JEFFERSON PARISH

Department of Purchasing

Michael S. Yenni
Parish President

Renny Simno
Director

July 2018

CHANGES TO JEFFERSON PARISH BIDDING PROCEDURES

The East bank Office of Purchasing is now open! We are located in the Joseph S. Yenni Building, 1221 Elmwood Park Blvd., Suite 404, Jefferson, LA 70123. Bidders may submit bid responses at this location, pending authorization in each bid package. **Bidders should carefully read and must respond accordingly per the requirements of the bid packages. NOTE: Bidders submitting bids on the day of bid opening, bidders must submit at the West Bank location only.**

Other Changes Continued:

- For all advertised sealed bids, written evidence of signature authority must be included with bid submission.
- Current W9 Forms and vendor applications may be submitted at any time; however, if your company is not registered and/or a current W-9 form is not on file, a current W-9 form must be supplied upon contract execution, should you be awarded a contract and/or issued a purchase order.
- **Proof of insurance in the form of a current certificate evidencing coverages is required with bid submission.** Bidders must read the insurance requirements attachment included in each bid package for specific instructions. Upon contract execution, successful bidder must produce final insurance certificates in accordance with Jefferson Parish insurance requirements.

Bidders should reference the "Additional Requirements" section of the bid instructions and/or the "Important Notice to Bidders" included in the bid package for specific requirements to respond accordingly.

For more information, please call Jefferson Parish Purchasing at 504-364-2678.

ONE (1) YEAR CONTRACT FOR MODEL YEAR 2019 HEAVY DUTY VEHICLES FOR JEFFERSON PARISH DEPARTMENT OF FLEET MANAGEMENT

Louisiana State Dealer's License:

In accordance with LA RS 32:1254 et seq and LA RS 38:2212.8, a Louisiana State Dealers License is required. All bidders must provide a copy of their Louisiana Dealer's License with their bid submission. Failure to submit this copy shall result in bid rejection.

Order Placement and Delivery of New Vehicles:

Upon order placement approved by Fleet Management, the successful vendor shall deliver vehicles within 220 days of order placement. All vehicles shall be delivered with 4 sets of keys.

Color of Vehicles (Exterior and Interior):

Exterior: Vehicles must be delivered in either white or red as specified by Fleet Management upon order placement.

Interior: Jefferson Parish will accept any available interior color; however this will be subject to approval by Jefferson Parish Fleet Management.

Servicing of Vehicles:

Successful vendor must pick up and/or deliver vehicles for factory maintenance and/or warranty services within one (1) hour of notification by the Jefferson Parish Fleet Management Department. The vehicles will be picked up and delivered to 4901 Jefferson Hwy., Suite A, Jefferson, LA 70121.

Brand Names:

Where brand names are specified, it is for the purpose of establishing minimum standard of quality. Bids may be submitted for products for equal quality, provided the brand names are specified in the respective line items as indicated. Complete equivalent product data will be required with bid submission. Failure to provide this documentation will result in bid rejection.

Pricing:

All pricing shall be firm until end of the 2019 model year or until contract expiration whichever is later. All pricing for dealer options must be invoiced at manufacturer's cost. Bidders must submit complete manufacturer's cost list with bid submission. Failure to submit will result in bid rejection. The Parish of Jefferson will accept and require Mid-Year model (2020) at 2019 model bid pricing.

Vehicle Warranty Information:

All new vehicles must be delivered complete with standard factory warranty. Warranty period (years/mileage) must be provided with bid submission. Failure to submit will result in bid rejection.

Vehicle Manuals:

Upon delivery of new vehicles, the successful vendor must provide (2) sets of manuals as indicated by each appropriate line item. Electronic copies of these manuals may be supplied at the successful vendor's cost.

Safety Specifications for All Vehicles:

Must meet or exceed all federal and state safety standards.

DATE: 10/17/2018
BID NO.: 50-00124461

INVITATION TO BID
THIS IS NOT AN ORDER

Page: 1

JEFFERSON PARISH

PURCHASING DEPARTMENT
P.O. BOX 9
GRETN, LA. 70054-0009
504-364-2678

BUYER: MCamardelle@jeffparish.net

BIDS WILL BE RECEIVED IN THE WEST BANK PURCHASING DEPT, SUITE 4400, JEFFERSON PARISH GENERAL GOVERNMENT BUILDING, 200 DERBIGNY STREET, GRETN, LA 70053 UNTIL 2:00 PM, 11/01/2018 AND PUBLICLY OPENED THEREAFTER.

For convenience, bidders may also submit bids in the East Bank Purchasing Department, Suite 404, Jefferson Parish Joseph S. Yenni Building, 1221 Elmwood Park Blvd., Jefferson LA 70123. However, if submitting bids on the day of bid opening, bidders must submit at the West Bank location only. All bids will be publicly opened at the West Bank location.

At no charge, bidders may also submit via Jefferson Parish's electronic procurement page by visiting www.jeffparishbids.net to register for this free site. Additional instructions are included in the text box highlighting electronic procurement.

LATE BIDS WILL NOT BE ACCEPTED

Unless submitting via online (see Page 3), each bid must be submitted in a sealed envelope bearing on the outside; the name of the Bidder, his address, and the name of the project for which the bid is submitted and the bid number.

NOTE: ONLY BIDS WRITTEN IN INK OR TYPEWRITTEN, AND PROPERLY SIGNED BY A MEMBER OF THE FIRM OR AUTHORIZED REPRESENTATIVE, WILL BE ACCEPTED. PENCIL AND/OR PHOTOSTATIC FIGURES OR SIGNATURES SHALL RESULT IN BID REJECTION.

INSTRUCTIONS FOR BIDDERS AND GENERAL CONDITIONS

THE FOLLOWING INSTRUCTIONS APPLY TO ALL BIDS

All bids submitted are subject to these instructions and general conditions and any special conditions and specifications contained herein, all of which are made part of this bid proposal reference. By submitting a bid, vendor agrees to comply with all provisions of Louisiana Law as well be in compliance with the Jefferson Parish Code of Ordinances, Louisiana Code of Ethics, applicable Jefferson Parish ethical standards and Jefferson Parish Resolution No. 113646 and/or Resolution No. 113647.

Jefferson Parish adheres to the Louisiana Code of Governmental Ethics, contained in Louisiana Revised Statutes Annotated, R.S. 42:1101, et seq. Vendor/Proposer by this submission, warrants that there are no "conflicts of interest" related to this procurement that would violate applicable Louisiana Law. Violation of the Louisiana Code of Governmental Ethics may result in rescission of contract, permit or licenses, and the imposition of fines and/or penalties, without contractual liability to the public in accordance with applicable law.

All vendors submitting bids should register as a Jefferson Parish vendor if not already yet registered. Registration forms may be downloaded from <http://purchasing.jeffparish.net> and by clicking on Vendor Information. Current W-9 forms with respective Tax Identification numbers and vendor applications may be submitted at any time; however, if your company is not registered and/or a current W-9 form is not on file, vendor registration is mandatory. Further, a current W-9 form and respective Tax Identification number must be supplied upon contract execution, should you be awarded a contract and/or issued purchase order. Failure to do so may result in delay of payment.

All quotations shall be based on F.O.B. Agency warehouse or job site, anywhere within the Parish as designated by the Purchasing Department. This provision does not apply to public works projects

JEFFERSON PARISH requires all products to be new (current) and all work must be performed according to standard practices for the project. Unless otherwise specified, no aftermarket parts will be accepted. Unless otherwise specified, all workmanship and materials must have at least one (1) year guaranty, in writing, from the date of delivery and/or acceptance of the project. Any deviations or alterations from the specifications must be indicated and/or supporting documentation supplied with bid submission.

Bidders should submit all questions in writing via email to the buyer's email address as indicated above, no later than Five (5) working days prior to the bid opening. Bid numbers should be mentioned in all requests. If submitting online, vendors may send questions via the E-Procurement site no later than Five (5) working days prior to the bid opening.

If this bid requires a pre-bid conference (see Additional Requirements section), bidders are advised that such conference will be held to allow bidders the opportunity to identify any discrepancies in the bid specifications and seek further clarification regarding instructions. The Purchasing Department will issue a written response to bidders' questions in the form of an Addendum. Please note that all official communication will be expressed in the form of an addendum.

Visit our website at [HTTP://PURCHASING.JEFFPARISH.NET](http://PURCHASING.JEFFPARISH.NET)

All formal Addenda require written acknowledgement on the bid form by the bidder. Failure to acknowledge an Addendum on the bid form shall cause the bid to be rejected. JEFFERSON PARISH reserves the right to award bid to next lowest responsive and responsible bidder in this event.

JEFFERSON PARISH will accept one price for each item unless otherwise indicated. Two or more prices for one item will result in bid rejection. Bidders are required to complete, sign and return the bid form and/or complete and return the associated line item pricing forms as indicated. Vendors must not alter the bid forms. Doing so will cause the bid to be rejected.

A corporate resolution or written evidence of the individual signing the bid having such authority must be submitted with the bid. Failure to comply will cause bid to be rejected. For corporate entities, such written evidence may be a printout of the Louisiana Secretary of State's website listing the signatory as an officer. Such printout shall be included with the bid submission. Bids submitted by Owners or Sole Proprietorships must include certification that he or she owns the entity for which the bid is signed. This documentation must be submitted with the bid. Failure to do so will result in bid rejection.

NOTE: A sample corporate resolution can be downloaded from our website <http://purchasing.jeffparish.net> or you may provide your own document. A sample certification of sole proprietorship can also be downloaded from our website <http://purchasing.jeffparish.net> or you may provide your own document.

INSTRUCTIONS FOR BIDDERS AND GENERAL CONDITIONS

A. AWARD OF CONTRACT: JEFFERSON PARISH reserves the right to award contracts or place orders on a lump sum or individual item basis, or such combination, as shall in its judgment be in the best interest of JEFFERSON PARISH. Every contract or order shall be awarded to the LOWEST RESPONSIVE and RESPONSIBLE BIDDER, taking into consideration the CONFORMITY WITH THE SPECIFICATIONS and the DELIVERY AND/OR COMPLETION DATE. SPLIT AWARDS MADE TO SEVERAL VENDORS WILL ONLY BE GRANTED TO THOSE DEEMED RESPONSIVE AND RESPONSIBLE.

All bid prices shall remain valid for 45 days. Jefferson Parish and the lowest responsive and responsible bidder(s) by mutual written consent may mutually agree to extend the deadline for award by one (1) or more extensions of thirty (30) calendar days.

PROTESTS: Only those vendors that submitted a bid in response to this solicitation may submit a protest in writing to the Director of the Purchasing within 48 hours of bid opening. The Purchasing Director will review it in connection with the Parish Attorney's Office which will then respond in writing as soon as possible.

PREFERENCE: Unless federal funding is directly spent by Jefferson Parish for this purchase, preference is hereby given to materials, supplies, and provisions produced, manufactured or grown in Louisiana, quality being equal to articles offered by competitors outside the state. "LSA - R.S. 38:2251-2261"

B. USE OF BRAND NAMES AND STOCK NUMBERS: Where brand names and stock numbers are specified, it is for the purpose of establishing certain minimum standards of quality. Bids may be submitted for products of equal quality, provided brand names and stock numbers are specified. Complete product data may be required prior to award.

C. CANCELLATION OF CONTRACT: JEFFERSON PARISH reserves the right to cancel all or any part if not shipped promptly. No charges will be allowed for parking or cartage unless specified in quotation. The order must not be filled at a higher price than quoted. JEFFERSON PARISH reserves the right to cancel any contract at anytime and for any reason by issuing a THIRTY (30) day written notice to the contractor.

For good cause and as consideration for executing a contract with Jefferson Parish, vendor conveys, sells, assigns and transfers to Jefferson Parish or its assigns all rights, title and interest in and to all causes of action it may now or hereafter acquire under the antitrust laws of the United States and the State of Louisiana, relating to the particular good or services purchased or acquired by Jefferson Parish.

D. PRICES: Jefferson Parish is exempt from paying sales tax under LSA-R.S. 47:301 (8)(c). All prices for purchases by Jefferson Parish of supplies and materials shall be quoted in the unit of measure specified and unless otherwise specified, shall be exclusive of state and Parish taxes. The price quoted for work shall be stated in figures. In the event there is a difference in unit prices and totals, the unit price shall prevail.

Quantities listed are for bidding purposes only. Actual requirements may be more or less than quantities listed.

Bidders are not to exclude from participation in, deny the benefits of, or subject to discrimination under any program or activity, any person in the United States on the grounds of race, color, national origin, or sex; nor discriminate on the basis of age under the Age Discrimination Act of 1975, or with respect to an otherwise qualified handicapped individual as provided in Section 504 of the Rehabilitation Act of 1973, or on the basis of religion, except that any exemption from such prohibition against discrimination on the basis of religion as provided in the Civil Rights Act of 1964, or Title VI and VII of the Act of April 11, 1968, shall also apply. This assurance includes compliance with the administrative requirements of the Revenue Sharing final handicapped discrimination provisions contained in Section 51.55 (c), (d), (e), and (k)(5) of the Regulations. New construction or renovation projects must comply with Section 504 of the 1973 Rehabilitation Act, as amended, in accordance with the American National Standard Institute's specifications (ANSI A17.1-1961).

Jefferson Parish and its partners as the recipients of federal funds are fully committed to awarding a contract(s) to firm(s) that will provide high quality services and that are dedicated to diversity and to containing costs. Thus, Jefferson Parish strongly encourages the involvement of minority and/or woman-owned business enterprises (DBE's, including MBE's, WBE's and SBE's) to stimulate participation in procurement and assistance programs.

INSTRUCTIONS FOR BIDDERS AND GENERAL CONDITIONS

The purpose and intention of this invitation to bid is to afford all suppliers an equal opportunity to bid on all construction, maintenance, repair, operating supplies and/or equipment listed in this bid proposal. JEFFERSON PARISH WILL ACCEPT ONE BID ONLY FROM EACH VENDOR. Items bid must meet specifications.

Advertised bids will be tabulated and a copy of the tabulation will be forwarded to each responding bidder.

IN ACCORDANCE WITH STATE REGULATIONS JEFFERSON PARISH OFFERS ELECTRONIC PROCUREMENT TO ALL VENDORS

This electronic procurement system allows vendors the convenience of reviewing and submitting bids online. This is a secure site and authorized personnel have limited read access only. Bidders are encouraged to submit electronically using this free service; while the website accepts various file types, one single PDF file containing all appropriate and required bid documents is preferred. Bidders submitting uploaded images of bid responses are solely responsible for clarity. If uploaded images/documents are not legible, then bidder's submission will be rejected. Please note all requirements contained in this bid package for electronic bid submission.

Please visit our E-Procurement Page at www.jeffparishbids.net to register and view Jefferson Parish solicitations. For more information, please visit the Purchasing Department page at <http://purchasing.jeffparish.net>.

The general specifications for construction projects and the purchase of materials, services and/or supplies are those adopted by the JEFFERSON PARISH Council by Resolution No. 113646 or 113647 dated 12/09/09. The general conditions adopted by this resolution shall be considered as much a part of this document as if they were written wholly herein. A copy may be obtained from the Office of the Parish Clerk, Suite 6700, Jefferson Parish General Government Building, 200 Derbigny Street, Gretna, LA 70053. You may also obtain a copy by visiting the Purchasing Department webpage at <http://purchasing.jeffparish.net> and clicking on Online Forms.

ADDITIONAL REQUIREMENTS FOR THIS BID

PLEASE MATCH THE NUMBERS PRINTED IN THIS BOX WITH THE CORRESPONDING INSTRUCTIONS BELOW.

10, 12, 13, 15

1. All bidders must attend the MANDATORY pre-bid conference and will be required to sign in and out as evidence of attendance. In accordance with LSA R.S. 38:2212(l), all prospective bidders shall be present at the beginning of the MANDATORY pre-bid conference and shall remain in attendance for the duration of the conference. Any prospective bidder who fails to attend the conference or remain for the duration shall be prohibited from submitting a bid for the project.
2. Attendance to this pre-bid conference is optional. However, failure to attend the pre-bid conference shall not relieve the bidder of responsibility for information discussed at the conference. Furthermore, failure to attend the pre-bid conference and inspection does not relieve the successful bidder from the necessity of furnishing materials or performing any work that may be required to complete the work in accordance with the specification with no additional cost to the owner.
3. Contractor must hold current applicable JEFFERSON PARISH licenses with the Department of Inspection and Code Enforcement. Contractor shall obtain any and all permits required by the JEFFERSON PARISH Department of Inspection and Code Enforcement. The contractor shall be responsible for the payment of these permits. All permits must be obtained prior to the start of the project. Contractor must also hold any and all applicable Federal and State licenses. Contractor shall be responsible for the payment of these permits and shall obtain them prior to the start of the project.
4. A LA State Contractor's License will be required in accordance with LSA R.S. 37-2150 et. seq. and such license number will be shown on the outside of the bid envelope. Failure to comply will cause the bid to be rejected. Additionally if submitting the bid electronically, then the license number must be entered in the appropriate field in the Electronic Procurement system. Failure to comply will cause the bid to be rejected.
5. It is the bidder's responsibility to visit the job site and evaluate the job before submitting a bid.
6. Job site must be clean and free of all litter and debris daily and upon completion of the contract. Passageways must be kept clean and free of material, equipment, and debris at all times. Flammable material must be removed from the job site daily because storage will not be permitted on the premises. Precautions must be exercised at all times to safeguard the welfare of JEFFERSON PARISH and the general public.

INSTRUCTIONS FOR BIDDERS AND GENERAL CONDITIONS

7. **PUBLIC WORKS BIDS:** All awards for public works in excess of \$5,000.00 will be reduced to a formal contract which shall be recorded at the contractor's expense with the Clerk of Court and Ex-Officio Recorder of Mortgages for the Parish of Jefferson. A price list of recordation costs may be obtained from the Clerk of Court and Ex-Officio Recorder of Mortgages for the Parish of Jefferson. All awards in excess of \$25,000.00 will require both a performance and a payment bond. Unless otherwise stated in the bid specifications, the performance bond requirements shall be 100% of the contract price. Unless otherwise stated in the bid specifications, the payment bond requirements shall be 100% of the contract price. Both bonds shall be supplied at the signing of the contract.
8. **NON-PUBLIC WORKS BIDS:** A performance bond will be required for this bid. The amount of the bond will be 100% of the contract price unless otherwise indicated in the specifications. The performance bond shall be supplied at the signing of the contract.
9. **NON-PUBLIC WORKS BIDS:** A payment bond will be required for this bid. The amount of the bond will be 100% of the contract price unless otherwise indicated in the specifications. The payment bond shall be supplied at the signing of the contract.
10. All bidders must comply with the requirements stated in the attached "Standard Insurance Requirements" sheet attached to this bid solicitation. Prior to contract executions/purchase order issuance, the successful bidder will be required to provide final insurance certificates which shall name Jefferson Parish as an additional insured in accordance with the instructions in the aforementioned "Standard Insurance Requirements" sheet.
11. A bid bond will be required with bid submission in the amount of 5% of the total bid, unless otherwise stated in the bid specifications. Acceptable forms shall be limited to cashier's check, certified check, or surety bid bond. All sureties must be in original format (no copies). If submitting a bid online, vendors must submit an electronic bid bond through the respective online clearinghouse bond management system(s) as indicated in the electronic bid solicitation on Central Auction House. No scanned paper copies of any bid bond will be accepted as part of the electronic bid submission.
12. This is a requirements contract to be provided on an as needed basis. JEFFERSON PARISH makes no representations on warranties with regard to minimum guaranteed quantities unless otherwise stated in the bid specifications.
13. Freight charges should be included in total cost when quoting. If not quoted FOB DELIVERED, freight must be quoted as a separate item. Bid may be rejected if not quoted FOB DELIVERED or if freight charges are not indicated on bid form.
14. **PUBLIC WORKS BIDS - Completed, Signed and Properly Notarized Affidavits Required;** This applies to all solicitations for construction, alteration or demolition of public buildings or projects, in conformity with the provisions contained in LSA-RS 38:2212.9, LSA-RS 38:2212.10, LSA-RS 38:2224, and Sec 2-923.1 of the Jefferson Parish Code of Ordinances. For bidding purposes, all bidders must submit with bid submission COMPLETED, SIGNED and PROPERLY NOTARIZED Affidavits, including: Non-Conviction Affidavit, Non-Collusion Affidavit, Campaign Contribution Affidavit, Debt Disclosures Affidavit and E-Verify Affidavit. For the convenience of vendors, all affidavits have been combined into one form entitled PUBLIC WORKS BID AFFIDAVIT. This affidavit must be submitted in its original format, and without material alteration, in order to be compliant and for the bid to be considered responsive. A scanned copy of the completed, signed and properly notarized affidavit may be submitted with the bid, however, the successful bidder must submit the original affidavit in its original format and without material alteration upon contract execution. Failure to comply will result in the bid submission being rejected as non-responsive. The Parish reserves the right to award bid to the next lowest responsive and responsible bidder in this event.
15. **NON PUBLIC WORK BIDS - Completed, Signed and Properly Notarized Affidavits Required** in conformity with the provisions contained in LSA – RS 38:2224 and Sec 2-923.1 of the Jefferson Parish Code of Ordinances. For bidding purposes, all bidders must submit with bid submission COMPLETED, SIGNED and PROPERLY NOTARIZED Affidavits, including: Non-Collusion Affidavit, Debt Disclosures Affidavit and Campaign Contribution Affidavit. For the convenience of vendors, all affidavits have been combined into one form entitled NON PUBLIC WORKS BID AFFIDAVIT. This affidavit must be submitted in its original format, and without material alteration, in order to be compliant and for the bid to be considered responsive. A scanned copy of the completed, signed and properly notarized affidavit may be submitted with the bid, however, the successful bidder must submit the original affidavit in its original format and without material alteration upon contract execution. Failure to comply will result in the bid submission being rejected as non-responsive. The Parish reserves the right to award bid to the next lowest responsive and responsible bidder in this event.
16. The ensuing contract for this bid solicitation may be eligible for FEMA reimbursement and/or Federal funding/reimbursement. As such, the referenced appendix will be applicable accordingly and shall be considered a part of the bid documents. All applicable certifications must be duly completed, signed and submitted with bid submission. Failure to submit applicable certifications with bid submission will result in bid rejection.
17. For this project, the Contractor shall not pay any state or local sales or use taxes on materials and equipment which are affixed and made part of the immovable property of the project or which permanently incorporated in the project (hereinafter referred to as "applicable materials and equipment"). All purchases of applicable materials or equipment shall be made by the contractor on behalf of and as the agent of Jefferson Parish (Owner), a political subdivision of the State of Louisiana. No state and local sales and use taxes are owned on applicable materials and equipment under the provisions of Act 1029 of the 1991 Regular Session – Louisiana Revised Statute 47:301(8)(c). Owner will furnish contractor a certificate form which certifies that Owner is not required to pay such state or local sales and use taxes, and contractor shall furnish a copy of such certificate to all vendors or suppliers of the applicable materials and equipment.

