tires are not available with Neway ADZ suspension. * This suspension is standard with cast brake spiders. | (\$3,279) | -225# |
| 3636480 | Rear suspension: single Reyco 79KB taperleaf 23K. Steel crossmembers & gussets, Kenworth longlife spring w/helper. Unladen Height: 11.0 in. Laden Height: 9.3 in. Not available with shocks or swaybars. * Rear air disc brakes are not compatible with HAS or Reyco rear suspensions. * Rear air disc brakes are not compatible with Reyco 79KB rear suspensions. * Reyco 79KB rear suspensions are not for use with a lift axle. * Reyco 79KB single axle rear suspension. Not for use with a fire apparatus body. | (\$5,651) | -162# |
| 3654030 | Rear suspension: single Neway ADZ126 26K. air suspension w/ 10 in. ride height. Includes air suspension dump valve, single leveling valve & cast brake spiders. * Air suspensions used on dump trucks, trailer dumps, or with no tilt fifth wheels will require the feature which automatically dumps the air from the suspension when PTO is engaged. This allows the suspension to deflate while hoist is up and helps alleviate any imbalance that can occur with air bags inflated. * Air suspensions, with the exception of Hendrickson PRIMAAX 3752027, are not available for use in mixer service. * Dual leveling valves required on Single or Tandem ADZ suspensions with the following intended services: Logger w/ full truck, snowplow, mining hauler, mining serv w/ full truck, refuse hauler, oil field rig move, fire truck, construction. OR with the following body types: Roll-on/roll-off, end dump, tank. * Neway ADZ suspension combined with Accuride 9" steel wheels are not compatible with any 315/80R22.5 tire. * Neway ADZ suspensions are not compatible with 12R24, 14R20, 14R24, or 14R25 tires. * Single Neway ADZ available with Dana rear axle S21/23/26-172/190 or Meritor rear axle RS23-161 and RS26-185. * Steel wheels with Michelin XDN2 GRIP 315/80R22.5 tires or Goodyear G289 315/80R22.5 tires are not available with Neway ADZ suspension. * This suspension is standard with cast brake spiders. | (\$2,190) | -188# |

T800: REAR SUSPENSION

| Option | Description | Price | Weight |
|------------------------|--|-----------|--------|
| Single | | | |
| 31K & Under | | | |
| 3666434 | Rear suspension: single Reyco 79KB multileaf 31K with 16 leaf springs. Not rear air disc brake compatible. * Rear air disc brakes are not compatible with HAS or Reyco rear suspensions. * Rear air disc brakes are not compatible with Reyco 79KB rear suspensions. * Requires an S23-172H, S26-190 or S30-190 rear axle. * Reyco 79KB rear suspensions are not for use with a lift axle. | (\$4,078) | -10# |
| Tandem | | | |
| 40K & Under | | | |
| Kenworth | | | |
| 3730026 | Rear suspension: Tandem Kenworth Airglide 400L 40K. 54 in. axle spacing. Air suspension w/ 8.5 in. ride height. Includes single leveling valve. Includes air suspension dump valve. * Air suspensions used on dump trucks, trailer dumps, or with no tilt fifth wheels will require the feature which automatically dumps the air from the suspension when PTO is engaged. This allows the suspension to deflate while hoist is up and helps alleviate any imbalance that can occur with air bags inflated. * Engineering will review orders specifying the Kenworth AG400L rear suspension and a lift axle to evaluate creep rating. For questions contact Application Engineering prior to submitting the DTPO. * For use with engine torque up to and including 1850 ft lbs. No class C road use in excess of 2%. No class D road use. * Kenworth AG400L rear suspension can be ordered with a single light weight steerable pusher axle. Application Engineering review required. * Kenworth AG400L rear suspension is available with rail material of 10-5/8 or 10-3/4 inches only. * Kenworth AG400L rear suspension is compatible with axles: DSP40/41, DSH40/44, RT40-145, RT41-145, MT40-14x3, MT40-14x4, MP40-14x3, MP40-14x4, MT44-14x5, MP44-14x5, Pro40 or dead axle tandem. * Kenworth AG400L rear suspension is for use with body types of beverage, dry bulk, fire truck, flat bed, flat bed utility crane, roll back flatbed, service body, tank, van, reefer van and wrecker. Refer to application guidelines on DealerNet for complete definition of body types. * Kenworth AG400L rear suspension is for use with trailer types of dry van, reefer van, doubles, triples, bottom dump, flatbed, auto carrier, and tank. Refer to application guidelines on DealerNet for complete definition of trailer types. * Kenworth air suspensions are not available for use in mixer service. * Kenworth Airglide rear suspensions and Meritor stamped spider rear brakes cannot be converted to super singles tires and wheels in the aftermarket. * Kenworth Airglide rear suspensions can be used with a maximum of one full frame insert. * Kenworth Airglide rear suspensions used in tractor service cannot be specified with a pintle hook, other than the 15K rated PH-30RP41 used for yarding dollies. * Optional dual air suspension leveling valves are not available on Kenworth AG380, Kenworth AG400L, or Hendrickson HAS. This is not an option for Neway ADZ tridem, Kenworth AG690 or Primaax tridem suspensions which are standard with dual valves. * Tractor units that specify a Kenworth Airglide tandem axle rear suspension must have an end of frame cutoff dimension no longer than 70 inches. * When specifying a lift axle the maximum GVWR cannot exceed the sum of the capacity of the steer and drive axles. | (\$2,191) | 28# |

| Kenworth | | | |
| 3730028 | Rear suspension: Tandem Kenworth Airglide 400L 40K. 52 in. axle spacing. Air suspension w/ 8.5 in. ride height. Includes single leveling valve. Includes air suspension dump valve. | (\$2,191) | 28# |
| <ul style="list-style-type: none">* Air suspensions used on dump trucks, trailer dumps, or with no tilt fifth wheels will require the feature which automatically dumps the air from the suspension when PTO is engaged. This allows the suspension to deflate while hoist is up and helps alleviate any imbalance that can occur with air bags inflated.* Engineering will review orders specifying the Kenworth AG400L rear suspension and a lift axle to evaluate creep rating. For questions contact Application Engineering prior to submitting the DTPO.* For use with engine torque up to and including 1850 ft lbs. No class C road use in excess of 2%. No class D road use.* Kenworth AG400L rear suspension can be ordered with a single light weight steerable pusher axle. Application Engineering review required.* Kenworth AG400L rear suspension is available with rail material of 10-5/8 or 10-3/4 inches only.* Kenworth AG400L rear suspension is compatible with axles: DSP40/41, DSH40/44, RT40-145, RT41-145, MT40-14x3, MT40-14x4, MP40-14x3, MP40-14x4, MT44-14x5, MP44-14x5, Pro40 or dead axle tandem.* Kenworth AG400L rear suspension is for use with body types of beverage, dry bulk, fire truck, flat bed, flat bed utility crane, roll back flatbed, service body, tank, van, reefer van and wrecker. Refer to application guidelines on DealerNet for complete definition of body types.* Kenworth AG400L rear suspension is for use with trailer types of dry van, reefer van, doubles, triples, bottom dump, flatbed, auto carrier, and tank. Refer to application guidelines on DealerNet for complete definition of trailer types.* Kenworth air suspensions are not available for use in mixer service.* Kenworth Airglide rear suspensions and Meritor stamped spider rear brakes cannot be converted to super singles tires and wheels in the aftermarket.* Kenworth Airglide rear suspensions can be used with a maximum of one full frame insert.* Kenworth Airglide rear suspensions used in tractor service cannot be specified with a pintle hook, other than the 15K rated PH-30RP41 used for yarding dollies.* Optional dual air suspension leveling valves are not available on Kenworth AG380, Kenworth AG400L, or Hendrickson HAS. This is not an option for Neway ADZ tridem, Kenworth AG690 or Primaax tridem suspensions which are standard with dual valves.* Tractor units that specify a Kenworth Airglide tandem axle rear suspension must have an end of frame cutoff dimension no longer than 70 inches.* When specifying a lift axle the maximum GVWR cannot exceed the sum of the capacity of the steer and drive axles. | | | |

This is important in situations where the body is likely to be pre-built before the chassis is delivered. Tire to body or bracket to body interference may be encountered. Communicate clear space requirements on the sales order. * Rear suspension for tandem rear axles with capacity of 58K or greater. | \$10,982 | 1,825# |
| 3762506 | Rear suspension: Tandem Hendrickson RS650 65K. 60 in. axle spacing w/15 in. saddle height. Unladen Height: 11.3 in. Laden Height: 10.4 in. Includes rubber trunnion & end bushings. * Advertised axle spacing for this rear suspension is a nominal value. Actual spacing may be up to two inches greater than noted. This is important in situations where the body is likely to be pre-built before the chassis is delivered. Tire to body or bracket to body interference may be encountered. Communicate clear space requirements on the sales order. * Hendrickson requires either track rods or bronze center bushings with all RS rear suspension installations. * Rear suspension for tandem rear axles with capacity of 58K or greater. * The Hendrickson HD high articulation kit 3832164 is required on the RS650 rear suspension when Severe Service is coded. | \$22,963 | 2,519# |

T800: REAR SUSPENSION

| Option | Description | Price | Weight |
|------------------------|---|---------|--------|
| Tridem | | | |
| 69K & Under | | | |
| 3740170 | Rear suspension: Tridem Kenworth Airglide 690 69K 54 in. axle spacing. Air suspension w/10.5 in. ride height. Includes air suspension dump valve. * A full spec review will be required if the road conditions include more than 9% class C or 2% class D usage. * Air suspensions used on dump trucks, trailer dumps, or with no tilt fifth wheels will require the feature which automatically dumps the air from the suspension when PTO is engaged. This allows the suspension to deflate while hoist is up and helps alleviate any imbalance that can occur with air bags inflated. * Double frame inserts on 11-5/8 inch rails are prohibited. * Heavy duty air springs are required with selection of AG690 rear suspension and one of the following: Canadian registry, class D highway usage, or wrecker, construction, logger, or refuse intended services. * Kenworth air suspensions are not available for use in mixer service. * Kenworth Airglide rear suspensions and Meritor stamped spider rear brakes cannot be converted to super singles tires and wheels in the aftermarket. * Kenworth Airglide rear suspensions are limited in application. Refer to Truck Sales/Product Information/Application Guidelines posted on DealerNet for definition. * Kenworth Airglide rear suspensions used in tractor service cannot be specified with a pintle hook, other than the 15K rated PH-30RP41 used for yarding dollies. * Optional dual air suspension leveling valves are not available on Kenworth AG380, Kenworth AG400L, or Hendrickson HAS. This is not an option for Neway ADZ tridem, Kenworth AG690 or Primaax tridem suspensions which are standard with dual valves. * The Airglide 690 suspension is not available with Dana T78-190P or Meritor RZ-XX-188P rear axles. * The tridem Airglide rear suspension can be used with up to one lift axle. * Tractor units that specify a Kenworth Airglide tridem axle rear suspension must have an end of frame cutoff dimension no longer than 120 inches. | \$6,049 | 719# |
| 3760030 | Rear suspension: Tridem Neway ADZ369 69K. 54 in. axle spacing. Air suspension w/10 in. ride height w/ dual leveling valves. Includes air suspension dump valve & cast brake spiders. * Advertised axle spacing for this rear suspension is a nominal value. Actual spacing may be up to two inches greater than noted. This is important in situations where the body is likely to be pre-built before the chassis is delivered. Tire to body or bracket to body interference may be encountered. Communicate clear space requirements on the sales order. * ADZ suspensions with 10 inch ride height are not available with Dana DT463 or DT521 axles or Meritor RT52-185, RT52-380 or RZ-XX-188 series axles. Use 12 inch ride height instead. * Air suspensions used on dump trucks, trailer dumps, or with no tilt fifth wheels will require the feature which automatically dumps the air from the suspension when PTO is engaged. This allows the suspension to deflate while hoist is up and helps alleviate any imbalance that can occur with air bags inflated. * Air suspensions, with the exception of Hendrickson PRIMAAX 3752027, are not available for use in mixer service. * Meritor stamped spiders are not available on Neway ADZ suspension, which requires cast spiders. * Neway ADZ suspension combined with Accuride 9" steel wheels are not compatible with any 315/80R22.5 tire. * Neway ADZ suspensions are not compatible with 12R24, 14R20, 14R24, or 14R25 tires. * Steel wheels with Michelin XDN2 GRIP 315/80R22.5 tires or Goodyear G289 315/80R22.5 tires are not available with Neway ADZ suspension. * This component requires a long lead-time. Refer to the long lead-time report for potential delivery date availability. | \$9,709 | 949# |

| 3760091 | Rear suspension: Tridem Neway AD390 90K. 60 in. axle spacing. Thru-pin design. Air suspension w/12 in. ride height. * Advertised axle spacing for this rear suspension is a nominal value. Actual spacing may be up to two inches greater than noted. This is important in situations where the body is likely to be pre-built before the chassis is delivered. Tire to body or bracket to body interference may be encountered. Communicate clear space requirements on the sales order. * Air suspensions used on dump trucks, trailer dumps, or with no tilt fifth wheels will require the feature which automatically dumps the air from the suspension when PTO is engaged. This allows the suspension to deflate while hoist is up and helps alleviate any imbalance that can occur with air bags inflated. * Air suspensions, with the exception of Hendrickson PRIMAAX 3752027, are not available for use in mixer service. * Neway AD390 rear suspension requires high output spring brakes when used with drum brakes on axles other than Sisu. Sisu rear axles utilize a spring brake that is acceptable for use with this suspension. This doesn't apply to K500. * This component requires a long lead-time. Refer to the long lead-time report for potential delivery date availability. | \$51,130 | 1,813# |

Suspension Equipment

| | | | |
|---------|--|-------|----|
| 3830502 | Delete dash mounted control for air suspension dump valve. Only available with an air suspension. * Delete dash control for air suspension dump valve is not available with suspension over inflation valve code 3839002, suspension air retention code 3834100 or traction enhancement code 3830500. | \$0 | 0# |
| 3830505 | Dual leveling valves for single air suspension. Dual leveling valves on single rear suspensions on only available on Neway ADZ for class 8 or Hendrickson HAS for medium duty. Dual leveling valves will not be approved on any other suspensions on T3. * Only applicable with single axle ADZ suspensions. * Requires dual suspension pressure gauges (8221100). | \$163 | 0# |

T800: REAR SUSPENSION

| Option | Description | Price | Weight |
|-----------------------------|---|---------|--------|
| Suspension Equipment | | | |
| 3830510 | Dual leveling valves for tandem air suspension. * Optional dual air suspension leveling valves are not available on Kenworth AG380, Kenworth AG400L, or Hendrickson HAS. This is not an option for Neway ADZ tridem, Kenworth AG690 or Primaax tridem suspensions which are standard with dual valves. * Optional equipment for air suspensions only. * The Kenworth AG230 is not available with dual leveling valves or over inflation valve. | \$208 | 2# |
| 3832001 | Torque rods for 46K PRIMAAX EX using disc brakes. Replacing standard. | \$498 | 23# |
| 3832002 | Torque rods for 69K PRIMAAX EX using disc brakes. Replacing standard. | \$730 | 33# |
| 3832004 | Heavy-duty track rods for Neway AD tandem or Hendrickson beam suspensions rated up to 46K. * Heavy-duty track rods are standard when a rear suspension sub-frame is specified. The option code is not required. * Track rods for tandem Neway AD tandem rear suspensions or Hendrickson beam suspensions. * Transverse track rods are required when optional heavy-duty track rods are requested. RT/RTE rear suspensions with axle spacing of 60 and 72 inches are standard with track rods. All Haulmaax (HMX) suspensions are standard with track rods. | \$178 | 0# |
| 3832008 | Heavy-duty torque rods for Hendrickson beam. 46K and under suspensions. * Heavy-duty torque rods for Hendrickson beam suspensions. Code is not available on Hendrickson beam suspensions with capacity over 46k, where the feature is standard. | \$379 | 15# |
| 3832018 | Delete shock absorbers. Hendrickson HAULMAAX (HMX) suspension. * Option to delete standard shock absorbers on Hendrickson HMX rear suspensions for mixer chassis only. | (\$264) | -30# |
| 3832020 | Edge kit for HAS single or tandem rear suspension * EDGE [Efficient Driveline Geometry] kit offered by Hendrickson to correct frame rise issues encountered with high torque engines and torque reactive rear suspensions. * The EDGE kit option 3832020 is required by Hendrickson to help combat frame rise during torque application on HAS402 rear suspensions. * Without an EDGE kit the Hendrickson HAS230 can be used with engine torque up to 1050 ft lbs. The EDGE kit option 3832020 is required when engine torque exceeds this limit. Reference TE1461. | \$139 | 10# |
| 3832021 | Delete shock absorber for Hendrickson ULTIMAAX suspension. | (\$445) | -31# |
| 3832026 | Chalmers shock absorbers. 52K and under suspension. * Rear axle shock absorbers for use with a Chalmers rear suspension. There is no option to relocate these shocks. * Rear shock absorbers are recommended for use on tractors that specify a Chalmers rear suspension. | \$542 | 35# |
| 3832072 | Transverse track rods for Hendrickson RT/RTE suspensions w/52 or 54 in. axle spacing. * An end of frame crossmember is required for use with transverse track rods on Hendrickson beam suspensions. * On 46-52K suspensions this option replaces the standard bronze center bushings with rubber bushings. * The Hendrickson RT463 or RT523 rear suspension requires the addition of transverse track rods when used as a mining hauler. RT/RTE rear suspensions with axle spacing of 60 and 72 inches are standard with track rods. * Track rods for use only on Hendrickson beam rear suspensions rated at 52k or less. | \$592 | 108# |

T800: REAR SUSPENSION

| Option | Description | Price | Weight |
|---------------------------------|---|---------|--------|
| Suspension Equipment | | | |
| 3832098 | Track rods: heavy duty for Hendrickson Primaax EX tandem. Replaces standard duty track rods. * Ultrarod Plus track rods are required for use in services other than linehaul, regional haul, pick-up and delivery, wrecker, EMT/rescue or when the vehicle will operate outside the U.S. * Ultrarod Plus track rods for use on tandem 46K Primaax EX rear suspensions only. 52K Primaax EX comes standard with Ultrarod Plus. | \$67 | 37# |
| 3832099 | Track rods: heavy duty for Hendrickson Primaax EX tridem. Replaces standard duty track rods. * Ultrarod Plus track rods are required for use in services other than linehaul, regional haul, pick-up and delivery, wrecker, or EMT/rescue when the vehicle will operate outside the U.S. | \$74 | 36# |
| 3832161 | Double Rebound Strap Kit: Hendrickson HAULMAAX rear suspension. | \$257 | 6# |
| 3832164 | Hendrickson heavy-duty high articulation kit for RS650 suspension. * The Hendrickson HD high articulation kit is only for use on the RS650 rear suspension. | \$243 | 2# |
| 3834100 | Air retention kit for rear suspension for use w/ outriggers. * Delete dash control for air suspension dump valve is not available with suspension over inflation valve code 3839002, suspension air retention code 3834100 or traction enhancement code 3830500. * For use with air suspensions only. * The air retention option is not for use with the over-inflation option (S/C 3839002). | \$279 | 4# |
| 3836500 | Heavy-duty gussets for forward suspension crossmember on Airglide 400/460, Chalmers, or Hendrickson beam suspensions. This replaces the standard gussets. * Mexico registry requires three hole gussets in the forward suspension crossmember when a Kenworth AG400/AG460, Hendrickson or Chalmers rear suspension is specified. * Three hole gussets for forward suspension crossmember for use with Hendrickson, Chalmers or KW Airglide rear suspensions other than AG380 or AG400L. | \$78 | 12# |
| 3839002 | Air suspension over-inflation valve w/warning light to temporarily raise the frame. * Delete dash control for air suspension dump valve is not available with suspension over inflation valve code 3839002, suspension air retention code 3834100 or traction enhancement code 3830500. * The air suspension over inflation valve is available for Neway, Hendrickson Primaax, or with Kenworth Airglide rear suspensions other than the AG380 or AG400L. * The Kenworth AG230 is not available with dual leveling valves or over inflation valve. | \$340 | 0# |
| 3839140 | Chalmers 40K severe service upgrade. Use with Chalmers 8xx-40 series suspensions. Separate suspension code required. | \$400 | 16# |
| 3839146 | Chalmers 46K severe service upgrade. Use with Chalmers 8xx-46 series suspensions. Separate suspension code required. | \$746 | 30# |
| 3839152 | Chalmers 52K severe service upgrade. Use with Chalmers 8xx-52 series suspensions. Separate suspension code required. | \$2,808 | 87# |
| Suspension Miscellaneous | | | |
| 3830152 | Air Springs: Heavy-duty for Airglide 460. Replaces standard duty air springs. * Heavy duty air springs (3830152) are required with selection of AG460 rear suspension and one of the following: Canadian registry, class D highway usage, wrecker, construction, logger, or refuse intended services. | \$51 | 28# |
| 3830153 | Air Springs: Heavy-duty for Airglide 690. Replaces standard duty air springs. | \$76 | 42# |
| 3839046 | Heavy duty barpin brackets for tandem Hendrickson beam rear suspensions. * Canadian logging trucks require heavy-duty barpin brackets when a D40-172 or D46-172 rear axle is specified with a Hendrickson beam rear suspension. | \$619 | 0# |

|---------|---|-------|----|
| 5045190 | Front Wheel: Alcoa 83462 22.5x13 aluminum hub-pilot mount 11000lb. maximum rating. Aluminum with Lvl One [TM] finish, hub Level 1 finish. | \$888 | 8# |
|---------|---|-------|----|

* 12K, 13.2K or 14.6K front axles used with wide based tires on chassis with wheelbase in excess of 244 inches are unavailable due to turn angle limitation resulting from steering geometry.

* Special delivery requirements may be required due to potential for front axle/wheel over all width. See shipping policy TA005.

* The Alcoa 83462 front wheel interferes with the steer arm in the D2000 axle installation. D2200 is not an issue.

| Tubeless Type Steel 22.5 | | | |
| 5242375 | Rear Wheel: Accuride 51408 22.5x8.25 steel Steel Armor[™] powder coat, hub-pilot mount. 7400lb. maximum rating. 2-hand holes. Air disc brake compatible. Code is priced per pair of wheels. | (\$14) | -12# |
| 5245285 | Rear Wheel: Kenworth 7-spoke Alcoa alum 88U68/ Accuride 51487 22.5x8.25. Aluminum with Lvl One[™] finish outside/steel Steel Armor[™] powder coat inside, hub-pilot mount. 7400 lb. maximum rating. 5-hand hole. Includes wheel guards. Air disc brake compatible. Code is priced per pair of wheels. | \$227 | -40# |
| Front | | | |
| 5042085 | Front Rim: Accuride 31674PG 22.5x12.25 steel gray e-coat spokes. 9270lb. maximum rating. * This option is for use in export operating areas only. | \$496 | 64# |
| 5042092 | Front Rim: Accuride 30391225PW 22.5x8.25 steel painted white spokes. 7300lb. maximum rating. * This option is for use in export operating areas only. | (\$18) | 0# |
| 5042183 | Front Rim: Accuride 32052225PG 22.5x9 steel painted gray. 10000lb. maximum rating. * Rubber fender extenders for the front axle are recommended for use with 385/65R22.5 tires or 9 inch wide wheels. * This option is for use in export operating areas only. | \$342 | 38# |
| 5042258 | Front Wheel: Accuride 50291 22.5X8.25 steel heavy-duty 22.5x8.25; Steel Armor[™] powder coat, hub-pilot mount. 8000lb. maximum rating. 2-hand holes. Air disc brake compatible. | \$101 | 22# |
| 5042275 | Front Wheel: Accuride 51408 22.5x8.25 steel Steel Armor[™] powder coat, hub-pilot mount. 7400lb. maximum rating. 2-hand holes. Air disc brake compatible. | (\$28) | 0# |
| 5042285 | Front Wheel: Accuride 50344 22.5x8.25 steel Steel Armor[™] powder coat, hub-pilot mount.heavy-duty 5 hand-hole hub pilot mount. | \$99 | 20# |
| 5042289 | Front Wheel: Accuride 51487 22.5x8.25 steel Steel Armor[™] powder coat, hub-pilot mount. 7400lb. maximum rating. 5-hand hole. Air disc brake compatible. | STD | 0# |
| 5042310 | Front Wheel: Accuride 28827 24.5x8.25 steel Steel Armor[™] powder coat, hub-pilot mount. 8000lb. maximum rating. 2-hand hole. | \$102 | 36# |
| 5042311 | Front Wheel: Accuride 29039 22.5X9 steel Steel Armor[™] powder coat, hub-pilot mount. 10000lb. maximum rating. 5-hand holes. | \$396 | 70# |
| 5042312 | Front Wheel: Accuride 29806 22.5x12.25 steel Steel Armor[™] powder coat, hub-pilot mount. 11500lb. maximum rating. 5-hand holes. | \$988 | 102# |
| 5042314 | Front Wheel: Accuride 29807 22.5x12.25 steel white, Steel Armor[™] powder coat, hub-pilot mount. 11500lb. maximum rating. 5-hand holes. | \$986 | 102# |
| 5049202 | Front Wheel: Marjean 13225-10 mm. 22.5x13 steel painted gray, 335 mm. hub-pilot mount. 10500lb. maximum rating on front axle. Not air disc brake compatible. * 12K, 13.2K or 14.6K front axles used with wide based tires on chassis with wheelbase in excess of 244 inches are unavailable due to turn angle limitation resulting from steering geometry. * Special delivery requirements may be required due to potential for front axle/wheel over all width. See shipping policy TA005. * The Marjean 13225-10MM wheel has an offset that will result in decreases front axle capacity. The rating will be reduced to a maximum of 12,600 lbs with aluminum hubs or 19,000 lbs with iron hubs. | \$2,978 | 132# |
| 5142074 | Front Rim: Accuride 31674PW 22.5X12.25 twin steer 4-4; steel white e-coat spokes. 9270lb. maximum rating. | \$1,049 | 128# |
| 5142285 | Front Wheel: Accuride 50344 22.5x8.25 steel twin steer 4-4 Steel Armor[™] powder coat; heavy-duty 5 hand-hole hub-pilot mount, steel white e-coat, 8000lb. maximum rating. | \$256 | 40# |

Dura-Bright outboard surface of outer dual or single aluminum wheels. * Dura bright on the inboard surface of tandem rear wheels requires Dura Bright on the outside of the wheels as well. * DuraBright wheel finish is not available for use on 41362 wheels. | \$808 | 0# |
| 5859013 | Single Rear: Dura-Bright Inboard Surface Of Inner Wheels (2)-2DB, Required Wheel Grades, Use With 5859011 | \$754 | 0# |
| 5859014 | Single Front Axle Wheels: Dura-Bright Buffed both outboard & inboard surfaces of aluminum wheels. | \$455 | 0# |
| 5859015 | Dual Rear Axle Wheels: Dura-Bright Buffed both outboard & inboard surfaces of outboard dual or single aluminum wheels. | \$961 | 0# |
| 5859016 | Dual Rear Axle Wheels: Dura-Bright Buffed inboard surface of inner dual aluminum wheels. * Dura bright on the inboard surface of tandem rear wheels requires Dura Bright on the outside of the wheels as well. | \$800 | 0# |
| 5859017 | Dual Rear Axle Wheels: Dura-Bright Buffed both inboard and outboard surface of inner dual aluminum wheels. | \$910 | 0# |
| 5859024 | Tridem Rear Axle Wheels: Dura-Bright Buffed both outboard & inboard surfaces of outboard dual or single aluminum wheels. | \$1,366 | 0# |
| 5859025 | 2 Pusher or Tag wheels: Dura-Bright Buffed outboard surface of outboard wheels mounted same as rear axle. For use on 2 non-steerable lift axles. | \$708 | 0# |
| 5859027 | Dual Rear Axle: Dura-Bright Buffed wide base singles, outboard surface (quantity 4) -1DB. | \$660 | 0# |
| 5859028 | Single Rear Axle: Dura-Bright Buffed wide base singles, outboard surface (quantity 2) -1DB. | \$303 | 0# |
| 5859031 | 1 Pusher: 2 Wheels Dura-Bright Buffed. Dura-Bright outboard surface of outboard wheels mounted same as front axle. For use on 1 steerable or 1 non-steerable pusher axles w/ single wheel. * Wheel treatment for one pusher mounted same as front: Use with single tires on steerable axle (without 5800001) or on non-steerable axle with 5800000. | \$303 | 0# |
| 5859032 | 2 Pushers: 2 Wheels Dura-Bright Buffed. Dura-Bright outboard surface of outboard wheels mounted same as front axle. For use on 2 steerable or 2 non-steerable pusher axle w/ single wheel. * Wheel treatment for two pushers mounted same as front: standard width on steerable axles. | \$758 | 0# |
| 5859033 | 3 Pushers: 3 Wheels Dura-Bright Buffed. Dura-Bright outboard surface of outboard wheels mounted same as front axle. For use on 3 steerable or 3 non-steerable pusher axle w/ single wheel. * Wheel treatment for three pushers mounted same as front: 2-4 standard width on non-steerable axle or standard width on steerable axles. | \$910 | 0# |

Rails & Inserts

Rail Material

10.625 x 3.5 x 0.3125 Steel Frame

| | | | |
|----------------|--|-------|----|
| 6054200 | Frame Rails: 10-5/8 x 3-1/2 x 5/16 in. Steel to 284 in. Truck frame weight is 2.91 lb.-in. per pair of rails. Section modulus is 14.80, RBM is 1,776,000 in-lbs per rail. Frame rail availability may be restricted based upon application, axle/suspension capacity, fifth wheel setting, or component/dimensional specifications. The results of the engineering review may result in a change to the requested frame rail. If a change is required Kenworth Application Engineering will advise the dealer of the appropriate material specification for a substitute rail. * 10-5/8 inch rails are appropriate for axles rated at 52K or less. Both frame strength considerations and physical fit of the suspension with a 10-5/8 inch rail can be a problematic. * A T800 (72 or 86 inch sleeper) or T680/T880 (76 inch sleeper) with 10-5/8 single frame rail and wheelbase 242 or greater has adequate frame strength but may result in frame beaming and associated ride quality concerns. Alleviate this potential by increasing frame size or adding frame inserts. * Rear fifth wheel settings exceeding 36 inches ahead of bogie require an inserted frame, or larger frame material. * Tridem rear axles require a minimum rail of 10-3/4 with full insert, 10-11/16, or 11-5/8 inch material. * W900 models with 10-5/8 single frame rail and 72 or 86 inch sleeper and wheelbase 256 or greater has adequate frame strength but may result in frame beaming and associated ride quality concerns. Alleviate this potential by increasing frame size or adding frame inserts. * When specifying a lift axle this rail material in not sufficient without an insert. The minimum single rail size is 10-3/4 inch. * With front axle capacities over 14.6k this rail material in not sufficient without an insert. The minimum single rail size is 10-3/4 inch. | STD | 0# |
| 6054400 | Frame Rails: 10-5/8 x 3-1/2 x 5/16 in. Steel to 285 in. to 336 in. Truck frame weight is 2.91 lb.-in. per pair of rails. Section modulus is 14.80, RBM is 1,776,000 in-lbs per rail. Frame rail availability may be restricted based upon application, axle/suspension capacity, fifth wheel setting, or component/dimensional specifications. The results of the engineering review may result in a change to the requested frame rail. If a change is required Kenworth Application Engineering will advise the dealer of the appropriate material specification for a substitute rail. * 10-5/8 inch rails are appropriate for axles rated at 52K or less. Requires bumper setting code. * Not for use on W900B with 22,000 lb. taperleaf front spring due to interference issues between the spring and bumper. * Requires a code for a bumper setting in addition to the bumper style sales code. * The straight painted steel channel bumpers are not for use on the W900S. * This bumper can be used on a W900B with a cast center tow hook with iron front drive brackets or with front spring capacity exceeding 14.6K. | \$202 | 50# |
| 6302460 | Bumper: Tapered painted steel channel. Requires a bumper setting code. * Requires a code for a bumper setting in addition to the bumper style sales code. * The W900L model with 82362/82365 front wheels and 445/65R22.5 tires may encounter tire rub when used with a steel channel bumper. The combination is not acceptable. * This bumper is not for use on the T800W or T800 with extended frame rails. | (\$89) | 44# |
| 6302461 | Bumper: Tapered chrome steel channel. Requires a bumper setting code. * Requires a code for a bumper setting in addition to the bumper style sales code. * The W900L model with 82362/82365 front wheels and 445/65R22.5 tires may encounter tire rub when used with a steel channel bumper. The combination is not acceptable. * This bumper is not for use on C500 twin steer, T800 with extended frame rails, T800W, the W900S, or on W900B/L with cast center mounted tow hook. | \$535 | 63# |
| Steel Box | | | |
| 6303331 | Bumper: Heavy-duty straight steel box. Painted. Requires a bumper setting code. * This bumper is applicable to the T800 without a front engine PTO provision or extended rails. Can be used on any C500 or K500. * This bumper is not ECE compliant for over the road use in Russia. | \$645 | 235# |
| 6303360 | Bumper: Straight steel box. Painted. Requires a bumper setting code. * A 29.5-inch bumper setting is not available with front tow hook 6324025 when used with the following bumpers: 6303360 or 6303428. * A 33-inch bumper setting is not available with front tow hooks 6321005 or 6324025 when used with the following bumpers: 6303360 or 6303428. * Requires a code for a bumper setting in addition to the bumper style sales code. * This bumper is not for use on the T800W, T800 with extended frame rails, or W900S. Requires a cast center tow hook request on C500. * This bumper is not for use on the W900S. Incompatible with the 28 inch bumper setting. | \$461 | 211# |

| Bumpers | | | |
| Bumper Setting | | | |
| 6319485 | 48.5 in. Bumper setting. Requires a bumper code. * The 48.5 inch bumper setting is for use on the T800 standard hood with a 2007+ engine and a channel bumper. Also for T880. | \$0 | 0# |
| 6319515 | 51.5 in. Bumper setting. Requires a bumper code. * The 51.5 inch bumper setting is for use on the T800 standard hood with a 2007+ engine and a box bumper or cast center mounted tow hook. Also for T880. | \$0 | 0# |
| 6319565 | 56.5 in. Bumper setting. Requires a bumper code. | \$0 | 0# |
| Bumper Equipment | | | |
| 6321005 | Removable Front Tow Hooks: 2. * If this chassis is being delivered to a body builder you may want to consider ordering tow pins to help facilitate undecking per TA005 Section 7. * Requires a 48.5 inch bumper setting when used on the T800 model. * This tow hook is NFPA compliant when specified on the T440, T470, or T800 models. | \$273 | 15# |
| 6323004 | Rams Horn front tow hooks: 2. * Rams horn front tow hooks are required on T800 with request for front engine PTO. * Rams horn style tow hooks are for T800 only with extended rails [FEPTO only]. C500 available across the board. | \$254 | 18# |
| 6324025 | Front tow hook: Center mounted, cast. Requires iron front drive brackets. * Extra duty radiator support crossmember is standard with cast front tow hook option, without the sales code. The hook is not available on the W900S. * For T440 only available with 50 inch bumper setting. * For T470 only available with 50.5" bumper setting. * For the W900 models with export engines requesting a cast center mount tow hook with 12K front springs requires the use of steel front drive brackets. The upgraded drive bracket is standard with higher capacity springs or with Severe Service, no code required. * If this chassis is being delivered to a body builder you may want to consider ordering tow pins to help facilitate undecking per TA005 Section 7. * Iron front drive brackets are required when a cast center tow hook is specified. Iron drive brackets are included when front spring capacity is 16K or greater, with requests for Severe Service, or when the upgraded drive bracket code is specified. * Not for use with a front engine PTO configuration. * The center mounted front tow hook requires selection of steel front drive brackets (6390305) with C500 or iron front drive brackets (6390312) with T800/T880 except with a 16K or greater front spring rating or request for severe service. * The W900 is available with a cast center tow hook when a 31.5 or 35 inch bumper setting is specified. * This tow hook is NFPA compliant when specified on the T800 model. * W900L with front center mounted tow hook requires a Straight Steel Box Bumper. Use 6303360 or 6303428. | \$251 | 28# |
| 6390048 | Rectangular bumper cutouts for customer-installed fog lights. * Bumper cutouts for rectangular shaped aftermarket fog lights are not for use with round fog lights. | \$25 | 0# |

T800: FRAME & EQUIPMENT

| Option | Description | Price | Weight |
|----------------------------------|--|-------|--------|
| Front Frame Miscellaneous | | | |
| 6390001 | Steel shackle links. * Steel shackle links required on all W900L models with 2007+ engines unless a Severe Service kit is requested. | \$5 | 8# |
| 6390021 | Iron shackle brackets. Code is not required with front springs greater than or equal to 16,000 lbs. * Iron shackle brackets are standard on W900L and C500 for all front suspension ratings. * Iron shackle brackets are standard with a spring capacity of 16K or greater , no code required. * The iron shackle bracket option is available with front spring capacities of 14.6K or less. * W900B chassis with an export engine requires iron shackle brackets. For springs rated under 16K sales code 6390021 must be used. Springs rated at 16K or greater include iron brackets without an additional sales code. * W900B with a 2007+ engine will be built with the iron shackle brackets in all configurations, no code required. | \$125 | 11# |
| 6390103 | Front mudflaps. * Not available on Aerodynamic models with split fender hood. Split Fender provides necessary coverage. | STD | 0# |
| 6390110 | Mudflaps, Front: Extra wide for use w/ tires that are wide base singles. * Extra wide front mud flaps are for use with either wide base front tires or rubber fender extenders. * Extra wide front mud flaps are not for use with sheet metal hood, on the C500 model, on the T800 twin steer, or T800 short hood configurations. | \$68 | 6# |
| 6390114 | Mudflaps, Front: Symplastic black spray guard * The Symplastic spray guard front mud flaps are not available in a size that matches with the 114 inch wide sheet metal fenders. These options are not compatible. | \$87 | 0# |
| 6390312 | Brackets: Iron front spring drive. Included with front spring capacity of 16,000 lbs or greater; code not required. | \$95 | 47# |
| Mixer Equipment | | | |
| 6340110 | Side plate on chassis rail for mixer boost-a-load * ABS with Bendix electronic stability program (ESP) can be specified with up to one non-steerable, factory-installed pusher or tag; up to four steerable, factory-installed pushers; or up to three steerable, factory-installed pushers with a steerable, factory-installed tag. Approvals for lift axles are limited to 6x4 and 6x2 axle configurations. Lift axle weight rating is limited to 13.2K with selection of Mixer Boost A-Load. * Dual side of cab exhaust not available with mixer side plates. * Minimum size for tanks located under the cab is 22 inch diameter x 60 gallons, or 24.5 inch diameter x 75 gallons, or 28.5 inch diameter x 105 gallons. * Side plate reinforcement for rails can be used for T800, T880, and W900S. Requires code for mixer service. Required with coding for a Boost-a-load mixer. Not for use with LNG. Not for use on T800 twin steer chassis with 2007+ EPA engine. | \$190 | 46# |
| 6350105 | Front engine skid protector. Painted bumper color. C500B requires 56.5 in. bumper setting. * Front engine protector skid plate option is available on C5 with 56.5" bumper setting, C5 twin steer with 92.5" bumper setting, and on T880, T800 or T4 with steel bumper. * Skid plate front engine protector is not available with a mixer packer or a T800 with Allison transmission. * The front skid plate for the T440 can be used with a steel bumper or with an Allison transmission * The front skid plate for the T470 can be used with an Allison transmission. | \$620 | 79# |

| Option | Description | Price | Weight |
|----------------------|---|-------|--------|
| Battery Boxes | | | |
| Parallel | | | |
| 6403678 | Battery box: Aluminum parallel BOC w/ ABS cover. * Parallel aluminum box with ABS cover used behind the cab. Aluminum material is not for use with Severe Service. Not for twin steer because they have a box between the steer axles. Not for 62 inch AeroCab on T660 with full chassis fairings due to fairing group and bracket spacing. Severe Service requires a steel battery box. * This box style is incompatible with full length chassis fairings. * When a pusher axle is specified the battery box behind the cab will always be located forward of the lift axle. Requests for the box to be located between the pusher and the forward drive axles will not be approved. | \$164 | 22# |
| 6404207 | Battery box: Steel parallel BOC w/ ABS cover. * Parallel steel battery box with ABS cover. Not for use C500 or T800 twin steer due to required box location between the steer axles. Not full length chassis fairings. * This box style is incompatible with full length chassis fairings. * When a pusher axle is specified the battery box behind the cab will always be located forward of the lift axle. Requests for the box to be located between the pusher and the forward drive axles will not be approved. | \$167 | 11# |
| 6405001 | Battery box: Short length polished aluminum parallel box module under cab w/ aluminum integral step, polished cover. Up to 2 air tanks may mount to bottom of box. Batteries will be oriented perpendicular on rail. * Aluminum battery box material is not applicable to Severe Service requests. * Material mismatch side to side under the cab is undesirable. A polished battery box cover and non-polished DPF/SCR cover is not allowed. * Parallel integral step boxes are not for use on twin steers because they have a box between the steer axles. Aluminum boxes are not for use with severe service. | \$541 | 0# |
| 6405002 | Battery box: Aluminum parallel module BOC w/ step, aluminum diamond plate cover. Up to 2 air tanks may be mounted to bottom of box. Batteries will be oriented perpendicular to the frame rail in a single row. * Aluminum battery box material is not applicable to Severe Service requests. * Cantilever battery boxes are also known as COE style. The aluminum version of the boxes are not applicable to Severe Service. This box style wont fit behind full chassis fairings. Not for twin steers which have the battery box located between the steer axles. * The following right hand frame access steps may not be mounted next to under frame DPF/SCR: ladder steps, battery/tool box w/ steps, or steps on a 28.5" fuel tank or hydraulic tank. * When a pusher axle is specified the battery box behind the cab will always be located forward of the lift axle. Requests for the box to be located between the pusher and the forward drive axles will not be approved. | \$327 | 44# |
| 6405048 | Battery box module: Short length aluminum parallel under cab, aluminum diamond plate cover w/ step. Up to 2 air tanks may mount to bottom of box. Batteries will be oriented perpendicular on rail. * Aluminum battery box material is not applicable to Severe Service requests. * Parallel integral step boxes are not for use on twin steers because they have a box between the steer axles. Aluminum boxes are not for use with severe service. | STD | 0# |

| Option | Description | Price | Weight |
|----------------------|--|---------|--------|
| Battery Boxes | | | |
| Parallel | | | |
| 6405080 | T8 parallel non-polished aluminum battery box module w/ integral step. Extended length for use w/ 2010 and later SCR style exhaust. Up to 2 air tanks may mount to bottom of box. Batteries will be oriented perpendicular on rail. * Aluminum battery box material is not applicable to Severe Service requests. * Dual AeroCab style exhaust requires that any battery box used in the LH under cab location be the extended length. This style includes an accommodation for the LH side of cab vertical tailpipe, when present. * Matching the cover lengths between battery box and DPF/SCR cover under the cab can be achieved using an extended length battery box. * T660/T680: Available only with split fender option. | \$77 | 72# |
| 6405082 | T8 parallel polished aluminum battery box module w/ integral step. Extended length for use w/ 2010 and later SCR style exhaust. Up to 2 air tanks may mount to bottom of box. Batteries will be oriented perpendicular on rail. * Aluminum battery box material is not applicable to Severe Service requests. * Dual AeroCab style exhaust requires that any battery box used in the LH under cab location be the extended length. This style includes an accommodation for the LH side of cab vertical tailpipe, when present. * Matching the cover lengths between battery box and DPF/SCR cover under the cab can be achieved using an extended length battery box. * Material mismatch side to side under the cab is undesirable. A polished battery box cover and non-polished DPF/SCR cover is not allowed. * T660/T680: Available only with split fender option. | \$1,343 | 72# |
| 6405101 | Short length steel parallel battery box module under cab, aluminum integral step, polished cover. Up to 2 air tanks may mount to bottom of box. Batteries will be oriented perpendicular on rail. * Material mismatch side to side under the cab is undesirable. A polished battery box cover and non-polished DPF/SCR cover is not allowed. | \$251 | 52# |
| 6405102 | Short length steel parallel battery box module under cab, aluminum integral step, diamond plate cover. Up to 2 air tanks may mount to bottom of box. Batteries will be oriented perpendicular on rail. | \$57 | 53# |
| 6405103 | Steel parallel battery box module: BOC w/ aluminum diamond plate cover w/step. Up to 2 air tanks may be mounted to bottom of box. Batteries oriented perpendicular. | \$416 | 92# |
| 6405180 | T8 parallel non-polished steel battery box module w/ integral step. Extended length for use w/ 2010 and later SCR style exhaust. Up to 2 air tanks may mount to bottom of box. Batteries will be oriented perpendicular on rail. * Dual AeroCab style exhaust requires that any battery box used in the LH under cab location be the extended length. This style includes an accommodation for the LH side of cab vertical tailpipe, when present. * Matching the cover lengths between battery box and DPF/SCR cover under the cab can be achieved using an extended length battery box. * Steel battery box for single steer axle chassis. No twin steer configurations. | \$271 | 125# |
| Cantilever | | | |
| 6400634 | Battery box cantilever aluminum BOC with smooth aluminum cover. * Cantilever battery boxes are also known as COE style. The aluminum version of the boxes are not applicable to Severe Service. This box style wont fit behind full chassis fairings. Not for twin steers which have the battery box located between the steer axles. | \$430 | 10# |

T800: FRAME & EQUIPMENT

| Option | Description | Price | Weight |
|------------------------------------|---|-------|--------|
| Battery Boxes | | | |
| Cantilever | | | |
| 6400636 | Battery box cantilever aluminum BOC with fiberglass cover. * Cantilever battery boxes are also known as COE style. The aluminum version of the boxes are not applicable to Severe Service. This box style wont fit behind full chassis fairings. Not for twin steers which have the battery box located between the steer axles. * When a pusher axle is specified the battery box behind the cab will always be located forward of the lift axle. Requests for the box to be located between the pusher and the forward drive axles will not be approved. | \$124 | 8# |
| 6400641 | Battery box cantilever aluminum BOC with polished smooth aluminum cover. | \$541 | 10# |
| 6401200 | Battery box cantilever steel BOC w/ fiberglass cover. * Cantilever battery boxes, also known as COE style, wont fit behind full chassis fairings. Not for twin steers which have the battery box located between the steer axles. * When a pusher axle is specified the battery box behind the cab will always be located forward of the lift axle. Requests for the box to be located between the pusher and the forward drive axles will not be approved. | \$375 | 24# |
| 6401233 | Steel cantilever battery box BOC w/ smooth aluminum cover. Vocational Style. * Battery box insulation not available for vocational battery boxes. * This cantilever style box is labeled vocational and is 3 inches narrower than a regular cantilever style box. The batteries are positioned parallel to the frame rail with a maximum quantity of three. Jumpstart terminals or disconnect switches cannot be located on this box. * When a pusher axle is specified the battery box behind the cab will always be located forward of the lift axle. Requests for the box to be located between the pusher and the forward drive axles will not be approved. | \$638 | 39# |
| 6401235 | Steel cantilever battery box BOC w/ smooth polished aluminum cover. Vocational Style. | \$694 | 39# |
| 6404315 | Steel cantilever battery box: W/ aluminum diamond plate cover, between twin steering axles. * Battery box between the steer axles is for use on the RH side of the chassis. * Cantilever style battery box located between the front axles is required with a twin steer axle configuration except on T880S twin steers. | \$544 | 0# |
| Across or Between Rails BOC | | | |
| 6400500 | Battery box: Aluminum between the rails BOC w/ FMCSR cover. * Battery box between the rails is not practical for most full truck applications. * Between rails battery boxes are not for use on C500 or T800 twin steer chassis. These chassis utilize a battery box between the steer axles. * Considerable wheelbase must be added to accommodate a between rails battery box when used with an auxiliary transmission. In many cases the solution is not preferable. * The SPL350 and single shaft SPL250 drivelines cannot be used in combination with a battery box behind the cab located between the rails. A center bearing is required with SPL250 to maneuver beyond the box position. * When a pusher axle is specified the battery box behind the cab will always be located forward of the lift axle. Requests for the box to be located between the pusher and the forward drive axles will not be approved. | \$891 | 11# |

Battery Boxes

Across or Between Rails BOC

| | | | |
|--|---|-------|-------|
| 6400508 | Battery box: Aluminum between the rails BOC w/ aluminum cover. | \$569 | -8# |
| <ul style="list-style-type: none">* Battery box between the rails is not practical for most full truck applications.* Between rails battery boxes are not for use on C500 or T800 twin steer chassis. These chassis utilize a battery box between the steer axles.* Considerable wheelbase must be added to accommodate a between rails battery box when used with an auxiliary transmission. In many cases the solution is not preferable.* The SPL350 and single shaft SPL250 drivelines cannot be used in combination with a battery box behind the cab located between the rails. A center bearing is required with SPL250 to maneuver beyond the box position.* When a pusher axle is specified the battery box behind the cab will always be located forward of the lift axle. Requests for the box to be located between the pusher and the forward drive axles will not be approved. | | | |
| 6400631 | Battery box: Temporary across the rails. | \$168 | -110# |
| <ul style="list-style-type: none">* The temporary battery box is for use on full trucks only, as the body builder would be responsible for locating the batteries. No tractors are allowed [complete or incomplete].* When a pusher axle is specified the battery box behind the cab will always be located forward of the lift axle. Requests for the box to be located between the pusher and the forward drive axles will not be approved. | | | |
| 6400633 | Battery box: Temporary across the rails. Includes maximum cable length available. | \$222 | -110# |

In-Cab

| | | | |
|---|---|---------|-----|
| 6405000 | In-cab steel battery box: under rider seat or in stand alone box. Requires appropriate AGM battery code, which varies by model, and appropriate rider seat code be selected prior to entering the workscreen. Includes 1 battery disconnect switch. | \$2,281 | -9# |
| <ul style="list-style-type: none">* 1.9 meter cabs with in cab battery box require Optima batteries.* An in cab battery box on T680 and T880 requires specific AGM batteries (1821271 or 1821275).* Dual exhaust not available in combination with Rear Engine PTO and an in-cab battery box.* In-cab battery box is not available with 52 inch or 76 inch sleepers.* In-cab battery box is not compatible with requests for Body Builder Battery Power Prewire (s/c 1901084).* Not available with 42 inch modular sleepers due to interference with HVAC lines.* On 1.9M cab, when lime green seat belt code 8496561 is selected in combination with in cab battery box, only the driver seat belt will be green. Rider's belt will be black.* Specific batteries (1825612, 1825623, 1821271 or 1821275) required for an in-cab battery box.* The in-cab battery box can be used with either a passenger side battery box style seat or with deletion of the passenger seat.* The in-cab battery box cannot be used with optional disconnect switches, box insulation, steel battery hold downs, or the Canadus battery energizer.* The in-cab battery box is incompatible with records holder on seat base, fire extinguisher mounted outboard, or trailer battery charge circuits. | | | |

| 6409136 | Insulate battery box w/ acid-resistant & cross-linked polyolefin foam sheets. | \$116 | 2# |
|---------|---|-------|----|

- * Battery box insulation not available for vocational battery boxes.
- * The battery box required on Aerodynamic models is located LH under the cab and is not available with steel hold downs or battery box insulation.

Center Frame Equipment

Frame Access

Grabhandles

| | | | |
|---------|---|------|----|
| 6410010 | Frame access grabhandle(s) LH mounted. Placement and quantity of grabhandles may vary due to FMCSR frame access requirements. | \$60 | 0# |
|---------|---|------|----|

- * All orders must have complete frame access if any one of the three components is selected. Step and grab handle on the same side of the vehicle accompanied by deck plate.
- * Any changes to the rear cab or sleeper area that impact grab handle position or access must comply with FMCSR 399.
- * Code for a grab handle mounted to the back of cab or sleeper cannot be used in combination with other styles of frame mounted grab handles.

| | | | |
|---------|---|------|----|
| 6410011 | Frame access grabhandle(s) RH mounted. Placement and quantity of grabhandles may vary due to FMCSR frame access requirements. | \$58 | 0# |
|---------|---|------|----|

- * All orders must have complete frame access if any one of the three components is selected. Step and grab handle on the same side of the vehicle accompanied by deck plate.
- * Any changes to the rear cab or sleeper area that impact grab handle position or access must comply with FMCSR 399.

| | | | |
|---------|---|------|----|
| 6410028 | Frame access grabhandle, additional LH mounted in side extender. Placement and quantity of grabhandles may vary due to FMCSR frame access requirements. | \$99 | 2# |
|---------|---|------|----|

- * Requesting an additional grab handle requires a primary handle that can be mounted on the back of the cab, or if coded for side extenders the primary handle will be inside the extenders.
- * The additional grab handle located in the side extender is for use only with side extenders and a primary grab handle mounted to the back of cab or sleeper on the same side. Not available as the only handle option.

| Grabhandles | | | |
| 6410029 | Frame access grabhandle, additional RH mounted on side extender. Placement and quantity of grabhandles may vary due to FMCSR frame access requirements. * The additional grab handle located in the side extender is for use only with side extenders and a primary grab handle mounted to the back of cab or sleeper on the same side. Not available as the only handle option. | \$99 | 2# |
| 6418508 | Ladder step access handle LH mounted to battery box /toolbox. Placement and quantity of grabhandles may vary due to FMCSR frame access requirements. * All orders must have complete frame access if any one of the three components is selected. Step and grab handle on the same side of the vehicle accompanied by deck plate. * Any changes to the rear cab or sleeper area that impact grab handle position or access must comply with FMCSR 399. * Battery or toolbox frame access grab handle can be used only with an integral step box on the LH rail. * Code for a grab handle mounted to the back of cab or sleeper cannot be used in combination with other styles of frame mounted grab handles. | \$273 | 8# |
| 6418509 | Ladder step access handle: RH mounted to battery box/toolbox. Placement and quantity of grabhandles may vary due to FMCSR frame access requirements. * All orders must have complete frame access if any one of the three components is selected. Step and grab handle on the same side of the vehicle accompanied by deck plate. * Any changes to the rear cab or sleeper area that impact grab handle position or access must comply with FMCSR 399. * Battery or toolbox frame access grab handle can be used only with an integral step box on the RH rail. | \$273 | 8# |
| 6418510 | Ladder step access handle: LH mounted to frame step. Narrate location. Placement and quantity of grabhandles may vary due to FMCSR frame access requirements. * All orders must have complete frame access if any one of the three components is selected. Step and grab handle on the same side of the vehicle accompanied by deck plate. * Any changes to the rear cab or sleeper area that impact grab handle position or access must comply with FMCSR 399. * Code for a grab handle mounted to the back of cab or sleeper cannot be used in combination with other styles of frame mounted grab handles. * When using the grab handle mounted to the ladder step you must also code for a ladder step on the same side of the vehicle. | \$216 | 8# |
| 6418512 | Ladder step access handle: RH mounted to frame step. Narrate location. Placement and quantity of grabhandles may vary due to FMCSR frame access requirements. * All orders must have complete frame access if any one of the three components is selected. Step and grab handle on the same side of the vehicle accompanied by deck plate. * Any changes to the rear cab or sleeper area that impact grab handle position or access must comply with FMCSR 399. * Ladder step frame access grab handle can be used only with a ladder step on the RH rail. | \$216 | 8# |
| Deckplate | | | |
| 6414002 | Short aluminum frame access deck plate, 24 in. unless only 12 in. fits. | \$132 | 10# |
| 6414003 | Medium aluminum frame access deck plate, 36 in. | \$229 | 15# |
| 6414006 | Full aluminum frame access deck plate. Provides up to 72 in. of deck plate filling the space from hoses to fifth wheel. | \$336 | 24# |