It shall be the duty of every parish officer, employee, department, agency, special district, board, and commission; and the duty of every contractor, subcontractor, and licensee of the parish, and the duty of every applicant for certification of eligibility for a parish contract or program, to cooperate with the Inspector General in any investigation, audit, inspection, performance review, or hearing pursuant to Jefferson Parish Code of Ordinances Section 2-155.10(19). By submitting a bid, vendor acknowledges this and will abide by all provisions of the referenced Jefferson Parish Code of Ordinances.

BID NO.: 50-00124461

BID FORM

Non Public Works

All Public Work Projects are required to use the Louisiana Uniform Public Work Bid Form

All prices must be held firm unless an escalation provision is requested in this bid. Jefferson Parish will allow one escalation during the term of the contract, which may not exceed the U.S. Bureau of Labor Statistics National Index for all Urban Consumers, unadjusted 12 month figure. The most recently published figure issued at the time an adjustment is requested will be used. A request must be made in writing by the vendor, and the escalation will only be applied to purchases made after the request is made.

Are you requesting an escalation provision?

YES _____ NO X

MAXIMUM ESCALATION PERCENTAGE REQUESTED _____%

INITIAL BID PRICES WILL REMAIN FIRM THROUGH THE DATE OF 3-30-2020

For the purposes of comparison of bids when an escalation provision is requested, Jefferson Parish will apply the maximum escalation percentage quoted by the bidder to the period to which it is applied in the bid. The initial price and the escalation will be used to calculate the total bid price. It will be assumed, for comparison of prices only, that an equal amount of material or labor is purchased each month throughout the entire contract.

Non-Public Works Bid Affidavit Instructions

- Affidavit is supplied as a courtesy to Affiants, but it is the responsibility of the affiant to insure the affidavit they submit to Jefferson Parish complies, in both form and content, with federal, state and parish laws.
- Affidavit must be signed by an authorized representative of the entity or the affidavit will not be accepted.
- Affidavit must be notarized or the affidavit will not be accepted.
- Notary must sign name, print name, and include bar/notary number, or the affidavit will not be accepted.
- Affiant **MUST** select either A or B when required or the affidavit will not be accepted.
- Affiants who select choice A must include an attachment or the affidavit will not be accepted.
- If both choice A and B are selected, the affidavit will not be accepted.
- Affidavit marked N/A will not be accepted.
- It is the responsibility of the Affiant to submit a new affidavit if any additional campaign contributions are made after the affidavit is executed but prior to the time the council acts on the matter.

Instruction sheet may be omitted when submitting the affidavit

Non-Public Works Bid**AFFIDAVIT**

Louisiana
STATE OF _____

Terrebonne
PARISH/COUNTY OF _____

BEFORE ME, the undersigned authority, personally came and appeared: Scott
Oliphant, (Affiant) who after being by me duly sworn, deposed and said that
he/she is the fully authorized President of Kenworth of South Louisiana LLC (Entity),
the party who submitted a bid in response to Bid Number 50-00124461, to the Parish of
Jefferson.

Affiant further said:

Campaign Contribution Disclosures

(Choose A or B, if option A is indicated please include the required attachment):

Choice A x

Attached hereto is a list of all campaign contributions, including the date and amount of each contribution, made to current or former elected officials of the Parish of Jefferson by Entity, Affiant, and/or officers, directors and owners, including employees, owning 25% or more of the Entity during the two-year period immediately preceding the date of this affidavit or the current term of the elected official, whichever is greater. Further, Entity, Affiant, and/or Entity Owners have not made any contributions to or in support of current or former members of the Jefferson Parish Council or the Jefferson Parish President through or in the name of another person or legal entity, either directly or indirectly.

Choice B _____

there are **NO** campaign contributions made which would require disclosure under Choice A of this section.

| | |
|--------|--------------------------|
| AMOUNT | \$1,000.00 |
| OFFICE | JEFFERSON PARISH COUNCIL |
| NAME | PAUL JOHNSTON |
| DATE | 09/26/11 |

Debt Disclosures

(Choose A or B, if option A is indicated please include the required attachment):

Choice A _____ Attached hereto is a list of all debts owed by the affiant to any elected or appointed official of the Parish of Jefferson, and any and all debts owed by any elected or appointed official of the Parish to the Affiant.

Choice B _____^x There are **NO** debts which would require disclosure under Choice A of this section.

Affiant further said:

That Affiant has employed no person, corporation, firm, association, or other organization, either directly or indirectly, to secure the public contract under which he received payment, other than persons regularly employed by the Affiant whose services in connection with the construction, alteration or demolition of the public building or project or in securing the public contract were in the regular course of their duties for Affiant; and

[The remainder of this page is intentionally left blank.]

That no part of the contract price received by Affiant was paid or will be paid to any person, corporation, firm, association, or other organization for soliciting the contract, other than the payment of their normal compensation to persons regularly employed by the Affiant whose services in connection with the construction, alteration or demolition of the public building or project were in the regular course of their duties for Affiant.

STANDARD INSURANCE REQUIREMENTS FOR BIDDING PURPOSES

All required insurance under this bid shall conform to Jefferson Parish Resolution No. 113646 or No. 113647, as applicable. Contractors may not commence any work under any ensuing contract unless and until all required insurance and associated evidentiary requirements thereto have been met, along with any additional specifications contained in the **Invitation to Bid**. Except as where otherwise precluded by law, the Parish Attorney or his designee, with the concurrence of the Director of Risk Management or his designee, may agree on a case-by-case basis, to deviate from Jefferson Parish's standard insurance requirements, as provided in this Section. Vendors requesting deviation therefrom shall submit such requests in writing, along with compelling substantiation, to the Purchasing Department prior to the bid's due date. Any changes to the insurance requirements will be reflected in the bid specifications and addenda. Prior to contract execution and at all times thereafter during the term of such contract, contractors must provide and continuously maintain all coverages as required by the foregoing Resolutions, and the contract documents. Failure to do so shall be grounds for suspension, discontinuation or termination of the contract.

For bidding purposes, bidders must submit with bid submission a current (valid) insurance certificate evidencing the required coverages. Failure to comply will cause bid to be rejected. The current insurance certificate will be used for proof of insurance at time of evaluation. Thereafter, and prior to contract execution, the low bidder will be required to provide final insurance certificates to the Parish which shall name **the Jefferson Parish, its Districts Departments and Agencies under the direction of the Parish President and the Parish Council** as additional insureds regarding negligence by the contractor for the Commercial General Liability, Workmen's Compensation Insurance and the Comprehensive Automobile Liability policies. Additionally, said certificates should reflect the name of the Parish Department receiving goods and services and reference the respective Jefferson Parish bid number.

JEFFERSON PARISH REQUIRED STANDARD INSURANCE

☒ **WORKER'S COMPENSATION INSURANCE**

As required by Louisiana State Statute, exception; Employer's Liability, Section B shall be \$1,000,000 per occurrence when Work is to be over water and involves maritime exposures to cover all employees not covered under the State Worker's Compensation Act, otherwise this limit shall be no less than \$500,000 per occurrence.

Note: If your company is not required by law to carry workmen's compensation insurance, i.e. not a Louisiana company, sole employee of the company, then bidders must request a workmen's compensation insurance declaration affidavit prior to the bid opening date. This insurance declaration affidavit must be fully completed, signed, properly notarized and submitted with the bid. A scanned copy may be submitted with the bid; however, the successful bidder must submit the original affidavit in its original format and without material alteration upon contract execution. Failure to comply will result in the bid submission being

rejected as non-responsive. The Parish reserves the right to award bid to the next lowest responsive and responsible bidder in this event.

☒ **COMMERCIAL GENERAL LIABILITY**

Shall provide limits not less than the following: \$1,000,000.00 Combined Single Limit per Occurrence for bodily injury and property damage.

☒ **COMPREHENSIVE AUTOMOBILE LIABILITY**

Bodily injury liability \$1,000,000.00 each person; \$1,000,000.00 each occurrence.
Property Damage Liability \$1,000,000.00 each occurrence.

Note: This category may be omitted if bidders do not/will not utilize company vehicles for the project or do not possess company vehicles. Bidder must request an automobile insurance declaration affidavit prior to the bid opening date. This insurance declaration affidavit must be fully completed, signed, properly notarized and submitted with the bid. A scanned copy of the completed, signed and properly notarized affidavit may be submitted with the bid; however, the successful bidder must submit the original affidavit in its original format and without material alteration upon contract execution. Failure to comply will result in the bid submission being rejected as non-responsive. The Parish reserves the right to award bid to the next lowest responsive and responsible bidder in this event.

DEDUCTIBLES

No insurance required shall include a deductible not greater than \$10,000.00. The cost of the deductible shall be borne by the contractor.

NOTE: If the vendor requires a change in deductibles, the request must be submitted in writing to the Purchasing Department prior to the due date of the bid. Such request shall be reviewed by the Parish Attorney's Office with the concurrence of the Director of Risk Management.

UMBRELLA LIABILITY COVERAGE

An umbrella policy or excess may be used to meet minimum requirements.

FOR CONSTRUCTION AND RENOVATION PROJECTS:

The following are required unless otherwise specified in the bid. Such insurance is due upon contract execution.

1) OWNER'S PROTECTIVE LIABILITY

To be for the same limits of liability for bodily injury and property damage liability established for commercial general liability.

2) BUILDER'S RISK INSURANCE

The contractor shall maintain Builder's Risk Insurance at his own expense to insure both the owner (Parish of Jefferson) and contractor as their interest may appear.

| Check appropriate box: <input type="checkbox"/> Individual/Sole proprietor <input type="checkbox"/> Corporation <input type="checkbox"/> Partnership <input type="checkbox"/> Limited liability company. Enter the tax classification (D=disregarded entity, C=corporation, P=partnership) ▶ <input type="checkbox"/> Exempt payee <input type="checkbox"/> Other (see instructions) ▶ | |
| Address (number, street, and apt. or suite no.) 3699 WEST PARK AVE | Requester's name and address (optional) PLEASE REMIT TO: PO BOX 1450 GRAY LA 70359 |
| City, state, and ZIP code GRAY LA 70359 | |
| List account number(s) here (optional) | |

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on Line 1 to avoid backup withholding. For individuals, this is your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the Part I instructions on page 3. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN* on page 3.

Note. If the account is in more than one name, see the chart on page 4 for guidelines on whose number to enter.

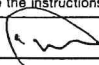

| |
|--------------------------------|
| Social security number |
| |
| or |
| Employer identification number |
| 90 0196371 |

Part II Certification

Under penalties of perjury, I certify that:

- The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me), and
- I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding, and
- I am a U.S. citizen or other U.S. person (defined below).

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the Certification, but you must provide your correct TIN. See the instructions on page 4.

| | | |

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Purpose of Form

A person who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) to report, for example, income paid to you, real estate transactions, mortgage interest you paid, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA.

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN to the person requesting it (the requester) and, when applicable, to:

- Certify that the TIN you are giving is correct (or you are waiting for a number to be issued),
- Certify that you are not subject to backup withholding, or
- Claim exemption from backup withholding if you are a U.S. exempt payee. If applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income.

Note. If a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

Definition of a U.S. person. For federal tax purposes, you are considered a U.S. person if you are:

- An individual who is a U.S. citizen or U.S. resident alien,
- A partnership, corporation, company, or association created or organized in the United States or under the laws of the United States,
- An estate (other than a foreign estate), or
- A domestic trust (as defined in Regulations section 301.7701-7).

Special rules for partnerships. Partnerships that conduct a trade or business in the United States are generally required to pay a withholding tax on any foreign partners' share of income from such business. Further, in certain cases where a Form W-9 has not been received, a partnership is required to presume that a partner is a foreign person, and pay the withholding tax. Therefore, if you are a U.S. person that is a partner in a partnership conducting a trade or business in the United States, provide Form W-9 to the partnership to establish your U.S. status and avoid withholding on your share of partnership income.

The person who gives Form W-9 to the partnership for purposes of establishing its U.S. status and avoiding withholding on its allocable share of net income from the partnership conducting a trade or business in the United States is in the following cases:

- The U.S. owner of a disregarded entity and not the entity,

Thomas Built Buses \ Blue Bird \ Hino \ International Truck & Engine \ IC Bus

Allison Transmission Coverage

Effective Dates

Transmission coverage effective dates as shown below are based upon individual agreements entered into between the OEM and Allison.

| | |
|-------------------|---|
| Navistar | Vehicles built on or after April 11, 2011. |
| Hino | Vehicles built on or after December 15, 2011. |
| American LaFrance | Vehicles built on or after January 1, 2012. |

All other OEMs referenced on the cover of this guide are eligible to receive Partnership Coverage and Extended Transmission Coverage, so long as they meet the Extended Transmission Coverage requirements listed below.

NOTE: Stated prices are effective for Extended Transmission Coverage purchased in 2016.

Transmission Coverage Definitions And Requirements

Standard Limited Warranty

All Allison transmissions carry a comprehensive Standard Limited Warranty covering 100% parts and labor. The length of Standard Limited Warranty coverage depends upon the Vocational Model Series and vehicle vocation.

REQUIREMENTS: Use of Allison Approved TES 295[®] transmission fluid** and Genuine Allison Filters is required to be eligible for Partnership Transmission Coverage and Extended Transmission Coverage. Failure to use Allison Approved TES 295[®] transmission fluid and Genuine Allison Filters during the Standard Limited Warranty coverage period will result in no additional coverage options beyond Standard Limited Warranty.

Partnership Coverage

Some Allison-equipped vehicles purchased through Allison Partnerships carry Partnership Coverage. Partnership Coverage begins at the end of the Standard Limited Warranty period. Duration of Partnership Coverage varies depending upon the Vocational Model Series purchased.

REQUIREMENTS: Use of Allison Approved TES 295[®] transmission fluid and Genuine Allison Filters is required. Failure to use Allison Approved TES 295[®] transmission fluid and Genuine Allison Filters will result in no coverage for repairs beyond Standard Limited Warranty.

NOTE: Except as noted, all transmissions with Partnership Coverage beyond Standard Limited Warranty have 100% parts and labor coverage with no mileage limitations.

Extended Transmission Coverage***

In addition to Partnership Coverage, transmissions purchased through Allison Partnerships are eligible for Extended Transmission Coverage. Extended Transmission Coverage can be purchased on all models to increase coverage to a total of five years. Extended Transmission Coverage can be purchased on Highway Series, P&D/Beverage, to increase coverage to a total of seven years. Extended Transmission Coverage begins at the end of Partnership Coverage and is available for purchase through Allison Authorized Distributors and Dealers. .

REQUIREMENTS: Use of Allison Approved TES 295[®] transmission fluid** and Genuine Allison Filters is required. Failure to use Allison Approved TES 295[®] transmission fluid and Genuine Allison Filters will result in no coverage for repair beyond the Standard Limited Warranty period. If the transmission is not OEM factory filled with Allison Approved TES 295[®] transmission fluid and Genuine Allison Filters, then Allison Approved TES 295[®] transmission fluid and Genuine Allison Filters must be installed at the time of Extended Transmission Coverage purchase. Transmissions not OEM factory filled with Allison Approved TES 295[®] transmission fluid, or transmissions operating with non-TES 295[®] fluids, must be drained and filled with Allison Approved TES 295[®] transmission fluid to achieve 100% concentration. One hundred percent concentration is not achieved until the second consecutive fluid change using Allison Approved TES 295[®] transmission fluid. The second consecutive change must be achieved at the time of Extended Transmission Coverage purchase.

* Suggested retail prices are established for each transmission vocational model/vocation combination. Prices and/or coverage are subject to change without notice. For current prices and coverage information, go to allisontransmission.com.

** For a list of current Allison Approved TES 295[®] transmission fluids, go to: allisontransmission.com; click on Parts + Service, then Approved Fluids.

*** The terms and conditions under which Allison Transmission offers Extended Transmission Coverage are set forth on the back of the Extended Transmission Coverage Agreement Registration, available from any authorized Allison Transmission Distributor or Dealer.

| MOTORHOME SERIES™ | | Total Coverage* (Included in acquisition price of transmission) |
|-------------------|--------------|---|
| Model | Vocation | Years of Coverage (Standard Limited Warranty** + Partnership Coverage) |
| 1000 MH | Motorhome/RV | 2 + 3 |
| 1350 MH | Motorhome/RV | 2 + 3 |
| 2100 MH | Motorhome/RV | 2 + 3 |
| 2200 MH | Motorhome/RV | 2 + 3 |

| 4000 MHR | Motorhome/RV | 2 + 3 |

* Total Coverage: Sum of Standard Limited Warranty and Partnership Coverage. Included in acquisition price of the transmission.

** Standard Limited Warranty provides coverage of 2 years/80,000 miles and 100% parts and labor.

If the transmission is OEM factory filled with Allison approved TES 295® transmission fluid, end-user is automatically registered, at no additional cost, for Partnership Coverage, which provides coverage of 5 years/200,000 miles and 100% parts and labor. Use of Allison Approved TES 295® transmission fluid and Genuine Allison Filters is required to maintain Extended Transmission Coverage. Failure to meet these guidelines will result in Standard Limited Warranty coverage as described above.

Q. During my Partnership and Extended Coverage periods, will Allison Transmission cover repairs if I do not use an Allison Approved TES 295® transmission fluid AND Genuine Allison Filters?

A. No.

Q. Where can I purchase Extended Coverage?

A. You can purchase the coverage from any Allison Authorized Distributor or Dealer.

Q. When do I purchase Extended Coverage?

A. You can purchase the coverage at the time the vehicle is delivered or within 12 months of vehicle delivery.

Q. How do I pay for this Extended Coverage?

A. You may include the cost with the purchase of your vehicle (with dealer approval) or simply write a check to the Allison Authorized Distributor or Dealer.

Q. Will regears be accepted in this program?

A. Yes, as long as they are new Allison transmissions in approved applications and the Extended Coverage is purchased within 12 months of purchase of the new Allison transmission.