T800: FRAME & EQUIPMENT

| Option | Description | Price | Weight |
|-------------------------------|--|-------|--------|
| Center Frame Equipment | | | |
| Frame Access | | | |
| Steps | | | |
| 6417007 | Frame access steps: 2 ladder-type, RH mount. Available when rear of tank extends less than 24 in. behind rear of cab, sleeper, or side extender. * Frame mounted ladder steps cannot be used in combination with wheel to wheel full chassis fairings on the same side. * Ladder style frame access steps cannot be used with full length chassis fairings. Not for use with extended steps for frame access mounted to a tank under cab. Not T8 non-sleeper chassis with 22 x 120 gal tank RH under or 24 x 135 or 24 x 150 gal RH under as the step will be located too far behind the cab to make the grab handle accessible. * The following right hand frame access steps may not be mounted next to under frame DPF/SCR: ladder steps, battery/tool box w/ steps, or steps on a 28.5" fuel tank or hydraulic tank. * Use of a tank larger than 120 gallons under 38 inch AeroCab or 42 inch modular sleeper will not permit the use of ladder style frame access steps. The step position will be too far from the grab handle on the back of the sleeper. * Use of a tank larger than 135 gallons under 62 inch AeroCab sleeper will not permit the use of ladder style frame access steps. The step position will be too far from the grab handle on the back of the sleeper. | \$168 | 15# |
| 6417009 | Frame access steps: 2 for fuel/hydraulic tank BOC, RH mount. Available when rear of tank under extends more than 14 in. behind rear of cab, sleeper, or side extender. For tanks located totally behind a cab or sleeper the front of the tank must be within 14 in. from the rear of cab, sleeper, or side extender. * Tank mounted frame access steps RH behind the cab require that a tank be selected in the same location. * The following right hand frame access steps may not be mounted next to under frame DPF/SCR: ladder steps, battery/tool box w/ steps, or steps on a 28.5" fuel tank or hydraulic tank. * This component is not available with full length chassis fairings due to interference issues. | \$192 | 6# |
| 6418006 | Frame access steps: 2 ladder-type, LH mount. Available when rear of tank extends less than 24 in. behind rear of cab, sleeper, or side extender. * Frame mounted ladder steps cannot be used in combination with wheel to wheel full chassis fairings on the same side. * Ladder style frame access steps cannot be used with full length chassis fairings. Not for use with extended steps for frame access mounted to a tank under cab. Not T8 non-sleeper chassis with 22 x 120 gal tank RH under or 24 x 135 or 24 x 150 gal RH under as the step will be located too far behind the cab to make the grab handle accessible. * Use of a tank larger than 120 gallons under 38 inch AeroCab or 42 inch modular sleeper will not permit the use of ladder style frame access steps. The step position will be too far from the grab handle on the back of the sleeper. * Use of a tank larger than 135 gallons under 62 inch AeroCab sleeper will not permit the use of ladder style frame access steps. The step position will be too far from the grab handle on the back of the sleeper. * When using the grab handle mounted to the ladder step you must also code for a ladder step on the same side of the vehicle. | \$168 | 15# |
| 6418008 | Frame access steps: 2 for fuel/hydraulic tank BOC, LH mount. Available when rear of tank under extends more than 14 in. behind rear of cab, sleeper, or side extender. For tanks located totally behind a cab or sleeper the front of the tank must be within 14 in. from the rear of cab, sleeper, or side extender. * Tank mounted frame access steps LH behind the cab require that a tank be selected in the same location. * This component is not available with full length chassis fairings due to interference issues. | \$192 | 6# |

DPF-SCR Covers

| | | | |
|---------|--|-----|----|
| 6451090 | T470,C5, T6, T8 non-polished DPF/SCR or CNG cover diamond plate w/ step. For use w/ 2010 or later exhaust systems. For T8, use extended length non-polished battery box on opposite rail to match the length of under cab components. End plates will be painted standard black frame color. * Classic panel lights will not fit under the cab when the DPF/SCR is located in the RH under cab step assembly. * Material mismatch side to side under the cab is undesirable. A polished battery box cover and non-polished DPF/SCR cover is not allowed. * This new generation of DPF covers support SCR on the chassis as well. The cover has a new length, 51 inches for W900 models, and 42" for all other models. The cover matches the battery box length for 'extended' length battery boxes. AeroCab length boxes are not for use with 2010+ engines. * Under cab fairings are not compatible with the DPF/SCR step cover assembly. | STD | 0# |
|---------|--|-----|----|

| 6451098 | C500,T800 twin steer, non-polished DPF/SCR cover. No cab access, no step. End plates will be painted standard black frame color. * Sales code 6451098 or 6451116 required with twin steer exhaust code 1247152 or 1247168. | \$0 | 0# |
| 6451099 | C500B, T800B, T800W non-polished Euro 4/5 EGP cover and cab access. Right hand under exhaust. | \$211 | 16# |
| 6451100 | C500B, T800B, T800W polished Euro 4/5 EGP cover and cab access. Right hand under exhaust. | \$316 | 16# |
| 6451112 | T470,C5, T6, T8 non-polished DPF/SCR or CNG cover, diamond plate with cab access step and polished end plates. For use with 2017 or later RH under exhaust systems. For T8, use extended length non-polished battery box on opposite rail to match the length of under cab components. For use with frame paint color other than standard black. The cover will be unpolished diamond-plate and the end plates will be polished. * Classic panel lights will not fit under the cab when the DPF/SCR is located in the RH under cab step assembly. * For use with custom frame paint and a non-aero right hand under cab DPF/SCR when a polished DPF/SCR cover is not desired. * Material mismatch side to side under the cab is undesirable. A polished battery box cover and non-polished DPF/SCR cover is not allowed. * This new generation of DPF covers support SCR on the chassis as well. The cover has a new length, 51 inches for W900 models, and 42" for all other models. The cover matches the battery box length for 'extended' length battery boxes. AeroCab length boxes are not for use with 2010+ engines. * Under cab fairings are not compatible with the DPF/SCR step cover assembly. | \$145 | 0# |
| 6451116 | C500,T800 twin steer, non-polished DPF/SCR cover with polished end plates. No cab access, no step. For use with 2017 or later RH under exhaust systems. For use with frame paint color other than standard black. The cover will be unpolished diamond-plate and the end plates will be polished. * Classic panel lights will not fit under the cab when the DPF/SCR is located in the RH under cab step assembly. * Material mismatch side to side under the cab is undesirable. A polished battery box cover and non-polished DPF/SCR cover is not allowed. * Sales code 6451098 or 6451116 required with twin steer exhaust code 1247152 or 1247168. | \$145 | 0# |
| Frame Crossmembers & Upgrades | | | |
| 6390002 | Two aluminum intermediate crossmembers with heavy-duty aluminum gussets. Includes one forward and one rear intermediate crossmember. * This is the standard installation with severe service kits, no code required. * Upgrading to 3-hole gussets on intermediate crossmembers is recommended for vehicles operating in Canada with GCWs exceeding 120K. | \$167 | 19# |

| Option | Description | Price | Weight |
|--|--|-------|--------|
| Frame Crossmembers & Upgrades | | | |
| 6390004 | Aluminum auxiliary transmission crossmember with heavy-duty aluminum gussets. Not Available with Spicer Auxiliary Transmission. Use 6390011. * Aluminum crossmember and gussets are not available with Spicer auxiliary transmissions. * Crossmember upgrades for use with auxiliary transmissions. | \$47 | 8# |
| 6390011 | Steel auxiliary transmission crossmember with heavy-duty steel gussets. * Crossmember upgrades for use with auxiliary transmissions. * Steel crossmembers and gussets are not available with Fuller AT-1202 auxiliary transmissions. Use code 6390004 or 6490014 | \$0 | 52# |
| 6421050 | Steel intermediate frame crossmembers & gussets. Does not include suspension crossmembers. | \$264 | 44# |
| 6490012 | Two steel intermediate crossmembers with heavy-duty aluminum gussets. Includes one forward and one rear intermediate crossmember. | \$256 | 52# |
| 6490014 | Steel auxiliary transmission crossmember with heavy-duty aluminum gussets. * Crossmember upgrades for use with auxiliary transmissions. | \$0 | 24# |
| 6490018 | Steel forward intermediate crossmember: One with heavy-duty aluminum gussets, replacing standard. * This option upgrades to material or gusset style it does not supply an additional crossmember. | \$128 | 17# |
| 6490028 | Aluminum rear intermediate crossmember: One with heavy-duty aluminum gussets, replacing standard. * Severe Service packages include upgrading the crossmembers from the standard 2-hole to 3-hole gussets. There is no need to use an additional code to get this upgrade. * This option upgrades to material or gusset style it does not supply an additional crossmember. | \$84 | 9# |
| 6490033 | Aluminum forward intermediate crossmember: One additional with standard-duty aluminum gussets. | \$248 | 29# |
| 6490034 | Aluminum rear intermediate crossmember: One additional with standard-duty aluminum gussets. * In most cases a cutoff of at least 60 inches is required to locate an additional rear intermediate crossmember with tandem rear axles. * Tandem axles with cutoff exceeding 65 inches, or single rear axles with cutoff exceeding 55 inches can add a rear intermediate crossmember. | \$259 | 29# |
| 6490086 | Steel forward intermediate crossmember: One additional with standard-duty steel gussets. | \$310 | 60# |
| 6490088 | Steel rear intermediate crossmember: One additional with standard-duty steel gussets. * Additional rear intermediate crossmember for use with tandem rear axle chassis with cutoff below 66 inches, or on single rear axle chassis with cutoff below 56 inches. Chassis with cutoff specified beyond the listed dimension will have a rear intermediate crossmember standard in most cases. | \$310 | 60# |
| 6490089 | Steel forward intermediate crossmember: One additional with heavy-duty aluminum gussets. | \$393 | 81# |
| 6490090 | Aluminum forward intermediate crossmember: One additional with heavy-duty aluminum gussets. | \$311 | 38# |
| 6490091 | Aluminum rear intermediate crossmember: One additional with heavy-duty aluminum gussets. | \$311 | 38# |
| 6490092 | Aluminum forward intermediate crossmember: One with heavy-duty aluminum gussets, replacing standard. * Severe Service packages include upgrading the crossmembers from the standard 2-hole to 3-hole gussets. There is no need to use an additional code to get this upgrade. * This option upgrades to material or gusset style it does not supply an additional crossmember. | \$84 | 9# |

T800: FRAME & EQUIPMENT

| Option | Description | Price | Weight |
|--|--|-------|--------|
| Frame Crossmembers & Upgrades | | | |
| 6490095 | Steel rear intermediate crossmember: One with heavy-duty aluminum gussets, replacing standard. * This option upgrades to material or gusset style it does not supply an additional crossmember. | \$128 | 17# |
| 6490100 | Two steel intermediate crossmembers with heavy-duty aluminum gussets. Includes one forward and one rear intermediate crossmember replacing Domestic Severe Service package standard. Code 9462002 is required. * Export Severe Service kit includes the steel crossmembers and they are costed into the code. This is an option in other cases. | \$256 | 52# |
| 6490120 | Invert rear intermediate crossmember. A separate sales code is required for one of the following: an additional crossmember; steel crossmember; and if crossmember is not standard aluminum gussets on non-severe service. * Rear intermediate crossmember requirement is suspension/cutoff dependent. If rear intermediate crossmember is not required this code will be deleted from order unless an additional rear intermediate crossmember is requested. * The option to invert the rear intermediate crossmembers requires that you upgrade from the standard 2-hole gussets to 3-hole gussets when Severe Service is not requested. * With double inserts requires the use of a steel crossmember. | \$0 | 0# |
| 6490416 | Heavy-duty rear cab supports: W/steel crossmembers & aluminum gussets. * Heavy-duty rear cab support is not compatible with an air cab suspension. * The Severe Service kit on T800 models requires a heavy-duty rear cab support crossmember and reinforced cab sills. | \$121 | 26# |
| 6490440 | Heavy-duty BOC crossmember assembly. * The heavy-duty back of cab crossmember assembly is restricted from use with front drive axles, transfer cases, auxiliary transmissions, and with a front engine PTO. * The heavy-duty crossmember assembly is required in the following conditions except when a front drive axle, transfer case, auxiliary transmission, front engine PTO, or T800SH with a rear engine PTO are specified: T800 logger with wheelbases in excess 259 inches, T800 dump truck with wheelbases in excess of 219 inches, W900 dump truck with wheelbases in excess of 239 inches, and for W900S or T800 mixer chassis. | \$192 | 23# |
| Center Frame Clear Space | | | |
| 6491011 | One clear frame space area without custom frame layout. Use with first clear frame space area code or customer-installed APU code when not using a custom frame layout code. | \$443 | 0# |
| 6491012 | Two clear frame space areas without custom frame layout. Use with first and second clear frame space area codes or customer-installed APU code when not using a custom frame layout code. | \$885 | 0# |
| 6497020 | First clear frame space dimensioned from back of cab. | \$0 | 0# |
| 6497030 | Second clear frame space dimensioned from back of cab. | \$0 | 0# |
| First Request Area | | | |
| 6497101 | First - LH outside rail only. Clear frame space area. Does not include fasteners or piping. Requires a supplemental length and location code. The actual chassis layout will be determined at time of engineering. | \$0 | 0# |
| 6497102 | First - RH outside rail only. Clear frame space area. Does not include fasteners or piping. Requires a supplemental length and location code. The actual chassis layout will be determined at time of engineering. | \$0 | 0# |
| 6497103 | First - LH below rail only. Clear frame space area. Does not include fasteners or piping. Requires a supplemental length and location code. | | * Export chassis require huckbolts in the frame. | | |
| | * Huckbolts throughout the frame, where possible. May not include fasteners in the suspension crossmembers. This code is not for use on W900S, which is standard with huckbolts throughout frame where ever possible [6397005]. | | |

T800: FRAME & EQUIPMENT

| Option | Description | Price | Weight |
|---|--|---------|--------|
| Miscellaneous Center Frame Equipment | | | |
| 6397006 | TC bolts throughout frame. Replacing standard fasteners. * Available for export chassis to China and Russia. | \$303 | 0# |
| 6670115 | BOC2 position location. Component located just forward of the drive axle tires. * This option is for use only when an option has been located in the BOC2 position and customer has acknowledged that they want the component to be located similar to the graphic in the Prospector Tank/Box workscreen. | \$25 | 0# |
| 6679904 | Fifth wheel setting is outside standard range. Required when fifth wheel setting is more than 30 in. from bogie. * Fifth wheels positioned with a rear or fixed setting more than 30 inches from bogie are subject to an additional charge. This includes factory installed fifth wheels, angles or drillings for aftermarket fifth wheels. | \$885 | 0# |
| 6790052 | Rear underrun protection, non-chrome. * Rear frame underrun is required on full truck chassis to meet Russian Compliance requirements. * Underrun protection can be added only to full trucks coded for Russian Compliance. Not for use in other operating areas. | \$3,373 | 281# |
| Body Builder Requirements | | | |
| 6090080 | Warning: T800/T880 twin steer wheelbase is measured from C/L first steer axle to C/L rear bogie. * The wheelbase on twin steer T800 and T880S chassis is measured from centerline of forward steer axle to centerline of bogie. Differs from C500 which is measured from centerline of each axle group. | \$0 | 0# |
| 6390088 | 3D Frame Layout to dealer prior to build date. Information only, no changes. This provides a 3D frame layout in a Pro/E or STP data file suitable for use with many CAD programs. * A copy of the frame layout can be obtained once the engineering work has been completed. This drawing will help the body builder define clearance requirements for the chassis. * With this option, an electronic 3D frame layout file will be sent to the dealership. The data is not viewable without the use of CAD oriented software. There is another option to have chassis dimensions sent to the dealership in .PDF format, which does not require specialized software to view. | \$885 | 0# |
| 6390091 | Frame layout picture to dealer prior to build date. Information only, no changes. This provides basic frame layout illustration in a PDF file. Adobe Reader or other software capable of viewing PDF files is required on your computer. A copy of the frame layout can be obtained once the engineering work has been completed. This drawing will help the body builder define clearance requirements for the chassis. * A copy of the frame layout can be obtained once the engineering work has been completed. This drawing will help the body builder define clearance requirements for the chassis. | \$885 | 0# |
| 6390097 | DXF frame layout to dealer prior to build date. Information only, no changes. This provides a frame layout in a .DXF format data file suitable for use w/ many CAD programs. * A copy of the frame layout can be obtained once the engineering work has been completed. This drawing will help the body builder define clearance requirements for the chassis. * With this option an electronic copy of the chassis frame layout will be forwarded to the dealership. The data is not viewable without the use of CAD oriented software. There is another option to have a paper copy of the chassis dimensions faxed to the dealership. | \$885 | 0# |
| 6391201 | Custom Frame Layout: one chassis | \$1,380 | 0# |
| 6391202 | Custom Frame Layout: two chassis | \$690 | 0# |
| 6391203 | Custom Frame Layout: 3-4 chassis | \$375 | 0# |

| 6670120 | C-Channel or I-Beam is Supplied By Body Builder and adds 1 to 999,999 lbs. RBM. * Body builders must frequently add sub-frame to meet rail RBM requirements with crane/cherry picker bodies. Adding the sales code when applicable will assist in the engineering evaluation of these chassis. | \$0 | 0# |
| 6670121 | C-Channel or I-Beam is Supplied By Body Builder and adds minimum 1MIL lbs. RBM. * Body builders must frequently add sub-frame to meet rail RBM requirements in services of oil field rig up or with oil field well service bodies. Adding the sales code when applicable will assist in the engineering evaluation of these chassis. * Body builders must frequently add sub-frame to meet rail RBM requirements with crane/cherry picker bodies. Adding the sales code when applicable will assist in the engineering evaluation of these chassis. | \$0 | 0# |
| 6670122 | C-Channel or I-Beam is Supplied By Body Builder and adds minimum 2MIL lbs. RBM. * Body builders must frequently add sub-frame to meet rail RBM requirements in services of oil field rig up or with oil field well service bodies. Adding the sales code when applicable will assist in the engineering evaluation of these chassis. * Body builders must frequently add sub-frame to meet rail RBM requirements with crane/cherry picker bodies. Adding the sales code when applicable will assist in the engineering evaluation of these chassis. | \$0 | 0# |
| 6670123 | C-Channel or I-Beam is Supplied By Body Builder and adds minimum 3MIL lbs. RBM. * Body builders must frequently add sub-frame to meet rail RBM requirements in services of oil field rig up or with oil field well service bodies. Adding the sales code when applicable will assist in the engineering evaluation of these chassis. * Body builders must frequently add sub-frame to meet rail RBM requirements with crane/cherry picker bodies. Adding the sales code when applicable will assist in the engineering evaluation of these chassis. | \$0 | 0# |
| 6670124 | C-Channel or I-Beam is Supplied By Body Builder and adds minimum 4MIL lbs. RBM. * Body builders must frequently add sub-frame to meet rail RBM requirements in services of oil field rig up or with oil field well service bodies. Adding the sales code when applicable will assist in the engineering evaluation of these chassis. * Body builders must frequently add sub-frame to meet rail RBM requirements with crane/cherry picker bodies. Adding the sales code when applicable will assist in the engineering evaluation of these chassis. | \$0 | 0# |
| 6670125 | C-Channel or I-Beam is Supplied By Body Builder and adds minimum 5MIL lbs. RBM. * Body builders must frequently add sub-frame to meet rail RBM requirements in services of oil field rig up or with oil field well service bodies. Adding the sales code when applicable will assist in the engineering evaluation of these chassis. * Body builders must frequently add sub-frame to meet rail RBM requirements with crane/cherry picker bodies. Adding the sales code when applicable will assist in the engineering evaluation of these chassis. | \$0 | 0# |
| 6670440 | Bodybuilder to install approved crossmember w/in 18 in. BOC prior to unit going into service. Specifications available from applications tech support. | \$0 | 0# |
| 6679850 | Dealer acknowledges self loading crane or boom will be located behind the cab. * Use code 6679850 or 6679852 to describe the location of the crane or boom for purpose of frame strength analysis. | \$0 | 0# |

T800: FRAME & EQUIPMENT

| Option | Description | Price | Weight |
|----------------------------------|--|---------|--------|
| Body Builder Requirements | | | |
| 6679852 | Dealer acknowledges self loading crane or boom will be located at the end-of-frame. * Use code 6679850 or 6679852 to describe the location of the crane or boom for purpose of frame strength analysis. | \$0 | 0# |
| 6679860 | Final end-of-frame cut-off dimension will be modified to less than or equal to 65 inches. * Final cut-off dimension is used to assist in the evaluation of frame strength when and if the final end of frame may be reduced by the body builder for body types of end dump, super dump with flying tag, transfer dump, roll-on/roll-off, roll back flatbeds, or cotton modules. Required if cutoff exceeds 65 inches in these vocations. | \$0 | 0# |
| 6679862 | Final end-of-frame cut-off dimension will be modified to 66 in. to 74 in. * Final cut-off dimension is used to assist in the evaluation of frame strength when and if the final end of frame may be reduced by the body builder for body types of end dump, super dump with flying tag, transfer dump, roll-on/roll-off, roll back flatbeds, or cotton modules. Required if cutoff exceeds 65 inches in these vocations. | \$0 | 0# |
| 6679864 | Final end-of-frame cut-off dimension will be modified to greater than or equal to 75 in. * Final cut-off dimension is used to assist in the evaluation of frame strength when and if the final end of frame may be reduced by the body builder for body types of end dump, super dump with flying tag, transfer dump, roll-on/roll-off, roll back flatbeds, or cotton modules. Required if cutoff exceeds 65 inches in these vocations. | \$0 | 0# |
| 6679901 | Hydraulic end of tank is difficult to fill. | \$0 | 0# |
| 6679914 | Any changes to rear cab/sleeper area must comply w/FMCSR 399. | \$0 | 0# |
| 6679915 | Customer-installed bulkhead and/or headache rack. | \$0 | 0# |
| 6679995 | Customer will install structural end-of-frame crossmember before vehicle is placed in service. * Warning for use when square end of frame without a crossmember is utilized with rear suspension configurations that require an end of frame crossmember. Provides dealer acknowledgement that the final-stage manufacturer must install the crossmember before placing the vehicle into service. * With cutoff 60" or less customer or body builder must install structural end of frame crossmember with Chalmers or Hendrickson beam rear suspensions. Use code 6679995 for full trucks when the crossmember will be installed by the body builder. | \$0 | 0# |
| 6790003 | Special frame drill: dealer to provide drawing with dimensions and revision level. Acceptable hole diameters range from 10.2 mm to 40.4 mm. Preferred file format is .pdf. Not for use for rear suspension, fifth wheel or other published frame drilling code. Does not replace clear frame space requests or custom frame layout. | \$1,770 | 0# |

Fifth Wheels

Holland Fixed Fifth Wheels

| | | | |
|---------|---|---------|------|
| 6541104 | Fifth Wheel: Fixed, Holland FW31Y600XL00 6.0 in. height. No lube, outboard mounting angles, 55K vertical rating, LH release. The code for additional factory drilled settings is available. Accommodates a 2 in. SAE kingpin. Requires some style of trailer connections. | \$2,293 | 356# |
| 6541232 | Fifth Wheel: Fixed, Holland FW17Y700XL00 7.12 in. height. Outboard mounting angles, 50K vertical rating, LH release. The code for additional factory drilled settings is available. Accommodates a 2 in. SAE kingpin. Requires some style of trailer connections. | \$1,641 | 378# |
| 6541234 | Fifth Wheel: Fixed, Holland FW17Y800XL00 8.12 in. height. Outboard mounting angles, 50K vertical rating, LH release. The code for additional factory drilled settings is available. Accommodates a 2 in. SAE kingpin. Requires some style of trailer connections. | \$1,641 | 383# |

| Holland Air-Sliding Fifth Wheels | | | |
| 6543318 | Fifth Wheel: ILS<=40K air Hol FW31J836XL00 36 in. slide, 8.1 in. height. Outboard mounting angles, 55K vertical rating, LH release. Accommodates a 2 in. SAE kingpin. Requires some style of trailer connections. Limited to use with 40K & under suspensions. Not available with lift axles. * Cannot be combined with lift axles. * In most cases a fifth wheel that uses a retractable handle will be required if the slide length falls between the tandem axles and a rear suspension with a ride height under 10 inches is specified. * Limited to suspensions 40K and below. | \$2,908 | 591# |
| 6543319 | Fifth Wheel: ILS<=40K air Hol FW31J836XL02 36 in. slide, 8.1 in. height. Manual secondary lock. Outboard mounting angles, 55K vertical rating, LH release. Accommodates a 2 in. SAE kingpin. Requires some style of trailer connections. Limited to use with 40K & under suspensions. Not available with lift axles. * Cannot be combined with lift axles. * In most cases a fifth wheel that uses a retractable handle will be required if the slide length falls between the tandem axles and a rear suspension with a ride height under 10 inches is specified. * Limited to suspensions 40K and below. | \$2,985 | 591# |
| 6543320 | Fifth Wheel: ILS<=40K air Hol FW31J836XL80 36 in. slide, 8.1 in. height. Air operated king pin release. Outboard mounting angles, 55K vertical rating, LH release. Accommodates a 2 in. SAE kingpin. Requires some style of trailer connections. Limited to use with 40K & under suspensions. Not available with lift axles. * A fifth wheel that includes an air operated kingpin release is not for use in combination with an AutoShift transmission due to a dash space conflict. * Cannot be combined with lift axles. * Fifth wheels that include an air operated kingpin release feature have dash mounted controls that eliminate four optional gauge spots. * In most cases a fifth wheel that uses a retractable handle will be required if the slide length falls between the tandem axles and a rear suspension with a ride height under 10 inches is specified. * Limited to suspensions 40K and below. | \$3,611 | 596# |
| 6543321 | Fifth Wheel: ILS<=40K air Hol FW31J848XL00 48 in. slide, 8.1 in. height. Outboard mounting angles, 55K vertical rating, LH release. Accommodates a 2 in. SAE kingpin. Requires some style of trailer connections. Limited to use with 40K & under suspensions. Not available with lift axles. * Cannot be combined with lift axles. * In most cases a fifth wheel that uses a retractable handle will be required if the slide length falls between the tandem axles and a rear suspension with a ride height under 10 inches is specified. * Limited to suspensions 40K and below. | \$3,443 | 639# |
| 6543323 | Fifth Wheel: ILS<=40K air Hol FW31J848XL80 48 in. slide, 8.1 in. height. Air operated king pin release. Outboard mounting angles, 55K vertical rating, LH release. Accommodates a 2 in. SAE kingpin. Requires some style of trailer connections. Limited to use with 40K & under suspensions. Not available with lift axles. * A fifth wheel that includes an air operated kingpin release is not for use in combination with an AutoShift transmission due to a dash space conflict. * Cannot be combined with lift axles. * Fifth wheels that include an air operated kingpin release feature have dash mounted controls that eliminate four optional gauge spots. * In most cases a fifth wheel that uses a retractable handle will be required if the slide length falls between the tandem axles and a rear suspension with a ride height under 10 inches is specified. * Limited to suspensions 40K and below. | \$4,082 | 644# |

Fifth Wheels

Fifth Wheel Equipment

| | | | |
|---------|---|-------|------|
| 6600033 | Aluminum Fifth Wheel Angles Replacing Steel on fixed or outboard mounted sliding fifth wheels. * Aluminum angles are not compatible with inboard mounted fifth wheels. * Aluminum replacing standard steel fifth wheel angles. Not for use with Reyco, Neway, Hendrickson air, Hendrickson RT or Primaax rear suspensions. * For use only on tractors with a factory installed or customer installed fifth wheel. This option is not available on vehicles that will be placed into service as a truck. * This option is not available with rear axles rated over 52K or with GCWs in excess of 120K. | \$215 | -30# |
| 6600052 | Steel Angle for Customer-Installed Fifth Wheel. For outboard mounted fixed or up to 36.7in. slide fifth wheel w/ o plate drill. * Cannot be combined with options for extra drillings for additional settings. * Cannot be combined with other factory drillings for aftermarket fifth wheel. * Requesting fifth wheel angles for an aftermarket fifth wheel requires a code to describe the fifth wheel so that engineering knows how long the angles should be. * When ordering angles for aftermarket fifth wheel installations include a narrative line describing the attributes of the fifth wheel that will be used. The angles are not available on vehicles that will be placed into service as a truck. | \$437 | 77# |
| 6600053 | Steel Angle for Customer-Installed Fifth Wheel. For outboard mounted fifth wheel. Narrate fifth wheel model & slide; w/ plate drill. * Requesting fifth wheel angles for an aftermarket fifth wheel requires a code to describe the fifth wheel so that engineering knows how long the angles should be. * When ordering angles for aftermarket fifth wheel installations include a narrative line describing the attributes of the fifth wheel that will be used. The angles are not available on vehicles that will be placed into service as a truck. | \$990 | 77# |
| 6602010 | Fifth Wheel: Ramps. * Factory installed fifth wheel ramps require tractor taper end of frame with bent and welded taper ends. This option is not available with short or long tapers. * Fifth wheel ramps are only available for use with rear suspensions rated under 58K. * For use only on tractors with a factory installed or customer installed fifth wheel. This option is not available on vehicles that will be placed into service as a truck. * Not for use with Severe Service. | \$753 | 22# |
| 6603011 | Mounting Plate: Aluminum for fixed fifth wheel replacing standard steel base plate. Adds 0.25 in. to height. * Aluminum mounting plate not available with integrated plate mount fifth wheels. * For use only on tractors with a factory installed or customer installed fifth wheel. This option is not available on vehicles that will be placed into service as a truck. * This option is not available with rear axles rated over 52K or with GCWs in excess of 120K. | \$118 | -35# |

Rear Frame Equipment

Quarter Fenders

| | | | |
|---------|--|-------|-----|
| 6734005 | Quarter Fenders: Stainless Steel w/ Painted Steel brackets, single post mounted. * Frame mounted quarter fenders are not applicable with full length chassis fairings. Full fairings utilize an integral quarter fender. * Quarter fenders are located just ahead of the forward drive axle. * Single post mounted quarter fenders are incompatible with wide track rear axles when a Neway AD or Hendrickson PRIMAAX rear suspension is specified. | \$376 | 55# |
|---------|--|-------|-----|

Rear Frame Equipment

Quarter Fenders

| | | | |
|---------|--|---------|-----|
| 6734008 | Quarter Fenders: Stainless Steel Hogebuilt 30in. Nu Style w/ brackets, frame mounted. * Frame mounted quarter fenders are not applicable with full length chassis fairings. Full fairings utilize an integral quarter fender. * Hogebuilt stainless quarter fenders are not available with Kenworth AG230, AG380, AG400L, AG460 with 60 inch axle spacing, Neway , or Reyco four spring suspensions. * Quarter fenders are located just ahead of the forward drive axle. | \$1,166 | 63# |
| 6734016 | Quarter Fenders: Stainless Steel Hogebuilt 30in. Nu Style w/ brackets, 30in. single post mount. * Frame mounted quarter fenders are not applicable with full length chassis fairings. Full fairings utilize an integral quarter fender. * Quarter fenders are located just ahead of the forward drive axle. | \$968 | 48# |
| 6737120 | Quarter Fenders: Black Polypropylene w/ painted steel brackets, single post mounted, 21 in. white top flap with logo. * Frame mounted quarter fenders are not applicable with full length chassis fairings. Full fairings utilize an integral quarter fender. * Quarter fenders are located just ahead of the forward drive axle. * Single post mounted quarter fenders are incompatible with wide track rear axles when a Neway AD or Hendrickson PRIMAX rear suspension is specified. | \$215 | 43# |
| 6737122 | Quarter Fenders: Black Polypropylene w/ painted steel brackets, single post mounted. No top flap, no holes & no logo. * Frame mounted quarter fenders are not applicable with full length chassis fairings. Full fairings utilize an integral quarter fender. * Single post mounted quarter fenders are incompatible with wide track rear axles when a Neway AD or Hendrickson PRIMAX rear suspension is specified. | \$240 | 40# |
| 6738107 | Quarter Fenders: Brackets Painted Steel For customer-installed fenders. * Frame mounted quarter fenders are not applicable with full length chassis fairings. Full fairings utilize an integral quarter fender. * Quarter fenders are located just ahead of the forward drive axle. | \$44 | 11# |

End-Of-Frame Configurations

Non-Towing Configuration

| | | | |
|---------|---|-------|-----|
| 6741011 | Square end-of-frame w/ crossmember; non-towing. * A square end of frame configuration is typically not the best solution for a tractor chassis. * Chalmers and Hendrickson beam suspensions without track rods do not have a standard rear suspension crossmember. When these suspensions are coded they require an end of frame or rear intermediate crossmember. For cutoff of 60 inches or less an EOF crossmember must be specified. There is an option for the body builder to install the crossmember, 6679995 must be used. * This end of frame style is not available with a pintle hook. Hooks for pulling trailers require a crossmember specifically designed for the hook installation, hooks for yarding dollies are installed in rear suspension crossmembers and an end of frame crossmember would interfere. | \$240 | 30# |
| 6742009 | Square end-of-frame w/o crossmember; non-towing. * A square end of frame configuration is typically not the best solution for a tractor chassis. * End of frame configurations which are applicable to hook at end of frame must code for the hook separately. * With cutoff 60" or less customer or body builder must install structural end of frame crossmember with Chalmers or Hendrickson beam rear suspensions. Use code 6679995 for full trucks when the crossmember will be installed by the body builder. | STD | 0# |

Rear Frame Equipment

End-Of-Frame Configurations

Non-Towing Configuration

| | | | |
|---|--|-----|----|
| 6747000 | Shortest end-of-frame cutoff with specified end-of-frame configuration. Selecting this code will override the overhang dimension found in the Vocational Analysis of Prospector. | \$0 | 0# |
| * The code for shortest end of frame configuration does not apply to tag axles. These axles are always located to the rear of the suspension and a short cutoff is never an option. | | | |

Towing Configuration

| | | | |
|--|---|---------|------|
| 6700005 | Drop-type crossmember below frame pintle hook; square end-of-frame towing configuration. This crossmember limits hitch capacity to 68K. | \$1,151 | 155# |
| * A drop-type crossmember should be used when the pintle hook height will be more than 2 inches below the centerline of the frame rail. | | | |
| * A drop-type crossmember will move the pintle hook location below the frame rails. Provide a hook height sales code so that the hook can be properly located. | | | |
| * Chalmers and Hendrickson beam suspensions without track rods do not have a standard rear suspension crossmember. When these suspensions are coded they require an end of frame or rear intermediate crossmember. For cutoff of 60 inches or less an EOF crossmember must be specified. There is an option for the body builder to install the crossmember, 6679995 must be used. | | | |
| * Drop-type crossmember is only applicable with tail lamps that include a single backup light, not when two backup lights are located in the tail lamp assembly. Also not available with tail lamps mounted between rails 9070034. | | | |
| * The drop-type crossmember for use with pintle hooks is incompatible with logger-style trailer connections. | | | |
| * This end of frame configuration is for use only with a pintle hook. | | | |
| * This option interferes with the ECE compliant under-run required for over the road use in Russia. Not Russian compliant. | | | |
| 6741005 | Straight crossmember for pintle hook mounting; square end-of-frame towing configuration. This crossmember limits hitch capacity to 78K. | \$888 | 135# |
| * Chalmers and Hendrickson beam suspensions without track rods do not have a standard rear suspension crossmember. When these suspensions are coded they require an end of frame or rear intermediate crossmember. For cutoff of 60 inches or less an EOF crossmember must be specified. There is an option for the body builder to install the crossmember, 6679995 must be used. | | | |
| * This end of frame configuration is for use only with a pintle hook. | | | |
| * This option interferes with the ECE compliant under-run required for over the road use in Russia. Not Russian compliant. | | | |

Hooks & Chain Loops

| | | | |
|--|--|-------|-----|
| 6490044 | 2 Pro-Tech chain hangers 35-5950CP w/cable pins and removable lids. | \$474 | 30# |
| * Chain hangers require 20 inches of frame space. | | | |
| * Incompatible with full chassis fairings. | | | |
| * It is highly unlikely that partial chassis fairings with the rearmost section deleted will work with Pro-Tech chain hangers. To get access to the chains they will need to be located behind the fairing near the forward drive tires. | | | |
| 6490144 | 1 Pro-Tech chain hanger, 35-5950CP LH rail with removable lid & cable pin. | \$237 | 15# |
| * Chain hangers require 20 inches of frame space. | | | |
| * Incompatible with full chassis fairings. | | | |
| * It is highly unlikely that partial chassis fairings with the rearmost section deleted will work with Pro-Tech chain hangers. To get access to the chains they will need to be located behind the fairing near the forward drive tires. | | | |

| 7880010 | Mechanical anti-roll channel for two tanks. * In export operating areas tanks may tend to rotate and require 7 inch tank supports or mechanical anti roll for all fuel tanks on the order. * In the Canadian oil field or in Canadian logging service areas tanks may tend to rotate and require 7 inch tank supports or mechanical anti-roll for all fuel tanks on the order. * Mechanical anti-roll channel for use with quantity two fuel tanks. Incompatible with 7 inch wide supports and straps. | \$87 | 13# |
| 7880011 | Mechanical anti-roll channel for three tanks. * In export operating areas tanks may tend to rotate and require 7 inch tank supports or mechanical anti roll for all fuel tanks on the order. * In the Canadian oil field or in Canadian logging service areas tanks may tend to rotate and require 7 inch tank supports or mechanical anti-roll for all fuel tanks on the order. * Mechanical anti-roll channel for use with quantity three fuel tanks. Incompatible with 7 inch wide supports and straps. | \$131 | 22# |
| 7881300 | Welded-in fitting w/ gasket & cover plate for mounting customer-installed fuel tank heater. * F/T plate/gasket for C/I in-tank heater not available with split fuel/hydraulic tanks, Arctic Fox fuel tank heaters and 28.5"x135 gallon fuel tanks. | \$34 | 0# |
| 7883701 | Heavy-duty tank strap anchors. Only available with 28.5 in. fuel tanks. * Heavy-duty strap anchors are not for use with 7 inch wide tank supports. Not for use with severe service. Not available with the clear back of cab [CBOC] DEF tank. * Only available when 28.5 inch fuel tank diameter is used. | \$44 | 4# |
| 7884051 | CNG BOC, BOS Cabinet Height - Low. Measurement is less than or equal to low roof range. * Natural gas tank mounting positions and cab height codes are only available with natural gas engines. | \$0 | 0# |
| 7884052 | CNG BOC, BOS Cabinet Height - Mid. Measurement is greater than low roof but less than high roof range. * Natural gas tank mounting positions and cab height codes are only available with natural gas engines. | \$0 | 0# |
| 7884053 | CNG BOC, BOS Cabinet Height - High. Measurement is greater than or equal to high roof range. * Natural gas tank mounting positions and cab height codes are only available with natural gas engines. | \$0 | 0# |
| 7884054 | CNG/LNG Frame Rail Mounted Tank Only. * A natural gas fueled chassis requires the selection of a tank mounting position sales-code. * Natural gas tank mounting positions and cab height codes are only available with natural gas engines. * Only BOC/BOS mounted natural gas fuel tanks will require a cabinet height sales-codes selection. | \$0 | 0# |
| 7884055 | CNG Body Mounted Cabinet Only. * A natural gas fueled chassis requires the selection of a tank mounting position sales-code. * Natural gas tank mounting positions and cab height codes are only available with natural gas engines. * Only BOC/BOS mounted natural gas fuel tanks will require a cabinet height sales-codes selection. | \$0 | 0# |
| 7884056 | CNG Body Mounted Cabinet with Frame Mounted Tank. * A natural gas fueled chassis requires the selection of a tank mounting position sales-code. * Natural gas tank mounting positions and cab height codes are only available with natural gas engines. * Only BOC/BOS mounted natural gas fuel tanks will require a cabinet height sales-codes selection. | \$0 | 0# |

T800: FUEL TANKS & EQUIPMENT

| Option | Description | Price | Weight |
|----------------------------|--|-------|--------|
| Fuel Tank Equipment | | | |
| Tank Miscellaneous | | | |
| 7884057 | CNG BOC, BOS Mounted Cabinet Only. * A natural gas fueled chassis requires the selection of a tank mounting position sales-code. * Back of sleeper, or back of cab mounted natural gas fuel placements require a sales-code indicating the height of the fuel cabinet. * Natural gas tank mounting positions and cab height codes are only available with natural gas engines. * Only BOC/BOS mounted natural gas fuel tanks will require a cabinet height sales-codes selection. | \$0 | 0# |
| 7884058 | CNG BOC, BOS Mounted Cabinet with Frame Mounted Tank. * A natural gas fueled chassis requires the selection of a tank mounting position sales-code. * Back of sleeper, or back of cab mounted natural gas fuel placements require a sales-code indicating the height of the fuel cabinet. * Natural gas tank mounting positions and cab height codes are only available with natural gas engines. * Only BOC/BOS mounted natural gas fuel tanks will require a cabinet height sales-codes selection. | \$0 | 0# |
| 7889003 | Fuel fill rear tank(s) under. * Rear fill for under cab fuel tanks is not available with the clear back of cab [CBOC] DEF tank. * Rear fill is not available on 24.5 x 100 gallon fuel tanks LH under cab combined with side of cab exhaust on left side for a T680 split-fender hood. * The minimum tank capacity to ensure the filler neck is located behind the cab is 24.5 x 120 gallons. * This option relocates the filler neck from under the door to the rear of the tank. | \$0 | 0# |
| 7889004 | Position fuel fill beyond rear of sleeper. May have gap between under cab components and fuel tank(s) visible on chassis without full chassis fairings. * Fuel fill behind the sleeper is available only with a sleeper. * Fuel fill behind the sleeper is or use only with fuel tanks located behind the cab. * Fuel tanks may need to be moved further rearward so the fill is not blocked when loadlocks are specified. Prospector does not account for this in the Tank/Box workscreen. Consider ordering a Custom Frame Layout. * Use when selecting raised tank supports back of cab under a sleeper. * When rear fill is requested Prospector does not adjust the position of the tanks, even though the tank in most cases must be move rearward. * With tanks located under a sleeper the fill may be partially blocked. Use this code to position tanks rearward to accommodate fill behind the sleeper. | \$0 | 0# |
| 7889006 | Fuel fill forward tank(s) BOC. * Forward fuel fill for tanks located behind the cab is not for use with full chassis fairings. If a sleeper is specified the fill position will be under the sleeper. | \$0 | 0# |
| 7889021 | Fuel tank locking cap(s). Not available w/ hydraulic tank. Tank lock does not match ignition/cab/sleeper locks. * Fuel cap keys will not match the key for cab or sleeper door locks. * Locking fuel caps are incompatible with the fuel anti-siphon device. When the locking caps are ordered the anti-siphon device will not be present. * Locking fuel tank caps for use with any number of fuel tanks. Hydraulic tanks never receive a locking cap. * Requests for matching keys for fuel caps must always be accompanied with a code for the locking caps. * The fuel cap key will not match the key for cab or sleeper doors. If more than one chassis is specified consider keying tank caps for all chassis in the fleet alike. | \$0 | 0# |

DEF Tanks & Equipment

Tanks

| | | | |
|----------------|---|-------|------|
| 7722005 | DEF tank 6.9 clear BOC [CBOC], requires LH under cab fuel tank. This tank has 6.9 gallons of usable volume. The tank will be located inboard of the LH under cab fuel tank. There is no frame space required to locate this tank. Not for use on sleeper chassis. Standard capacity is calculated by fuel capacity of the vehicle and will accommodate two diesel fill-ups for every DEF fill-up. For 1:1 DEF fuel fill ratio, add 7889204. * Heavy-duty 7 inch wide tank supports cannot be used with the clear back of cab [CBOC] DEF tank option. * Incompatible with a sleeper. DEF capacity is very low with this tank and would not be appropriate for the fuel volume that supports most sleeper units. * Left hand under cab extended steps for frame access are not compatible with the clear back of cab [CBOC] DEF tank. Right hand extended steps are fine. * Not available for use with dual side of cab exhaust. * Only for use with a fuel tank diameter of 22 or 24.5 inches. * Rear fill for under cab fuel tanks is not available with the clear back of cab [CBOC] DEF tank. * The Clear Back Of Cab [CBOC] DEF tank is incompatible with any heated fuel tank. * The clear back of cab [CBOC] DEF tank can only be used in the LH under cab position with a fuel tank in the same location. * The clear back of cab [CBOC] DEF tank cannot be used with low left hand back of cab components such as pusher controls. * The clear back of cab [CBOC] DEF tank is incompatible with raised fuel tank supports. * The clear back of cab [CBOC] DEF tank is incompatible with side extenders. * This option is only for use with a fuel tank LH under cab. The standard under cab battery box will not work. | \$111 | -23# |
| 7722011 | Small round DEF tank. 11 gallons of usable volume. The DEF tank will be located on the side you specified. If you have specific configuration or body builder concerns, please utilize the Custom Frame Layout option. Standard capacity is calculated by fuel capacity of the vehicle and will accommodate two diesel fill-ups for every DEF fill-up. For 1:1 DEF fuel fill ratio, add 7889204. | STD | 0# |
| 7722019 | Medium round DEF tank. 20.7 gallons of usable volume. The DEF tank will be located on the side you specified. If you have specific configuration or body builder concerns, please utilize the Custom Frame Layout option. Standard capacity is calculated by fuel capacity of the vehicle and will accommodate two diesel fill-ups for every DEF fill-up. For 1:1 DEF fuel fill ratio, add 7889204. | \$185 | 32# |
| 7722031 | Large round DEF tank. 31.1 gallons of usable volume. The DEF tank will be located on the side you specified. If you have specific configuration or body builder concerns, please utilize the Custom Frame Layout option. Standard capacity is calculated by fuel capacity of the vehicle and will accommodate two diesel fill-ups for every DEF fill-up. For 1:1 DEF fuel fill ratio, add 7889204. * Most truck stop fuel fill islands have DEF fill capability only on the LH side. For ease of filling a LH DEF tank location should be considered. | \$343 | 39# |
| 7722035 | EURO4 or 5 Square DEF tank. 21.1 gallons. | \$0 | 0# |

DEF Tank Miscellaneous

| | | | |
|----------------|--|-------|----|
| 7840038 | Polished cover for 1 DEF tank any size. * The options for DEF tank polish are for use only with the round tanks. Not available with the clear back of cab [CBOC] or aerodynamic style DEF tanks. * The polished DEF tank cover obstructs the view of the DEF tank/straps. There is no provision to order polished straps in combination with the polished cover. | \$329 | 3# |
|----------------|--|-------|----|

There is no provision to order polished straps in combination with the polished cover. * When polished fuel tank straps are requested the customer may also want polished DEF straps [unless they request a polished tank cover]. | \$69 | 0# |
| 7889203 | Standard DEF to fuel fill ratio: 2:1 or greater. | \$0 | 0# |
| 7889204 | Optional DEF to fuel fill ratio between 1:1 and 2:1. | \$0 | 0# |
| DEF Tank Location | | | |
| 7889603 | DEF tank location is on the RH. * Most truck stop fuel fill islands have DEF fill capability only on the LH side. For ease of filling a LH DEF tank location should be considered. | \$0 | 0# |
| 7889604 | DEF tank location is on the LH. * On T680, T880 and W990 day cabs without deck plates, LH DEF tank will have the DEF lines will be routed above the rail. * This location is not available on the T660 with a 22 inch diameter 120 gallon fuel tank located LH under the cab when RH under cab exhaust is specified. | \$0 | 0# |
| Fuel Tank Miscellaneous | | | |
| 7210000 | Delete base model gallon aluminum fuel tank. Hardware & plumbing deleted. * ISL-G and ISX12-G engines do not utilize any diesel tanks. | (\$1,538) | -114# |

T800: CAB EXTERIOR

| Option | Description | Price | Weight |
|-------------|---|---------|--------|
| Cabs | | | |
| 8024310 | <p>Cab: Curved Glass Conventional. Cab Includes aluminum & fiberglass fully hucked cab w/ all aluminum bulkhead doors & continuous stainless steel piano-style door hinges. Single electric horn standard. Incandescent exterior lights include diagnosable bulb detection and warning. Trailer cable on tractors includes integrity detection. Standard features include multiplex wiring for interior lights, automated pre-trip inspection, short and open check diagnostics. Warning alarm will sound when lights are left on.</p> <p>* Curved glass daycab can be coupled with optional modular sleeper. Includes heavy-duty reinforcements on the C500, no separate code required. Okay for T4 series chassis. Cannot be used with AeroCab sleeper, see 8025300.</p> <p>* T660 daycab/extended daycab only available with export engine.</p> <p>* The curved glass cab is not compatible with sheet metal hoods.</p> | STD | 0# |
| 8024344 | <p>Cab: Flat Glass Conventional Cab. Includes aluminum & fiberglass fully hucked cab w/ all aluminum bulkhead doors & continuous stainless steel piano-style door hinge & pins. Includes heavy-duty reinforcements on the C500 as standard. Single electric horn is standard. Incandescent exterior lights include diagnosable bulb detection and warning. Trailer cable on tractors includes integrity detection. Standard features include multiplex wiring for interior lights, automated pre-trip inspection, short and open check diagnostics, and programmable daytime running lights. Warning alarm will sound when lights are left on.</p> <p>* Flat glass cab is available as a daycab or with a modular sleeper.</p> | \$0 | 0# |
| 8025300 | <p>Cab: AeroCab Curved Glass Conventional. AeroCab includes aluminum & fiberglass fully hucked cab w/ all aluminum bulkhead doors & continuous stainless steel piano-style door hinge & pins. Available only w/ AeroCab sleepers. Not for use on W900 w/ set forward axle. C500B: 123 in. BBC. 74 in. FA to BOC. T660B: 122 in. BBC. 74 in. FA to BOC. T800B: 121 in. BBC. 74 in. FA to BOC. W900B: 120 in. BBC. 90 in. FA to BOC. W900L: 130in. BBC. 100 in. FA to BOC. Incandescent exterior lights include diagnosable bulb detection and warning. Trailer cable on tractors includes integrity detection. Standard features include multiplex wiring for interior lights, automated pre-trip inspection, short and open check diagnostics, and programmable daytime running lights. Warning alarm will sound when lights are left on.</p> <p>* AeroCab curved glass cab always requires an AeroCab sleeper sales code. Not twin steer chassis. Expanded availability to both the T4 series and the C500 for 2010.</p> <p>* AeroCab sleeper on the T4 series requires 8-1/2 foot wide mirror brackets or aerodynamic mirrors.</p> <p>* The W900S model is not for use in an AeroCab sleeper configuration.</p> | \$0 | 0# |
| 8049001 | <p>Cab: Extended Day Cab w/ Curved Glass. Includes aluminum & fiberglass fully hucked cab w/ all aluminum bulkhead doors & continuous stainless steel piano-style door hinge & pins. | <ul style="list-style-type: none">* Not available on Russian compliant vehicles. | | | |

T800: CAB EXTERIOR

| Option | Description | Price | Weight |
|--------------------------|---|---------|--------|
| Hoods, Fenders & Grilles | | | |
| Hoods, Fenders & Grilles | | | |
| 8090103 | Hood: Sloped Metton Hood W/ Grille & Shell Use For T800B 1-Piece Requires Engine Mounted Air Cleaner, 1440 Square In. Radiator & 2007+ Engines. * Not for use with a front engine PTO. * Sloped Metton hood for use on the T800 with 1440 sq inch radiator. Can be used with 2007+ engines only. Requires an engine mounted air cleaner. The hood scoop for the air intake is standard. Not available on twin steer configurations. | STD | 0# |
| 8090122 | Hood: Sloped Metton hood With Split Fenders. Includes Grille and Shell. Use for T800B 2-Piece Requires 1440 Square In. Radiator. Required With Cowl Mounted Air Cleaner or Twin Steer * Not for use with a front engine PTO. * Sloped split fender Metton hood for use on the T800 with 1440 sq inch radiator. Use with engine mounted air cleaner or cowl mounted air cleaner. The hood scoop for air intake is standard when an engine mounted air cleaner is specified. | \$1,711 | 11# |
| 8090123 | Hood: Sloped Unitglas Wide Hood W/ Split Fenders. Use for T800W Requires 1780 Square In. Radiator & 2007+ Engine. * T800 wide hood can be used with daycab, extended daycab, or AeroCab sleepers. Requires 1520 sq inch radiator for use with export engines, and a 1780 sq inch cooling module for 2007+ engines. Not available with a front engine PTO provision, radiator mounted grille, extended rails. or with a mixer package. * T800W hood for use with 2007+ engines. Not compatible with a mixer package, front engine PTO, or with extended frame rails. | \$4,504 | 33# |
| 8090137 | T800 Straight unitglas hood w/ split fenders. Use w/ extended frame rails or FEPTO. * T800 twin steer not available with FEPTO * Unitglas straight split-fender hood is required for use on T800B with front engine PTO or with extended frame rails. Can be used with a 1440 sq inch radiator only. | \$5,449 | 205# |
| 8095550 | Fenders: Two-piece aluminum diamond-plate fenders. * Diamond plate fenders are incompatible with the short hood on T800 chassis. * Twin steer chassis require either 1-piece wide steel fenders or 2-piece aluminum diamond plate fenders. * Two-piece diamond plate fenders are for use on twin steer chassis. | \$4,281 | 63# |
| Grilles Only | | | |
| 8098404 | Additional 4 ribs on radiator grille. | \$113 | 2# |
| 8098421 | Radiator Mounted Grille for use with W9S or C500 or T800 standard width sloped hood with 1430 or 1520 Radiator. This code is not applicable to sheet metal hoods. For C500 with 1780 Radiator or T800 FEPTO models, see 8098424. * W9S fixed grill is only available with PX9 engines. | \$685 | 5# |
| 8098424 | Radiator Mounted Grille for use with C500 with 1780 Radiator, T800 FEPTO, or T800 Wide hood. This code is not applicable to sheet metal hoods. * Extended frame rails on the T800 require a radiator mounted grille. This code is optional on the C500 and recommended if a front engine PTO will be used. * Grille and shell mounted to radiator not for use with sheet metal hoods because the hood does not pivot at the lower front edge like Unitglas or Metton. | \$710 | 0# |

| 8800440 | Grabhandle: LH 36 in. BOC. * 36 inch tubular grab handles mounted to the back of cab or sleeper are not for use with dual independent exhaust, dual exhaust with BOC/S mounted tailpipe, LH single independent exhaust or transverse exhaust. * All orders must have complete frame access if any one of the three components is selected. Step and grab handle on the same side of the vehicle accompanied by deck plate. * Tubular style back of cab mounted grab handles will not fit on the extended daycab due to the structure of the cab. | \$87 | 2# |
| 8890869 | Severe service reinforcements for aluminum cab sill. * Severe Service reinforcement for the aluminum cab sill. Not for use on C500 which has a cab code specific to this need. Not for use on AeroCabs. * Severe Service vehicles operating in Canada require the reinforced cab sill option on daycab chassis. * The Severe Service kit on T800 models requires a heavy-duty rear cab support crossmember and reinforced cab sills. | \$175 | 17# |
| 8890872 | Kenworth cab/sleeper air suspension for use w/ 38/62/72/86 in. AeroCabs only. * AeroCab air cab/sleeper suspension is not for use with 11-5/8 inch rails due to distance between rail and cab, except on C500 with 38 inch sleeper due to cab height. * AeroCab cab/sleeper suspension is standard on Studio sleeper without a sales code. * AeroCab sleeper suspension is required on all AeroCab sleeper chassis. The suspension is not for use with modular sleepers. * Air shifted 4-speed auxiliary transmissions are not compatible with air cab or sleeper suspensions due to physical interference issues. * Heavy-duty rear cab support is not compatible with an air cab suspension. | \$0 | 0# |
| 8890898 | Link Cabmate suspension. * Air shifted 4-speed auxiliary transmissions are not compatible with air cab or sleeper suspensions due to physical interference issues. * Heavy-duty rear cab support is not compatible with an air cab suspension. * Link Cabmate cab air suspension for non-AeroCabs only. Not for use with top mounted PTO. * The cab air suspension is not available on the C500 model used with a front drive axle. * The rear cab or sleeper air suspension cannot be used with an ATO1750-4C auxiliary transmission. | \$721 | 22# |
| 8890899 | Link Bunkmate sleeper suspension. * Air shifted 4-speed auxiliary transmissions are not compatible with air cab or sleeper suspensions due to physical interference issues. * Link Bunkmate sleeper air suspension for non-AeroCab sleepers. Not for use w/ 11-5/8 inch rails. Not for use with Espar bunk heater. For AeroCabs see code 8890872. * The rear cab or sleeper air suspension cannot be used with an ATO1750-4C auxiliary transmission. * Typically the Link Bunkmate air suspension is accompanied by a request for the Cabmate air suspension. | \$828 | 52# |