Q. Do I have to return to the selling outlet to obtain service?

A. No. You may select any Allison Authorized Distributor or Dealer offering vehicle transmission service.

Q. If I decide to sell or trade in my vehicle before my coverage expires, can the remaining coverage be transferred to my new transmission?

A. No. The remaining coverage is not transferable to your new transmission. The Extended Coverage purchased stays with the transmission. There is no need for transfer papers to be filed.

Q. If I take delivery of a new vehicle from an outlet that does not make Extended Coverage available, am I still eligible to purchase the coverage?

A. Yes. Contact your nearest Allison Authorized Distributor or Dealer to purchase the coverage.

Q. Are towing charges to the nearest Allison Transmission authorized service outlet covered by Extended Coverage?

A. Yes, if your vehicle is disabled or if towing is necessary to prevent further damage to your transmission.

Q. Is the support equipment purchased from Allison Transmission for original installations covered by Extended Coverage?

A. Yes.

Q. Are the electronic components purchased from Allison Transmission covered by Extended Coverage?

A. Yes.

Q. What coverage is offered on the TC10?

A. TC10 has a 5-year-750,000-mile warranty. There is currently no Extended Transmission Coverage offered for the TC10.

Roadranger

SUPPORT

The transmission you can count on.

From the people you trust.

Eaton is the global leader in heavy-duty transmissions with over 100 years of proven success. And, as a pioneer, we will continue to look for new ways to deliver value in the products, services, and solutions that are most important to our customers' success.

Eaton® leadership:

- Trusted by owners and drivers for decades
- A transmission technology innovator
- A leader in automation
- Factory-installed at multiple OEMs
- Roadranger® service and support

"UltraShift® *PLUS* makes perfect shifting decisions. The pulling power is right where we want it to be for our operation. Now, clutch adjustments are a thing of the past."

Chad McCormick – Supervisor,
T.J. Hunt Trucking, Chattanooga, TN

Over 200 Roadranger[®]
representatives to
support you

"The UltraShift[®] *PLUS*
is brilliant with curbing.
It saves my drivers' legs,
backs, arms, and shoulders."

Dan Brown – Fleet Manager,
Dufferin Concrete, Toronto, Ontario

UltraShift® *PLUS* Benefits

Life Cycle Costs

UltraShift® *PLUS* balances performance with fuel economy, providing error-free, guess-proof shifting, improving your average fuel economy through consistent shift points and appropriate gear selections.

Safety

Built-in features like Hill Start Aid provide the driver with a consistent controlled launch, helping to prevent rolling when stopped on a grade. With UltraShift® *PLUS*, drivers can focus on the job, rather than the next gear.

Uptime

UltraShift® *PLUS* transmissions are engineered for maximum uptime and productivity, and Roadranger® service makes sure your truck stays that way. Thousands of truck dealerships with factory-trained technicians stand ready to help whenever you need it.

Performance

There are thousands of UltraShift® *PLUS* transmission configurations available. Each one provides superior start-ability, grade-ability, and low-speed maneuverability, delivering the optimum blend of performance and economy.

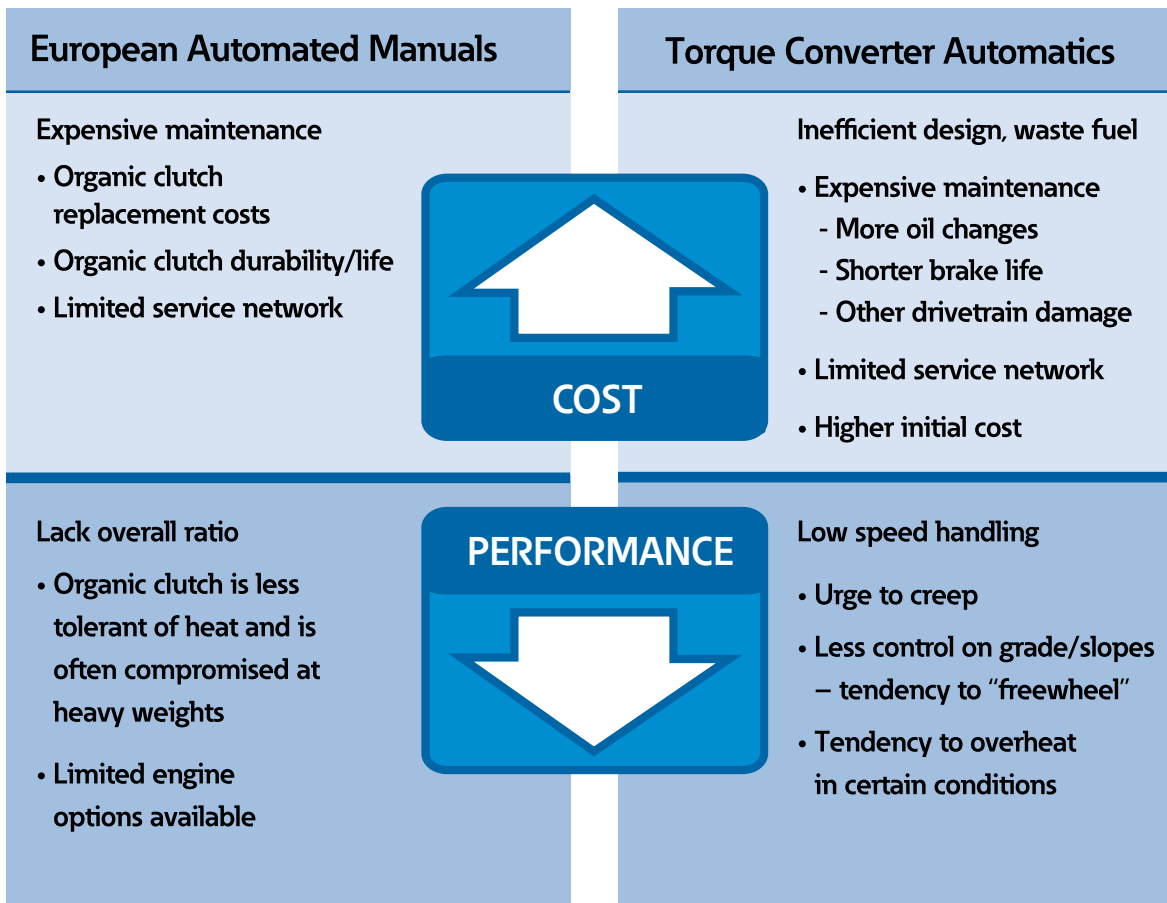

Driver Issues

UltraShift® *PLUS* powers your driver recruitment, training, and retention efforts by helping to save time and money. Both new and experienced drivers love the simplicity, comfort, and additional safety features offered by UltraShift® *PLUS*.

The downside of alternative transmissions: Cost and performance.

European automated manual transmissions and torque converter automatics issues include poor fuel efficiency, expensive maintenance, and a limited service network. Performance is also compromised in a number of common work functions.

Introducing UltraShift® *PLUS*: Enhanced design for superior performance.

UltraShift® *PLUS* provides extreme efficiency over other automated and automatic transmissions, as well as a number of performance and cost advantages. Its two-pedal design uses electronics to engage and disengage the clutch, so drivers can concentrate on the job, not on shifting. Best of all, UltraShift *PLUS* can be tailored to your unique needs in order to provide optimal performance.

†For select platforms

Giving you control when you need it most.

Gear Selection Logic and low-speed maneuverability.

For low-speed maneuverability, a necessity for challenging worksites, the UltraShift® *PLUS* Vocational Multipurpose Series (VMS) is the ultimate transmission choice. Through extended low and reverse-gear ratio coverage, it provides the lowest ground speed for curbing, creeping, spreading, and paving. And the patented shift logic and controls constantly adapt based on changes in weight of load, grade, and power, making adjustments to maximize efficiency.

LOAD

- Constantly adjusts to weight changes to keep up with varying demands

GRADE

- Real-time active grade sensing – uphill, downhill, and everything in between

POWER

- Automatically tracks vehicle and engine speeds – to meet the needs for power and torque

LOW-SPEED MANEUVERABILITY:

Engages at a lower RPM to allow for a creeping speed of less than one foot per second

GEAR SELECTION LOGIC:

Monitors continuously, making proper adjustments to maximize efficiency and control

The smartest transmission for the job

Gear Selection Logic and low-speed maneuverability.

Designed with deep reduction and fast, flexible reverse gearing, UltraShift® PLUS Vocational Construction Series (VCS) is your best choice for highway construction and dump operations. The Gear Selection Logic feature constantly adapts based on changes in weight of load, grade, and power. And, through extended low and reverse gear ratio coverage, UltraShift PLUS VCS provides enhanced maneuverability at lower and reverse speeds, giving the driver ultimate control.

LOW-SPEED MANEUVERABILITY: Engages at a lower RPM to allow for a creeping speed of less than one foot per second

GEAR SELECTION LOGIC: Monitors continuously, making proper adjustments to maximize efficiency and control

LOAD

- Constantly adjusts to weight changes to keep up with varying demands

GRADE

- Real-time active grade sensing – uphill, downhill, and everything in between

POWER

- Automatically tracks vehicle and engine speeds – to meet the needs for power and torque

When we say *PLUS*, we mean it.

In addition to Gear Selection Logic and low-speed maneuverability, UltraShift® *PLUS* provides drivers with enhanced performance capabilities like:

HILL START AID

Prevents rollback while on steep grades, allowing for optimized launches every time

ENGINE BRAKING

Provides maximum engine braking to 600 hp or more, without the weight and cost of a retarder

CREEP MODE

Provides constant ground speed for low-speed control

SKIP SHIFTING

Intelligent adaptive shifting lessens wear and tear on drivetrain components

Advantages for owners and drivers

UltraShift® *PLUS* helps make everyone perform like your best driver when it comes to fuel economy and safety. Driver recruitment and training will be easier too. And when it comes to driver benefits, they will find that their comfort level is improved and fatigue is significantly reduced. UltraShift *PLUS* transmissions optimize control without excess braking, making your truck even safer and more efficient.

Simple and intuitive
driver interfaces
available as touchpad
or shift control lever

COMFORT: Less stress than manual shifting – easier to operate, less driver fatigue

SAFETY: Drivers can give their full attention to the job

DRIVER RECRUITMENT: Easier to find qualified drivers because UltraShift® *PLUS* is simpler to use

DRIVER TRAINING: Less training required to achieve maximum driver performance

Roadranger® service

We go the extra mile.

When you work with a Roadranger® representative, you are working with one of the most experienced, expert, and accessible drivetrain consultants in the business. From helping you choose the best solutions for your business to service after the sale, our team members are with you whenever you need them.

Roadranger offers:

- Specification assistance
- Warranty and policy support
- Extended warranties
- Training – Sales, service, parts, and driving
- Marketing programs and branding

OVER 200 ROADRANGER REPRESENTATIVES ACROSS THE NATION OFFER UNMATCHED SERVICE BEFORE, DURING, AND AFTER THE SALE.

THOUSANDS OF SERVICE LOCATIONS – 6,000+ FACTORY-TRAINED
TECHNICIANS AT 2,000+ DEALER LOCATIONS

Warranty – Up to 5 year system warranties available

Convenience – UltraShift® *PLUS* does not require service by a dedicated service network, and its modular design minimizes cost and time of service

UltraShift® *PLUS* helps save you money

The UltraShift® *PLUS* design provides the ideal combination of fuel efficiency, driving ease, and performance, bringing real savings to your operation.

See how it all adds up

Fuel savings

- + Reduced wear and tear on transmission
- + Extended brake and clutch life
- + Less downtime/more uptime generating revenue
- + Protecting cargo from damage
- + Reduced training time
- + Increased driver retention/less turnover
- + Improved driver performance
- + Improved safety/fewer accidents

= Savings with UltraShift® *PLUS*

KENWORTH TRUCK COMPANY LIMITED WARRANTY AGREEMENT

Medium Duty Warranty

UNITED STATES

THIS LIMITED WARRANTY AGREEMENT ("AGREEMENT") LISTS THE RESPECTIVE RIGHTS AND RESPONSIBILITIES OF YOU, KENWORTH TRUCK COMPANY ("KENWORTH"), AND THE SELLING KENWORTH DEALER ("SELLING DEALER"). PLEASE READ THIS LIMITED WARRANTY CAREFULLY.

Kenworth warrants directly to you that the Kenworth vehicle ("Vehicle") identified below will be free from defects in materials and factory workmanship ("Warrantable Failures") appearing under normal commercial use and service during the time or mileage limitations set forth in the attached Warranty Schedule (dated 11/09). **The Vehicle warranty extends only to you, the First Purchaser.**

YOUR SOLE AND EXCLUSIVE REMEDY AGAINST KENWORTH AND THE SELLING DEALER ARISING FROM YOUR PURCHASE AND USE OF THIS VEHICLE IS LIMITED TO THE REPAIR OR REPLACEMENT OF "WARRANTABLE FAILURES" AT AUTHORIZED UNITED STATES AND CANADIAN KENWORTH DEALERS, SUBJECT TO KENWORTH'S TIME AND MILEAGE LIMITATIONS LISTED IN THE ATTACHED VEHICLE ONLY WARRANTY SCHEDULE. The maximum time and mileage limitations in the Warranty Schedule begin on the Date of Delivery to the First Purchaser, as shown below. **The accrued time and mileage is calculated when this Vehicle is brought into an Authorized Dealer for correction of Warrantable Failures.**

WARRANTY DISCLAIMER AND LIMITATIONS OF LIABILITY

This limited warranty is the sole warranty made by Kenworth and the Selling Dealer. Except for the above limited warranty, Kenworth and the Selling Dealer make no other warranties, express or implied. KENWORTH AND THE SELLING DEALER EXPRESSLY DISCLAIM ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

IT IS AGREED THAT KENWORTH AND THE SELLING DEALER SHALL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES INCLUDING, BUT NOT LIMITED TO: LOSS OF INCOME OR LOST PROFITS; VEHICLE DOWNTIME; THIRD PARTY DAMAGE, INCLUDING DAMAGE OR LOSS TO OTHER VEHICLES OR PROPERTY, ATTACHMENTS, TRAILERS AND CARGO; LOSS OR DAMAGE TO PERSONAL CONTENTS; COMMUNICATION EXPENSES; LODGING AND/OR MEAL EXPENSES; FINES; APPLICABLE TAXES OR BUSINESS COSTS OR LOSSES; ATTORNEY'S FEES; AND ANY LIABILITY YOU MAY HAVE IN RESPECT TO ANY OTHER PERSON OR ENTITY.

The following components may be warranted directly to you by their respective manufacturers and are NOT warranted by Kenworth: engine and engine accessories, Allison automatic transmission, fifth wheel, tires, wheels and rims, tubes, pintle hook, hitch, batteries not listed in the Vehicle Schedule, refrigerator, trade accessories (such as fire extinguishers, chains, emergency kits, and tools), customer-furnished components installed by the Kenworth factory, and items not installed by the Kenworth factory at the time of the Vehicle's manufacture.

Kenworth does not warrant antifreeze, lubricants, bulbs, fuses, filters, mud-flaps, winter front, wiper nozzles, wiper blades, filter elements, or any other part which is considered a maintenance item.

You are responsible for the safe operation and maintenance of the Vehicle, as specified in the applicable Operator's Manuals. You are responsible for providing proof that all recommended inspections and maintenance have been performed. Before the expiration of the applicable warranty, you must notify an Authorized Dealer of any Warrantable Failures and make the Vehicle available for repair by such Authorized Dealer. You are responsible for delivery of the Vehicle to the Authorized Dealer. Locations in the United States and Canada of authorized Kenworth dealers may be found on WWW.KENWORTH.COM.

KENWORTH IS NOT RESPONSIBLE FOR WEAR AND TEAR OR WEAROUT OF COVERED PARTS, storage deterioration, or changes in adjustment resulting from your use of the Vehicle. This includes, but is not limited to, wear or damage to brake and clutch linings, clutch brake, belts, upholstery, wheel balancing or axle alignment. This list is offered as an example only and shall not be construed as all inclusive.

Kenworth does not warrant metallic chassis (frame) paint. Kenworth is not responsible for paint chipping or fading, peeling paint from frame bolts relating to maintenance, paint peeling from road chemical or salt damage, or corrosion caused by damage to a cab or hood panel or to finish paint.

Damage due to accident, misuse, abuse, neglect, negligence, improper or insufficient maintenance, or unauthorized modification is not warranted.

All warranties are null and void should a Vehicle be converted to a motor coach, motor home, or recreational vehicle.

Vibrations, squeaks, and unusual noises, rattles, loose nuts/bolts can develop during the early use of the vehicle. Kenworth will make the necessary adjustments under warranty up to the earlier of the first 25,000 miles or the first 90 days after the Date of Delivery.

Parts used to repair a Warrantable Failure may be new parts, approved remanufactured parts, or repaired parts. Kenworth is not responsible for failures resulting from the use of parts not approved by Kenworth. A new or approved remanufactured part used to repair a Warrantable Failure assumes the identity of the part it has replaced and is entitled to the remaining warranty coverage, if any.

Chassis Number(s) (17-digit VIN)

Customer Initials _____

Kenworth is not responsible for towing or roadside assistance should there be a defect in the Vehicle. **Kenworth is not responsible for damage or loss resulting from engine horsepower/torque upgrades.**

Kenworth reserves the right to inspect and download data from the Vehicle and Engine Electronic Control Modules (ECM) for purposes of failure analysis.

TIME LIMIT ON COMMENCING LEGAL ACTION / OTHER TERMS

It is agreed that you have 12 months from the accrual of the cause of action to commence any legal action arising from the purchase or use of the Vehicle, or be barred forever.

To the extent any provision of this limited warranty is found to contravene the law of any jurisdiction, the remainder of the warranty shall not be affected thereby.

PACCAR ENGINE LIMITED WARRANTY AGREEMENT

UNITED STATES

THIS LIMITED WARRANTY AGREEMENT ("AGREEMENT") LISTS THE RESPECTIVE RIGHTS AND RESPONSIBILITIES OF YOU, PACCAR INC ("PACCAR"), AND THE SELLING PACCAR ENGINE DEALER ("SELLING DEALER"). PLEASE READ THIS LIMITED WARRANTY CAREFULLY.

PACCAR warrants directly to you that the PACCAR PX-7 engine ("Engine") identified below will be free from defects in materials and factory workmanship ("Warrantable Failures") appearing under normal commercial use and service during the time or mileage or hour limitations set forth in the attached Warranty Schedule (dated 12/09). **The Engine warranty extends only to you, the First Purchaser.** The Emissions warranty is made to all owners of the Engine in the chain of distribution until the end of the Emissions warranty coverage period. Warranty coverage relating to the Emissions components is outlined in the Emission Warranty section of the applicable PACCAR Operator's Manual, the terms and conditions of which are incorporated herein by reference.

YOUR SOLE AND EXCLUSIVE REMEDY AGAINST PACCAR AND THE SELLING DEALER ARISING FROM YOUR PURCHASE AND USE OF THIS ENGINE IS LIMITED TO THE REPAIR OR REPLACEMENT OF "WARRANTABLE FAILURES" AT AUTHORIZED UNITED STATES AND CANADIAN PACCAR ENGINE DEALERS, OR AN AUTHORIZED PACCAR ENGINE FACILITY OR AN AUTHORIZED CUMMINS DISTRIBUTOR WHERE APPLICABLE, (REFERRED TO AS "AUTHORIZED DEALER" OR "AUTHORIZED DEALERS") SUBJECT TO PACCAR'S TIME, MILEAGE, AND HOUR LIMITATIONS LISTED IN THE ATTACHED WARRANTY SCHEDULES. The maximum time, mileage and hour limitations in the Warranty Schedules begin running on the Date of Delivery to the First Purchaser, as shown below. **The accrued time, mileage, or hours is calculated when this engine is brought into an Authorized Dealer for correction of Warrantable Failures.**

WARRANTY DISCLAIMER AND LIMITATIONS OF LIABILITY (ENGINE AND EMISSIONS)

This limited warranty is the sole warranty made by PACCAR and the Selling Dealer. Except for the above limited warranty, PACCAR and the Selling Dealer make no other warranties, express or implied. PACCAR AND THE SELLING DEALER EXPRESSLY DISCLAIM ANY WARRANTY OF MERCHANTABILITY OR WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE.