| Heaters & Air Conditioning | | | |
| 8178210 | Heater/Air Conditioner: Separate Units, Cab & Sleeper. W/integral Defrosters & A/C. Separate Heater & A/C In Sleeper. Includes 5 Mode Rotary Control In Dash. 45,000 BTU Cab Heater. Separate 29,000 BTU Sleeper Heater W/AC, Thermostatically Controlled. T660 Includes Filter Media. Includes On/Off Button For Sleeper Unit In Air Flow Control Dial. Parallel Plumbing Is Included W/ All Sleepers And Allows For Independent Control Of Heat Output At Each Heater. Shutoff Valves Are Optional. * Not applicable to the 38 inch AeroCab which utilizes cab only HVAC. * R134a excise tax is required on Canadian registered vehicles whenever air conditioning is requested. | \$0 | 0# |
| Miscellaneous | | | |
| 8109472 | Roof mounted condenser for air conditioning. * If frame access is required when using a roof mounted condenser you must also code for side extenders. * Metal ground plate/bracket for an aftermarket radio antenna is not available with a sunroof or for use with a roof mounted condenser. * Not available on an extended daycab or with an AeroCab sleeper. * Only available on the W900 model with an export engine. * Roof mounted condenser is incompatible with trip tracking when there is not a sleeper. This is not an option when sleeper air conditioning is specified. | \$1,244 | 90# |
| 8154005 | Auxiliary recirculating cab heater: For use only as a supplement to cab primary heater, mounted under toolbox rider seat. Recommended for frequent operation in temperatures below 0 degrees Fahrenheit. Plumbed in parallel to primary cab/sleeper heater. * An auxiliary heater between the seats cannot be used in combination with an in-cab battery box or fire extinguisher on the floor next to the passenger seat due to interference. * In dash PTO controls, LNG readout, fifth wheel air kingpin release, auxiliary heater, two speed rear axle and NavPlus HD all occupy the same dash space. No two are allowed in combination. * Records compartment mounted to seat base requires a toolbox or utility box on passenger side. Unavailable with heater between the seats due to interference. * Sleeper chassis requesting an auxiliary heater must code for a toolbox style passenger seat. * The auxiliary heater has dash mounted controls that eliminate four optional gauge spots. | \$621 | 22# |
| 8158011 | Espar Airtronic D2 Sleeper or Bunk Heater w/thermostat. Rated for 5,000 ft of elevation * Espar Slpr or Bunk Heater Airtronic is not available with an in-cab battery box. * In most configurations, Espar cannot be used in combination with Webasto engine heater. Submit an OAR for review if the combination is absolutely required. * Insulated lines to the auxiliary heater are only for use when the heater is coded as well. * Not available in the 42 inch sleeper with request for Diamond sleeper lining. * Not available with natural gas engines. * Not available with Rear Sleeper Sliding Window sales codes due to exhaust fumes. * Not for use on LNG powered vehicles. * Not for use with optional liftable bunks for sleepers other than 72 inch AeroCabs. Not available on 38 inch AeroCab which comes with a liftable bunk only. Can be used on 86 inch AeroCab with Diamond interior only with the fixed bunk option 8520080. Not available with Studio interior unless fixed bunk option replacing sofa bed is requested [8520086]. Not for use with drawers under the bunk in any configuration. * The Espar sleeper heater requires that four batteries be specified. One of these batteries may be replaced with an electronic starting module. | \$1,594 | 14# |
| 8158012 | Insulated fuel lines for Espar heater. * Insulated lines to the auxiliary heater are only for use when the heater is coded as well. | \$76 | 0# |

| 8201206 | Fixed steering column w/ECE compliant column lock * Steering column required for and only available with Russian Compliance code 0098035. | \$378 | 2# |
| Instruments & Controls | | | |
| 8240620 | Canadian instrument package: KPH speedometer replaces MPH. * Metric gauges are required for Russian compliance. * With this option miles per hour vehicle speed will be listed as the secondary scale. | \$0 | 0# |
| 8282004 | KW Driver Information Center: Includes fuel economy, RPM display, trip information, truck information, diagnostics, gear display, alarm clock. * The Kenworth Driver Information Center includes instantaneous and average fuel economy, full screen rpm reading, ignition countdown timer, trip odometer and trip readings, truck configuration information, diagnostics for warning lights, current gear display with AutoShift or UltraShift transmissions, clock with alarm, modification of settings such as time zone / unit of measure / language. The display does not impact total gauge or switch count. * The Kenworth Driver Information Center is standard on all models that use a 2007+ engine. | STD | 0# |
| 8282006 | Odometer units locked to match speedometer dial. Locks instrumentation to record the units of measure indicated by the primary scale. For instance, U.S. Domestic trucks would not be able to toggle from miles to kilometers on the trip odometer. | \$15 | 0# |

| Option | Description | Price | Weight |
|-----------------------------------|---|-------|--------|
| Instruments & Controls | | | |
| 8282009 | Instrument package: Includes speedometer, tachometer, fuel gauge, engine coolant temperature gauge, engine oil pressure, voltmeter. Class 8 also includes primary & secondary air reservoir gauges & an air application gauge. DEF level gauge and warning lamp are included with 2010+ engines. Engine hour meter and outside air temperature readouts are standard. Primary read out will be MPH. Add 8240620 to switch primary scale to KPH in Canada. * The standard speedometer reads in mph on the primary scale. * The T4 Series dash accommodates twelve gauges. You may select up to four additional gauges with a manual transmission or three optional gauges with an Allison transmission [which includes a transmission oil temperature gauge]. * Two speed rear axle controls, Vorad, 3 inch hydraulic pressure gauge, small flat panel on the dash, air operated kingpin release, in-dash auxiliary heater controls, large in-dash PTO controls, and air shifted auxiliary transmission controls all occupy a 4 gauge spot in the dash, effectively lowering maximum gauge count by four. * With ISL-G and ISX12-G engines, the fuel level and DEF fluid level gauges will not be part of the standard dash. In this case six [6] gauges are standard with the instrument panel. | STD | 0# |
| Gauges | | | |
| 8220106 | Gauge: Dash mounted air filter restriction gauge. | \$147 | 0# |
| 8221100 | Gauge: 2 air suspension pressure gauges. For use w/air suspension w/dual leveling valves. * Optional equipment for air suspensions only. * Two air pressure valves for use with air suspensions that have dual leveling valves. Neway and Kenworth AG690 tridem are standard with dual valves. Hendrickson Primaax tandem and Kenworth AG400 and AG460 can option for dual valves. | \$297 | 0# |
| 8221136 | Gauge: Trailer reservoir air pressure gauge. | \$74 | 0# |
| 8221137 | Gauge: Trailer air application gauge. | \$55 | 0# |
| 8221138 | Gauge: Air suspension pressure gauge. For dual leveling valves, not dual read. * An air suspension pressure monitoring gauge is available with request for an air suspension. This gauge is for use with a dual leveling valves air suspensions on suspensions that have a single valve with request for optional dual leveling valves. * Optional equipment for air suspensions only. | \$274 | 0# |
| 8221139 | Gauge: Additional dash mounted air pressure gauge Includes piping to BOC/BOS. | \$43 | 0# |
| 8221140 | Gauge: Two additional dash mounted air pressure gauges. Include piping to BOC/BOS. | \$98 | 0# |
| 8221144 | Gauge: Air suspension pressure gauge. * An air suspension pressure monitoring gauge is available with request for an air suspension. This gauge is for use with a single leveling valve and is not for use with tridem rear suspensions which always employ dual valves. Incompatible with other air suspensions with requests for optional dual leveling valves. * Optional equipment for air suspensions only. * The request for dual valves is not available for use with a single air pressure gauge. | \$105 | 0# |
| 8221160 | Gauge: Engine Oil Temperature Gauge With Integral warning light. The NavPlus HD unit includes a virtual engine oil temperature gauge. | \$34 | 0# |
| 8222115 | Gauge: All metric gauges. * Metric gauges are not available for U.S. operation. * Metric gauges are required for Russian compliance. * Not available on T680 by its self. Must use with Canadian Instrument Package 8240620. | \$0 | 0# |

Sound System Speakers

Options for Kenworth Radios

| | | | |
|---|---|-------|----|
| 8699514 | Speakers: Four 4 in. x 6 in. high performance. Adds 2 speakers to the Panasonic standard 2. Located in cab header & rear cab corners. | \$117 | 0# |
| * Cab speakers interfere with corner window placement for daycabs. Corner windows and speakers can be used in combination with the extended daycab. | | | |
| * NFPA compliance kit interferes with these radio speaker locations. | | | |

Options for Sleepers

5.25" Two-Way Coaxial Speakers

| | | | |
|---|---|------|----|
| 8698998 | Speakers: Two 5-1/4 in. For sleeper w/fader in radio for volume control to sleeper. | \$56 | 2# |
| * Sleeper speakers require a coded sleeper. | | | |

Sound System Equipment

| | | | |
|--|--|-------|----|
| 8699017 | Telescoping Antenna: Mounted Behind LH Door. Replaces Top-of-Cab Antenna. | \$80 | 0# |
| * Radio antenna mounted on B-pillar behind door is not available on T680/T880 with sleeper. | | | |
| * Telescoping radio antenna mounted on LH side behind the cab door requires a code for factory installed radio, antenna lead, or installation kit with antenna lead. Does not fit on AeroCabs. | | | |
| 8699042 | Constant Power Supply To Sound System: For Use W/Battery Disconnect. | \$33 | 0# |
| * Constant power for radio memory when the battery is disconnected maintains clock and radio pre-sets, and is only be used with factory installed disconnect switches. | | | |
| * Constant power to the radio to maintain pre-sets is not available with an in-cab battery box or with the Kenworth NavPlus HD option. NavPlus HD includes a battery back-up that saves pre-sets in memory when the battery power is disconnected. | | | |
| 8699109 | Antenna, wiring, radio cut-out & bracket: For din-mounted radio. | \$87 | 2# |
| * Aftermarket radio installation or speakers is not for use in combination with a factory installed radio. | | | |
| * Aftermarket radio installation or speakers is not for use in combination with NavPlus. | | | |
| * The aftermarket installation kit does not include speakers for the radio. To ease the installation process consider adding them to the chassis from the factory. | | | |
| 8699147 | Solid post antenna: Mounted on LH cowl. Replaces top-of-cab antenna. Recommended for dump trucks, loggers, & where overcab clearance is limited. | \$28 | 0# |
| * Radio antenna mounted to the LH cowl using a solid post interferes with aerodynamic mirrors. | | | |
| 8699900 | Metal ground plate: Two-way radio. For customer-installed antenna located in center of cab roof. | \$123 | 2# |
| * Metal ground plate/bracket for an aftermarket radio antenna is not available with a sunroof or for use with a roof mounted condenser. | | | |
| * Not available with 52", 76" or 40" sleepers. | | | |
| * Not available with MX engines. | | | |

| Information & Communication Systems | | | |
| 8700767 | Wiring Only for Qualcomm MCP200 Pre-Wiring for Qualcomm MCP200T. Pre-Wire with Both Cellular and Terrestrial Service. Includes wiring only. Use 8700896 and 8700897 for mounting brackets. * If mounting brackets are desired, then both mounting brackets 8700896 and 8700897 are required. * Loadlock holders may interfere with Qualcomm MCP200 Satellite (SDM) antenna bracket at upper LH corner BOS. * Not available with natural gas fuel systems, or Russian export. * Restrict s/c 8700767 and 8700766 with any Allison transmission using generation 4/5 controls. | \$1,469 | 10# |
| 8700774 | Mounting bracket: On sleeper roof. For customer-installed Qualcomm antenna. * Mounting bracket on sleeper roof for Qualcomm antenna can be used only with flattop AeroCab or modular sleepers. * Not available with Qualcomm MCP110 or MCP200. * There is a potential that metallic paint will interfere with satellite or radio type signals. * This option is not available with Russian compliance. | \$250 | 4# |
| 8700787 | Mounting bracket: For customer-installed Qualcomm antenna. Located Back-of Sleeper wall *OR* Center Rear of Daycab roof. Not for T680. * Not available with Qualcomm MCP110 or MCP200. * There is a potential that metallic paint will interfere with satellite or radio type signals. * This option is not available with Russian compliance. * This Qualcomm antenna mounting bracket is not available with the 42 inch modular sleepers. * When specifying this antenna mounting bracket be aware that a roof fairing will produce interference with the satellite signals. | \$195 | 4# |
| 8700789 | Mounting bracket: For customer-installed Qualcomm antenna. On cab roof. * Mounting bracket on cab roof for Qualcomm antenna. Not for use on daycabs with a roof fairing or a roof mounted condenser. Not for use with sunroof or 26 inch long air horns. Incompatible with AeroCab sleepers or with Varashield on extended daycabs. * Not available with Qualcomm MCP110 or MCP200. * This option is not available with Russian compliance. | \$115 | 4# |
| 8700791 | Provision for mounting antenna for Qualcomm tracking system in roof fairing. For 62 in./72 in. AeroCab AERODYNE & 62 in./72 in. AeroCab FlatTop. * Not available with Qualcomm MCP110 or MCP200. * Provision for Qualcomm antenna in roof fairing. Requires a code for roof fairing. Not for use on 38 inch AeroCab or 42 inch modular sleepers. * There is a potential that metallic paint will interfere with satellite or radio type signals. * This option is not available with Russian compliance. | \$212 | 8# |
| 8700793 | Message waiting light: For Qualcomm. * Message waiting light for Qualcomm trip tracking. Requires separate code for wiring the Qualcomm unit. * There is a potential that metallic paint will interfere with satellite or radio type signals. * Trip tracking is not applicable to Russian compliance. | \$20 | 0# |
| 8700824 | Wiring only: For Qualcomm MCP100. Trailer Tracs (AKA Q-TRACS) wiring is standard on T680/T880 models. * Trip tracking is not applicable to Russian compliance. | \$1,056 | 11# |
| 8700870 | Mounting brackets: two for customer-installed Qualcomm MCP200 system antennae on cab. | \$357 | 0# |

| Option | Description | Price | Weight |
|--|---|---------|--------|
| Information & Communication Systems | | | |
| 8700871 | Pre-Wire for Peoplenet G3 with Multi Bus Adapter (MBA) for 2010+ engines. Includes Antenna Bracket. * Not available with dual exhaust back of sleeper or LH loadlocks. * Qualcomm bracket not required with Peoplenet Pre-Wire (S/C 8700871). | \$1,992 | 0# |
| 8700895 | Exterior Initiation or Inhibition of Regen Thru J1939 BCan Communications. | \$35 | 0# |
| 8700896 | Mounting Bracket: C/I Qualcomm Terrestrial Antenna. Provision for mounting antenna with customer installed Qualcomm tracking system. For use with cellular antenna (WIB). DayCab Location: Top of roof, BOC. Sleeper Location: Left Hand, BOS (NOT with dual BOS Exhaust). Requires 8700766. Aerocab Restrictions: NA with Dual BOS exhaust. Daycabs and Extended Daycabs Restrictions: NA with Single beacon lamp roof mounted at rear on centerline (sales codes 9080026 or 9080027), NA with Roof Condenser, NA with Sunroof, NA with Inboard Air Horns, NA with Varashield, NA with Collapsible 2 piece Airshield on Daycabs (OK on Extended Daycabs). * Loadlock holders may interfere with Qualcomm MCP200 Satellite (SDM) antenna bracket at upper LH corner BOS. * Not available with Qualcomm MCP110 or MCP200 antenna bracket(s) mounted on top of cab roof. * Qualcomm mounting brackets require trip reporting systems (8700766 or 8700767). Use 8700766 with single bracket 8700896. If using two brackets code 8700767. * Qualcomm mounting brackets without a sleeper are not available with roof mounted condenser s/c 8109472. * Qualcomm mounting brackets without a sleeper are not available with varashield 8820221. * When used with a daycab, Qualcomm mounting brackets are not compatible with collapsable two-piece roof fairings. * When used with a sleeper, Qualcomm mounting brackets are not compatible with dual back of sleeper exhaust. | \$142 | 4# |
| 8700897 | Mounting Bracket: C/I Qualcomm Satellite Antenna. Provision for mounting antenna for customer installed Qualcomm tracking system. For use with satellite antenna (SDM). DayCab Location: Top of roof, BOC. Sleeper Location: Left Hand, BOS (NOT with dual BOS Exhaust). Requires 8700766 or 8700767. Aerocab Restrictions: NA with Dual BOS exhaust. Warning for Aerocabs: Satellite Antenna bracket may interfere with Customer Installed LH BOS Loadlock Holders; recommend to change LoadLock Holders brackets to RH. Daycabs and Extended Daycabs Restrictions: NA with Single beacon lamp roof mtd at rear on Centerline (S/C 9080026 or 9080027), NA with Roof Condenser, NA with Sunroof, NA with Inboard Air Horns, NA with Varashield, NA with Collapsible 2 piece Airshield on Daycabs (OK on Extended Daycabs). * Loadlock holders may interfere with Qualcomm MCP200 Satellite (SDM) antenna bracket at upper LH corner BOS. * Not available with Qualcomm MCP110 or MCP200 antenna bracket(s) mounted on top of cab roof. * Qualcomm mounting brackets require trip reporting systems (8700766 or 8700767). Use 8700766 with single bracket 8700896. If using two brackets code 8700767. * Qualcomm mounting brackets without a sleeper are not available with roof mounted condenser s/c 8109472. * Qualcomm mounting brackets without a sleeper are not available with varashield 8820221. * When used with a daycab, Qualcomm mounting brackets are not compatible with collapsable two-piece roof fairings. * When used with a sleeper, Qualcomm mounting brackets are not compatible with dual back of sleeper exhaust. | \$180 | 5# |
| 8700902 | Wiring only:For customer-installed Bendix AutoVue lane departure system. Replaces code 8700845. | \$321 | 0# |

| 8700966 | Kenworth NavPlus HD Navigation System: Vantage, Splendor, APEX, Summit, or Pinnacle interior. System hardware includes: head unit that mounts in radio opening and 7in. high resolution touchscreen display mounted in dash area four. Includes: Truck specific navigation by ALK, Sirius and XM satellite radio receiver. | \$2,525 | 0# |
| * Virtual NavPlus HD Gauge(s) requires NavPlus or Diamond interior. | | | |

T800: LIGHTS & SIGNALS

| Option | Description | Price | Weight |
|----------------------|---|--------|--------|
| Headlamps | | | |
| 9010335 | Headlamps: Single rectangular halogen. * Headlights for use in Export operating areas only. * Not available on T800B. Not for use on the T660. | \$0 | 0# |
| 9010421 | Headlamps: Dual Rectangular halogen (non-sealed) w/ integral marker parking lamps. * Headlights for Export operating areas only. Not T8 wide hood, twin steer, or RH steer. | \$364 | 0# |
| 9010702 | Headlamps: Single rectangular halogen. * Not available on T800B. Not for use on the T660. * Single rectangular headlights are required on the C500 straight Unitglas hood with non-driving front axles. Dual rectangular lights are still available for use with the sheet metal hood. | (\$34) | 0# |
| 9010802 | Headlamps: Dual Rectangular, extended life halogen * Dual rectangular headlights are not for use on the T800 with wide hood or RH steer. | STD | 0# |
| 9010809 | Headlamps: Dual rectangular halogen extended life dual beam with position lamp: Russian compliant vehicles only. * These headlights are for use in export operating areas only. | \$364 | 0# |
| 9010911 | Headlamps: Lowered to approximately 1.2 meters from the ground. * Lowered headlights for use in Export operating areas. For use on flat glass cabs only. Not T8 wide hood or twin steer axles. | \$0 | 0# |
| Marker Lights | | | |
| 9020005 | Marker Lights: Two out-board mounted on roof, nonpedestal replacing standard. ICC-type. * Two non-pedestal cab roof mounted market lights for Export operating areas only. Not for use with aerodynamic sunvisor which requires integral marker lights. | \$40 | -4# |
| 9020006 | Marker Lights: Two out-board mounted white, five standard amber marker lights on cab roof. * Two non-pedestal cab roof mounted market lights for Export operating areas only. Not for use with aerodynamic sunvisor which requires integral marker lights. | \$75 | 0# |
| 9022135 | Marker Lights: Five rectangular. * Five rectangular marker lights mounted on cab roof. Not available with sunvisor styles which includes integral marker lights * This option is not available for Russian compliant chassis. | \$133 | 0# |
| 9022137 | Marker Lights: Five, rectangular, LED * Five rectangular marker lights mounted on cab roof. Not available with sunvisor styles which includes integral marker lights * This option is not available for Russian compliant chassis. | \$201 | 0# |
| 9024102 | Marker Lights: Five additional rectangular, LED, top of sleeper. * Five additional rectangular marker lights mounted on sleeper roof is available for all AeroCabs. Modular sleepers or remote mounted sleepers are not compatible. * Request for five additional marker lights mounted on sleeper roof cannot be accompanied by roof fairing. * The option for LED marker lights on sleeper roof is available when LED style marker lights have been requested on the cab. * This option is not available for Russian compliant chassis. | \$466 | 2# |

T800: LIGHTS & SIGNALS

| Option | Description | Price | Weight |
|----------------------|---|-------|--------|
| Marker Lights | | | |
| 9026200 | Marker Lights: Five aerodynamic mounted in sunvisor. * Aerodynamic marker lights integrated into the sunvisor on daycabs, extended daycabs, or AeroCab chassis. * These cab marker lights are integrated into the external sunvisor and require a visor style which accommodates them. * This option is not available for Russian compliant chassis. | STD | 0# |
| 9026205 | Marker Lights: Five aerodynamic, LED mounted in sunvisor. * Aerodynamic marker lights integrated into the sunvisor on daycabs, extended daycabs, or AeroCab chassis. * These cab marker lights are integrated into the external sunvisor and require a visor style which accommodates them. * This option is not available for Russian compliant chassis. | \$45 | 0# |
| 9027120 | Marker Lights: Cab & mid-frame Russia compliant vehicles only. * Marker lights for export operating areas only. * Russian compliance turn signal and marker lights. | \$500 | 0# |
| 9090037 | Trailer Marker Lights w/ Separate Switch * This option is not available for Russian compliant chassis. | \$39 | 0# |
| 9090039 | Marker Lights: Interrupter Switch. Included in Turn Signal For All Models Except T3. The T3 Switch Is In The Dash. * The marker light interrupter switch is a standard function of the Smartwheel. This code is not required with a Smartwheel. * This option is not available for Russian compliant chassis. | STD | 0# |
| 9090115 | Reflectors: Two Midframe * Mid-frame mounted reflectors for use on full trucks only. Meeting FMVSS 108 would be the responsibility of the body builder or final stage manufacturer. * This component is not available with full length chassis fairings due to interference issues. * This option is not available for Russian compliant chassis. * Trucks over 30 feet in length require mid frame reflectors, sales code 9090115. | \$23 | 0# |
| 9090117 | Marker Lights: Midframe & reflectors mounted standout. Required on tractors where overall length exceeds 30 feet. * This component is not available with full length chassis fairings due to interference issues. * This option is not available for Russian compliant chassis. * Tractor chassis over 30 feet in total length require mid-frame marker lights. On full trucks this light may be installed by the body builder. Russian Compliant chassis are the exception - code 9027120 covers mid-frame marker light requirement. | \$194 | 22# |
| 9090119 | Marker Lights: Mid-Frame Marker Lights & Reflectors Mounted On Side Extenders. Required On Tractors Where Overall Length Exceeds 30 Feet. * Mid-frame marker lights are available for use with side extenders. Applicable to 72 inch or larger sleepers. * This option is not available for Russian compliant chassis. * Tractor chassis over 30 feet in total length require mid-frame marker lights. On full trucks this light may be installed by the body builder. Russian Compliant chassis are the exception - code 9027120 covers mid-frame marker light requirement. | \$179 | 2# |

T800: LIGHTS & SIGNALS

| Option | Description | Price | Weight |
|---------------------------|--|---------|--------|
| Turn Signal Lights | | | |
| 9030010 | Turn Signal Lights: Mounted on fender * This option is not available on Russian compliant chassis. | STD | 0# |
| 9030014 | Turn Signal Lights: LED, mounted on fender * This option is not available on Russian compliant chassis. | \$108 | 0# |
| 9030027 | Turn Signal Lights: Additional round. Located in lower portion of cab or sleeper side extenders. * Turn signals mounted in the lower portion of the side extenders are only applicable to sleeper chassis. | \$308 | 0# |
| 9034107 | Turn Signal Lights: Rectangular mounted mirror bottom, in addition to standard. * This option is not available on Russian compliant chassis. * Turn signals mounted to the bottom of the mirror brackets are not for use with aerodynamic style mirrors. | \$233 | 2# |
| 9039010 | Turn Signal Lights: Mounted below sleeper, additional (facing front rear). * Turn signal lamps mounted under the sleeper box require a sleeper code. Interferes with chassis fairings. | \$204 | 2# |
| 9039012 | Turn Signal Lights: Mounted below sleeper side extender, additional (facing front rear). * This option is not available on Russian compliant chassis. * Turn signal lamps mounted under the sleeper box require a sleeper code and side extenders. Interferes with chassis fairings. Not available on 86 inch Studio [standard with panel lights] on models other than T660. | \$238 | 2# |
| 9039906 | Side Turn Indicators & Direction Indicators: Russian compliant vehicles only. * Russian compliance turn signal and marker lights. * Turn signals for export operating areas only. | \$139 | 0# |
| Other | | | |
| 9030034 | Wiring: Customer Installed Turn Signals, Mid Chassis. | \$1,164 | 0# |
| Foglights | | | |
| 9042542 | Fog Light: With Clear Lens. Does Not Include Rock Screens on T680. * Other than on the T660, rock screens are standard on all bumpers when factory installed fog lights are specified. * This option is not available on Russian compliant chassis. | \$271 | 4# |
| Other | | | |
| 9049825 | Customer-installed road/fog lights switch & wiring. * This option is not available on Russian compliant chassis. * Use 9049825 if only one switch for a single set of aftermarket lights are required. A switch and wiring for a second set of fog lights requires a first set of fog lights to also be spec'd. | \$34 | 0# |
| 9049826 | Switch & Wiring: For second foglights. * This option is not available on Russian compliant chassis. | \$101 | 2# |

| Option | Description | Price | Weight |
|-------------------|--|-------|--------|
| Spotlights | | | |

T800: EXTENDED WARRANTY

| Option | Description | Price | Weight |
|-------------------------------|--|-------|--------|
| Warranty | | | |
| 9200002 | Base Warranty - Severe Service 12 months / 50,000 miles / 80,000 km. * Class C or D road service greater than 9% requires a Severe Service Warranty. * Extended Warranty requests are not available with Severe Service Warranty. * Severe Service Warranty is required for front steer axles rated over 22,000 lbs GAWR, except in Ready Mix Concrete service. * Severe service warranty is required if you have a rear axle rated at 52,000 lbs. or greater, or when rear axle ratio slower than 4.60 is specified for use in a heavy haul vocation. Rear axle ratio faster [numerically lower] than 4.60 can use either warranty when used in heavy haul vocation. * Severe service warranty is required if you have the specified components: Front drive axle, single rear axle rated over 23k, dual reduction rear axles, or twin steer axle chassis. Coding for Severe Service kit does not automatically require the use of a Severe Service warranty, only when the products dictate the necessity. * Specifying a rear axle ratio slower than 4.60 requires a Severe Service Warranty when used in heavy haul vocation. All other vocations using a 52,000 lb plus rear axle require the severe service warranty. * The Severe Service Warranty is not a requirement unless you have the specified components that dictate its use. | \$0 | 0# |
| 9200006 | Base Warranty - PACCAR MX-11 & MX-13 Engine 24 months / 250,000 miles / 400,000 km / 6250 hours. | \$0 | 0# |
| 9200021 | Base Warranty - Standard Service Heavy Duty 12 months / 100,000 miles / 160,000 km. * Severe service warranty is required if you have a rear axle rated at 52,000 lbs. or greater, or when rear axle ratio slower than 4.60 is specified for use in a heavy haul vocation. Rear axle ratio faster [numerically lower] than 4.60 can use either warranty when used in heavy haul vocation. * Standard warranty is not available with front drive axles, large capacity planetary rear axles rated at 52,000 lbs. or greater, single rear axles rated over 23K, or twin steer axles. | STD | 0# |