IT IS AGREED THAT PACCAR AND THE SELLING DEALER SHALL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES INCLUDING, BUT NOT LIMITED TO: LOSS OF INCOME OR LOST PROFITS; ENGINE OR VEHICLE DOWNTIME; THIRD PARTY DAMAGE, INCLUDING DAMAGE OR LOSS TO OTHER ENGINES, VEHICLES OR PROPERTY, ATTACHMENTS, TRAILERS AND CARGO; LOSS OR DAMAGE TO PERSONAL CONTENTS; COMMUNICATION EXPENSES; LODGING AND/OR MEAL EXPENSES; FINES; APPLICABLE TAXES OR BUSINESS COSTS OR LOSSES; ATTORNEYS' FEES; AND ANY LIABILITY YOU MAY HAVE IN RESPECT TO ANY OTHER PERSON OR ENTITY.

This warranty does not apply to accessories supplied by the vehicle OEM which are covered by the OEM vehicle warranty.

Failures of belts and hoses supplied by PACCAR are covered during the first year from the Date of Delivery of the Engine to the First Purchaser. PACCAR does not warrant antifreeze, lubricants, filters, filter elements, or any other part which is considered a maintenance item. However, in its discretion, PACCAR will pay for lubricating oil, antifreeze, filter elements, belts, hoses, and other maintenance items only if the need for replacing such items is due to a Warrantable Failure to the PACCAR PX-7 engine.

You are responsible for the safe operation and maintenance of the Engine and Emissions equipment as specified in the applicable Operator's Manuals. You are responsible for providing proof that all recommended inspections and maintenance have been performed. Before the expiration of the applicable warranty, you must notify an Authorized Dealer of any Warrantable Failures and make the Engine available for Engine repair by such Authorized Dealer. You are responsible for delivery of the Engine to the Authorized Dealer. Locations in the United States and Canada of authorized PACCAR Engine dealers may be found on WWW.PACCARENGINES.COM.

PACCAR IS NOT RESPONSIBLE FOR WEAR AND TEAR OR WEAROUT OF COVERED PARTS, storage deterioration, and changes in adjustment resulting from your use of the Engine.

Damage due to accident, misuse, abuse, neglect, negligence, improper or insufficient maintenance, or unauthorized modification is not warranted. This may include, but is not limited to: operation without adequate coolants, lubricants, or other fluids; over-fueling; over-speeding; lack of maintenance of the lubricating, cooling or air intake systems; improper storage, starting, warm-up, run-in or shutdown practices; and unauthorized modifications to the Engine.

Parts used to repair a Warrantable Failure may be new parts, approved remanufactured parts, or repaired parts. PACCAR is not responsible for failures resulting from the use of parts not approved by PACCAR. A new or approved remanufactured part used to repair a Warrantable Failure assumes the identity of the part it has replaced and is entitled to the remaining warranty coverage, if any.

PACCAR is not responsible for damage or loss resulting from Engine horsepower/torque upgrades.

Chassis Number(s) (17-digit VIN)

Engine Serial Number

Customer Initials _____

PACCAR reserves the right to inspect and download data from the Vehicle and Engine Electronic Control Modules (ECM) for purposes of failure analysis.

PACCAR IS NOT RESPONSIBLE FOR DAMAGE OR LOSSES CAUSED BY INCORRECT OIL, FUEL, DIESEL EXHAUST FLUID, COOLANT, OR ADDITIVES; WATER, DIRT OR OTHER CONTAMINANTS IN THE FUEL, OIL OR DIESEL EXHAUST FLUID; OPERATION WITHOUT ADEQUATE COOLANTS OR LUBRICANTS; OVER-FUELING; OVER-SPEEDING; IMPROPER STORAGE, STARTING, WARM-UP, RUN-IN OR SHUT-DOWN PRACTICES; OR UNAUTHORIZED MODIFICATIONS OF THE ENGINE. Failure of replacement parts used in repairs due to the above non-warrantable conditions is not warrantable.

If your Vehicle is disabled by a Warrantable Failure to the Engine during the base warranty period, PACCAR will pay the reasonable cost of towing the Vehicle to the nearest Authorized Dealer, or other facility authorized by PACCAR. In lieu of the towing expense and at the sole discretion of PACCAR, PACCAR will pay the reasonable costs of an authorized mechanic to travel to and from the location of the disabled Vehicle in order to perform the Engine repair.

PACCAR will pay for reasonable labor costs for Engine removal and reinstallation when necessary to repair a Warrantable Failure.

Warrantable Failures resulting in excessive oil consumption are covered for the duration of the coverage or 100,000 miles or 6,250 hours from the date of delivery of the Engine to the first user, whichever of the three occurs first. Before a claim for excessive oil consumption, low power, or excessive fuel consumption will be considered for payment, you must submit adequate documentation to show that consumption exceeds PACCAR published standards.

TIME LIMIT ON COMMENCING LEGAL ACTION / OTHER TERMS

IT IS AGREED THAT YOU HAVE 12 MONTHS FROM THE ACCRUAL OF THE CAUSE OF ACTION TO COMMENCE ANY LEGAL ACTION ARISING FROM THE PURCHASE OR USE OF THE ENGINE, OR BE BARRED FOREVER.

To the extent any provision of this limited warranty is found to contravene the law of any jurisdiction, the remainder of the warranty shall not be affected thereby.

PACCAR Inc

I, the undersigned have read the above limited warranty agreement including the attached schedules and understand and accept its terms and acknowledge receipt of a copy of the agreement (3 pages).

PACCAR ENGINE LIMITED WARRANTY SCHEDULE

UNITED STATES

THIS ENGINE WARRANTY SCHEDULE APPLIES ONLY TO ORIGINAL FACTORY EQUIPMENT AND IS SUBJECT TO THE TERMS AND LIMITATIONS IN THE ATTACHED LIMITED WARRANTY AGREEMENT. This Engine Warranty Schedule does not apply to the Vehicle or Emission related equipment, which is warranted separately. Warranty coverage relating to the Emissions components is outlined in the Emission Warranty section of the applicable PACCAR Operator's Manual, the terms and conditions of which are incorporated herein by reference. Pursuant to the terms of the attached Limited Warranty Agreement, PACCAR Inc will pay warranty claims for Warrantable Failures within the following maximum limits in time, mileage, or hours, **whichever shall occur first**. The Warrantable Failure must be brought to the attention of an Authorized Dealer within 30 days of discovery.

PACCAR PX-7 Engine

Basic Engine Coverage - (All applications except fire apparatus truck) - **Twenty-four (24) months – no mileage limitation.**

Fire Apparatus Truck Applications – 60 Months or 100,000 miles, whichever occurs first. (Owner is responsible for a US\$100 deductible per each service visit in the 3rd, 4th and 5th years of warranty.)

T270: REQUIRED INFORMATION

| Option | Description | Price | Weight |
|-------------------------|---|-------|--------|
| Intended Service | | | |
| 0093000 | <p>Linehaul: Vehicles (trucks or tractors) used in over-the-road freight hauling. Pickup to delivery distance is typically over 300 miles, & annual mileage is typically over 60,000 miles per year. Operation is typically on-highway. Road usage: minimum 1% Class B, do not code for Class D.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* Linehaul is not a typical vocation for a Medium-Duty vehicle.</p> <p>* The road use profile for linehaul service should be: CLASS A 1-99% ; CLASS B 1-99% ; CLASS C 0-20% ; CLASS D 0%</p> | \$0 | 0# |
| 0093005 | <p>Local pickup & delivery: Vehicles which haul freight, typically operating within a 100-mile radius, on public streets & highways, & other paved surfaces, including limited Class C roads. Includes package & freight delivery, as well as fuel oil or petroleum distribution, etc. Road usage: minimum 3% Class B, do not code for Class D.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* The road use profile for pick-up and delivery service should be: CLASS A 0-97% ; CLASS B 3-100% ; CLASS C 0-50% ; CLASS D 0%</p> | \$0 | 0# |
| 0093007 | <p>Regional Haul: Vehicles used to haul freight on public roads consisting of a mixture of over the road, urban and/or suburban hauling. Pickup to delivery distance typically in the 100 to 300 miles range but some LTL applications may exceed 300 mile limit. Road usage: minimum 19% Class B, do not code for Class D.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* The road class profile for chassis in regional haul service is: CLASS A 0-81% ; CLASS B 1-100% ; CLASS C 0-20% ; CLASS D 0%</p> | \$0 | 0# |
| 0093025 | <p>Snowplow: Vehicles which are configured for mounting a snowplow to the front. May also have dump or other body. Typically includes some operation off of paved roads. Road usage: majority of Class A & B, do not code for Class D.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* The road use profile for snowplow service should be: CLASS A 0-95% ; CLASS B 5-100% ; CLASS C 0-30% ; CLASS D 0%</p> | \$0 | 0# |
| 0093035 | <p>Mining service: Vehicles used to service earthmoving & mining equipment. Includes bodies such as mechanic's service bodies, tire hoists, fuel/lube, etc. Typically includes some operation off of paved roads. Road usage: any combination, which includes some Class C.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* The road use profile for mining service should be: CLASS A 0-97% ; CLASS B 0-95% ; CLASS C 1-100% ; CLASS D 0-99%</p> | \$0 | 0# |
| 0093090 | <p>Utility vehicle: Used to service utility or communication equipment. Typically operates within 100 mile radius on public roads & may or may not have a man lift. Duty cycle includes long engine idle times. Road usage: any combination of A & B, may include some class C roads.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* Typical road use profile for a vehicle operating in Utility service is: CLASS A 0-99% ; CLASS B 1-100% ; CLASS C 0-50% ; CLASS D 0%</p> | \$0 | 0# |

T270: REQUIRED INFORMATION

| Option | Description | Price | Weight |
|-------------------------|---|-------|--------|
| Intended Service | | | |
| 0093091 | <p>Refuse hauler: Vehicles which haul refuse, recycled material, etc. Includes Roll-on/roll-off container movement, as well as hauling refuse from transfer stations to landfills. Typically includes operation in landfills, over rough, uneven surfaces. Road usage: any combination, which includes some Class B.</p> <p>* A clog resistant radiator is recommended for operation in environments where high dust levels are found.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* The road use profile for refuse haulers should be: CLASS A 0-99% ; CLASS B 1-100% ; CLASS C 0-99% ; CLASS D 0-5%</p> | \$0 | 0# |
| 0093095 | <p>Refuse packer: Vehicles which pick up refuse or recycled material from curbside containers in residential areas. Operation typically includes very frequent stops & starts. Unloading can be at transfer station or at landfill. Road usage: some Class B required, with maximum of 5% Class D.</p> <p>* A clog resistant radiator is recommended for operation in environments where high dust levels are found.</p> <p>* AD-IS Extended Purge air dryer is required with Refuse Packer intended service or Refuse Loader/Packer body type.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* Intended service of refuse packer requires use of a 30.4 CFM air compressor, or 8205021 Large flip valve and piping to apply front and rear service brakes.</p> <p>* Refuse loader/packer body type is only for use with refuse packer intended service.</p> <p>* The road use profile for refuse packer service should be: CLASS A 0-50% ; CLASS B 1-100% ; CLASS C 0-99% ; CLASS D 0-5%</p> <p>* The T270 is not well suited in applications of logger, mixer, mining hauler, heavy equipment transport, refuse packer, fire truck, or crane/cherry picker. mining hauler and heavy equipment transport. See TE1482.</p> | \$0 | 0# |
| 0093105 | <p>Oil field well servicing: Vehicles which carry well servicing equipment, e.g., pumpers, blenders, cementers, data loggers, etc. Typically involve considerable hours of stationary operation, but low mileage. Typically operate on prepared (although often unpaved) roadways. Road usage: any combination, w/minimum 5% Class C.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* The road use profile for oil field well service should be: CLASS A 0-80% ; CLASS B 0-95% ; CLASS C 5-100% ; CLASS D 0-95%</p> <p>* This vocation presents a high likelihood that the vehicle will include some stationary operation. This service type will be reviewed by engineering to determine cooling requirements.</p> | \$0 | 0# |
| 0093111 | <p>Wrecker service: Vehicles w/ recovery bodies used for recovering & towing stranded vehicles & equipment. Road usage: minimum 5% Class B & maximum 10% Class D.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* The road use profile for use with wrecker service should be: CLASS A 0-95% ; CLASS B 5-100% ; CLASS C 0-95% ; CLASS D 0-10%</p> <p>* To assist engineering communicate the wrecker body manufacturers frame RBM requirements using narrative lines on the DTPO.</p> | \$0 | 0# |

T270: REQUIRED INFORMATION

| Option | Description | Price | Weight |
|-------------------------|--|-------|--------|
| Intended Service | | | |
| 0093121 | Fire truck service: Vehicles used in fighting fires. Typically have pumps, etc., mounted in the body. Road usage: minimum 5% Class B & maximum 5% Class D. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * NFPA compliance 1901 kit is required with Fire service. * PACCAR requires a fire rated engine for use in fire service. * The road use profile for fire or EMT service should be: CLASS A 0-80% ; CLASS B 5-100% ; CLASS C 0-95% ; CLASS D 0-10% * The T270 is not well suited in applications of logger, mixer, mining hauler, heavy equipment transport, refuse packer, fire truck, or crane/cherry picker. mining hauler and heavy equipment transport. See TE1482. * With fire truck service an ember separator may be required to meet local or NFPA compliance. | \$0 | 0# |
| 0093122 | EMT/rescue service: Vehicles used responding to emergencies & rescue operations. Typically configured for rapid response, & carry medical & other rescue equipment. Road usage: minimum 5% Class B & maximum 5% Class D. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for fire or EMT service should be: CLASS A 0-80% ; CLASS B 5-100% ; CLASS C 0-95% ; CLASS D 0-10% | \$0 | 0# |
| 0093125 | Crane/cherry picker: Vehicles equipped w/ cranes, man-lifts, hoists, cherry-pickers, bridge inspection units, etc. Road usage: any combination, w/minimum 5% Class B. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for crane/cherry picker service should be: CLASS A 0-95% ; CLASS B 5-100% ; CLASS C 0-80% ; CLASS D 0-80% * The T270 is not well suited in applications of logger, mixer, mining hauler, heavy equipment transport, refuse packer, fire truck, or crane/cherry picker. mining hauler and heavy equipment transport. See TE1482. | \$0 | 0# |
| 0093130 | Construction: Vehicles used in the construction industry, other than those listed above. Use typically involves operating on the jobsite, to pick up or deliver construction materials, or to position the vehicle for its intended use at the construction site. Includes such activities as delivery of precast concrete, concrete pumpers, flatbeds or roll-offs for delivery of construction materials or equipment, etc. Typically includes some operation off of paved roads. Road usage: any combination, which includes some Class C. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for construction service should be: CLASS A 0-97% ; CLASS B 0-99% ; CLASS C 1-100% ; CLASS D 0-99% | \$0 | 0# |
| 0093135 | Agriculture: Vehicles used in the agriculture industry, other than those listed above. Use typically involves transportation of agricultural & dairy products to/from/on/around farm sites, & includes operation off of improved surfaces while on the farm. Includes applications such as milk tankers for farm pickup, feed trucks, grain haulers which load in the field, etc. Can be trucks or tractors. Road usage: any combination, which includes both Class C & D. * A clog resistant radiator is recommended for operation in environments where high dust levels are found. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for chassis in agriculture service should be: CLASS A 0-95% ; CLASS B 0-98% ; CLASS C 1-95% ; CLASS D 1-95% | \$0 | 0# |

| Dry Goods | | | |
| 0091090 | General freight. | \$0 | 0# |
| | * General freight commodity is applicable with intended service codes of line haul, regional haul, pickup and delivery, construction or agriculture. | | |
| 0091100 | Heavy machinery. | \$0 | 0# |
| | * Heavy machinery commodity is for use with intended services of pickup and delivery, regional haul, snowplow, mining service, oil field well service, wrecker or EMT/rescue. | | |
| 0091110 | Oil field equipment. | \$0 | 0# |
| | * Oil field equipment commodity is for use with intended services of mining service or oil field well service. | | |
| 0091120 | Other dry goods. | \$0 | 0# |
| | * Other/dry goods commodity is applicable with intended service codes of line haul, regional haul, pickup and delivery, construction or agriculture. | | |
| 0091124 | Auto transporter. | \$0 | 0# |
| | * Automobile transport commodity is for use with intended services of linehaul, pickup and delivery or regional haul. | | |
| Miscellaneous | | | |
| 0091250 | Empty cans. | \$0 | 0# |
| | * Empty cans commodity is for use with intended services of refuse hauler, pickup and delivery or regional haul. | | |
| 0091260 | Refuse/recycled material. | \$0 | 0# |
| | * A clog resistant radiator is recommended for operation in environments where high dust levels are found. | | |
| | * Refuse/recycle commodity is for use with intended services of refuse hauler or refuse packer. | | |

T270: REQUIRED INFORMATION

| Option | Description | Price | Weight |
|----------------------|--|-------|--------|
| Commodity Hauled | | | |
| Miscellaneous | | | |
| 0091270 | Fire apparatus. * Fire apparatus commodity is applicable to intended services of fire truck, oil field well service, construction or agriculture. * NFPA compliance 1901 kit is required with Fire service. | \$0 | 0# |
| 0091271 | EMT/rescue. * EMT/rescue equipment commodity is applicable with intended service code of EMT/rescue. | \$0 | 0# |
| Body Type | | | |
| 0095010 | End dump. * End dump body type is for use in the following services: local P&D, regional haul, snowplow, construction, refuse hauler, or agriculture. * The road use profile for dump truck service should be: CLASS A 0-97% ; CLASS B 0-99% ; CLASS C 1-100% ; CLASS D 0-99% | \$0 | 0# |
| 0095040 | Concrete mixer, non-booster-axle. * Air suspensions are not for use with body types of refuse, roll-on/roll-off, concrete mixers, drilling derricks, oil field rig up, oil field service, crane or boom, concrete pumper, or logger of any type. * Non-booster axle concrete mixer body is for use in the following service: concrete ready mix. * The following body types are not available with a trailer: Concrete mixer/non-booster axle, concrete mixer w/ approved frame reinforcement, concrete pump, volumetric mixer, roll-back flatbed, refuse loader/packer, beverage, drilling derrick, cotton module, wrecker, crane/boom, fire truck/pumper, or vacuum tank. * This body type is generally unacceptable for use in a Medium-Duty application. Consult with Application Engineering before submitting a request for this vocation. | \$0 | 0# |
| 0095055 | Concrete pump. * Air suspensions are not for use with body types of refuse, roll-on/roll-off, concrete mixers, drilling derricks, oil field rig up, oil field service, crane or boom, concrete pumper, or logger of any type. * Concrete pump body type is for use in the following services: concrete ready mix or construction. * Concrete pumper body type is used for the commodity of ready mix concrete only. * The following body types are not available with a trailer: Concrete mixer/non-booster axle, concrete mixer w/ approved frame reinforcement, concrete pump, volumetric mixer, roll-back flatbed, refuse loader/packer, beverage, drilling derrick, cotton module, wrecker, crane/boom, fire truck/pumper, or vacuum tank. * This body type is compatible with full trucks only. | \$0 | 0# |
| 0095056 | Volumetric mixer. * The following body types are not available with a trailer: Concrete mixer/non-booster axle, concrete mixer w/ approved frame reinforcement, concrete pump, volumetric mixer, roll-back flatbed, refuse loader/packer, beverage, drilling derrick, cotton module, wrecker, crane/boom, fire truck/pumper, or vacuum tank. * Volumetric mixer body is for use in the following services: concrete ready mix, mining service, or construction. | \$0 | 0# |
| 0095060 | Roll on/roll off. * Air suspensions are not for use with body types of refuse, roll-on/roll-off, concrete mixers, drilling derricks, oil field rig up, oil field service, crane or boom, concrete pumper, or logger of any type. * Roll on/roll off body type is for use in the following services: local P&D, mining service, refuse hauler, construction, or agriculture. | \$0 | 0# |

T270: REQUIRED INFORMATION

| Option | Description | Price | Weight |
|------------------|---|-------|--------|
| Body Type | | | |
| 0095065 | Roll back flatbed. * Installation of an aftermarket headache rack is frequently required for this vocation. The rack may impede access to grab handles mounted on the back of the cab. Compliance with FMCSR 399 must be maintained. * Roll back flat bed body is for use in the following services: local P&D, mining service, wrecker service, construction, or agriculture. * The following body types are not available with a trailer: Concrete mixer/non-booster axle, concrete mixer w/ approved frame reinforcement, concrete pump, volumetric mixer, roll-back flatbed, refuse loader/packer, beverage, drilling derrick, cotton module, wrecker, crane/boom, fire truck/pumper, or vacuum tank. * This body type is compatible with full trucks only. | \$0 | 0# |
| 0095070 | Refuse loader/packer. * A clog resistant radiator is recommended for operation in environments where high dust levels are found. * AD-IS Extended Purge air dryer is required with Refuse Packer intended service or Refuse Loader/Packer body type. * Body type refuse loader/packer requires use of a 30.4 CFM air compressor, or 8205021 large flip valve and piping to apply front and rear service brakes. * Refuse loader/packer body type is only for use with refuse packer intended service. * The following body types are not available with a trailer: Concrete mixer/non-booster axle, concrete mixer w/ approved frame reinforcement, concrete pump, volumetric mixer, roll-back flatbed, refuse loader/packer, beverage, drilling derrick, cotton module, wrecker, crane/boom, fire truck/pumper, or vacuum tank. | \$0 | 0# |
| 0095080 | Refuse, other. * A clog resistant radiator is recommended for operation in environments where high dust levels are found. * Other refuse body types are for use in the following services: local P&D, refuse hauler, or refuse packer. | \$0 | 0# |
| 0095095 | Beverage. * Beverage body type is for use in the following services: regional haul or local P&D. * The following body types are not available with a trailer: Concrete mixer/non-booster axle, concrete mixer w/ approved frame reinforcement, concrete pump, volumetric mixer, roll-back flatbed, refuse loader/packer, beverage, drilling derrick, cotton module, wrecker, crane/boom, fire truck/pumper, or vacuum tank. | \$0 | 0# |
| 0095099 | Oil Field Winch/Equipment BOC for use w/Tractors. | \$0 | 0# |
| 0095100 | Oil well servicing equipment. * Air suspensions are not for use with body types of refuse, roll-on/roll-off, concrete mixers, drilling derricks, oil field rig up, oil field service, crane or boom, concrete pumper, or logger of any type. * Oil field well service equipment body type is for use in the following service: oil field well service. | \$0 | 0# |
| 0095105 | Drilling derrick. * Drilling derrick body type is for use in the following services: mining service, oil field well service, construction, or agriculture. * The following body types are not available with a trailer: Concrete mixer/non-booster axle, concrete mixer w/ approved frame reinforcement, concrete pump, volumetric mixer, roll-back flatbed, refuse loader/packer, beverage, drilling derrick, cotton module, wrecker, crane/boom, fire truck/pumper, or vacuum tank. * This body type is compatible with full trucks only. | \$0 | 0# |

T270: REQUIRED INFORMATION

| Option | Description | Price | Weight |
|------------------|--|-------|--------|
| Body Type | | | |
| 0095110 | Tank. * Tank bodies should specify a commodity the is a liquid or some other type of bulk product. * Tanker body type is for use in the following services: linehaul, local P&D, regional haul, snowplow, mining service, refuse hauler, oil field well service, fire truck, EMT/rescue, construction, or agriculture. | \$0 | 0# |
| 0095115 | Dry bulk hopper. * A clog resistant radiator is recommended for operation in environments where high dust levels are found. * A dry bulk hopper body type is used for the commodities of bark/topsoil, dry bulk goods, other food/farm products, other forest products, grain, dry bulk, or feedlot type commodities * Dry bulk hopper body type is for use in the following services: linehaul, local pickup & delivery, regional haul, construction, or agriculture. * This body type is compatible with full trucks only. | \$0 | 0# |
| 0095120 | Van. * These body types (0095120, 0095140, 0095151, 0095175) are for use with trucks only. * Van body type is for use in the following services: linehaul, local P&D, regional haul, mining service, utility, refuse hauler, EMT/rescue, construction, or agriculture. | \$0 | 0# |
| 0095125 | Service body. * Service Body type is for use in the following services: local P&D, mining service, utility, fire truck, EMT/rescue, or construction. * This body type is compatible with full trucks only. | \$0 | 0# |
| 0095130 | Dromedary box or automobile rack. * Dromedary box or automobile rack body type are for use in the following services: linehaul or regional haul. * This body type can be used in tractor or full truck configurations. | \$0 | 0# |
| 0095135 | Cotton module. * A clog resistant radiator is recommended for operation in environments where high dust levels are found. * A cotton module body is used for commodities of 'other' food/farm products . 'other' bulk goods, or dry bulk goods * Cotton module body type is for use in the following services: local P&D, regional haul, or agriculture. * The following body types are not available with a trailer: Concrete mixer/non-booster axle, concrete mixer w/ approved frame reinforcement, concrete pump, volumetric mixer, roll-back flatbed, refuse loader/packer, beverage, drilling derrick, cotton module, wrecker, crane/boom, fire truck/pumper, or vacuum tank. * This body type is compatible with full trucks only. | \$0 | 0# |
| 0095140 | Flatbed. * Flatbed body type is for use in the following services: linehaul, local P&D, regional haul, snowplow, mining service, refuse hauler, oil field well service, EMT/rescue, construction, or agriculture. * Installation of an aftermarket headache rack is frequently required for this vocation. The rack may impede access to grab handles mounted on the back of the cab. Compliance with FMCSR 399 must be maintained. * These body types (0095120, 0095140, 0095151, 0095175) are for use with trucks only. * This body is indicative types that utilize an aftermarket headache rack. In those cases the frame access package must be altered after the vehicle is delivered to accommodate the installation of a headache rack and retain compliance with FMCSR 399. | \$0 | 0# |

T270: REQUIRED INFORMATION

| Option | Description | Price | Weight |
|---------------------|---|-------|--------|
| Body Type | | | |
| 0095145 | Flatbed with utility crane. * Flatbed with utility crane body type is for use in the following services: local P&D, regional haul, snowplow, mining service, utility, refuse hauler, oil field well service, EMT/rescue, construction, or agriculture. * Installation of an aftermarket headache rack is frequently required for this vocation. The rack may impede access to grab handles mounted on the back of the cab. Compliance with FMCSR 399 must be maintained. * This body type is compatible with full trucks only. | \$0 | 0# |
| 0095146 | Wrecker. * A wrecker body for commodities of auto transporter or heavy machinery. * The following body types are not available with a trailer: Concrete mixer/non-booster axle, concrete mixer w/ approved frame reinforcement, concrete pump, volumetric mixer, roll-back flatbed, refuse loader/packer, beverage, drilling derrick, cotton module, wrecker, crane/boom, fire truck/pumper, or vacuum tank. * This body type is compatible with full trucks only. * Wrecker body type is for use in the following services: local P&D, mining service, or wrecker. | \$0 | 0# |
| 0095155 | Fire truck-pumper. * Fire truck pumper body type is for use in the following service: fire truck. * NFPA compliance 1901 kit is required with Fire service. * The following body types are not available with a trailer: Concrete mixer/non-booster axle, concrete mixer w/ approved frame reinforcement, concrete pump, volumetric mixer, roll-back flatbed, refuse loader/packer, beverage, drilling derrick, cotton module, wrecker, crane/boom, fire truck/pumper, or vacuum tank. | \$0 | 0# |
| 0095160 | Other - Narrative Required * A narrative describing the actual body type is required to help engineering determine the application of vehicles where the body type of 'other' has been specified. | \$0 | 0# |
| 0095165 | Vacuum tank. * The following body types are not available with a trailer: Concrete mixer/non-booster axle, concrete mixer w/ approved frame reinforcement, concrete pump, volumetric mixer, roll-back flatbed, refuse loader/packer, beverage, drilling derrick, cotton module, wrecker, crane/boom, fire truck/pumper, or vacuum tank. * Vacuum tank body type is for use in the following services: mining service, utility, refuse hauler, oil field well service, or construction. | \$0 | 0# |
| 0095175 | Reefer van. * Reefer van body is applicable to line haul, local pickup and delivery, or regional haul intended services * These body types (0095120, 0095140, 0095151, 0095175) are for use with trucks only. | \$0 | 0# |
| Trailer Type | | | |
| 0096020 | End dump. * End dump trailer type is for use in the following services: local P&D, regional haul, snowplow, refuse hauler, construction, or agriculture. * The T170 is available in a full truck application, no trailers are applicable. See TE1482. | \$0 | 0# |

Stationary Application

| | | | |
|---|---|-----|----|
| 0072000 | Chassis operation will not include a stationary application. Stationary operation is defined as running the engine under load while stationary at a substantial fraction of engine gross horsepower (60% or greater) for an extended period of time (longer than 5 - 10 minutes). | \$0 | 0# |
| * Stationary application use codes are required when vehicle service or components are indicative applications requiring special cooling review. Vocations where stationary operation may exist include concrete pumper, oil well service, Coil Tubing Unit, drilling derrick, fire pumper, vacuum tank, chassis with a front engine PTO used other than as a snowplow, or chassis using a split-shaft PTO. | | | |
| 0072001 | Chassis operation will include stationary application used in lower 48 states [US only]. Stationary operation is defined as running the engine under load while stationary at a substantial fraction of engine gross horsepower (60% or greater) for an extended period of time (longer than 5 - 10 minutes). | \$0 | 0# |
| * Stationary application use codes are required when vehicle service or components are indicative applications requiring special cooling review. Vocations where stationary operation may exist include concrete pumper, oil well service, Coil Tubing Unit, drilling derrick, fire pumper, vacuum tank, chassis with a front engine PTO used other than as a snowplow, or chassis using a split-shaft PTO. | | | |
| 0072002 | Chassis operation will include stationary application used in Canada or Alaska. Stationary operation is defined as running the engine under load while stationary at a substantial fraction of engine gross horsepower (60% or greater) for an extended period of time (longer than 5 - 10 minutes). | \$0 | 0# |
| * Stationary application use codes are required when vehicle service or components are indicative applications requiring special cooling review. Model Series

| | | | |
|--|---|-----|----|
| 0070005 | T270 Class 6: medium-duty Conventional. | \$0 | 0# |
| * Available with 8,000 lb air braked front axle with 16,000 - 18,000 lb rear axle, 9,000 lb air braked front axle with 17,000 lb rear axle, or 10,000 lb air braked front axle with 16,000 lb rear axle. Available with 8,000 lb hydraulic braked front axle with 16,000 - 18,000 lb rear axle. Available with certain heavier axles totaling over 26k combined axle ratings when used with a derate code. | | | |
| * Class 6 vehicles are not for use on class C roads over 10% or operation on more than 2% class D roads. Narratives can be added for OAR/T-Supt review if these conditions exist and are questionable. | | | |
| * The T270 air brakes vehicle with NAMUX dash has seven [7] standard non-coded gauges are included with this dash: Engine coolant temperature, Electronic fuel level, Engine oil pressure, Voltmeter, two air pressure reservoirs and DEF level are standard. The vehicle has room for 3 optional coded gauges | | | |
| * The T270 hydraulic braked vehicle with NAMUX dash has five [5] standard non-coded gauges are included with this dash: Engine coolant temperature, Electronic fuel level, Engine oil pressure, Voltmeter and DEF level are standard. The vehicle has room for 5 optional coded gauges. | | | |

Export Exhaust Systems

| | | | |
|---------|--|-------|----|
| 1241317 | Exhaust: horizontal w/vertical pipe RH cab side export. * Non-Catalytic converter exhaust systems are used only for export operating areas. * Side of cab exhaust requires a 22 inch diameter x 56 gallon tank when a fuel tank is located under the cab on the same side. | \$670 | 6# |
| 1241328 | Exhaust: horizontal w/vertical pipe BOC cab export. * Non-Catalytic converter exhaust systems are used only for export operating areas. | \$832 | 6# |

Exhaust Accessories

Single Tailpipes

| | | | |
|---------|---|--------|-----|
| 1290124 | Tailpipe: 5 in. single 24 in. 45 degree curved. * Single five or seven inch diameter vertical tailpipes are for use with RH DPF/SCR exhaust and side of cab mounted tailpipe positions. | (\$35) | -2# |
| 1290130 | Tailpipe: 5 in. single 30 in. 45 degree curved. * Single five or seven inch diameter vertical tailpipes are for use with RH DPF/SCR exhaust and side of cab mounted tailpipe positions. | \$0 | 0# |
| 1290136 | Tailpipe: 5 in. single 36 in. 45 degree curved. * Single five or seven inch diameter vertical tailpipes are for use with RH DPF/SCR exhaust and side of cab mounted tailpipe positions. | \$22 | 1# |
| 1290142 | Tailpipe: 5 in. single 42 in. 45 degree curved. For use with any Exhaust other than SCR Independent. * Single five or seven inch diameter vertical tailpipes are for use with RH DPF/SCR exhaust and side of cab mounted tailpipe positions. | \$44 | 3# |
| 1290148 | Tailpipe: 5 in. single 48 in. 45 degree curved. For use with any Exhaust other than SCR Independent. * Single five or seven inch diameter vertical tailpipes are for use with RH DPF/SCR exhaust and side of cab mounted tailpipe positions. | \$66 | 5# |
| 1290154 | Tailpipe: 5 in. single 54 in. 45 degree curved. For use with any Exhaust other than SCR Independent. * Single five or seven inch diameter vertical tailpipes are for use with RH DPF/SCR exhaust and side of cab mounted tailpipe positions. | \$88 | 7# |
| 1290160 | Tailpipe: 5 in. single 60 in. 45 degree curved. For use with any Exhaust other than SCR Independent. * Single five or seven inch diameter vertical tailpipes are for use with RH DPF/SCR exhaust and side of cab mounted tailpipe positions. | \$123 | 8# |
| 1290336 | Tailpipe: 7 in. single 36 in. 45 degree curved. * Single five or seven inch diameter vertical tailpipes are for use with RH DPF/SCR exhaust and side of cab mounted tailpipe positions. | \$182 | 5# |
| 1290342 | Tailpipe: 7 in. single 42 in. 45 degree curved. For use with any Exhaust other than SCR Independent. * Single five or seven inch diameter vertical tailpipes are for use with RH DPF/SCR exhaust and side of cab mounted tailpipe positions. | \$207 | 8# |
| 1290348 | Tailpipe: 7 in. single 48 in. 45 degree curved. For use with any Exhaust other than SCR Independent. * Single five or seven inch diameter vertical tailpipes are for use with RH DPF/SCR exhaust and side of cab mounted tailpipe positions. | \$234 | 10# |

T270: ENGINE EQUIPMENT

| Option | Description | Price | Weight |
|---------------------------------------|---|---------|--------|
| Heating & Starting Aids | | | |
| Block Heater | | | |
| 1504006 | Block heater, PACCAR 1750 watt 120V for PX-6 and PX-7, 1000 watt for PX-8 and PX-9 or ISL9 engines . * Engine block heater for Medium-Duty PACCAR engines. 120 volt /750 watt heater on PX-7 and 120 volt /1000 watt heater on PX-9. Not available on the T170. | \$115 | 2# |
| Oil Pan Heater | | | |
| 1506055 | Engine oil pan heater 120V 300W w/plug under door on C500, T660, T800 & W900. | \$72 | 0# |
| In-tank Fuel Heater | | | |
| 1509058 | Fuel tank heater: single Arctic Fox w/thermostat. | \$437 | 6# |
| Heater Accessories | | | |
| 1500035 | Engine block heater plug mounted LH fender bracket. * The combination of the narrow under cab battery box (6404411) and an engine block heater requires the engine block heater receptacle to be mounted to the left hand fender (1500035). | \$23 | 0# |
| Governors & Controls | | | |
| 1405074 | Ambient temperature sensor for idle shutdown for use with Cummins ISM, ISX12, X15, and PACCAR PX engines. | \$0 | 0# |
| Engine Equipment Miscellaneous | | | |
| 1000170 | Enable engine regeneration in PTO mode Cummins | \$0 | 0# |
| 1000306 | T300: 4x2 truck w/hydraulic brakes. * Hydraulic braked chassis utilize preformed steel brake lines are limited in wheelbase options to 153, 162, 176, 188, 206, 218, 236, 245, 254, 260 or 272 inches. * No PTOs from the factory are available with hydraulic brakes. | \$0 | 0# |
| 1000307 | Accessory air system T300 4 x 2 hydraulic brakes. Includes an air system pressure gauge. * An accessory air system along with an air dryer are required when an air rear suspension is used on hydraulic braked chassis. * For use with hydraulic brakes only. * This option provides an air system to run air controlled options such as air horns or air seats on hydraulic brakes vehicles. Accessory air is not for use on the T170. * When optional air accessory system is specified an air compressor is required. | \$1,586 | 0# |
| 1600713 | Oil pressure sender for pump panel gauge VDO 360-009. | \$54 | 0# |
| 1900082 | Multi-function engine connector for body builder interface for Cummins. * Remote throttle is applicable to full trucks, not tractors. Requires a multi-function engine connector. | \$44 | 0# |
| 1900976 | Body Builder Control Harness coiled EOF for customer installed remote throttle and remote PTO controls. Harness includes Remote PTO control and Remote Throttle controls. T680/T880 models do not require 12-way engine connector sales codes. All other models require (1900082 or 1900084). * Remote throttle can be used with an Allison transmission only when auto neutral functionality or a split shaft PTO are specified. * This option is not available on the T170 model. | \$74 | 2# |

T270: ENGINE EQUIPMENT

| Option | Description | Price | Weight |
|---------------------------------------|--|---------|--------|
| Engine Equipment Miscellaneous | | | |
| 1901008 | Body Builder Connector 500mm Back of Cab Requires 1900082 * Body builder connector code 1901008 is only available with Allison transmissions. * This body builder connector requires 1900082. | \$237 | 0# |
| 1901084 | Body Builder Battery Power Prewire | \$84 | 2# |
| Retarders | | | |
| 1700149 | Retarder Jacobs for PX-8/9 ISL w/ 3-way switch.. Replaces the standard turbo brake for PX-8 engines. * The PX-9 engines are standard with an exhaust brake. When the optional PX-9 compression brake is selected the exhaust brake is removed from the turbo. * This compression brake is available for the PACCAR PX-9 engine. The engine brakes requires an accessory air system when specified on hydraulic braked chassis. | \$2,233 | 57# |
| 1700364 | Pacbrake for Cummins ISC. Export engines only. * Optional engine brake for use with ISC export engines only. Requires accessory air on hydraulic braked chassis. | \$1,109 | 15# |
| Starting & Recharging | | | |
| Alternator | | | |
| 1812162 | Alternator: 160 amp brushless with battery voltage sense. *This code replaced 1812160. | \$267 | 9# |
| 1812451 | Alternator: Delco 40SI 320 amp Brushless with battery voltage sense | \$1,136 | 13# |
| 1816160 | Alternator: 160 amp brush type T3 | STD | 0# |
| 1816200 | Alternator: Bosch 200 amp, brush type | \$195 | 0# |
| 1816260 | Alternator: PACCAR 160 amp, brush type | \$6 | 0# |
| Battery | | | |
| 1821210 | Batteries: 3 PACCAR GP31 threaded post (700-730) 2100-2190 CCA dual purpose. | \$186 | 57# |
| 1821215 | Batteries: 4 PACCAR GP31 threaded post (700-730) 2800-2920 CCA dual purpose. * Selection of four batteries requires either the standard T3 left-hand under cab battery box or the BOC cantilever battery box. | \$440 | 114# |
| 1821220 | Batteries: 2 PACCAR GP31 threaded post (700-730) 1400-1460 CCA dual purpose. * The use of two batteries only in cold weather climates may result in insufficient starting power for some truck applications over time. Consider selecting three batteries. | STD | 0# |
| 1821225 | Batteries: 2 PACCAR GP31 threaded post (1000) 2000 CCA starting. * The use of two batteries only in cold weather climates may result in insufficient starting power for some truck applications over time. Consider selecting three batteries. * This option is not available on the T170 model. | \$2 | 4# |
| 1825006 | Batteries: 4 Odyssey GP 31 AGM threaded post (1150) 4600 CCA * Selection of four batteries requires either the standard T3 left-hand under cab battery box or the BOC cantilever battery box. | \$1,483 | 188# |