T880: REQUIRED INFORMATION

| Option | Description | Price | Weight |
|-------------------------|--|-------|--------|
| Intended Service | | | |
| 0093000 | Linehaul: Vehicles (trucks or tractors) used in over-the-road freight hauling. Pickup to delivery distance is typically over 300 miles, & annual mileage is typically over 60,000 miles per year. Operation is typically on-highway. Road usage: minimum 1% Class B, do not code for Class D. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for linehaul service should be: CLASS A 1-99% ; CLASS B 1-99% ; CLASS C 0-20% ; CLASS D 0% | \$0 | 0# |
| 0093005 | Local pickup & delivery: Vehicles which haul freight, typically operating within a 100-mile radius, on public streets & highways, & other paved surfaces, including limited Class C roads. Includes package & freight delivery, as well as fuel oil or petroleum distribution, etc. Road usage: minimum 3% Class B, do not code for Class D. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for pick-up and delivery service should be: CLASS A 0-97% ; CLASS B 3-100% ; CLASS C 0-50% ; CLASS D 0% | \$0 | 0# |
| 0093007 | Regional Haul: Vehicles used to haul freight on public roads consisting of a mixture of over the road, urban and/or suburban hauling. Pickup to delivery distance typically in the 100 to 300 miles range but some LTL applications may exceed 300 mile limit. Road usage: minimum 19% Class B, do not code for Class D. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road class profile for chassis in regional haul service is: CLASS A 0-81% ; CLASS B 1-100% ; CLASS C 0-20% ; CLASS D 0% | \$0 | 0# |
| 0093010 | Logger: Vehicles which haul logs from the forest to the mill, or from mill to mill. Typically includes some operation off of paved roads. Road usage: any combination, which includes some Class C. * A steel bumper with center mounted tow hook is required on Canadian chassis used in logging or oil field service. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for logger service should be: CLASS A 0-97% ; CLASS B 3-100% ; CLASS C 0-50% ; CLASS D 0-5% | \$0 | 0# |
| 0093015 | Concrete ready mix: Vehicles which deliver Ready-Mix concrete from batch plant to job site. Typically includes some operation off of paved roads. Road usage: any combination, which includes minimum 5% Class B. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for mixer service should be: CLASS A 0-95% ; CLASS B 5-100% ; CLASS C 0-30% ; CLASS D 0-5% | \$0 | 0# |
| 0093025 | Snowplow: Vehicles which are configured for mounting a snowplow to the front. May also have dump or other body. Typically includes some operation off of paved roads. Road usage: majority of Class A & B, do not code for Class D. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for snowplow service should be: CLASS A 0-95% ; CLASS B 5-100% ; CLASS C 0-30% ; CLASS D 0% | \$0 | 0# |
| 0093030 | Mining haulers: Vehicles used for hauling ore or overburden, either from the pit or face or from a stockpile. Generally used on private haul roads, rather than public highways. Typically includes some operation off of paved roads. Road usage: do not code for Class A, some Class C required. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for service as a mining hauler should be: CLASS A 0% ; CLASS B 0-95% ; CLASS C 1-100% ; CLASS D 0-99% | \$0 | 0# |

T880: REQUIRED INFORMATION

| Option | Description | Price | Weight |
|-------------------------|---|-------|--------|
| Intended Service | | | |
| 0093035 | Mining service: Vehicles used to service earthmoving & mining equipment. Includes bodies such as mechanic's service bodies, tire hoists, fuel/lube, etc. Typically includes some operation off of paved roads. Road usage: any combination, which includes some Class C. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for mining service should be: CLASS A 0-97% ; CLASS B 0-95% ; CLASS C 1-100% ; CLASS D 0-99% | \$0 | 0# |
| 0093071 | Heavy equipment transport: Vehicles used to transport heavy, non-divisible loads, such as earthmoving equipment, electrical transformers, pressure vessels, etc. GCW can be from 80,000 lbs. to extremely heavy. Road usage: any combination, which includes some Class B. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for heavy equipment transport should be: CLASS A 0-99% ; CLASS B 1-100% ; CLASS C 0-99% ; CLASS D 0% | \$0 | 0# |
| 0093091 | Refuse hauler: Vehicles which haul refuse, recycled material, etc. Includes Roll-on/roll-off container movement, as well as hauling refuse from transfer stations to landfills. Typically includes operation in landfills, over rough, uneven surfaces. Road usage: any combination, which includes some Class B. * A clog resistant radiator is recommended for operation in environments where high dust levels are found. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * In off-road areas where tanks may tend to rotate the 7 inch tank supports or mechanical anti-roll options are recommended. * The road use profile for refuse haulers should be: CLASS A 0-99% ; CLASS B 1-100% ; CLASS C 0-99% ; CLASS D 0-5% | \$0 | 0# |
| 0093095 | Refuse packer: Vehicles which pick up refuse or recycled material from curbside containers in residential areas. Operation typically includes very frequent stops & starts. Unloading can be at transfer station or at landfill. Road usage: some Class B required, with maximum of 5% Class D. * A clog resistant radiator is recommended for operation in environments where high dust levels are found. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * Intended service of refuse packer requires use of a 37.4 CFM air compressor on ISX * Intended service refuse packer requires use of a 30.4 CFM air compressor. * MX engines not approved for refuse loader/packer applications except for the following MX-11 engines: 0700198 and 0700199. * Refuse loader/packer body type is only for use with refuse packer intended service. * The DSP41/P rear axle is not for use in refuse packer service per TE1568. * The road use profile for refuse packer service should be: CLASS A 0-50% ; CLASS B 1-100% ; CLASS C 0-99% ; CLASS D 0-5% | \$0 | 0# |

T880: REQUIRED INFORMATION

| Option | Description | Price | Weight |
|-------------------------|--|-------|--------|
| Intended Service | | | |
| 0093101 | <p>Oil field rig move: Vehicles used in the transport & erection of oil well equipment. Includes bed trucks, winch trucks, rig-up trucks, etc. Trucks typically move heavy loads over poorly-prepared surfaces, & do considerable maneuvering on the jobsite to place or pick up loads. Road usage: minimum 5% Class C, w/no Class A or B required.</p> <p>* A Severe Service kit is required on all chassis operating in the Canadian oil fields.</p> <p>* A steel bumper with center mounted tow hook is required on Canadian chassis used in logging or oil field service.</p> <p>* Body builders must frequently add sub-frame to meet rail RBM requirements in services of oil field rig up or with oil field well service bodies. Adding the sales code when applicable will assist in the engineering evaluation of these chassis.</p> <p>* Cab door bearing blocks are required on all chassis operating in Canada in the logging or oil field vocations. This is included as part of a Severe Service kit.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* In off-road areas where tanks may tend to rotate the 7 inch tank supports or mechanical anti-roll options are recommended.</p> <p>* The road use profile for oil field rig move service should be: CLASS A 0-50% ; CLASS B 0-90% ; CLASS C 5-100% ; CLASS D 0-95%</p> | \$0 | 0# |
| 0093105 | <p>Oil field well servicing: Vehicles which carry well servicing equipment, e.g., pumpers, blenders, cementers, data loggers, etc. Typically involve considerable hours of stationary operation, but low mileage. Typically operate on prepared (although often unpaved) roadways. Road usage: any combination, w/minimum 5% Class C.</p> <p>* A Severe Service kit is required on all chassis operating in the Canadian oil fields.</p> <p>* A steel bumper with center mounted tow hook is required on Canadian chassis used in logging or oil field service.</p> <p>* Accurate body data is required to help engineering determine the vehicle application. Specification of oil field service or oil well service covers a broad spectrum and requires a narrative line that describes the body type.</p> <p>* Body builders must frequently add sub-frame to meet rail RBM requirements in services of oil field rig up or with oil field well service bodies. Adding the sales code when applicable will assist in the engineering evaluation of these chassis.</p> <p>* Cab door bearing blocks are required on all chassis operating in Canada in the logging or oil field vocations. This is included as part of a Severe Service kit.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* The road use profile for oil field well service should be: CLASS A 0-80% ; CLASS B 0-95% ; CLASS C 5-100% ; CLASS D 0-95%</p> | \$0 | 0# |
| 0093111 | <p>Wrecker service: Vehicles w/ recovery bodies used for recovering & towing stranded vehicles & equipment. Road usage: minimum 5% Class B & maximum 10% Class D.</p> <p>* Body manufacturer's often have specific RBM requirements in excess of Kenworth standards. It is the dealer's responsibility to contact the body builder and communicate the frame RBM or section modulus requirements to Kenworth engineering.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* For the purpose of frame strength analysis the body load is assumed to be a distributed load. It is further understood that the load of the crane and it's payload will be supported by outriggers in contact with the ground during operation of the crane. If these assumptions don't accurately represent the body load please contact Application Engineering for assistance.</p> <p>* The road use profile for use with wrecker service should be: CLASS A 0-95% ; CLASS B 5-100% ; CLASS C 0-95% ; CLASS D 0-10%</p> | \$0 | 0# |

| Option | Description | Price | Weight |
|-------------------------|---|-------|--------|
| Intended Service | | | |
| 0093121 | Fire truck service: Vehicles used in fighting fires. Typically have pumps, etc., mounted in the body. Road usage: minimum 5% Class B & maximum 5% Class D. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * NFPA compliance 1901 kit is required with Fire service. * The road use profile for fire or EMT service should be: CLASS A 0-80% ; CLASS B 5-100% ; CLASS C 0-95% ; CLASS D 0-10% * With fire truck service an ember separator may be required to meet local or NFPA compliance. | \$0 | 0# |
| 0093122 | EMT/rescue service: Vehicles used responding to emergencies & rescue operations. Typically configured for rapid response, & carry medical & other rescue equipment. Road usage: minimum 5% Class B & maximum 5% Class D. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for fire or EMT service should be: CLASS A 0-80% ; CLASS B 5-100% ; CLASS C 0-95% ; CLASS D 0-10% | \$0 | 0# |
| 0093125 | Crane/cherry picker: Vehicles equipped w/ cranes, man-lifts, hoists, cherry-pickers, bridge inspection units, etc. Road usage: any combination, w/minimum 5% Class B. * Body builders must frequently add sub-frame to meet rail RBM requirements with crane/cherry picker bodies. Adding the sales code when applicable will assist in the engineering evaluation of these chassis. * Body manufacturer's often have specific RBM requirements in excess of Kenworth standards. It is the dealer's responsibility to contact the body builder and communicate the frame RBM or section modulus requirements to Kenworth engineering. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for crane/cherry picker service should be: CLASS A 0-95% ; CLASS B 5-100% ; CLASS C 0-80% ; CLASS D 0-80% | \$0 | 0# |
| 0093130 | Construction: Vehicles used in the construction industry, other than those listed above. Use typically involves operating on the jobsite, to pick up or deliver construction materials, or to position the vehicle for its intended use at the construction site. Includes such activities as delivery of precast concrete, concrete pumpers, flatbeds or roll-offs for delivery of construction materials or equipment, etc. Typically includes some operation off of paved roads. Road usage: any combination, which includes some Class C. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for construction service should be: CLASS A 0-97% ; CLASS B 0-99% ; CLASS C 1-100% ; CLASS D 0-99% | \$0 | 0# |
| 0093135 | Agriculture: Vehicles used in the agriculture industry, other than those listed above. Use typically involves transportation of agricultural & dairy products to/from/on/around farm sites, & includes operation off of improved surfaces while on the farm. Includes applications such as milk tankers for farm pickup, feed trucks, grain haulers which load in the field, etc. Can be trucks or tractors. Road usage: any combination, which includes both Class C & D. * A clog resistant radiator is recommended for operation in environments where high dust levels are found. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for chassis in agriculture service should be: CLASS A 0-95% ; CLASS B 0-98% ; CLASS C 1-95% ; CLASS D 1-95% | \$0 | 0# |

T880: REQUIRED INFORMATION

| Option | Description | Price | Weight |
|--------------------|--|-------|--------|
| Commodity Hauled | | | |
| Building Materials | | | |
| 0091010 | Pre-cast concrete (blocks, pavers, etc.). * Precast concrete commodity is applicable with intended service codes of regional haul, pickup and delivery, construction or agriculture. | \$0 | 0# |
| 0091020 | Ready-mix concrete. * Ready-mix concrete commodity is applicable with intended service codes of mixer, pickup and delivery, construction or crane/cherry picker [pumper trucks]. | \$0 | 0# |
| 0091030 | Lumber. * Lumber commodity is applicable with intended service codes of line haul, regional haul, pickup and delivery, construction or crane/cherry picker. | \$0 | 0# |
| 0091040 | Other building materials. * Other/building material commodity is applicable with intended service codes of heavy equipment transport, line haul, regional haul, pickup and delivery, construction or crane/cherry picker. | \$0 | 0# |
| 0091041 | Asphalt. * Asphalt commodity is applicable with intended service codes of line haul, regional haul, pickup and delivery, or construction. * Beam or spring rear suspensions are typically used with an asphalt spreader. * For dump trucks used to spread asphalt there is an option to switch ABS off to improve performance on loose surfaces. Use 8205012 if the road conditions require this. * Vocations of snowplow, mining haulers, construction, pick-up and delivery or regional haul are appropriate for this commodity. | \$0 | 0# |
| 0091042 | Gravel/crushed rock/sand. * Gravel/crushed rock commodity is applicable with intended service codes of line haul, regional haul, pickup and delivery, snowplow, mining hauler, or construction. * Vocations of snowplow, mining haulers, construction, pick-up and delivery or regional haul are appropriate for this commodity. | \$0 | 0# |
| 0091043 | Topsoil/bark. * A clog resistant radiator is recommended for operation in environments where high dust levels are found. * The commodity of bark or topsoil most closely matches the intended service of pick-up and delivery, agriculture, or construction. | \$0 | 0# |
| Food-Farm Products | | | |
| 0091130 | Grain. * A clog resistant radiator is recommended for operation in environments where high dust levels are found. * Grain commodity is applicable to intended services of agriculture, pickup and delivery or regional haul. | \$0 | 0# |
| 0091135 | Livestock feed. * A clog resistant radiator is recommended for operation in environments where high dust levels are found. * The commodity of livestock feed is most closely matched with intended services of agriculture, pick-up and delivery, or linehaul [flatbed sacked feed]. | \$0 | 0# |

| Air Compressor | | | |
| 1002060 | Air compressor: Cummins 18.7 CFM For Cummins And PACCAR PX engines. * 18.7 cfm air compressor for use on Cummins or PACCAR PX-9 engines. Not for use on 2017 emissions X15 engines. * 18.7 CFM compressor N/A with body type refuse loader/packer. * Required with ISX12G engine. | \$0 | 0# |
| 1002070 | Air compressor: Cummins 37.4 CFM *For C500 Twin Steer use 1002075 * 37.4 cfm air compressor coupled with a Bendix AD-SP, AD-IP, or AD-IS air dryer is not for use in continuous dry-air bulk unloading operation. Consider a dual dryer with Everflow for this use. * Intended service of refuse packer requires use of a 37.4 CFM air compressor on ISX * The 37.4 cfm Cummins air compressor is not compatible with ISX engines in T800 twin steer front axle configurations. * The Cummins 37.4 cfm air compressor can be used on an X15, ISM, or ISX. * This air compressor is not for use on the PACCAR MX engine. Use the WABCO 28 cfm with the MX engine. | \$2,648 | 15# |

| 1002080 | Air compressor: Cummins 18.7 CFM, Naturally Aspirated for Cummins X15 engines * Only available for X15 engines. | \$0 | 0# |
| 1006003 | Air Compressor: WABCO 25.9 CFM PACCAR MX 2017 440cc Air Compressor * This air compressor is for use only with the PACCAR MX engine. * Wet bulk unload is restricted from this compressor. As such, s/c 9140084 is restricted from being used with this compressor. | STD | 0# |
| 1006037 | Air compressor: WABCO 37.4 CFM PACCAR MX. | \$2,116 | 0# |
| Air Intake System | | | |
| Air Cleaner | | | |
| Firewall-Mounted | | | |
| 1051200 | Air Cleaner: composite firewall mounted PACCAR or Cummins engines | STD | 0# |
| Air Intake Equipment | | | |
| 1093110 | In/Outside Air Intake for firewall mounted Air Cleaner. Special air intake door allows driver to select outside air or warm air from under the hood for engine combustion. Aids in cold weather operation. Helps prevent air cleaner from becoming clogged with snow. * Inside/outside air not available with PACCAR MX-11 or MX-13 engines. | \$1,358 | 0# |
| 1099080 | Pre-cleaner mounted in the hood plenum * The ember separator and air cleaner pre-filter cannot be used in combination. Both components occupy the same location. | \$331 | 0# |
| 1099380 | Ember Separator mounted in the hood plenum * An ember separator is for use on fire trucks or emergency service vehicles only. * The ember separator and air cleaner pre-filter cannot be used in combination. Both components occupy the same location. | \$1,112 | 0# |
| 1600116 | Cummins air intake throttle overspeed shutdown for Cummins X15 engines. * Engine overspeed shutdown device for EPA 2013 ISX15 and EPA 2017 X15 engines. * Parking brake interlock is to be used in conjunction with an engine overspeed shutdown device. | \$5,515 | 0# |
| 1600220 | PACCAR MX Overspeed Shutdown. Includes manual switch and test switch * Engine overspeed shutdown device for PACCAR MX engines. * For vehicles operating in fuel rich environments an engine overspeed shutdown device is strongly recommended. * Parking brake interlock is to be used in conjunction with an engine overspeed shutdown device. * This item has a long leadtime requirement that may impact your requested delivery date. Refer to the Leadtime Report on DealerNet. | \$4,261 | 0# |
| 1600221 | Parking brake interlock for over speed shutdown for 2010+ engine requires code 1600110, 120, 130 or 220 * Parking brake interlock is to be used in conjunction with an engine overspeed shutdown device. | \$22 | 0# |

|---------------------------------|---|---------|--------|
| Cooling System | | | |
| 1123555 | Cooling module: 1330 square inches. Includes aluminum radiator core, aluminum charge air cooler, translucent surge tank and washer bottle, silicone hoses, and extended life coolant. * This cooling module is available with a 2010+ EPA compliant engines. C500 available with export engines as well as 2010+ EPA compliant engines. | STD | 0# |
| 1123556 | Cooling Module: 1330 square inches. Clog Resistant. *Low clog radiators have reduced cooling capacity compared to standard radiators. Chassis configuration may be subject to engineering review for cooling capacity. * Not available with ISX12N CNG engines. * This cooling module is available with a 2010+ EPA compliant engines. C500 available with export engines as well as 2010+ EPA compliant engines. | \$1,089 | 0# |
| Cooling System Equipment | | | |
| 1105208 | Fan Hub: Horton Variable Speed for ISX12G/ISX12N *This fan hub is available on ISX12 G/N engines with all Intended Services except with Stationary Application or Split-shaft PTOs. * This fan hub is available on ISX12N engines with all Intended Services except with Stationary Application or Split-shaft PTO's. | \$402 | 0# |
| 1105210 | Fan hub: Horton 2-Speed for PACCAR MX * This fan hub is required on MX engines with Intended Service Logger, Concrete Ready-Mix, Mining Haulers, Heavy Equipment Transport, Refuse Packer, Oil Field Rig Mover, Oil Field Well Servicing, SnowPlow, Mining Service, Utility Vehicle, Refuse Hauler, Wrecker Service, Fire Truck Service, EMT/Rescue Service, Crane/Cherry Picker, Construction or Agriculture. | \$264 | 0# |
| 1105211 | Fan Hub: Horton On/Off for PACCAR MX * Horton ON/OFF fan hubs are available in Linehaul, Regional Haul and Pickup & Delivery intended services. Horton ON/OFF are available in ALL intended services for Canadian/Quebec Registry. * Not available on W900S and T800 FEPTO. | STD | 0# |
| 1105212 | Fan Hub: Variable Speed for MX-13 *This fan hub is available on MX -13 engines with all Intended Services except with Stationary Application or Split-shaft PTOs. * Fan control switches not available with variable speed fan hub * This fan hub is available on MX -13 engines with all Intended Services except with Stationary Application or Split-shaft PTO's | \$246 | 0# |
| 1105220 | Fan Hub: Horton 2-Speed for X15 * This fan hub is required on X15 engines with Intended Service Logger, Concrete Ready-Mix, Mining Haulers, Heavy Equipment Transport, Refuse Packer, Oil Field Rig Mover, Oil Field Well Servicing, SnowPlow, Mining Service, Utility Vehicle, Refuse Hauler, Wrecker Service, Fire Truck Service, EMT/Rescue Service, Crane/Cherry Picker, Construction or Agriculture. | \$434 | 0# |
| 1105221 | Fan Hub: Horton On/Off for X15 * ENGINE COOLING OPTIONS; For X15 only. * Horton ON/OFF fan hubs are available in Linehaul, Regional Haul and Pickup & Delivery intended services. Horton ON/OFF are available in ALL intended services for Canadian/Quebec Registry. | \$0 | 0# |
| 1105230 | Fan Hub: Horton 2-Speed for ISL9, ISL-G, PX-8 or PX-9 * This fan hub is required on PX-9 engines with Intended Service Logger, Concrete Ready-Mix, Mining Haulers, Heavy Equipment Transport, Refuse Packer, Oil Field Rig Mover, Oil Field Well Servicing, SnowPlow, Mining Service, Utility Vehicle, Refuse Hauler, Wrecker Service, Fire Truck Service, EMT/Rescue Service, Crane/Cherry Picker, Construction or Agriculture. | \$528 | 0# |

| Cooling System Equipment | | | |
| 1105231 | Fan Hub: Horton On/Off for PX-9 or ISLG * ENGINE COOLING OPTIONS; For PX-9 and ISL-G only * Horton ON/OFF fan hubs are available in Linehaul, Regional Haul and Pickup & Delivery intended services. Horton ON/OFF are available in ALL intended services for Canadian/Quebec Registry. * Not available on T470. | (\$4) | 0# |
| 1105240 | Fan Hub: Horton 2-Speed for ISX12 * This fan hub is required on ISX12 engines with Intended Service Logger, Concrete Ready-Mix, Mining Haulers, Heavy Equipment Transport, Refuse Packer, Oil Field Rig Mover, Oil Field Well Servicing, SnowPlow, Mining Service, Utility Vehicle, Refuse Hauler, Wrecker Service, Fire Truck Service, EMT/Rescue Service, Crane/Cherry Picker, Construction or Agriculture. | \$368 | 0# |
| 1105241 | Fan Hub: Horton On/Off for ISX12/ISX12 G/ISX12N * Fan Hub: Horton/Borg Warner On/Off for ISX12 or ISX12N engines * Horton ON/OFF fan hubs are available in Linehaul, Regional Haul and Pickup & Delivery intended services. Horton ON/OFF are available in ALL intended services for Canadian/Quebec Registry. * Not available on W900S and T800 FEPTO. | \$0 | 0# |
| 1107050 | Fan Hub: Borg Warner On/Off ISX12, ISX12G, ISX12N * Fan Hub: Horton/Borg Warner On/Off for ISX12 or ISX12N engines | (\$4) | 0# |
| 1107060 | Fan Hub: Borg Warner On/Off for PX-9 or ISLG | (\$3) | 0# |
| 1107130 | Fan Hub: Borg Warner On/Off PACCAR MX | \$20 | 0# |
| 1107140 | Fan Hub: Borg Warner On/Off for X15 | \$31 | 0# |
| 1160105 | Radiator winterfront. * Radiator Winterfront (1160105) available only on T470 models only w/ 8090410 (Hood) * Winterfront required for T680 ISX12N models. Optional for diesel engines. | \$182 | 2# |
| 1160205 | Bug screen: Front of grille on C500, T800, T880, and W900. Behind grille on T660, T680, and T300 (Medium Duty). | \$265 | 2# |
| 1160208 | Radiator bug screen mounted between hood & grille. * Bug screen mounted between the hood and grille is not available with a radiator mounted grille. * Not available with T880S * Not for use with C500 with 1780 sq inch cooling module. Use sales code 1160205. | \$121 | 2# |
| 1160728 | Lower radiator drain valve Okay for use w/2010+ engine cooling modules, other than 1780 square inches. * Lower radiator drain valve is not for use with 1780 sq inch radiator, or when the chassis specifies an Allison transmission. | \$18 | 0# |
| Exhaust Systems | | | |
| 1227053 | Exhaust: Single Independent CNG Catalyst, Right Hand With Back of Cab Vertical Mounted Muffler, 2018 | \$345 | 0# |

| Option | Description | Price | Weight |
|------------------------|--|---------|--------|
| Exhaust Systems | | | |
| 1227116 | Exhaust: 2017 EPA Vertical Independent DPF/SCR w/ Single RH back of Cab Tailpipe. *Not Available With Sleepers. *DPF/SCR Mounted Vertically to RH Stanchion. Frame brackets are painted chassis color and other supports are painted black. * Not available with ISX-12. * Not available with PX-9 engines. * Tailpipes 42 inches and longer are not available with 2017 emissions level vertical independent DPF/SCR. * This exhaust cannot be used on 1.9m twin steer chassis. * This exhaust system is a sub-assembled kit and is installed after the cab/sleeper are set. The bracket and supports are painted black as standard and will not match a non-black frame paint request. | \$3,614 | 24# |
| 1227124 | Exhaust: 2017 EPA Vertical Independent DPF/SCR w/ Single RH BOS Tailpipe. DPF/SCR mounted vertically to RH stanchion. Frame brackets are painted chassis color and other supports are painted black. *Use with 38 in. Aerocab sleeper OR 42 in. Modular sleeper on T800B or T800 FEPTO models. *Use with 40 in. sleeper on T880. * Not available with Allison transmissions. * Not available with ISX-12. * Not for use on 1.9m twin steer chassis. * Tailpipes 42 inches and longer are not available with 2017 emissions level vertical independent DPF/SCR. * This exhaust system is a sub-assembled kit and is installed after the cab/sleeper are set. The bracket and supports are painted black as standard and will not match a non-black frame paint request. | \$6,588 | 47# |
| 1247019 | Exhaust: Single Horizontal CNG Catalyst With Single Horizontal Tailpipe, 2018 | \$3,035 | 0# |
| 1247033 | Exhaust: L9N Single Right Hand Under Cab Catalyst With Single Vertical Tailpipe Right Hand Side of Cab * This exhaust style is exclusive to L9N and ISX12N engines. | \$1,514 | 0# |
| 1247166 | Exhaust: 2017 EPA RH Under DPF/SCR w/ RH side of cab vertical tailpipe w/ daycabs, extended daycabs, or modular sleepers. * Not available with ISX-12. * Not available with under cab fairings. * Side of cab exhaust on T680 is not available with the high roof sleeper configuration. * The NFPA compliant grab handles are required with the NFPA kit in all cases where SOC exhaust is not specified. The grab handle installation interferes with side of cab exhaust, so in that instance the body builder is responsible for installing compliant handles. * This exhaust is only for use with a daycab or 42 inch modular sleeper. Cannot be used on 1.9m twin steer chassis, or with wide sheet metal fenders. * With this exhaust style a RH under cab step assembly is combined with a DPF/SCR cover. You will not be able to request an alternate under cab component on the RH rail. | STD | 0# |
| 1247173 | Exhaust: 2017 EPA RH Under Cab DPF/SCR w/ Single Vertical RH Back of Cab Tailpipe. Not Available w/ Sleepers. * Not available with ISX-12. * Not available with under cab fairings. * Right hand frame access ladder steps are not available with this exhaust on T680 as it has been identified as posing a safety concern due to proximity to the exhaust. * This exhaust cannot be used on 1.9m twin steer chassis, or with wide sheet metal fenders. Must use side extenders if an extended daycab is specified. Not for use with a sleeper. * With this exhaust style a RH under cab step assembly is combined with a DPF/SCR cover. You will not be able to request an alternate under cab component on the RH rail. | \$2,506 | 13# |

| Option | Description | Price | Weight |
|------------------------|---|---------|--------|
| Exhaust Systems | | | |
| 1247179 | <p>Exhaust: 2017 EPA RH Under Cab DPF/SCR w/ Dual Side of Cab Tailpipes for Daycabs, Extended Daycabs, or Modular Sleepers. *LH Pipe is not functional for the exhaust.</p> <ul style="list-style-type: none"> * Cannot be used on 1.9m twin steer chassis, or with wide sheet metal fenders. Not for use on W900S. Not for use with PX-9 engines. Cannot be used with rear engine PTOs. * Dual side of cab exhaust not available with mixer side plates. * Not available with ISX-12. * Not available with under cab fairings. * Side of cab exhaust on T680 is not available with the high roof sleeper configuration. * The NFPA compliant grab handles are required with the NFPA kit in all cases where SOC exhaust is not specified. The grab handle installation interferes with side of cab exhaust, so in that instance the body builder is responsible for installing compliant handles. * This exhaust style will not permit a 100 gallon split tank located under an extended daycab due to hydraulic tank fill proximity to the exhaust. * With this exhaust style a RH under cab step assembly is combined with a DPF/SCR cover. You will not be able to request an alternate under cab component on the RH rail. | \$1,487 | 160# |
| 1247184 | <p>Exhaust: 2017 EPA RH Under Cab DPF/SCR w/ Single Vertical Back of Sleeper Tailpipe Mounted on RH Independent Stanchion. *Only Available w/ Sleepers. *2017 emissions back of sleeper exhaust is not available with day cabs, extended day cabs, 38 in. sleepers, 42 in. sleepers, 62 in. sleepers, 72 in. sleepers, and 86 in. sleepers on 1.9 m models.</p> <ul style="list-style-type: none"> * Due to heat issues, battery boxes between rails are not available with this exhaust. * Due to heat issues, battery boxes BOC on the RH rail are not available with this exhaust. * For tractor kit with a slide bar use 9110088. For tractor kit with a hosetenna 9110072 is the best choice. Other frame mounted options will require a non-standard hosetenna location. * Not available with ISX-12. * Not available with PX-9. * Not available with under cab fairings. * This exhaust restricts access for jackshaft with RH mounted PTOs. * This exhaust style is available only with the T660 or T680 split-fender hood. On T880 the long hood, MX hood, and set-forward front axle hood are available. * With this exhaust style a RH under cab step assembly is combined with a DPF/SCR cover. You will not be able to request an alternate under cab component on the RH rail. | \$2,437 | 102# |
| 1247189 | <p>Exhaust: 2017 EPA RH Under Cab DPF/SCR w/ Dual Vertical Back of Sleeper Tailpipes Mounted Independent. *Only Available w/ Sleepers.</p> <ul style="list-style-type: none"> * Due to heat issues, battery boxes between rails are not available with this exhaust. * Due to heat issues, battery boxes BOC on the RH rail are not available with this exhaust. * Not available with ISX-12. * Not available with PX-9. * Not available with under cab fairings. * This SCR style exhaust is only to be used with sleepers. Exhaust style prohibits locating items such as a slide bar for trailer connections on the rear face of the sleeper. * This exhaust restricts access for jackshaft with RH mounted PTOs. * This exhaust style interferes with jackshafts mounted to a transmission PTO. Either select another exhaust option, or a modification to the crossover pipe will be necessary. * This exhaust style is available only with the T660 or T680 split-fender hood. On T880 the long hood, MX hood, and set-forward front axle hood are available. * With this exhaust style a RH under cab step assembly is combined with a DPF/SCR cover. You will not be able to request an alternate under cab component on the RH rail. | \$1,412 | 131# |