| 2010862 | Transmission: Allison 2200RDS 5-speed w/PTO drive gear. 5th Gen controls. Limited to 550 lb.-ft. w/ park pawl, Includes heat exchanger. Rugged Duty Series for vocational applications. Transynd transmission fluid is standard on all Allison 1000, 2000, 3000 & 4000 series transmissions. * Allison 2000 series transmissions are not for use with PX-9 engines. * The minimum wheelbase for hydraulic braked vehicles using this transmission is 141 inches. For air braked chassis 150 inches is the minimum. * The right hand mounted 10 bolt PTO position is obscured by DPF pipe routing with the PX-7 engine. * The T170 is available only with an Allison 1000/2100/2200 series automatic or FS5406/FS6406 manual transmission. * This transmission cannot be used with a pre-2010 emission engine with a torque rating greater than 575 ft.lbs. * This transmission has a GCW limitation of 26K. | \$7,045 | 55# |
| 2011192 | Transmission: Allison 3000HS 5-speed w/o PTO drive gear. 5th Gen Controls. Includes heat exchanger & oil level sensor. Highway Service only as defined by Allison. CTransynd transmission fluid is standard on all Allison 1000, 2000, 3000 & 4000 series transmissions. * 5-speed Allison transmissions are suited primarily for use on single drive axle trucks where GVWR does not exceed 40K. In other applications startability will be improved using a 6-speed transmission which allows deeper rear axle gearing. Contact Application Engineering for more information. * Allison 3000 series transmissions used in off-road conditions require wheel slip which cannot be met with a rear axle ratio faster [numerically lower] than 5.91. * Allison 3000HS transmissions are for use in linehaul, pick-up and delivery, or regional haul services only. For other applications including those that may require a provision for a PTO consider the 3000RDS. * PTO controls cannot be used with Allison transmissions that do not include PTO provisions, and a PTO cannot be added later without replacing the transmission. * Refuse Hauler, refuse packer, oil field well servicing, loggers and mixers are prohibited with the HS transmission. Class C or D road service is restricted to 4% maximum. * The T170 is available only with an Allison 1000/2100/2200 series automatic or FS5406/FS6406 manual transmission. * This transmission is not available for use in fire or EMT/rescue service. | \$10,885 | 244# |
| 2011203 | Transmission: Allison 3000RDS 5-speed w/PTO drive gear. 5th Gen Controls. Includes heat exchanger & oil level sensor. Rugged Duty Series for vocational applications. Transynd transmission fluid is standard on all Allison 1000, 2000, 3000 & 4000 series transmissions. Requires a push button shift control code. Oil temperature gauge is standard on class 8 models. * 5-speed Allison transmissions are suited primarily for use on single drive axle trucks where GVWR does not exceed 40K. In other applications startability will be improved using a 6-speed transmission which allows deeper rear axle gearing. Contact Application Engineering for more information. * Allison 3000 series transmissions used in off-road conditions require wheel slip which cannot be met with a rear axle ratio faster [numerically lower] than 5.91. * The right hand mounted 10 bolt PTO position is obscured by DPF pipe routing with the PX-7 engine. * This transmission is not available for use in fire or EMT/rescue service. | \$12,289 | 291# |
| 2011228 | Transmission: Allison 3500RDS 5-speed w/PTO drive gear. Limited to 860 lb.-ft. 5th Gen controls. Includes heat exchanger & oil level sensor. Rugged Duty Series for vocational applications. Transynd transmission fluid is standard on all Allison 1000, 2000, 3000 & 4000 series transmissions. * 5-speed Allison transmissions are suited primarily for use on single drive axle trucks where GVWR does not exceed 40K. In other applications startability will be improved using a 6-speed transmission which allows deeper rear axle gearing. Contact Application Engineering for more information. * The right hand mounted 10 bolt PTO position is obscured by DPF pipe routing with the PX-7 engine. * This transmission is not available for use in fire or EMT/rescue service. | \$12,217 | 291# |

| 2406872 | Driveline:3 SPL140 for T/C w/1 C/B & 3 SPL170 with two centerbearing to rear axle. * For 6x6 applications SPL140 forward and SPL170 rear drivelines are required. * Front drive axle configurations using the Allison 2000 series transmissions require SPL140 series forward with SPL170 rear driveline with the S21/23/26-170 or S21/23/26-190 series rear axles. * This driveline is required for use and only available with a transfer case in combination with a front drive axle only. A minimum of one centerbearing will be required in all cases. | \$3,707 | 510# |
| Centerbearing Crossmembers | | | |
| 2409916 | One bolted centerbearing crossmember. This option upgrades an existing crossmember. The cost does not include the centerbearing and bracket. Crossmember location will be in accordance with Kenworth engineering standards, using the major components specified on the DTPO. * * Required with front axles 13K and greater. * Required with frame rail inserts. * Required with 10-3/4 inch frame rail. * Required with front drive axle. * Bolted crossmembers are only available and required with 13K and greater front axles, front drive axles, 10-3/4 inch rails, or inserted rails. These codes switch from the medium-duty welded crossmembers to heavy-duty style bolted crossmembers, and are not optional with other Medium-Duty configurations. * Required with front axles 13K and greater. | \$75 | 11# |
| 2409917 | Two bolted centerbearing crossmembers. This option upgrades existing crossmembers. The cost does not include the centerbearing and bracket. Crossmember location will be in accordance with Kenworth engineering standards, using the major components specified on the DTPO. * * Required with front axles 13K and greater. * Required with frame rail inserts. * Required with 10-3/4 inch frame rail. * Required with front drive axle. * Bolted crossmembers are only available and required with 13K and greater front axles, front drive axles, 10-3/4 inch rails, or inserted rails. These codes switch from the medium-duty welded crossmembers to heavy-duty style bolted crossmembers, and are not optional with other Medium-Duty configurations. * Required with front axles 13K and greater. | \$150 | 19# |

Front Axles

10K & Under

| | | | |
|---|--|---------|-----|
| 2501011 | Dana Spicer E-1002IL Front Axle rated 10K 3-1/2in. drop, hydraulic brakes. | \$1,311 | 29# |
| * Dana 10k light weight beam axles are not available with tires that have SLR greater than 19.5 inches. | | | |
| * Front axles less than 16K are not available with 385 front tires except for front drive axles. | | | |
| * Hydraulic brake front axles do not require slack adjusters, no sales code is required. | | | |
| * Hydraulic braked Dana Spicer E-1002IL or E-1202IL front axles are available with 2 x 73 mm front brakes rated to 12K. | | | |
| * The E-1002IL or E-1202IL front axles are for use with a 12k power steering gear with 2010 engines. | | | |
| * This front axle has the brake code included with the hub package. | | | |

Front Drive Axles

| | | | |
|---|--|----------|------|
| 2561010 | Fabco FSD-10A Front Drive Axle at 10,000 lbs. capacity. Includes cast iron hubs, 16.5x5 in. S-cam brakes, automatic slack adjusters, with ABS provision. | \$15,043 | 823# |
| * * Requires bolted crossmembers w/ 12 mm frame fasteners: center and rear frame. s/c 6490123. | | | |
| * Requires bolted rear cab support crossmember. s/c 6490430. | | | |
| * Cab door bearing blocks are required when a front drive axle is specified. | | | |
| * Front drive axles are available for use with air brakes on the T270 and T370 models. | | | |
| * Front drive axles are not available for use on tractors. | | | |
| * Front drive axles require the Kenworth Driver Information Center. Operator will receive a warning when vehicle is traveling faster than 25 mph with front drive axle engaged. | | | |
| * Not available with RSD-compliant vehicle or air disc brakes. | | | |
| * Single 13.5K steering gear is required for use with the FSD-10A, -12A front drive axles. | | | |
| * This axle must be accompanied by a drive ratio. See 2590307 - 2590650. | | | |
| * This component requires a long lead-time. Refer to the long lead-time report for potential delivery date availability. | | | |
| * Vehicles with front drive axles have dust shields included with the hub and brake package. There are no options. | | | |
| * Vehicles with front drive axles include dust shields on all axles. There are no options. | | | |

Single Axle Outer End Equipment

Hubs

| | | | |
|----------------|--|-------|-------|
| 3401001 | 23K air brake package includes 16-1/2x7 in. brakes, cast drums, aluminum 10-bolt hub pilot Preset hubs, automatic slack adjusters and oil seals for use w/ 22.5 in. wheels. * Hub package for use with single rear axles only. * The specification of 10-bolt hubs on one axle requires matching 10-bolt hubs on the other axle. | STD | 0# |
| 3401007 | 23K Meritor air brake package includes 16.5X7Q+ brakes, cast drums, aluminum 10-bolt hub pilot Preset hubs, slack adjusters. * Hub package for use with single rear axles only. * Meritor hub packages which use brake package for single rear axle installation. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use an RSD-compliant brake code instead. | \$83 | 55# |
| 3401019 | 19K air brake package includes 15x8-5/8 in. brakes, cast drums, aluminum 8-bolt hub pilot hubs, slack adjusters and oil seals for use w/ 19.5 in. wheels. * 19k air brake package with 15x8-5/8 inch brakes is not compatible with dust shields on the axle. * Hub package for use with single rear axles only. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use an RSD-compliant brake code instead. | \$883 | -25# |
| 3403000 | 18K hydraulic brake package includes 2x66 mm. disc brakes, rotors, iron 10-bolt hub pilot hubs, hub caps, oil seals and Dust Shields for use w/ 22.5in. wheels or Alcoa aluminum 19.5in.x7.5in. wheels, code 5242236. * Hub package for use with single rear axles only. * Hub packages for use with hydraulic brakes. No slack adjuster sales code is required. * Rear axle hubs for use with P20060, P22060 or Dana SXX-140 series rear axles only. * T270 and wheel (5242236) is only available with the iron 10-bolt hub and hydraulic brakes with P20060, P22060 or Sxx-140 rear axles. * The specification of 2 x 66 mm 10-bolt hubs on one axle requires matching hub size on the other axle. * Tractors not applicable to hydraulic brake systems. | \$0 | -171# |
| 3403001 | 21K hydraulic brake package includes 2x73 mm. disc brakes, rotors, iron 10-Bolt hub pilot hubs, hub caps, oil seals and dust shields for use w/ 22.5 in. wheels. * Hub package for use with single rear axles only. * Hub packages for use with hydraulic brakes. No slack adjuster sales code is required. * Only for use with 22.5in wheels. * Rear axle hubs for use with P20060, P22060 or Dana SXX-140 series rear axles only. * The specification of 2 x 73 mm 10-bolt hubs on one axle requires matching hub size on the other axle. * Tractors not applicable to hydraulic brake systems. | \$0 | -105# |
| 3403003 | 26K air brake package includes 16-1/2x7 in. brakes, cast drums, iron 10-bolt hub pilot hubs, slack adjusters and oil seals for use w/ 22.5 in. wheels. * Hub package for use with single rear axles only. * The specification of 10-bolt hubs on one axle requires matching 10-bolt hubs on the other axle. | (\$5) | 0# |

Spring Brakes & Parking Brakes

| | | | |
|----------------|--|---------|----|
| 3485001 | Bosch Parking Brake 3x12 in. high lever actuated. Axle mounted for medium duty. * The axle mounted parking brake is for use with hydraulic braked chassis, and requires an SPL100 or SPL140 driveline series. | (\$142) | 2# |
|----------------|--|---------|----|

T270: REAR AXLE

| Option | Description | Price | Weight |
|----------------------|--|---------|--------|
| Miscellaneous | | | |
| 3407046 | Longer studs for aluminum wheels w/ steel hub pilot wheels. * Longer stud length on rear axles is available with steel rear wheels only. * Longer studs for use on tandem rear axles with hub-pilot steel wheels facilitate the change to aluminum wheels in field. Aluminum material thickness is greater so standard length steel wheel studs are too short accommodate the after market swap. | \$72 | 6# |
| 3490046 | Dustshields for drum brakes: all rear axles, required and only available with T270/T370 front drive axles * Vehicles with front drive axles include dust shields on all axles. There are no options. | \$0 | 11# |
| 3490047 | Dustshields for drum brakes: all rear axles. * 19k air brake package with 15x8-5/8 inch brakes is not compatible with dust shields on the axle. | \$101 | 11# |
| 3495352 | Bendix Collision Mitigation System Following Distance Alerts- CONFIGURATION 5 | \$0 | 0# |
| 3495353 | BENDIX WINGMAN FUSION ADAPTIVE CC W/ACB | \$4,101 | 0# |

T270: REAR SUSPENSION

| Option | Description | Price | Weight |
|------------------------|---|---------|--------|
| Single | | | |
| 31K & Under | | | |
| 3622215 | Rear suspension: single Hendrickson HAS210L 21K. Welded steel crossmember and gussets w/shocks at 8.3 in. laden height, 8.5 in. unladen height. Medium-duty. Includes air suspension dump valve. Not rear air disc brake compatible. * A heavy-duty rear suspension crossmember is required for use with front axle 13K or greater, a frame insert, or 10-3/4 inch rail. Add sales code 3832313. * Beam or spring rear suspensions are typically used with an asphalt spreader. * Engineering review and/or vendor approval will be required for Hendrickson air suspensions used as fire trucks. * Hendrickson HAS suspensions are not available with refuse packer applications. * Hendrickson HAS210L rear suspension requires use of accessory air system if hydraulic brakes are specified. Hendrickson air suspensions cannot be used in fire service. Not available with logger, mixer roll-off, concrete pump, oil field rig-up, oil well service, drilling derrick, or crane/boom operation. * Not compatible with rear air disc brakes. * Not compatible with rear air disc brakes. * With 385 front tires this suspension requires 24.5" rear tires for proper frame rake. | \$1,181 | -121# |
| 3626430 | Rear suspension: single Reyco 79KB multileaf 20K. Medium duty FDA only. Without helper spring. Unladen height: 16.5 in. Laden height: 14.7 in. Not rear air disc brake compatible. * Bolted rear suspension crossmember for use with Reyco 79KB rear suspensions when a frame insert or front drive axle is specified. * Not compatible with rear air disc brakes. * Rear suspension equipment for use on Reyco 79KB rear suspensions. Not available with 30K or greater rear axles or with front drive axles. * Requires a minimum wheelbase of 180 inches when used with a PACCAR PX-9 or Cummins ISC engine. * Requires a minimum wheelbase of 190 inches when used with a PX-7 engine. * Reyco 79KB with front drive axle and PX-7 engine has a minimum wheelbase of 190 inches. * This rear suspension for use with a single rear drive axle. * This rear suspension is for use with a single drive axle only. Not available with body types of fire pumper or tank. * This suspension is required with and for use with a front drive axle only. | \$854 | 90# |
| 3626431 | Rear suspension: single Reyco 79KB multileaf 21K. Medium duty FDA only. Without helper spring. Unladen height: 16.5 in. Laden height: 14.6 in. Not rear air disc brake compatible. * Bolted rear suspension crossmember for use with Reyco 79KB rear suspensions when a frame insert or front drive axle is specified. * Not compatible with rear air disc brakes. * Rear suspension equipment for use on Reyco 79KB rear suspensions. Not available with 30K or greater rear axles or with front drive axles. * Requires a minimum wheelbase of 180 inches when used with a PACCAR PX-9 or Cummins ISC engine. * Requires a minimum wheelbase of 190 inches when used with a PX-7 engine. * Reyco 79KB with front drive axle and PX-7 engine has a minimum wheelbase of 190 inches. * This rear suspension for use with a single rear drive axle. * This rear suspension is for use with a single drive axle only. Not available with body types of fire pumper or tank. * This suspension is required with and for use with a front drive axle only. | \$854 | 90# |

T270: REAR SUSPENSION

| Option | Description | Price | Weight |
|------------------------|---|---------|--------|
| Single | | | |
| 31K & Under | | | |
| 3626479 | Rear suspension: single Reyco 79KB taperleaf 20K. Medium-duty. Unladen Height: 9 in. Laden Height: 7.6 in. Not rear air disc brake compatible. * A bolted rear suspension crossmember is required with Reyco 79kb rear suspensions and front axle 13K or greater, a frame insert, 10-3/4 inch rails, or front drive axle. * If the vehicle will be a fire truck Reyco rear suspensions rated under 26K are not available. * Not available with 385 front tires. * Not compatible with rear air disc brakes. * Reyco recommends stabilizer bars for the 79KB rear suspension when the vehicle will be used as a refuse packer. | STD | 0# |
| 3630021 | Rear suspension: single Kenworth Airglide 210L 21K. 6.5 in. ride height w/single leveling valve. Includes air suspension dump valve. * Available for use on trucks with body types of beverage, flatbed, or van. For tractors a trailer type of van or flatbed is allowed. Some additional body types are subject to engineering review. For complete definition of approved body/trailer types and intended services, please see Application Guidelines on DealerNet. * Cannot be used in any class D road service when specified for a Medium-Duty chassis. * Frame reinforcement is required with 9-7/8 rail and AG210 together. * GCW limit of 60,000 lbs. maximum. * Meritor RS23, RS26, and RS30 rear axles are not for use with AG210L. * Not available with 385 front tires. * Not compatible with rear air disc brakes. * S23 and S26 rear axles are not for use with the Kenworth AG210L rear suspension. * This rear suspension cannot be used with greater than 3% class C road service when specified on a Medium-Duty chassis. | \$1,057 | -145# |
| 3632010 | Rear suspension: Single Hendrickson Primaax EX232 23K, 8.5 in. ride height. | \$3,317 | -10# |
| 3632015 | Rear suspension: Single Hendrickson Primaax EX232 23K, 15.5 in. ride height. Not rear air disc brake compatible. * Not compatible with rear air disc brakes. * Recommend to only keep it published for models which have PX9 engine published. Then add restriction in prospector to only allow 130 amp alternator when there is a PX9 engine on the order. * Requires a minimum wheelbase of 180 inches when used with a PACCAR PX-9 or Cummins ISC engine. * Requires a minimum wheelbase of 190 inches when used with a PX-7 engine. * This rear suspension for use with a single rear drive axle. * This suspension is required with and for use with a front drive axle only. | \$4,985 | 243# |

T270: REAR SUSPENSION

| Option | Description | Price | Weight |
|-----------------------------|---|---------|--------|
| Single | | | |
| 31K & Under | | | |
| 3632277 | Rear suspension: single Hendrickson HAS230L 23K. Welded steel crossmember & gussets w/shocks at 8.3 in. laden height, 8.5 in. unladen height. Medium-duty. Includes air suspension dump valve. Not rear air disc brake compatible. * A heavy-duty rear suspension crossmember is required for use with front axle 13K or greater, a frame insert, or 10-3/4 inch rail. Add sales code 3832313. * Beam or spring rear suspensions are typically used with an asphalt spreader. * Engineering review and/or vendor approval will be required for Hendrickson air suspensions used as fire trucks. * Hendrickson HAS suspensions are not available with refuse packer applications. * Hydraulic brakes are not available with this suspension. Not for use with logger, mixer, roll-off, concrete pump, oil field rig-up, oil well service, drilling derrick, or crane/boom operation. * Not compatible with rear air disc brakes. * Not compatible with rear air disc brakes. * Single Hendrickson HAS rear suspensions require 10-5/8 inch or 10-3/4 inch parent rail material. * The P22060S rear axle is incompatible with the 23K rated HAS 230L rear suspension. * With 385 front tires this suspension requires 24.5" rear tires for proper frame rake. | \$1,217 | -59# |
| 3636421 | Rear suspension: single Reyco 79KB taperleaf 21K. Medium-duty. Unladen Height: 9 in. Laden Height: 7.5 in. Not rear air disc brake compatible. * A bolted rear suspension crossmember is required with Reyco 79kb rear suspensions and front axle 13K or greater, a frame insert, 10-3/4 inch rails, or front drive axle. * If the vehicle will be a fire truck Reyco rear suspensions rated under 26K are not available. * Not available with 385 front tires. * Not compatible with rear air disc brakes. * Reyco recommends stabilizer bars for the 79KB rear suspension when the vehicle will be used as a refuse packer. | \$0 | 0# |
| 3636422 | Rear suspension: single Reyco 79KB taperleaf 23K. Medium-duty. Unladen Height: 9 in. Laden Height: 7.3 in. Not rear air disc brake compatible. * A bolted rear suspension crossmember is required with Reyco 79kb rear suspensions and front axle 13K or greater, a frame insert, 10-3/4 inch rails, or front drive axle. * If the vehicle will be a fire truck Reyco rear suspensions rated under 26K are not available. * Not available with 385 front tires. * Not compatible with rear air disc brakes. * Reyco recommends stabilizer bars for the 79KB rear suspension when the vehicle will be used as a refuse packer. | \$469 | 57# |
| 3652012 | Rear suspension: Single Hendrickson Primaax EX262 26K, 8.5 in. ride height. | \$3,613 | -10# |
| Suspension Equipment | | | |
| 3830313 | Bolted rear suspension crossmembers for AG210L. Replaces T3 standard. * * Required with front axles 13K and greater. * Required with frame rail inserts. * Required with 10-3/4 inch frame rail. | \$41 | 0# |
| 3830502 | Delete dash mounted control for air suspension dump valve. Only available with an air suspension. | \$0 | 0# |