Horizontal DPF

| | | | |
|---------|---|-----------|-------|
| 1247127 | Exhaust: 2017 EPA Horizontal Under Rail DPF/SCR Horizontal Tailpipe Below RH Rail. DPF/SCR is mounted Horizontally. * 38" and 42" sleepers are not available with this exhaust. * Battery boxes located RH back of cab, RH under cab, or between the rails are not for use with this exhaust style. Cable routings need to be forward of the exhaust. * Cannot be used with a front engine PTO or with extended frame rails on a T800. Is not available on 1.9m twin steer chassis, or with wide sheet metal fenders. * Chart defining minimum wheelbase restrictions for use with horizontal exhaust systems can be found on DealerNet. See TRUCK SALES/PRODUCT INFO/APPLICATION GUIDELINES. * Manually shifted auxiliary transmissions cannot be used with 2010 SCR exhaust systems that use the crossover DPF/SCR combination horizontal BOC or with 2017 exhaust systems that use the horizontal underframe DPF/SCR combination horizontal BOC. * Not available with 28.5" RHUC fuel tanks greater than 105 gallons. * Not available with 3000, 4000, or TC10 Series Allison transmissions. * Not available with chassis fairings or mixer side plates. * Not available with DEF tank on right hand rail. * Not available with ISX-12. * Not available with PX-9. * Not available with RH back of cab APU, RH back of cab jumpstart terminals, heavy-duty back of cab crossmember assembly, or in a Severe Service application. * Not available with SPL350 series drivelines. * The following right hand frame access steps may not be mounted next to under frame DPF/SCR: ladder steps, battery/tool box w/ steps, or steps on a 28.5" fuel tank or hydraulic tank. * The right hand under cab box for Kenworth Idle Management System batteries is not available with horizontal under frame exhaust. * This exhaust restricts access to all manual transmission mounted PTOs. * This exhaust restricts access to jackshaft for LH mounted PTOs. * This exhaust system requires very long wheelbases for locating pusher axles, and may not be the best choice for use with a pusher. | (\$1,800) | -191# |

|---|---|-------|-----|
| 1509058 | Fuel tank heater: single Arctic Fox w/thermostat. | \$528 | 6# |
| <ul style="list-style-type: none">* Arctic Fox in-tank fuel heater requires a minimum tank size of 22 inches x 56 gallons, 24.5 inches x 75 gallons, or 28.5 inches x 105 gallons.* In-tank fuel heaters are unavailable with steel fuel tank material.* ISL-G and ISX12-G engines do not utilize any fuel heat components designed for diesel engines.* Single in-tank fuel heater is for use only with one fuel tank. | | | |
| 1509065 | Fuel tank heater: dual Arctic Fox w/thermostat. | \$835 | 15# |
| <ul style="list-style-type: none">* Arctic Fox in-tank fuel heater requires a minimum tank size of 22 inches x 56 gallons, 24.5 inches x 75 gallons, or 28.5 inches x 105 gallons.* Dual in-tank fuel heaters are for use only with two fuel tanks.* In-tank fuel heaters are unavailable with steel fuel tank material.* ISL-G and ISX12-G engines do not utilize any fuel heat components designed for diesel engines. | | | |

Heater Accessories

| | | | |
|---|--|-------|----|
| 1504040 | Harness plug for block heater coiled under cab. DEL PLUG UNDER DOOR C5, T6, T8 & W9 | (\$1) | 0# |
| 1507008 | Block heater & oil pan heater wired to separate plugs. | \$0 | 0# |
| <ul style="list-style-type: none">* This option provides two separate 15amp plugs in situations where one 20 amp plug would normally be supplied [engine/block heater wattage exceeds 1750]. | | | |
| 1509029 | Shutoff valves for trailer heat with hoses routed 3ft. BOC/BOS. Installation includes shutoff valves on a loop of hose routed to 3' BOC/BOS. Trailer heat application not to exceed 12 kW (680 BTU/min) of heat draw from the engine. For applications requiring a significant amount of heat (6-12 kW, Ex: heating a tanker), the engine must be warmed up before opening shutoff valves allowing coolant to flow. A separate coolant heater is recommended for applications requiring more heat. | \$201 | 0# |
| <ul style="list-style-type: none">* Not compatible with PX-7, PX-9, and ISL-G, instead use s/c 1509000.* Only to be used with EPA13 and greater MX-11, MX-13, ISX12, X15, ISX15 or ISX12N engines* Pre-EPA13 and Euro engines only allow trailer heat option s/c 1509000. | | | |
| 1509035 | Coolant hoses & 2 shut-off valves for C/I APU coolant hoses routed to 3 feet back-of-sleeper. | \$171 | 0# |

Fuel Cooler

| | | | |
|--|---|-------|----|
| 1500029 | Kenworth Fuel Cooler Required for Cummins engines with a single fuel tank. Required for PACCAR MX-13 engine with a single fuel tank and stationary use: High RPM, low vehicle speed, sustained for longer than 1 hour. Optional for all other applications. | \$219 | 6# |
| <ul style="list-style-type: none">* On the T470 the fuel cooler and power steering cooler are a single unit. Add a power steering cooler when a fuel cooler is specified.* On the T470 the fuel cooler and power steering cooler are a single unit. The power steering cooler must be added to orders specifying a single fuel tank, since a fuel cooler is required in this instance.* Required for Cummins engines with single fuel tank; for PACCAR PX-9 with single fuel tank Restricted for PACCAR MX engines w/o stationary applications (ref 0072001, 0072002, and 0072003) | | | |

Rear Engine PTO - REPTO

| 1000277 | <p>Speed Control Management: Enable Gear Down Protection for PACCAR MX engines. Gear Down Protection is a feature which encourages a driver to shift into higher gears in order to use the engine at lower engine speed (RPM) when the vehicle is at higher road speed (MPH). This is a PACCAR MX Engine Parameter w/ Default Setting. Default settings are optimized for 10-speed transmissions & line haul applications.</p> <p>* Consult Kenworth Application Engineering or Programming Guide for non-default setting options.</p> <p>* Not for use with 2-speed rear axles.</p> <p>* Not for use with Allison transmissions.</p> <p>* Not for use with an auxiliary transmission or transfer case.</p> <p>* Not for use with direct drive transmissions with rear axle ratios 3.25 to 4.33 (inclusive).</p> <p>* Not for use with overdrive transmissions with 2.53 and 2.64 axle ratios.</p> <p>* Progressive Shift and Gear Down Protection are available only with rear axle ratios of: 2.53, 2.64, 2.69, 2.93, 3.07, 3.08, 3.21, 3.25, 3.36, 3.42, 3.55, 3.58, 3.70, 3.73, 3.90, 3.91, 4.10, 4.11, 4.30, 4.33</p> <p>* Progressive Shift and Gear Down Protection are available only with rear tire sizes: 11R22.5, 285/75R24.5, 455/55R22.5, 11R24.5, 275/80R22.5, 295/75R22.5, OR 445/50R22.5.</p> <p>* Progressive Shift and Gear Down Protection are not available with transmissions other than a 9/10/13/18-speed. Consult PACCAR MX Programming Guide or Division Applications for more details</p> <p>* The Progressive Shift &/or Gear Down Protection features will be disabled during normal operation of automated manual transmission, and enabled only during manual mode only.</p> | \$0 | 0# |
| 1000281 | <p>MX Engine: Fast Stop Recorder Disable Disables MX Fast Stop recorder functionality, which logs key vehicle parameters whenever vehicle deceleration rates exceed a specified value. See engine ordering and programming guides for further details. 2013+</p> <p>* For use to opt-out of Fast Stop Recorder. Fast Stop Recorder is default to ON from the factory.</p> | \$0 | 0# |
| 1000282 | <p>MX Retarder State Cruise Control On Manual Mode Selecting this code will program the engine controller to make manual mode available when cruise control is on, but not set, and the engine brake switch is on. Manual mode means the engine retarder activates whenever the throttle pedal is not depressed. 2013+</p> | \$0 | 0# |
| 1000283 | <p>MX Retarder State Cruise Control On Coast Mode Selecting this code will program the engine controller to make coast mode available when cruise control is on, but not set, and the engine brake switch is on. Coast mode means the engine retarder is only activated when the brake pedal is depressed. 2013+</p> | \$0 | 0# |

T880: ENGINE EQUIPMENT

| Option | Description | Price | Weight |
|---------------------------------------|---|-----------|--------|
| Engine Equipment Miscellaneous | | | |
| 1000284 | MX Retarder State Cruise Control On Latch Mode Selecting this code will program the engine controller to make latch mode available when cruise control is on, but not set, and the engine brake switch is on. Latch mode means the engine retarder is activated when the brake pedal is depressed and does not deactivate until the operator depresses the accelerator pedal. This sales code cannot be selected if either Code 5 or Code 6 are selected. 2013+ | \$0 | 0# |
| 1000285 | Enable MX Retarder Auto-Retard Selecting this code will program the engine to utilize the auto retard mode whenever cruise control speed has been set and the engine brake switch is on. The auto-retard mode will control the vehicle speed to an offset from the cruise control set speed via the engine retarder. The offset speed shall be dependent upon customer inputs via the electronic programming work screen. 2013+ | \$0 | 0# |
| 1000287 | Enable MX Retarder Downhill Speed Limiter Selecting this code will program the engine to utilize the Downhill Speed Limiter functionality. The Downhill Speed Limiter functionality will control the vehicle to a customer-programmed maximum speed when the engine brake switch is in the ON position, whether or not cruise control is active. 2013+ | \$0 | 0# |
| 1000288 | Disable MX Retarder Selecting this code will program the engine to never actuate the engine brake, regardless of switch input. This code will be reflected as a programmable parameter on the engine, so customers can re-enable the MX engine retarder via aftermarket programming at their local Kenworth or Peterbilt dealership. A restriction must be put in place to not allow the selection of this code on trucks with any type of adaptive cruise braking or collision mitigation system as they use the engine brake in their base functionality. 2013+ | \$0 | 0# |

| 10-Speed | | | |
| 2058360 | Transmission: Fuller FRO15210C 10-speed w/pump & external oil cooler. Standard with synthetic lubricant. Includes severe-duty pilot bearing on all class 8 models. *Torque Limit: 1550 pound-feet. * For 62 inch AeroCab sleepers requesting a ten speed transmission and horizontal DPF/SCR exhaust the intermediate duty driveline with a single centerbearing is not available. * This transmission is available with a maximum engine torque of 1550 ft lbs. For some transmissions Fuller will accept 100 lb ft more engine output torque with a multi-torque engine than the transmission input is rated at. | (\$6,791) | 87# |
| 2058362 | Transmission: Fuller FRO16210C 10-speed w/pump & external oil cooler. Standard with synthetic lubricant. Includes severe-duty pilot bearing on all class 8 models. *Torque Limit: 1650 pound-feet. * For 62 inch AeroCab sleepers requesting a ten speed transmission and horizontal DPF/SCR exhaust the intermediate duty driveline with a single centerbearing is not available. * This transmission is available with a maximum engine torque of 1650 ft lbs. For some transmissions Fuller will accept 100 lb ft more engine output torque with a multi-torque engine than the transmission input is rated at. | (\$6,763) | 87# |
| 2058366 | Transmission: Fuller FRO17210C 10-speed w/pump & external oil cooler. *Torque Limit: 1750 pound-feet. * For 62 inch AeroCab sleepers requesting a ten speed transmission and horizontal DPF/SCR exhaust the intermediate duty driveline with a single centerbearing is not available. * Fuller FR transmissions with an internal oil cooler will not support a 6-bolt PTO mounting. * Fuller overdrive transmissions with 400hp+ engine and GCW exceeding 90K require a code for transmission oil cooler. * This transmission available with a maximum engine torque of 1750 lb ft., except for multi-torque engines (0123654 and 0123712) rated 1650/1850 lb ft.. | (\$6,283) | 87# |
| 2058372 | Transmission: Fuller RTO16908LL 10-speed w/pump & oil cooler. Standard with synthetic lubricant. Includes severe-duty pilot bearing on all class 8 models. *Torque Limit: 1650 pound-feet. * For 62 inch AeroCab sleepers requesting a ten speed transmission and horizontal DPF/SCR exhaust the intermediate duty driveline with a single centerbearing is not available. * Fuller overdrive transmissions with 400hp+ engine and GCW exceeding 90K require a code for transmission oil cooler. * The Fuller -8LL transmissions are incompatible with a tachograph. * This transmission is available with a maximum engine torque of 1650 ft lbs. | (\$5,400) | 180# |
| 2058384 | Transmission: Fuller FRO18210C 10-speed w/external oil cooler; w/pump. Standard with synthetic lubricant. Includes severe-duty pilot bearing on all class 8 models. *Torque Limit: 1850 pound-feet. * For 62 inch AeroCab sleepers requesting a ten speed transmission and horizontal DPF/SCR exhaust the intermediate duty driveline with a single centerbearing is not available. * This transmission is available with a maximum engine torque of 1850 ft lbs. | (\$5,022) | 97# |
| 2058385 | Transmission: Fuller FR15210B 10-speed w/external oil cooler; w/pump. Includes severe-duty pilot bearing on all class 8 models. *Torque Limit: 1550 pound-feet. * This transmission is available with a maximum engine torque of 1550 ft lbs. For some transmissions Fuller will accept 100 lb ft more engine output torque with a multi-torque engine than the transmission input is rated at. | (\$6,838) | 87# |
| 2058408 | Transmission:Eaton FO17E308LL-VCS UltraShift Plus 10-speed w/Hill Start Aid feature. Standard with synthetic lubricant. *Torque Limit: 1750 pound-feet. * AMT transmissions require column mounted transmission control 8201052, 8201053. * This transmission is available with a maximum engine torque of 1750 lb ft. * UltraShift Plus VCS transmissions are approved for use in pickup & delivery, linehaul, construction, concrete ready-mix, wrecker, utility, logging, mining, oil field, refuse, fire service, rescue, agriculture, crane/cherry picker, mixer, or snowplow. It is not available for use in heavy haul. | \$6,267 | 284# |

| 18-Speed | | | |
| 2058754 | Transmission: Eaton FO20E318B-VXP UltraShift Plus 18-speed w/Hill Start Aid feature. Standard with synthetic lubricant. This product should be used in heavy haul, oilfield & mining applications, or other off-road services. *Torque Limit: 2050 pound-feet. * AMT transmissions require column mounted transmission control 8201052, 8201053. * An SPL250, SPL350, or RPL25SD driveline is required when an 18-speed transmission is requested with engine torque greater than 1849 ft-lbs. * Fuller overdrive transmissions with 400hp+ engine and GCW exceeding 90K require a code for transmission oil cooler. * Not available with an ISX12G engine. * Requires transmission filter 2450114 * The transmission you have selected (2058754 or 2058463) is not available on T680 with RH under fairing exhaust, due to clearance issues between the trans cooler-filter and exhaust FP piping. * UltraShift Plus transmissions require ABS that includes air traction control. * UltraShift Plus VXP are approved for use in pickup & delivery, linehaul, construction, concrete ready-mix, wrecker, utility, heavy haul, logging, mining, oil field, refuse, fire service, rescue, agriculture, crane/cherry picker, mixer, or snowplow. * With 2007+ EPA engines the transmission gear display for AutoShift or UltraShift transmissions will be located in the Kenworth Driver Information Center. | \$15,650 | 272# |
| 2058755 | Transmission: Eaton FO16E318B-MXP UltraShift Plus 18-speed w/Hill Start Aid feature. Standard with synthetic lubricant. This product should be used for heavy loads operating primarily on highway. *Torque Limit: 1650 pound-feet. * AMT transmissions require column mounted transmission control 8201052, 8201053. * An SPL250, SPL350, or RPL25SD driveline is required when an 18-speed transmission is requested with engine torque greater than 1849 ft-lbs. * Fuller overdrive transmissions with 400hp+ engine and GCW exceeding 90K require a code for transmission oil cooler. * Not available with an ISX12G engine. * The UltraShift Plus MXP or MHP requires written manufacturers approval when used for city delivery applications. * This transmission is available with a maximum engine torque of 1650 ft lbs. * UltraShift Plus MXP transmissions are approved for use in linehaul, regional haul, pickup and delivery, heavy haul, logging, mining, oil field, construction, concrete ready-mix, wrecker, crane/cherry picker, mixer, snowplow, utility, refuse, agriculture, and or off highway. * UltraShift Plus transmissions require ABS that includes air traction control. * With 2007+ EPA engines the transmission gear display for AutoShift or UltraShift transmissions will be located in the Kenworth Driver Information Center. | \$6,150 | 272# |

| Allison | | | |
| 4-Speed | | | |
| 2016155 | Transmission: Allison 4500RDS 4-speed w/o Retarder w/o PTO provision 5th generation. For vocational applications. Includes shift control, transmission oil temperature gauge, oil level sensor & heat exchanger. Transynd transmission fluid is standard on all Allison 1000, 2000, 3000 & 4000 series transmissions. * Allison RDS transmissions are restricted to 1550 ft lbs of engine torque when used as a refuse hauler. * Allison transmissions are not available on the W900L. * Allison transmissions require the additional selection of a push button or lever shift module. * This transmission is available with a maximum engine torque of 1850 ft lbs. | \$23,420 | 403# |
| 5-Speed | | | |
| 2011192 | Transmission: Allison 3000HS 5-speed w/o PTO drive gear. 5th Gen Controls. Includes heat exchanger & oil level sensor. Highway Service only as defined by Allison. CTransynd transmission fluid is standard on all Allison 1000, 2000, 3000 & 4000 series transmissions. * A PTO provision is not available with this Allison transmission. * Allison 3000 series transmissions are only available with MX-11 (0700192, and 0700198), or ISX12 (0125719, 0125730) engines. * Allison 3000-series transmissions are for use with engines rated at 370 HP or less. * Allison transmissions require the additional selection of a push button or lever shift module. * The Allison 3000 series transmissions will accept engine torque up to 1250 ft lbs. * The Allison 3000RDS is available on the T800 with a short hood [T800SH] or W900 with a sloped hood [W900S] due to PX-9 engine limitation, T680 and T4 series models only. Limited to use in linehaul or pick-up and delivery services only. For emergency services of fire or EMT/rescue use the EVS version. For other vocations use the RDS version. * There is no PTO provision available with this transmission. If a PTO will be required in the future use the RDS series transmission. | \$4,441 | 75# |
| 2011203 | Transmission: Allison 3000RDS 5-speed w/PTO drive gear. 5th Gen Controls. Includes heat exchanger & oil level sensor. Rugged Duty Series for vocational applications. Transynd transmission fluid is standard on all Allison 1000, 2000, 3000 & 4000 series transmissions. Requires a push button shift control code. Oil temperature gauge is standard on class 8 models. * Allison 3000 series transmissions are only available with MX-11 (0700192, and 0700198), or ISX12 (0125719, 0125730) engines. * Allison 3000-series transmissions are for use with engines rated at 370 HP or less. * Allison transmissions require the additional selection of a push button or lever shift module. * The Allison 3000 series transmissions will accept engine torque up to 1250 ft lbs. * The maximum GVWR for this transmission when used in mixer or refuse service is 60,000 lbs. | \$6,162 | 122# |
| 2011228 | Transmission: Allison 3500RDS 5-speed w/PTO drive gear. Limited to 860 lb.-ft. 5th Gen controls. Includes heat exchanger & oil level sensor. Rugged Duty Series for vocational applications. Transynd transmission fluid is standard on all Allison 1000, 2000, 3000 & 4000 series transmissions. * Allison transmissions require the additional selection of a push button or lever shift module. * The Allison 3500RDS is available on the T880 short hood, T880 set forward, W900 sloped hood due to PX-9 engine limitation, and T4 series models only. Not available for emergency services of fire or EMT/rescue. * This transmission is available with a maximum engine torque of 1050 ft lbs. | \$6,955 | 122# |

| 2038252 | Eaton AMT LSM Package - Linehaul Config Low Speed Maneuverability, Rev=Blended Pedal, Drive=Urge to Move, Manual=Standard, Low=Blended Pedal Eaton AMT Low Speed Maneuverability parameters to utilize various Eaton low speed functions depending on transmission shift selection (Reverse, Drive, Manual, Low). Eaton service tool can be utilized to reconfigure parameters individually if customer desires something other than typical Linehaul or Vocational package options. | \$0 | 0# |
| 2038253 | Eaton AMT LSM Package - Vocational Config Low Speed Maneuverability, Rev=Blended Pedal, Drive=Urge to Move, Manual=Standard, Low=Blended Pedal Eaton AMT Low Speed Maneuverability parameters to utilize various Eaton low speed functions depending on transmission shift selection (Reverse, Drive, Manual, Low). Eaton service tool can be utilized to reconfigure parameters individually if customer desires something other than typical Linehaul or Vocational package options. | \$0 | 0# |
| 2050007 | Neutral Coast Mode Disabled Eaton Automated Transmission Programming. * Neutral coast can only be disabled for combinations where it is present - MX-13 or Cummins X15 engines with Ultrashift-MHP, Advantage, PACCAR or Endurant transmissions. | \$0 | 0# |
| 2410005 | Optional neutral start switch. * The option for a neutral start switch is not compatible with UltraShift, PACCAR, Eaton Endurant or Advantage Automated transmissions. | \$62 | 0# |
| 2410047 | High Capacity Input Shaft Bearing for High PTO Duty Cycle * This option is available with the following transmissions: all 10-speed FR, all 13-speed, RTOC-16909A, RTOCM-16909A, and all 18-speed except the RTLO-22918B. All other Eaton transmissions have this feature as standard. | \$28 | 0# |
| 2410072 | Auto neutral not required this application. * Allison transmission auto neutral functionality exception is applicable only to chassis which specify a split shaft PTO installed at the factory or in the aftermarket. * If the vocation will not include a split-shaft PTO the auto neutral functionality will be required with pick up and delivery service hauling liquid petroleum, liquefied gas, or compressed gas. This is true with services of oil field well service or fire pumper as well. | \$0 | 0# |
| 2410151 | Pushbutton control center console mounted. Class 8 with Allison Transmission. * The shift control is located in the left-most cup holder. | \$0 | 0# |
| 2410154 | Allison lever control, center console mounted. The lever shifter is for use with Allison Transmissions and is located in the dash cup holder assembly. | \$387 | 0# |
| 2410212 | Allison Transmission Mobile PTO Operation - Change max output speed to 4500 RPM | \$0 | 0# |
| 2410241 | 1st gear start for Eaton UltraShift. * Optional first gear start replacing second gear start is an UltraShift option. Not an option for the UltraShift Plus -VMS. * Second gear start is the default with UltraShift transmissions other than the UltraShift Plus -VMS. This transmission family often needs special programming for first gear start based upon gradeability results for the vehicle specification. | \$0 | 0# |
| 2410244 | J1939 Park Brake Auto Neutral | \$0 | 0# |
| 2444000 | Chrome shift lever for main transmission. * Chrome shift level is not for use with Allison, AutoShift, or UltraShift transmissions. | \$108 | 0# |
| 2450114 | Add Transmission Filter: Eaton UltraShift Plus *Optional below 2050 lb-ft torque. Filter is installed on the transmission by Eaton. * This option is no available with transmissions rated for 2050 ft.lbs. of torque. | \$249 | 0# |