T270: REAR SUSPENSION

| Option | Description | Price | Weight |
|-----------------------------|---|---------|--------|
| Suspension Equipment | | | |
| 3830505 | Dual leveling valves for single air suspension. Dual leveling valves on single rear suspensions on only available on Neway ADZ for class 8 or Hendrickson HAS for medium duty. Dual leveling valves will not be approved on any other suspensions on T3. * Only applicable with Hendrickson HAS 21k and 23k rear suspensions. * Requires dual suspension pressure gauges (8221100). | \$153 | 0# |
| 3832033 | Inboard mounted shock absorbers for Hendrickson HAS single or dual. Mounted outboard on forward rear & inboard on rear rear axle. * Inboard mounted shock absorbers are for use on end dumps used to haul and spread asphalt. There is no other application for this option. * This option is for use on Hendrickson air suspensions only. Relocation applies only to the rear axle in a tandem set, forward axle will have the standard outboard mounting. | \$49 | 0# |
| 3832100 | Track rods: heavy duty for Hendrickson PRIMAAX EX single. Replaces standard duty track rods. | \$50 | 12# |
| 3832313 | Bolted rear suspension crossmembers for HAS 210/210L or 230/230L. Replaces T3 standard. * * Required with front axles 13K and greater. * Required with frame rail inserts. * Required with 10-3/4 inch frame rail. * A heavy-duty rear suspension crossmember is required for use with front axle 13K or greater, a frame insert, or 10-3/4 inch rail. Add sales code 3832313. * Bolted rear suspension crossmember for use with Hendrickson HAS 210 or 230. | \$191 | 4# |
| 3832320 | Bolted rear suspension crossmember for PRIMAAX EX single. Replaces T270, T370 standard. | \$0 | 16# |
| 3836300 | Rear axle stabilizer bar for Reyco 79KB. * Rear suspension equipment for use on Reyco 79KB rear suspensions. Not available with 30K or greater rear axles or with front drive axles. * Reyco recommends stabilizer bars for the 79KB rear suspension when the vehicle will be used as a refuse packer. | \$1,153 | 66# |
| 3836310 | Rear shock absorbers for Reyco 79KB. * Rear suspension equipment for use on Reyco 79KB rear suspensions. Not available with 30K or greater rear axles or with front drive axles. * Reyco recommends stabilizer bars for the 79KB rear suspension when the vehicle will be used as a refuse packer. | \$269 | 35# |
| 3836315 | Bolted rear suspension crossmembers for Reyco 79KB. Replaces T3 standard. * * Required with front axles 13K and greater. * Required with frame rail inserts. * Required with 10-3/4 inch frame rail. * Required with front drive axle. * * Required with front axles 13K and greater. * Required with frame rail inserts. * Required with 10-3/4 inch frame rail. * Required with front drive axle. * Not available with hydraulic brakes. * A bolted rear suspension crossmember is required with Reyco 79kb rear suspensions and front axle 13K or greater, a frame insert, 10-3/4 inch rails, or front drive axle. * Not available with hydraulic brakes. * Not available with hydraulic brakes. | \$99 | 41# |
| 3839140 | Chalmers 40K severe service upgrade. Use with Chalmers 8xx-40 series suspensions. Separate suspension code required. | \$362 | 16# |

T270: FRAME & EQUIPMENT

| Option | Description | Price | Weight |
|---------------------------------|---|-------|--------|
| Center Frame Clear Space | | | |
| First Request Location | | | |
| 6497200 | Directly behind the under fuel/hydraulic tank. First clear frame space location. | \$0 | 0# |
| 6497201 | Directly behind the BOC fuel/hydraulic tank. First clear frame space location. | \$0 | 0# |
| 6497202 | Directly forward of the rearmost fuel/hydraulic tank. First clear frame space location. | \$0 | 0# |
| 6497203 | Directly behind DEF tank. First clear frame space location. | \$0 | 0# |
| 6497204 | Directly behind the battery box. First clear frame space location. | \$0 | 0# |
| 6497205 | Directly behind the DPF/SCR box. First clear frame space location. | \$0 | 0# |
| 6497206 | Directly behind the toolbox or temporary cab entry step for use with natural gas engines. First clear frame space location. | \$0 | 0# |
| 6497207 | Directly forward of the rear suspension/quarter fender. First clear frame space location. | \$0 | 0# |
| 6497209 | Directly behind the under cab component. First clear frame space location. | \$0 | 0# |
| 6497210 | Directly behind BOC1 fuel/hydraulic tank or box. First clear frame space location. | \$0 | 0# |
| 6497211 | Directly behind BOC2 fuel/hydraulic tank or box. First clear frame space location. | \$0 | 0# |
| Second Request Area | | | |
| 6497109 | Second - LH outside rail only. Clear frame space area. Does not include BOC crossmember, fasteners or piping. Requires a supplemental length and location code. The actual chassis layout will be determined at time of engineering. | \$0 | 0# |
| 6497110 | Second - RH outside rail only. Clear frame space area. Does not include BOC crossmember, fasteners or piping. Requires a supplemental length and location code. The actual chassis layout will be determined at time of engineering. | \$0 | 0# |
| 6497111 | Second - LH below rail only. Clear frame space area. Does not include BOC crossmember, fasteners or piping. Requires a supplemental length and location code. Sales tool graphics do not depict interference between requested location and other frame-mounted components. The actual chassis layout will be determined at time of engineering. | \$0 | 0# |
| 6497112 | Second - RH below rail only. Clear frame space area. Does not include BOC crossmember, fasteners or piping. Requires a supplemental length and location code. Sales tool graphics do not depict interference between requested location and other frame-mounted components. The actual chassis layout will be determined at time of engineering. | \$0 | 0# |
| 6497113 | Second - LH outside and LH below rail only. Clear frame space area. Does not include BOC crossmember, fasteners or piping. Requires a supplemental length and location code. Sales tool graphics do not depict interference between requested location and other frame-mounted components. The actual chassis layout will be determined at time of engineering. | \$0 | 0# |
| 6497114 | Second - RH outside and RH below rail only. Clear frame space area. Does not include BOC crossmember, fasteners or piping. Requires a supplemental length and location code. Sales tool graphics do not depict interference between requested location and other frame-mounted components. The actual chassis layout will be determined at time of engineering. | \$0 | 0# |
| 6497115 | Second - between rails only. Clear frame space area. Does not include BOC crossmember, fasteners or piping. Requires a supplemental length and location code. Sales tool graphics do not depict interference between requested location and other frame-mounted components. The actual chassis layout will be determined at time of engineering. | \$0 | 0# |

Miscellaneous Center Frame Equipment

| | | | |
|---------|--|-------|----|
| 6679020 | Class 6 26K GVWR, for air brakes only. Requires GAWR front 9K, GAWR rear 21K; front axle 9K, front spring 10K, rear axle 21K. Maximum rear suspension is 23K. | \$0 | 0# |
| 6679021 | Class 6 26K GVWR, for air brakes only. Requires GAWR front 10K, GAWR rear 20K; front axle 10K, front spring 10K, rear axle 20K. Maximum rear suspension is 23K. | \$0 | 0# |
| 6679023 | Class 6 26K GVWR, for air brakes only. Requires GAWR front 12K, GAWR rear 18K; front axle 12K, front spring 12K, rear axle 18K. Maximum rear suspension is 23K. | \$0 | 0# |
| 6679025 | Class 6 26K GVWR, for air brakes only. Requires GAWR front 10K, GAWR rear 21K; front axle 10K, front spring 10K, rear axle 21K. Maximum rear suspension is 23K. | \$0 | 0# |
| 6679027 | Class 6 26K GVWR, for air brakes only. Requires GAWR front 12K, GAWR rear 19K; front axle 12K, front spring 12K, rear axle 19K. Maximum rear suspension is 23K. | \$0 | 0# |
| 6679904 | Fifth wheel setting is outside standard range. Required when fifth wheel setting is more than 30 in. from bogie. * Fifth wheels positioned with a rear or fixed setting more than 30 inches from bogie are subject to an additional charge. This includes factory installed fifth wheels, angles or drillings for aftermarket fifth wheels. | \$718 | 0# |

Body Builder Requirements

| | | | |
|---------|---|-------|----|
| 6390091 | Frame layout picture to dealer prior to build date. Information only, no changes. This provides basic frame layout illustration in a PDF file. Adobe Reader or other software capable of viewing PDF files is required on your computer. A copy of the frame layout can be obtained once the engineering work has been completed. This drawing will help the body builder define clearance requirements for the chassis. | \$718 | 0# |
| 6390097 | DXF frame layout to dealer prior to build date. Information only, no changes. This provides a frame layout in a .DXF format data file suitable for use w/ many CAD programs. * With this option an electronic copy of the chassis frame layout will be forwarded to the dealership. The data is not viewable without the use of CAD oriented software. There is another option to have a paper copy of the chassis dimensions faxed to the dealership. | \$718 | 0# |

T270: FRAME & EQUIPMENT

| Option | Description | Price | Weight |
|------------------------------------|---|---------|--------|
| Body Builder Requirements | | | |
| 6391201 | Custom Frame Layout: one chassis | \$1,380 | 0# |
| 6391202 | Custom Frame Layout: two chassis | \$690 | 0# |
| 6391203 | Custom Frame Layout: 3-4 chassis | \$375 | 0# |
| 6391205 | Custom Frame Layout: 5-9 chassis | \$200 | 0# |
| 6391210 | Custom Frame Layout: 10-24 chassis | \$100 | 0# |
| 6391225 | Custom Frame Layout: 25-49 chassis | \$40 | 0# |
| 6391250 | Custom Frame Layout: 50 or more chassis | \$30 | 0# |
| 6679860 | Final end-of-frame cut-off dimension will be modified to less than or equal to 65 inches. | \$0 | 0# |
| 6679862 | Final end-of-frame cut-off dimension will be modified to 66 in. to 74 in. | \$0 | 0# |
| 6679864 | Final end-of-frame cut-off dimension will be modified to greater than or equal to 75 in. | \$0 | 0# |
| 6679915 | Customer-installed bulkhead and/or headache rack. * This body is indicative types that utilize an aftermarket headache rack. In those cases the frame access package must be altered after the vehicle is delivered to accommodate the installation of a headache rack and retain compliance with FMCSR 399. | \$0 | 0# |
| 6679995 | Customer will install structural end-of-frame crossmember before vehicle is placed in service. * This warning states the dealers intent for the body builder to meet the structural end of frame requirement associated the installation of a heavy-duty end of frame crossmember. | \$0 | 0# |
| 6790003 | Special frame drill: dealer to provide drawing with dimensions and revision level. Acceptable hole diameters range from 10.2 mm to 40.4 mm. Preferred file format is .pdf. Not for use for rear suspension, fifth wheel or other published frame drilling code. Does not replace clear frame space requests or custom frame layout. | \$1,437 | 0# |
| Rear Frame Equipment | | | |
| Quarter Fenders | | | |
| 6734005 | Quarter Fenders: Stainless Steel w/ Painted Steel brackets, single post mounted. | \$326 | 55# |
| 6737120 | Quarter Fenders: Black Polypropylene w/ painted steel brackets, single post mounted, 21 in. white top flap with logo. | \$179 | 43# |
| End-Of-Frame Configurations | | | |
| Non-Towing Configuration | | | |
| 6741011 | Square end-of-frame w/ crossmember; non-towing. | \$152 | 41# |
| 6741023 | Square end-of-frame w/ bolted crossmember, non-towing. | \$201 | 41# |
| 6742009 | Square end-of-frame w/o crossmember; non-towing. * The square end of frame without a crossmember is required for the T170. | STD | 0# |
| Hooks & Chain Loops | | | |
| 6490144 | 1 Pro-Tech chain hanger, 35-5950CP LH rail with removable lid & cable pin. | \$195 | 15# |
| 6710080 | Two rams horn open rear tow hooks, not for trailer towing. | \$97 | 17# |

T270: FRAME & EQUIPMENT

| Option | Description | Price | Weight |
|--------|-------------|-------|--------|
|--------|-------------|-------|--------|

Rear Frame Equipment

Hooks & Chain Loops

| | | | |
|---------|---|-------|-----|
| 6710157 | Holland: PH-30RP41 pintle hook mounted on 15,000lb rear suspension crossmember for use w/ Airglide suspensions. For yarding dollies, no trailers. 6,000lb vertical rating. * Pintle hook is for use with Kenworth Airglide rear suspensions only. * This pintle hook is not suitable for transporting a trailer over the road. * Yarding hooks require an end of frame configuration without a crossmember. | \$127 | 11# |
| 6710158 | Holland: PH-30RP41 pintle hook mounted on 15,000lb rear suspension crossmember for use w/ Reyco, HAS, & Neway suspensions. For yarding dollies, no trailers. 6,000lb vertical rating. * Pintle hook is for use with Reyco or Hendrickson HAS rear suspensions only. * Requires end of frame configuration code 6742009. * This pintle hook is not suitable for transporting a trailer over the road. * Yarding hooks require an end of frame configuration without a crossmember. | \$260 | 11# |
| 6792810 | Safety chain loops - Dual. * Use only in combination w/ pintle hook codes 6710157 or 6710158 | \$92 | 2# |

Rear Mudflap Equipment

Arms

| | | | |
|---------|--|-------|-----|
| 6721102 | Rear mudflap arms: Betts B-25 standard-duty, straight. Includes B1732 mounting brackets as standard. * Tractors operating in the U.S. or Canada require rear mud flaps. | \$73 | 12# |
| 6721144 | Rear mudflap arms: Fleetline FF30SS, tapered spring loaded & stainless steel. | \$296 | 20# |
| 6721163 | Rear mudflap arms: Fleet Engineers, FB27 shortie 033-04734. Conspicuity on extended flange. 45 degree angle, painted black RoadKote. | \$121 | 22# |
| 6721164 | Rear mudflap arms: Fleet Engineers, FB27 shortie 033-00865. 45 degree angle, polished stainless steel. | \$197 | 0# |

Shields

| | | | |
|---------|--|-------|-----|
| 6722000 | Rear mudflap shields: White plastic antisail w/ Kenworth logo. * Tractors operating in the U.S. or Canada require rear mud flaps. | \$65 | 9# |
| 6722065 | Rear mudflap shields: Fleetline black rib poly. Antispray w/o logo 24 in.X27 in. * Requires mud flap bracket code 6721163. | \$83 | 2# |
| 6722094 | Rear mudflap shields: Black rubber anti-sail w/o logo. 28 in. x 30 in., 25 in. thickness. * Extra-wide rear mud flaps are required with 12R24 or 315/80R22.5 rear tires. Not available as an option for other configurations. | \$121 | 17# |
| 6723287 | Rear mudflap shields: Fleet Engineers AeroFlap. Black, polypropylene material. Without Kenworth logo. Not for use with Kenworth Aero Package. | \$98 | 4# |

Delivery Restriction Notifications

| | | | |
|---------|---|-----|----|
| 6679804 | Do not drive: Marker lights are deleted. Unit may be decked. Transporter review delivery options. Requires code 9029025. | \$0 | 0# |
| 6679806 | Do not drive: Bumper is deleted. Unit may be decked. Transporter review delivery options. Requires code 6309910 or 6309912. | \$0 | 0# |

T270: FRAME & EQUIPMENT

| Option | Description | Price | Weight |
|---|--|-------|--------|
| Delivery Restriction Notifications | | | |
| 6679812 | Speed limited tires: Less than 65MPH. Dealer to review delivery options w/transporter. | \$0 | 0# |
| 6679823 | Dealer to review delivery restrictions w/ transporter. Units equipped with transfer case. | \$0 | 0# |
| 6679828 | Chassis too long for delivery in standard 3 way due to long cutoff. Dealer to review delivery options w/ transporter. * Special delivery requirements may be required with cutoff in excess of 120 inches. | \$0 | 0# |
| 6679836 | Dealer Review Delivery Restrictions w/ transporter. Chassis lacking required safety equipment such as fenders, lighting, or bumpers & cannot be driven but may be decked. | \$0 | 0# |
| 6679911 | Component Restriction: Do Not Drive- Unit may be decked. * Chassis specified without lights or safety equipments are considered incomplete vehicles and cannot be driven on the highway with the component/s missing. This restriction dictates special delivery requirements. * The delete bumper option requires a do not drive warning. Standard delivery may not be available. | \$0 | 0# |

T270: FUEL TANKS & EQUIPMENT

| Option | Description | Price | Weight |
|---|--|---------|--------|
| Round | | | |
| Aluminum Diesel | | | |
| 22" | | | |
| Under - Replace | | | |
| 7010056 | Fuel Tank: 56 US gallon 22in. aluminum under replace. Class 8 fuel tank includes an anti-siphon device on the filler neck. | (\$175) | -19# |
| 7010075 | Fuel Tank: 75 US gallon 22in. aluminum under replace. Class 8 fuel tank includes an anti-siphon device on the filler neck. | (\$141) | -11# |
| 7010100 | Fuel Tank: 100 US gallon 22in. aluminum under replace. Class 8 fuel tank includes an anti-siphon device on the filler neck. | (\$55) | 0# |
| * The 9-7/8 inch rail is not available with fuel capacity greater than 75 gallons. | | | |
| 7010120 | Fuel Tank: 120 US gallon 22in. aluminum under replace. Class 8 fuel tank includes an anti-siphon device on the filler neck. | \$47 | 8# |
| * The 9-7/8 inch rail is not available with fuel capacity greater than 75 gallons. | | | |
| Under - Add | | | |
| 7012056 | Fuel Tank: 56 US gallon 22in. aluminum under add. Class 8 fuel tank includes an anti-siphon device on the filler neck. Multiple tank installations include a fuel equalization system w/ dual draw and return lines with a splitter valve located within 6 inches behind the cab. Single draw and return is an option in some cases. | \$1,099 | 81# |
| * This tank is not available on the T170. | | | |
| 7012075 | Fuel Tank: 75 US gallon 22in. aluminum under add. Class 8 fuel tank includes an anti-siphon device on the filler neck. Multiple tank installations include a fuel equalization system w/ dual draw and return lines with a splitter valve located within 6 inches behind the cab. Single draw and return is an option in some cases. | \$1,249 | 90# |
| * This tank is not available on the T170. | | | |
| Behind - Replace | | | |
| 7014056 | Fuel Tank: 56 US gallon 22in. aluminum BOC replace. Class 8 fuel tank includes an anti-siphon device on the filler neck. | (\$174) | -45# |
| 7014075 | Fuel Tank: 75 US gallon 22in. aluminum BOC replace. Class 8 fuel tank includes an anti-siphon device on the filler neck. | (\$150) | -36# |
| 7014100 | Fuel Tank: 100 US gallon 22in. aluminum BOC replace. Class 8 fuel tank includes an anti-siphon device on the filler neck. | (\$100) | -25# |
| * The 9-7/8 inch rail is not available with fuel capacity greater than 75 gallons. | | | |
| Behind - Add | | | |
| 7016056 | Fuel Tank: 56 US gallon 22in. aluminum BOC add. Class 8 fuel tank includes an anti-siphon device on the filler neck. Multiple tank installations include a fuel equalization system w/ dual draw and return lines with a splitter valve located within 6 inches behind the cab. Single draw and return is an option in some cases. | \$1,245 | 72# |
| * If the 56 gallon tank is requested LH behind the cab with quarter fenders a minimum of 175 wheelbase will be required on tandem axle configurations. | | | |
| * If the 56 gallon tank is requested LH behind the cab without quarter fenders a minimum of 170 wheelbase will be required on tandem axle configurations. | | | |
| * This tank is not available on the T170. | | | |