T880: TRANSMISSIONS

| Option | Description | Price | Weight |
|--------------------------------|---|----------|--------|
| Transmission Equipment | | | |
| 2480315 | Severe Service rear transmission support spring(s). * PACCAR MX engines utilize a flywheel housing design that makes this option unnecessary. * Transmission support springs are upgraded when required, except with PACCAR MX engines, when Severe Service is coded. | \$90 | 15# |
| 9490930 | Vent transmission, drive axle & transfer case to filter. * Option to vent the transmission and axle to a firewall mounted filter is not for use on Sisu or Marmon FDAs. These axles have a style of axle venting that will not allow them to be plumbed along with a transfer case or transmission. | \$165 | 8# |
| Auxiliary Transmissions | | | |
| 2154321 | Aux: AT1202 2-speed electric over air shift 3-position rocker switch dash mounted and includes synthetic lubricant | \$20,848 | 522# |
| Transfer Case | | | |
| 2329128 | Transfer Case: Fabco TC-143 873-0089-006 1-speed w/o PTO, w/o neutral w/lube pump. * If the chassis will be modified to include a driving front axle verify frame rake with Application Engineering prior to submitting the DTPO. * Special delivery requirements may be required with chassis specifying a transfer case. See shipping policy TA005. * This component requires a long lead-time. Refer to the long lead-time report for potential delivery date availability. * This transfer case is not available in combination with lift axles. * This transfer case requires an oil cooler. * Transfer case is only available when a front drive axle is specified. | \$34,619 | 1,033# |
| 2329339 | Transfer Case: Fabco TC-142 2-speed 873-0079-116 w/o PTO. 1.00:1 high, 2.23:1 low. W/dual acting high-low air shift. W/single acting air shift front drive engagement. W/pressurized lubrication pump & spin-on filter. W/ metal plug in speedo opening. W/special oil level for high speed applications. W/o neutral. W/o PTO. * If the chassis will be modified to include a driving front axle verify frame rake with Application Engineering prior to submitting the DTPO. * Special delivery requirements may be required with chassis specifying a transfer case. See shipping policy TA005. * This transfer case requires an oil cooler. * Transfer case is only available when a front drive axle is specified. | \$41,225 | 1,444# |
| Split-Shaft PTO | | | |
| 2410073 | Customer-installed split shaft PTO Informational only, nothing additional is provided. | \$0 | 0# |

| 2765810 | Manual Slack Adjusters. * Manual slack adjusters are for use in export operating areas only. Not compatible with antilock brakes. Not for use on front drive axles. Single steer axles, not twin steers. | \$183 | -4# |
| 2769000 | Slack Adjusters included w/ front axle or brake. Also use w/ disc brakes. * Front slack adjusters are included with brake packages, front drive axles, Meritor FF980 series axles, Marmon MT-22/Meritor FL941, and Dana Spicer EFA-24T5 axles, or air disc brakes. | STD | 0# |
| Front Springs | | | |
| 12K to 14.6K Capacity | | | |
| 2863012 | Front Springs: Taperleaf 12K w/ shock absorbers w/ maintenance-free elastomer spring pin bushings. Standard with rubber pins except for C500 which has threaded pins. Not available on W900L. * 12K and 12.35K taperleaf front springs cannot be used with tank bodies when a Kenworth Airglide rear suspension is specified. * It is strongly recommended that vehicles which will operate on steep downgrades, twisty roads, or on soft surfaces be specified with 16,000 lbs minimum front spring capacity. * Springs for use with front axle capacity of 12K through 13.2K. * This front spring is not compatible on W900L or W900S. | STD | 0# |
| 2863017 | Front Springs: Taperleaf 12.35K w/ shock absorbers w/ maintenance-free elastomer spring pin bushings. * 12K and 12.35K taperleaf front springs cannot be used with tank bodies when a Kenworth Airglide rear suspension is specified. * It is strongly recommended that vehicles which will operate on steep downgrades, twisty roads, or on soft surfaces be specified with 16,000 lbs minimum front spring capacity. * Springs for use with front axle capacity of 12K through 13.2K. * This spring is not available with low profile 315, 385, 425, or 445 front tires. | \$0 | 0# |
| 2863020 | Front Springs: Taperleaf Lightweight 12.5K w/ shock absorbers w/ maintenance-free elastomer spring pin bushings. Standard with rubber pins. | \$138 | -29# |
| 2864008 | Front Springs: Taperleaf Lightweight 13.2K w/ shock absorbers w/ maintenance-free elastomer spring pin bushings. Standard with rubber pins. | \$158 | -22# |
| 2864012 | Front Springs: Taperleaf 13.2K w/ shock absorbers w/ maintenance-free elastomer spring pin bushings. Standard with rubber pins. Not available on W900L. * 13.2K taperleaf springs are not a good choice for logging service. * It is strongly recommended that vehicles which will operate on steep downgrades, twisty roads, or on soft surfaces be specified with 16,000 lbs minimum front spring capacity. * Springs for use with front axle capacity up to 14.6K. * These front springs are not available on the W900S. * These springs are not for use on the W900L. | \$40 | 9# |
| 2864019 | Front Springs: Taperleaf 14.6K w/shock absorbers 2-leaf. With maintenance-free elastomer spring pin bushings. Standard with rubber pins. Not available on W900L or W900S. * 14.6K taperleaf front spring not for use on W900S or W900L. * It is strongly recommended that vehicles which will operate on steep downgrades, twisty roads, or on soft surfaces be specified with 16,000 lbs minimum front spring capacity. * Springs for use with front axles capacity of 20k or less. * The 14.6,000 lb. taperleaf spring is not available with anti-lock brakes that includes pre-wire for full truck ESP in a mixer or dump truck application. | \$572 | 25# |

T880: FRONT AXLE

| Option | Description | Price | Weight |
|--------------------------------|--|---------|--------|
| Front Springs | | | |
| 12K to 14.6K Capacity | | | |
| 2864105 | Front Springs: Taperleaf 14.6K w/shock absorbers 3-leaf. With maintenance-free elastomer spring pin bushings. Standard with rubber pins. T880 set forward axle only. * It is strongly recommended that vehicles which will operate on steep downgrades, twisty roads, or on soft surfaces be specified with 16,000 lbs minimum front spring capacity. * Only available with T880S. * Springs for use with front axles capacity of 20k or less. * The 14.6,000 lb. taperleaf spring is not available with anti-lock brakes that includes pre-wire for full truck ESP in a mixer or dump truck application. | \$280 | 17# |
| 2884000 | Kenworth AG 130 front air suspension 13.2K w/ shock absorbers. Standard with rubber pins. * AG130 front suspension is not available with wirebraid air hoses or -60 degree (arctic) hoses. * Kenworth AG130 air front suspension is available for use with E-1202I, E-1322I, D-1251IL, D-1251LW, D-1301IL, D-1321IL, D-1321LW, MFS MERITOR. Not for use with any class C or D road service. Not for use in logging service. * Not available with ISX12N in 2.1M models. * T660 and T800 front frame will not permit the air dryer to be mounted under the hood when the AG130 front suspension is specified. The air dryer will move to a back of cab location in this case. * The AeroCab style exhaust is incompatible with the Allison 4500 transmission w/o PTO when used in conjunction with the AG130 front air suspension. * With use of the Kenworth AG130 front suspension on T800SH the air tanks cannot be located on the bottom of a battery box module under the cab. | \$1,513 | -13# |
| 15K & Over Capacity | | | |
| 2864016 | Front Springs: Taperleaf 16K w/shock absorbers w/ maintenance-free elastomer spring pin bushings. Three Leaf. Standard with rubber pins except for C500 which has threaded pins. Not available on W900L. * Aluminum front drive bracket is not for use with front springs rated at 16k or greater. * Iron shackle brackets are standard with a spring capacity of 16K or greater , no code required. * Springs for use with front axles capacity of 20k or less. * These front springs are not available on the W900S. * These front springs are not for use on W900L. Available on the W900B with 2007+ engines only. | \$730 | 121# |
| 2864110 | Front Springs: Taperleaf 16K w/shock absorbers w/ maintenance-free elastomer spring pin bushings. Standard with rubber pins. T880S set forward axle only. * 16K Front Springs code 2864110 requires a 14.6k or 20k front axle. * Only available with T880S. | \$632 | 131# |
| 2865018 | Front Springs: Taperleaf 18K w/shock absorbers w/ maintenance-free elastomer spring pin bushings. Standard with rubber pins. Not available on W900L. * Aluminum front drive bracket is not for use with front springs rated at 16k or greater. * Iron shackle brackets are standard with a spring capacity of 16K or greater , no code required. * Springs for use with front axles capacity of 20k or less. * These front springs are not available on the W900S. * These springs are not for use on the W900L. | \$1,190 | 184# |

T880: FRONT AXLE

| Option | Description | Price | Weight |
|--------------------------------|---|---------|--------|

Front Spring Equipment

| | | | |
|----------------|--|------|----|
| 2900020 | Front Frame Raised: 1/2 in. * Available with T4 and these front springs (2864016, 2865018, 2866020, 2867022) * Available with T800, T880 or W990 and these front springs (2884000, 2864016, 2865018, 2866020, 2867022, 2866025, 2867027) * Available with W900S and front springs 2866020 | \$21 | 0# |
| 2900024 | Front Frame Raised: 1 in. * Available with T4 and these front springs (2864016, 2865018, 2866020, 2867022) * Available with T800, T880 or W990 and these front springs (2884000, 2864016, 2865018, 2866020, 2867022, 2866025, 2867027) * Available with W900B and these front springs (2864016, 2864019, 2865018, 2866021, 2867022) * Available with W900S and front springs 2866020 | \$44 | 0# |
| 2900615 | Threaded bushings for taperleaf springs 12K - 14.6K replacing rubber: T6/T8, W900B, W990. W9L gets as standard: code not required. Not available with W9S. 13K - 14.6K for T370. * Front spring threaded bushing code 2900615 is only available with 12K-14.6K taperleaf springs. * Front spring threaded bushings are standard on W900L, no code required. | \$49 | 0# |
| 2900616 | Threaded Bushings for taperleaf spring 16K, 18/20K, 22K, 40K replacing rubber. * Front spring threaded bushing code 2900616 is only available with 16K, 18K, 20K, 22K and 40K taperleaf springs. * Front spring threaded bushings are standard on W900L, no code required. | \$89 | 0# |

Power Steering

Single Gear

| | | | |
|----------------|--|-------|-----|
| 2893671 | Single power steering gear: 13.2K TRW THP60 Not for use on T3. * Creep loading of the front axle with pushers raised may compromise park-steer performance with a TAS65, M100P, or HD94 single gear is used with a single lift axle, or a TAS85, SD110 or M110P single gear is used with more than one lift axle. * Single light weight steering gears are not for use with 2900702 (setback axle W900S). * Single power steering gear rated to 13.2K is compatible with front axle capacities under 20K. * Steering gear for single front axle installations only. | \$34 | -7# |
| 2893881 | Single power steering gear: 16K TRW TAS85 W900B/W990 available, but not available W900S, W900L or T3. * Creep loading of the front axle with pushers raised may compromise park-steer performance with a TAS65, M100P, or HD94 single gear is used with a single lift axle, or a TAS85, SD110 or M110P single gear is used with more than one lift axle. * Iron front drive brackets are required on T4 Series, T660, T800, T880 and W900B models when a single TAS85 power steering gear is specified. The upgraded drive bracket is standard with front spring capacities over 14.6K. * Single light weight steering gears are not for use with 2900702 (setback axle W900S). * Single power steering gear rated to 16K is compatible with front axle capacities up to 20K. * Single TAS85 power steering gear is not available on W900S or W900L. * Steering gear for single front axle installations only. * The creep loading of the front axle [load with lift axle raised] may compromise park-steer performance with a single power steering gear and a non-steerable pusher. Consider using dual steering gears in this application. | \$428 | 18# |

T880: FRONT AXLE

| Option | Description | Price | Weight |
|-----------------------|---|---------|--------|
| Power Steering | | | |
| Single Gear | | | |
| 2895101 | Single power steering gear: 16K Sheppard SD110. * Creep loading of the front axle with pushers raised may compromise park-steer performance with a TAS65, M100P, or HD94 single gear is used with a single lift axle, or a TAS85, SD110 or M110P single gear is used with more than one lift axle. * The creep loading of the front axle [load with lift axle raised] may compromise park-steer performance with a single power steering gear and a non-steerable pusher. Consider using dual steering gears in this application. | \$486 | 9# |
| 2895221 | Single power steering gear: 13.2K Sheppard HD94. * Creep loading of the front axle with pushers raised may compromise park-steer performance with a TAS65, M100P, or HD94 single gear is used with a single lift axle, or a TAS85, SD110 or M110P single gear is used with more than one lift axle. * Single light weight steering gears are not for use with 2900702 (setback axle W900S). * Single power steering gear rated to 13.2K is compatible with front axle capacities under 20K. * Steering gear for single front axle installations only. | STD | 0# |
| Dual Gear | | | |
| 2893642 | Dual power steering gear: 16-22K TRW THP60 Not for use on T3. * Dual power steering gears rated to 20K are not compatible with axles rated below 20,000 lbs. | \$1,272 | 54# |
| 2893882 | Dual power steering gears: 32K TRW TAS85. * Dual power steering gears rated over 29K are not compatible with axles rated below 20K. * Dual, triple, or quadruple power steering gears require the use of a power steering cooler. * For use on W900B with a 2007+ EPA compliant engine. * Steering gear for single front axle installations only. | \$1,668 | 113# |
| 2895103 | Dual power steering gear: 16-23K Sheppard SD110. Severe duty. * Dual power steering gears rated to 20K are not compatible with axles rated below 20,000 lbs. | \$1,682 | 81# |
| 2895302 | Dual power steering gear: 16-22K Sheppard HD94. Heavy duty. Not for use on T3. * Dual power steering gears rated to 20K are not compatible with axles rated below 20,000 lbs. | \$1,235 | 73# |
| Miscellaneous | | | |
| 2899336 | Power Steering Cooler:Radiator Mounted Air-to-Oil * Cooling module mounted power steering fluid cooler. Optional for single steering gears, required with more than one gear. * On the T470 the fuel cooler and power steering cooler are a single unit. Add a power steering cooler when a fuel cooler is specified. * Power steering cooler required for 2.1 meter cabs with ISX12 and ISX12G engine. | \$356 | 11# |

T880: FRONT AXLE

| Option | Description | Price | Weight |
|---|---|----------|--------|
| Twin Steer | | | |
| Non-Driving | | | |
| 2509140 | Twin Steer Front Axle: 40,000 lbs. Dana Spicer D2000. | \$10,176 | 1,508# |
| <ul style="list-style-type: none">* A front axle setting code must be present on all C500 twin steer orders. Use code 2900730 or 2900745.* D2000 twin steer axles cannot be used in Export service except on the K500.* MX engine is not available on twin steer chassis except for T880S twin steer.* Narrating desired fuel tank placement relative to the back of cab or centerline of the rearmost steer axle will help ensure that the chassis body requirements are met.* Severe Service Warranty is required for front steer axles rated over 22,000 lbs GAWR, except in Ready Mix Concrete service.* Special delivery requirements may be required on twin steer chassis. See shipping policy TA005.* Steel fenders are required on T800 models used with twin steer configurations.* T800 twin steer and C500 twin steer models are not available with 2017 Efficiency Series X15 engines as the design of the fuel pump on these engines interferes with the power steering pump for the T800/C500 twin steers.* The Alcoa 83462 front wheel interferes with the steer arm in the D2000 axle installation. D2200 is not an issue.* The T800 twin steer option is offered only on chassis with a road use profile of 10% maximum class C and 5% maximum class D roads. If your vocation will exceed these values consider using a C500 twin steer chassis.* The wheelbase on a T800 twin steer chassis is measured from the centerline of the forward steer axle to the centerline of the rear axle group. Steer axle spacing is 72 inches.* Twin steer chassis can use a flat or curved glass in a wide hood, split fender hood, or sheet metal hood configuration.* Twin steer chassis require either 1-piece wide steel fenders or 2-piece aluminum diamond plate fenders.* Wheelbases on twin steer K500 chassis are measured from centerline of the forward steer axle, like a T800, to centerline of bogie. Differs from C500 which is measured from centerline of forward axle group to centerline of bogie. | | | |

Twin Steer

Non-Driving

| | | | |
|--|---|----------|--------|
| 2509144 | Twin Steer Front Axle: 40,000 lbs. Dana Spicer D2200. | \$11,505 | 1,546# |
| <ul style="list-style-type: none">* A front axle setting code must be present on all C500 twin steer orders. Use code 2900730 or 2900745.* D2200 twin steer axle installation is for use with 2007+ EPA compliant engine platform only. Not for use in export operating areas.* MX engine is not available on twin steer chassis except for T880S twin steer.* Narrating desired fuel tank placement relative to the back of cab or centerline of the rearmost steer axle will help ensure that the chassis body requirements are met.* Severe Service Warranty is required for front steer axles rated over 22,000 lbs GAWR, except in Ready Mix Concrete service.* Special delivery requirements may be required on twin steer chassis. See shipping policy TA005.* Steel fenders are required on T800 models used with twin steer configurations.* T800 twin steer and C500 twin steer models are not available with 2017 Efficiency Series X15 engines as the design of the fuel pump on these engines interferes with the power steering pump for the T800/C500 twin steers.* The T800 twin steer option is offered only on chassis with a road use profile of 10% maximum class C and 5% maximum class D roads. If your vocation will exceed these values consider using a C500 twin steer chassis.* The wheelbase on a T800 twin steer chassis is measured from the centerline of the forward steer axle to the centerline of the rear axle group. Steer axle spacing is 72 inches.* Twin steer chassis can use a flat or curved glass in a wide hood, split fender hood, or sheet metal hood configuration.* Twin steer chassis require either 1-piece wide steel fenders or 2-piece aluminum diamond plate fenders.* Wheelbases on twin steer K500 chassis are measured from centerline of the forward steer axle, like a T800, to centerline of bogie. Differs from C500 which is measured from centerline of forward axle group to centerline of bogie. | | | |
| 2517140 | Meritor MFS20 40K Dual 3.5in. Drop Standard Track Twin Steer. | \$10,186 | 1,454# |
| <ul style="list-style-type: none">* T800 twin steer and C500 twin steer models are not available with 2017 Efficiency Series X15 engines as the design of the fuel pump on these engines interferes with the power steering pump for the T800/C500 twin steers. | | | |
| 2539002 | PACCAR Front Axle rated at 40K, standard track, 4 in. drop. | \$9,553 | 467# |
| 2539003 | PACCAR Front Axle rated at 40K, Wide Track 4 in. drop. | \$10,214 | 495# |

Outer End Equipment

Brakes & Drums

| | | | |
|---|---|-----|----|
| 2621405 | Twin Steer Front Axle Brakes: 40K Bendix ES S-cam 16-1/2x6 in. | \$0 | 0# |
| <ul style="list-style-type: none">* Front brakes for use on twin steer axles only. | | | |
| 2690003 | Twin Steer Front Axle Brake Drums: 16-1/2x6 in. 40,000 lbs. cast. | \$0 | 0# |
| <ul style="list-style-type: none">* Dual front axle 16.5 x 6 inch drums are for use with 16.5 x 6 inch twin steer brakes. | | | |

| Outer End Equipment | | | |
| Hubs & Seals | | | |
| 2701340 | Twin Steer front axle Hubs Aluminum hub pilot 40,000 lbs. 10 Bolt 11-1/4 in. bolt circle | \$0 | 0# |
| * 16.5 x 6 inch hubs for use on twin steer chassis. | | | |
| * Aluminum front hubs rated at 20K are not available with lift axles. | | | |
| * Hub for twin steer axle is only available with Preset Plus oil seals. | | | |
| * These hubs are not available with front tires that have a static loaded radius of 21.5 inches or more. | | | |
| * This hub must be used with wheel styles of Accuride 29806 or Alcoa 82362/82365 if a 40K rating is desired. Other wheel styles may result in a derate. Refer to TE1716 on DealerNet. | | | |
| 2741971 | ConMet PreSet Plus Hub package; front axle twin steer. | \$0 | 0# |
| * For use with twin steer front axles only. | | | |
| * Hub for twin steer axle is only available with Preset Plus oil seals. | | | |
| Front Springs | | | |
| 2869043 | Twin Steer Front Axle Springs: taperleaf 40K w/ beam equalizing suspension and maintenance-free elastomer spring pin bushings. 61 in. axle spacing. | \$12,754 | 1,340# |
| Power Steering | | | |
| 2895113 | Triple Power Steering Gears: 40K Sheppard SD110/ HD94. Twin Steer axles only. | \$6,872 | 170# |
| Miscellaneous | | | |
| 2750002 | Twin Steer front axle vented hubcaps. | \$0 | 0# |
| * Vented hubcap for use on twin steer axles. | | | |
| 2765002 | Twin Steer front axle automatic slack adjusters. | \$0 | 0# |
| * Automatic slack adjusters for twin steer front axles. | | | |
| Miscellaneous | | | |
| 2790035 | Maximum length wheel studs for hub pilot wheels only. Option is standard length w/ dual aluminum wheels, code not required. | \$13 | 2# |
| * Maximum length wheel studs for use with steel wheels when dealer may opt to change the wheel material to aluminum after the truck leaves the factory. Available with hub pilot mounting style only. Not available for twin steer configurations. Not compatible with front drive axles. | | | |

T880: REAR AXLE

| Option | Description | Price | Weight |
|-------------------------------|--|---------|--------|
| Tandem Drive Rear Axle | | | |
| 46K | | | |
| 3142160 | Dual Meritor RT46-160 rear axle rated at 46K. Tandem rear axles. * 6S/6M ABS systems are required on RSD tractors (all US, Canada, or Mexico (with EPA2010+ engines) chassis with factory- or customer-installed fifth wheel with rear GAWR under 29K per axle, except twin steer chassis) with the following configuration: Tandem rear axle with steer axle GAWR up to and including 14.6K and drive axle GAWR over 40K. * This axle may have warranty limited to one year for use in export operating areas or with certain vocations operating in Canada. | \$2,834 | 534# |
| 3142161 | Dual Meritor RT46-160P rear axle rated at 46K. Tandem rear axles. * 6S/6M ABS systems are required on RSD tractors (all US, Canada, or Mexico (with EPA2010+ engines) chassis with factory- or customer-installed fifth wheel with rear GAWR under 29K per axle, except twin steer chassis) with the following configuration: Tandem rear axle with steer axle GAWR up to and including 14.6K and drive axle GAWR over 40K. * This axle may have warranty limited to one year for use in export operating areas or with certain vocations operating in Canada. | \$2,984 | 564# |
| 3142170 | Dual Rear Axle 46,000 lbs. Meritor RT46-164EH Heavy wall housing * 6S/6M ABS systems are required on RSD tractors (all US, Canada, or Mexico (with EPA2010+ engines) chassis with factory- or customer-installed fifth wheel with rear GAWR under 29K per axle, except twin steer chassis) with the following configuration: Tandem rear axle with steer axle GAWR up to and including 14.6K and drive axle GAWR over 40K. | \$3,483 | 611# |
| 3142171 | Dual Meritor RT46-164PEH rear axle rated at 46K w/ heavy wall housing. Tandem rear axles. * 6S/6M ABS systems are required on RSD tractors (all US, Canada, or Mexico (with EPA2010+ engines) chassis with factory- or customer-installed fifth wheel with rear GAWR under 29K per axle, except twin steer chassis) with the following configuration: Tandem rear axle with steer axle GAWR up to and including 14.6K and drive axle GAWR over 40K. * This axle may have warranty limited to one year for use in export operating areas or with certain vocations operating in Canada. | \$3,773 | 641# |
| 3142172 | Dual Meritor RT46-164EH rear axle rated at 46K; wide track tandem rear axles w/ heavy wall housing. * 6S/6M ABS systems are required on RSD tractors (all US, Canada, or Mexico (with EPA2010+ engines) chassis with factory- or customer-installed fifth wheel with rear GAWR under 29K per axle, except twin steer chassis) with the following configuration: Tandem rear axle with steer axle GAWR up to and including 14.6K and drive axle GAWR over 40K. * For mixer chassis, wide track rear axles cannot be combined with super single rear wheels. Use dual wheel mounting style for greater roll stability. * Meritor RT46-164EH wide track rear axles are incompatible with the Kenworth AG380 rear suspension * Special delivery requirements may be required due to potential for vehicle over width due to wide track rear axle. See shipping policy TA005. * This axle may have warranty limited to one year for use in export operating areas or with certain vocations operating in Canada. * Wide track axles are often over the legal width of 102 inches and may require special delivery arrangements. | \$4,870 | 757# |

| Dual | | | |
| 3483260 | Spring Brake: 3630 dual for Sisu axle. * Sisu tandem rear axles require 3630 spring brake chambers. This code is not available for use with other axle manufacturers. * Spring brake available for use with Sisu tandem rear axles. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use long stroke brake chambers instead. | \$1,672 | 28# |
| 3485002 | Spring brakes included w/ dual rear air disc brakes. * Neway AD390 rear suspension requires high output spring brakes when used with drum brakes on axles other than Sisu. Sisu rear axles utilize a spring brake that is acceptable for use with this suspension. This doesn't apply to K500. * Spring brakes for use only with, and required for air disc brakes on tandem rear axle chassis. * The air disc brakes require a generic spring brake code. | \$0 | 0# |
| 3485207 | Spring Brake: 3030 long stroke dual 30 square inches travel; replaces standard 2-1/2 in. travel. Helps keep brakes in adjustment longer. * 3030 high output spring brakes for tandem rear axles when no more than one pusher axle is specified. * Long stroke brake chambers are not compatible with Neway AD rear suspensions. There is no option for inverted or high mounting these chambers. * Long stroke brake chambers are required for RSD-compliant chassis with drum brakes. * Spring brakes with 3030 chamber size for use on tandem rear axle with capacities up to 52K. Not for use in fire service. | \$28 | 4# |
| 3485208 | Spring Brake: 3036 dual 30 square inches; 36 square inches spring chamber. * 3036 spring brake chambers for use on tandem rear axle capacities up to 58K. Not available for fire service, see 3636 chamber size. * Multiple lift axles require the use of 3036 spring brake chambers. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use long stroke brake chambers instead. | \$215 | 16# |

Tandem Axle Outer End Equipment

Spring Brake & Service Chambers

Dual

| | | | |
|--|--|-------|-----|
| 3485209 | Spring Brake: 3030 high output dual. | STD | 0# |
| <ul style="list-style-type: none"> * 3030 high output spring brakes for tandem rear axles when no more than one pusher axle is specified. * Neway AD390 rear suspension requires high output spring brakes when used with drum brakes on axles other than Sisu. Sisu rear axles utilize a spring brake that is acceptable for use with this suspension. This doesn't apply to K500. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use long stroke brake chambers instead. | | | |
| 3485210 | Spring Brake: 3636 dual. | \$248 | 24# |
| <ul style="list-style-type: none"> * Meritor axles rated over 52K should use the 3636 spring brake. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use long stroke brake chambers instead. | | | |
| 3485213 | Spring Brake: 3036 long stroke dual 30 square inches; 36 square inches spring chamber. | \$274 | 16# |
| <ul style="list-style-type: none"> * 3036 Longstroke brake chambers are not available with Neway ADZ suspensions. * 3036 spring brake chambers for use on tandem rear axle capacities up to 58K. Not available for fire service, see 3636 chamber size. * Long stroke brake chambers are not compatible with Neway AD rear suspensions. There is no option for inverted or high mounting these chambers. * Long stroke brake chambers are required for RSD-compliant chassis with drum brakes. * Not available with Kenworth AG380 rear suspension. | | | |

Brake Equipment

| | | | |
|---|---|-----|----|
| 3500006 | Inverted chambers for 16-1/2 x 7 in. brakes; Replaces standard mount w/ higher mount. | \$6 | 0# |
| <ul style="list-style-type: none"> * Inverted rear brake chambers are only available on Chalmers or Hendrickson beam type rear suspensions. The option will not work with Chalmers low mount suspension requesting 3036 brake chambers. Not available with Hendrickson HMX with saddle height below 17.5 inches. * Recommended for asphalt spreaders. * The option to invert rear brake chambers is not available with an LMS brake package or with axle capacities of 58K or greater. Not for use with air disc brakes. | | | |
| 3500012 | Replace standard mount w/ high mount for rear rear axle brake chambers. | \$0 | 0# |
| <ul style="list-style-type: none"> * High mount brake chambers are not available with some high capacity rear axles where the chambers are already in the highest possible position. * High mounted rear brake chambers are applicable to high mount Chalmers, standard height Hendrickson HMX except with 3036 chamber size, or Hendrickson beam suspensions other than HMX with 16.5 inch [low] saddle height. | | | |
| 3500021 | Brake cam tube bracket required w/ wide base tires w/ Airslide 380, 400, 400L, 460, 690 & Primaax suspension. | \$0 | 4# |
| <ul style="list-style-type: none"> * 50R/22.5 or 55R/22.5 rear tires require the use of a brake camshaft tube brace in applications other than with Meritor rear brakes, air disc brakes on rear axle, or with a Reyco rear suspension. * Brake camshaft tube brace is not available with Reyco rear suspensions, rear air disc brakes, axles rated over 46K, or Meritor rear brakes. | | | |

Differential Lock & Crosslock

| | | | |
|---|--|---------|-----|
| 3511400 | Driver Controlled Differential Lock (Crosslock) for Meritor Axles 40K to 52K forward rear axle. Under Speed Interlock is standard on T680. | \$1,410 | 19# |
| <ul style="list-style-type: none"> * Crosslock for tandem rear axles rated under 58k. Not available on dead axle tandem installations. | | | |

| Option | Description | Price | Weight |
|--|---|---------|--------|
| Tandem Axle Outer End Equipment | | | |
| Differential Lock & Crosslock | | | |
| 3511401 | Driver Controlled Differential Lock (Crosslock) for FUELite MA40-165. * Bendix eTrac traction enhancement system requires differential lock code 3531001 (Dana) OR 3511401 (Meritor). * Meritor FUELite dead axle tandem requires differential lock code 3511401. | \$1,411 | 0# |
| 3511410 | Driver Controlled Differential Lock (Crosslock) for Meritor Axles 40K to 58K rear rear axle. Under Speed Interlock is standard on T680. * Crosslock for tandem rear axles rated under 58k. Not available on dead axle tandem installations. | \$1,457 | 19# |
| 3511420 | Driver Controlled Differential Lock (Crosslock) for Meritor Axles 40K to 52K forward rear & rear rear axle. Under Speed Interlock is standard on T680. * Crosslock for tandem rear axles rated under 58k. Not available on dead axle tandem installations. * Engagement of both traction control devices may seriously impair the steering of the vehicle. Use code 3573110, 3573111, or 3573112 to provide separate switches and help alleviate the issue. | \$2,621 | 39# |
| 3511500 | Driver Controlled Differential Lock (Crosslock) for Paccar Axles 40K rated, forward rear axle, with cab control. | \$1,369 | 19# |