T270: FUEL TANKS & EQUIPMENT

| Option | Description | Price | Weight |
|------------------------|---|---------|--------|
| Round | | | |
| Aluminum Diesel | | | |
| 22" | | | |
| Behind - Add | | | |
| 7016075 | Fuel Tank: 75 US gallon 22in. aluminum BOC add. Class 8 fuel tank includes an anti-siphon device on the filler neck. Multiple tank installations include a fuel equalization system w/ dual draw and return lines with a splitter valve located within 6 inches behind the cab. Single draw and return is an option in some cases. * If the 75 gallon tank is requested LH behind the cab with quarter fenders a minimum of 185 wheelbase will be required on tandem axle configurations. * If the 75 gallon tank is requested LH behind the cab without quarter fenders a minimum of 180 wheelbase will be required on tandem axle configurations. * This tank is not available on the T170. | \$1,345 | 81# |
| 7016100 | Fuel Tank: 100 US gallon 22in. aluminum BOC add. Class 8 fuel tank includes an anti-siphon device on the filler neck. Multiple tank installations include a fuel equalization system w/ dual draw and return lines with a splitter valve located within 6 inches behind the cab. Single draw and return is an option in some cases. * If the 100 gallon tank is requested LH behind the cab with quarter fenders a minimum of 200 wheelbase will be required on tandem axle configurations. * If the 100 gallon tank is requested LH behind the cab without quarter fenders a minimum of 195 wheelbase will be required on tandem axle configurations. * The 9-7/8 inch rail is not available with fuel capacity greater than 75 gallons. * This tank is not available on the T170. | \$1,368 | 119# |
| 24.5" | | | |
| Under - Replace | | | |
| 7210056 | Fuel Tank: 56 US gallon 24.5in. aluminum under replace. * The 24.5 inch diameter fuel tanks are not to be used on the T170. This diameter is also unavailable on T270/T370 with 19.5 inch wheels or AG210L with 255 tires. | (\$90) | -45# |
| 7210075 | Fuel Tank: 75 US gallon 24.5in. aluminum under replace. Class 8 fuel tanks w/o locking caps include an anti-siphon device on the filler neck. * Not available for right hand under cab with export exhaust 1201308 or 1241317. * Not available with hydraulic brakes with exhaust 1227155. * The 24.5 inch diameter fuel tanks are not to be used on the T170. This diameter is also unavailable on T270/T370 with 19.5 inch wheels or AG210L with 255 tires. * The 24.5 inch x 75 gallon fuel tank left hand under cab with hydraulic brakes with cross over exhaust 1247125/1247130 are not available with Arctic Fox fuel tank heater . | \$53 | -16# |
| 7210090 | Fuel Tank: 90 US gallon 24.5in. aluminum under replace. Class 8 fuel tanks w/ o locking caps include an anti-siphon device on the filler neck. * Not available for right hand under cab with export exhaust 1201308 or 1241317. * Not available with air brakes with exhaust 1227155. * Not available with hydraulic brakes with exhaust 1227155. * The 24.5 inch diameter fuel tanks are not to be used on the T170. This diameter is also unavailable on T270/T370 with 19.5 inch wheels or AG210L with 255 tires. * The 24.5 inch x 90/100 gallon fuel tanks are not available with 9-7/8 frame rails. | \$90 | -11# |

Class 8/T4 Content Includes Dash Signals: Ignition Power (20A), Ground, Stop Lamp and Electric Trailer Brake Controller Wired To EOF Junction Box. These Signals Are Located Near The NavPlus HD Area. No Need To Code For An Additional End of Frame Junction Box. EOF Junction Box Signals Are: Ground, Tail Lamp, Marker Lamp, Left Turn, Right Turn, Stop Lamp and Electric Trailer Brake Controller Wired To Dash. Medium Duty (not T4) Content Includes A MP 280 Series Connector In Dash Near Driver Door Connections With Signals: Battery Power (40A), Ground, Stop Lamp and Electric Trailer Brake Controller Wired To Chassis Connector. Medium Duty (not T4) 2 Way Deutsch Chassis Connector Located Near Back of Cab, With Signals: Ground and Electric Trailer Brake Controller Wired To Dash Connector. | \$134 | 1# |
| 9090312 | Body Builder Lighting Harness Coiled End Of Frame For Additional Customer Installed Exterior Lighting. Harness Includes Circuits for Additional Customer Installed Tail Lamps, Turn Lamps, Stop Lamps, and Marker Lamps. * Provides circuits for additional customer-installed tail lamps, turn lamps, stop lamps, and marker lamps. | \$87 | 0# |
| 9090845 | Circuit Breakers: Replacing fuses. Does not apply to any 5-amp fuse box position. Brakers include stop/brake/turn, tail lamp, high & low beams, marker/clearance lamps, horn, fuel heat, gauges, air dryer, HVAC controls, panel lamps. Some circuits will remain fuses. | \$37 | 0# |
| Beacon Lights | | | |
| Single | | | |
| 9080026 | Amber Beacon Lamp:Single strobe,12V, daycab roof, mounted at rear on centerline of roof without bracket. SAE J1318 Class 2. * This option is not available on the T170 model. | \$295 | 6# |
| Dual | | | |
| 9080126 | Amber Beacon Lamp: Dual strobe, 12V centered over cab door w/ stainless steel brackets. SAE J1318 Class 2. * This option is not available on the T170 model. | \$905 | 11# |
| Customer-Installed | | | |
| 9080202 | Switch & Wiring: Customer-installed dual beacon lights w/o insulators. Coiled wire behind dash. | \$91 | 1# |

T270: LIGHTS & SIGNALS

| Option | Description | Price | Weight |
|---------------------------------|---|-------|--------|
| Floodlights | | | |
| First Set | | | |
| 9052011 | Dual Flush Floodlights: First Set | \$129 | 2# |
| | * Dual floods interfere with back of cab mounted exhaust pipes. | | |
| | * This option is not available on the T170 model. | | |
| Switches for Customer-Installed | | | |
| 9058037 | Switch & Wiring for Customer-Installed Floodlight W/O Electrical Pass-Through - 1st Set. Wire Coiled BOC/BOS. | \$107 | 0# |
| Location Codes | | | |
| 9059901 | Floodlight Location: Located High - First Set. This Code To Be Used With Flush-Mount (9052011) or C/I (9058071) Codes Only. | \$0 | 0# |
| 9059911 | Floodlight Location: Located Mid - First Set | \$0 | 0# |
| Miscellaneous | | | |
| 9058030 | Dual Floodlights:Top-Mirror Mounted - First Set | \$310 | 11# |
| | * Flood lights will be located on the mirror brackets. | | |

T270: AIR EQUIPMENT

| Option | Description | Price | Weight |
|--------|-------------|-------|--------|
|--------|-------------|-------|--------|

Air Drying Equipment

Moisture Ejection Valve

| | | | |
|---------|--|-------|----|
| 9102040 | Moisture ejection valve: Two Bendix DV-2 drain valves on service tanks use w/ AD-IS only. Heated. * DV-2 heated drain valves are for use only with the AD-IS air dryer. * When used with a parallel battery box left-hand under cab this option is not available with 385 front tires. | \$269 | 0# |
| 9108001 | Moisture ejection valve w/ pull cable drain. | \$14 | 0# |

Air Dryer

| | | | |
|---------|--|---------|------|
| 9101022 | Delete standard air dryer. * Cannot delete the air dryer on a hydraulic braked chassis with the accessory air system. * Only hydraulic brakes can be used on the T170 and there is no option for an accessory air system on this model. The air dryer and air compressor must be deleted. * This air dryer option is not available with air brakes. AD-IP can be used on hydraulic brakes when the accessory air system is specified. | (\$372) | -11# |
| 9101023 | Air dryer: Bendix AD-SP heated. With 2010 engine installations the dryer is mounted under the hood. * AD-IS is the preferred air dryer with hydraulic brakes and an accessory air system. * This air dryer is unnecessary on hydraulic braked chassis without an accessory air system. | \$0 | 0# |
| 9101215 | Air Dryer Bendix AD-IS heated Puraguard * This air dryer is unnecessary on hydraulic braked chassis without an accessory air system. | STD | 0# |
| 9101235 | Air Dryer: Bendix AD-IS Extended Purge heated. with PuraGuard | \$97 | 4# |

Air System Miscellaneous

T370: REQUIRED INFORMATION

| Option | Description | Price | Weight |
|-------------------------|--|-------|--------|
| Intended Service | | | |
| 0093000 | <p>Linehaul: Vehicles (trucks or tractors) used in over-the-road freight hauling. Pickup to delivery distance is typically over 300 miles, & annual mileage is typically over 60,000 miles per year. Operation is typically on-highway. Road usage: minimum 1% Class B, do not code for Class D.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* Linehaul is not a typical vocation for a Medium-Duty vehicle.</p> <p>* The road use profile for linehaul service should be: CLASS A 1-99% ; CLASS B 1-99% ; CLASS C 0-20% ; CLASS D 0%</p> | \$0 | 0# |
| 0093005 | <p>Local pickup & delivery: Vehicles which haul freight, typically operating within a 100-mile radius, on public streets & highways, & other paved surfaces, including limited Class C roads. Includes package & freight delivery, as well as fuel oil or petroleum distribution, etc. Road usage: minimum 3% Class B, do not code for Class D.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* The road use profile for pick-up and delivery service should be: CLASS A 0-97% ; CLASS B 3-100% ; CLASS C 0-50% ; CLASS D 0%</p> | \$0 | 0# |
| 0093007 | <p>Regional Haul: Vehicles used to haul freight on public roads consisting of a mixture of over the road, urban and/or suburban hauling. Pickup to delivery distance typically in the 100 to 300 miles range but some LTL applications may exceed 300 mile limit. Road usage: minimum 19% Class B, do not code for Class D.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* The road class profile for chassis in regional haul service is: CLASS A 0-81% ; CLASS B 1-100% ; CLASS C 0-20% ; CLASS D 0%</p> | \$0 | 0# |
| 0093015 | <p>Concrete ready mix: Vehicles which deliver Ready-Mix concrete from batch plant to job site. Typically includes some operation off of paved roads. Road usage: any combination, which includes minimum 5% Class B.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* The road use profile for mixer service should be: CLASS A 0-95% ; CLASS B 5-100% ; CLASS C 0-30% ; CLASS D 0-5%</p> <p>* The T270 is not well suited in applications of logger, mixer, mining hauler, heavy equipment transport, refuse packer, fire truck, or crane/cherry picker. mining hauler and heavy equipment transport. See TE1482.</p> | \$0 | 0# |
| 0093025 | <p>Snowplow: Vehicles which are configured for mounting a snowplow to the front. May also have dump or other body. Typically includes some operation off of paved roads. Road usage: majority of Class A & B, do not code for Class D.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* The road use profile for snowplow service should be: CLASS A 0-95% ; CLASS B 5-100% ; CLASS C 0-30% ; CLASS D 0%</p> | \$0 | 0# |
| 0093035 | <p>Mining service: Vehicles used to service earthmoving & mining equipment. Includes bodies such as mechanic's service bodies, tire hoists, fuel/lube, etc. Typically includes some operation off of paved roads. Road usage: any combination, which includes some Class C.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* The road use profile for mining service should be: CLASS A 0-97% ; CLASS B 0-95% ; CLASS C 1-100% ; CLASS D 0-99%</p> | \$0 | 0# |

T370: REQUIRED INFORMATION

| Option | Description | Price | Weight |
|-------------------------|--|-------|--------|
| Intended Service | | | |
| 0093090 | Utility vehicle: Used to service utility or communication equipment. Typically operates within 100 mile radius on public roads & may or may not have a man lift. Duty cycle includes long engine idle times. Road usage: any combination of A & B, may include some class C roads. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * Typical road use profile for a vehicle operating in Utility service is: CLASS A 0-99% ; CLASS B 1-100% ; CLASS C 0-50% ; CLASS D 0 % | \$0 | 0# |
| 0093091 | Refuse hauler: Vehicles which haul refuse, recycled material, etc. Includes Roll-on/roll-off container movement, as well as hauling refuse from transfer stations to landfills. Typically includes operation in landfills, over rough, uneven surfaces. Road usage: any combination, which includes some Class B. * A clog resistant radiator is recommended for operation in environments where high dust levels are found. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for refuse haulers should be: CLASS A 0-99% ; CLASS B 1-100% ; CLASS C 0-99% ; CLASS D 0-5% | \$0 | 0# |
| 0093095 | Refuse packer: Vehicles which pick up refuse or recycled material from curbside containers in residential areas. Operation typically includes very frequent stops & starts. Unloading can be at transfer station or at landfill. Road usage: some Class B required, with maximum of 5% Class D. * A clog resistant radiator is recommended for operation in environments where high dust levels are found. * AD-IS Extended Purge air dryer is required with Refuse Packer intended service or Refuse Loader/Packer body type. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * Intended service of refuse packer requires use of a 30.4 CFM air compressor, or 8205021 Large flip valve and piping to apply front and rear service brakes. * Refuse loader/packer body type is only for use with refuse packer intended service. * The road use profile for refuse packer service should be: CLASS A 0-50% ; CLASS B 1-100% ; CLASS C 0-99% ; CLASS D 0-5% * The T270 is not well suited in applications of logger, mixer, mining hauler, heavy equipment transport, refuse packer, fire truck, or crane/cherry picker. mining hauler and heavy equipment transport. See TE1482. | \$0 | 0# |
| 0093105 | Oil field well servicing: Vehicles which carry well servicing equipment, e.g., pumpers, blenders, cementers, data loggers, etc. Typically involve considerable hours of stationary operation, but low mileage. Typically operate on prepared (although often unpaved) roadways. Road usage: any combination, w/minimum 5% Class C. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for oil field well service should be: CLASS A 0-80% ; CLASS B 0-95% ; CLASS C 5-100% ; CLASS D 0-95% * This vocation presents a high likelihood that the vehicle will include some stationary operation. This service type will be reviewed by engineering to determine cooling requirements. | \$0 | 0# |
| 0093111 | Wrecker service: Vehicles w/ recovery bodies used for recovering & towing stranded vehicles & equipment. Road usage: minimum 5% Class B & maximum 10% Class D. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for use with wrecker service should be: CLASS A 0-95% ; CLASS B 5-100% ; CLASS C 0-95% ; CLASS D 0-10% * To assist engineering communicate the wrecker body manufacturers frame RBM requirements using narrative lines on the DTPO. | \$0 | 0# |

T370: REQUIRED INFORMATION

| Option | Description | Price | Weight |
|-------------------------|---|-------|--------|
| Intended Service | | | |
| 0093121 | <p>Fire truck service: Vehicles used in fighting fires. Typically have pumps, etc., mounted in the body. Road usage: minimum 5% Class B & maximum 5% Class D.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* NFPA compliance 1901 kit is required with Fire service.</p> <p>* PACCAR requires a fire rated engine for use in fire service.</p> <p>* The road use profile for fire or EMT service should be: CLASS A 0-80% ; CLASS B 5-100% ; CLASS C 0-95% ; CLASS D 0-10%</p> <p>* The T270 is not well suited in applications of logger, mixer, mining hauler, heavy equipment transport, refuse packer, fire truck, or crane/cherry picker. mining hauler and heavy equipment transport. See TE1482.</p> <p>* With fire truck service an ember separator may be required to meet local or NFPA compliance.</p> | \$0 | 0# |
| 0093122 | <p>EMT/rescue service: Vehicles used responding to emergencies & rescue operations. Typically configured for rapid response, & carry medical & other rescue equipment. Road usage: minimum 5% Class B & maximum 5% Class D.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* The road use profile for fire or EMT service should be: CLASS A 0-80% ; CLASS B 5-100% ; CLASS C 0-95% ; CLASS D 0-10%</p> | \$0 | 0# |
| 0093125 | <p>Crane/cherry picker: Vehicles equipped w/ cranes, man-lifts, hoists, cherry-pickers, bridge inspection units, etc. Road usage: any combination, w/minimum 5% Class B.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* The road use profile for crane/cherry picker service should be: CLASS A 0-95% ; CLASS B 5-100% ; CLASS C 0-80% ; CLASS D 0-80%</p> <p>* The T270 is not well suited in applications of logger, mixer, mining hauler, heavy equipment transport, refuse packer, fire truck, or crane/cherry picker. mining hauler and heavy equipment transport. See TE1482.</p> | \$0 | 0# |
| 0093130 | <p>Construction: Vehicles used in the construction industry, other than those listed above. Use typically involves operating on the jobsite, to pick up or deliver construction materials, or to position the vehicle for its intended use at the construction site. Includes such activities as delivery of precast concrete, concrete pumpers, flatbeds or roll-offs for delivery of construction materials or equipment, etc. Typically includes some operation off of paved roads. Road usage: any combination, which includes some Class C.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* The road use profile for construction service should be: CLASS A 0-97% ; CLASS B 0-99% ; CLASS C 1-100% ; CLASS D 0-99%</p> | \$0 | 0# |
| 0093135 | <p>Agriculture: Vehicles used in the agriculture industry, other than those listed above. Use typically involves transportation of agricultural & dairy products to/from/on/around farm sites, & includes operation off of improved surfaces while on the farm. Includes applications such as milk tankers for farm pickup, feed trucks, grain haulers which load in the field, etc. Can be trucks or tractors. Road usage: any combination, which includes both Class C & D.</p> <p>* A clog resistant radiator is recommended for operation in environments where high dust levels are found.</p> <p>* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.</p> <p>* The road use profile for chassis in agriculture service should be: CLASS A 0-95% ; CLASS B 0-98% ; CLASS C 1-95% ; CLASS D 1-95%</p> | \$0 | 0# |

T370: ENGINE EQUIPMENT

| Option | Description | Price | Weight |
|---------------------------------------|---|---------|--------|
| Heating & Starting Aids | | | |
| Block Heater | | | |
| 1504006 | Block heater, PACCAR 1750 watt 120V for PX-6 and PX-7, 1000 watt for PX-8 and PX-9 or ISL9 engines . * Engine block heater for Medium-Duty PACCAR engines. 120 volt /750 watt heater on PX-7 and 120 volt /1000 watt heater on PX-9. Not available on the T170. | \$115 | 2# |
| Oil Pan Heater | | | |
| 1506055 | Engine oil pan heater 120V 300W w/plug under door on C500, T660, T800 & W900. | \$72 | 0# |
| In-tank Fuel Heater | | | |
| 1509058 | Fuel tank heater: single Arctic Fox w/thermostat. | \$437 | 6# |
| Heater Accessories | | | |
| 1500035 | Engine block heater plug mounted LH fender bracket. * The combination of the narrow under cab battery box (6404411) and an engine block heater requires the engine block heater receptacle to be mounted to the left hand fender (1500035). | \$23 | 0# |
| Governors & Controls | | | |
| 1405074 | Ambient temperature sensor for idle shutdown for use with Cummins ISM, ISX12, X15, and PACCAR PX engines. | \$0 | 0# |
| Engine Equipment Miscellaneous | | | |
| 1000170 | Enable engine regeneration in PTO mode Cummins | \$0 | 0# |
| 1000306 | T300: 4x2 truck w/hydraulic brakes. * Hydraulic braked chassis utilize preformed steel brake lines are limited in wheelbase options to 153, 162, 176, 188, 206, 218, 236, 245, 254, 260 or 272 inches. * No PTOs from the factory are available with hydraulic brakes. | \$0 | 0# |
| 1000307 | Accessory air system T300 4 x 2 hydraulic brakes. Includes an air system pressure gauge. * An accessory air system along with an air dryer are required when an air rear suspension is used on hydraulic braked chassis. * For use with hydraulic brakes only. * This option provides an air system to run air controlled options such as air horns or air seats on hydraulic brakes vehicles. Accessory air is not for use on the T170. * When optional air accessory system is specified an air compressor is required. | \$1,586 | 0# |
| 1600713 | Oil pressure sender for pump panel gauge VDO 360-009. | \$54 | 0# |
| 1900082 | Multi-function engine connector for body builder interface for Cummins. * Remote throttle is applicable to full trucks, not tractors. Requires a multi-function engine connector. | \$44 | 0# |
| 1900976 | Body Builder Control Harness coiled EOF for customer installed remote throttle and remote PTO controls. Harness includes Remote PTO control and Remote Throttle controls. T680/T880 models do not require 12-way engine connector sales codes. All other models require (1900082 or 1900084). * Remote throttle can be used with an Allison transmission only when auto neutral functionality or a split shaft PTO are specified. * This option is not available on the T170 model. | \$74 | 2# |

T370: ENGINE EQUIPMENT

| Option | Description | Price | Weight |
|---------------------------------------|--|---------|--------|
| Engine Equipment Miscellaneous | | | |
| 1901008 | Body Builder Connector 500mm Back of Cab Requires 1900082 * Body builder connector code 1901008 is only available with Allison transmissions. * This body builder connector requires 1900082. | \$237 | 0# |
| 1901084 | Body Builder Battery Power Prewire | \$84 | 2# |
| Retarders | | | |
| 1700149 | Retarder Jacobs for PX-8/9 ISL w/ 3-way switch.. Replaces the standard turbo brake for PX-8 engines. * The PX-9 engines are standard with an exhaust brake. When the optional PX-9 compression brake is selected the exhaust brake is removed from the turbo. * This compression brake is available for the PACCAR PX-9 engine. The engine brakes requires an accessory air system when specified on hydraulic braked chassis. | \$2,233 | 57# |
| 1700364 | Pacbrake for Cummins ISC. Export engines only. * Optional engine brake for use with ISC export engines only. Requires accessory air on hydraulic braked chassis. | \$1,109 | 15# |
| Starting & Recharging | | | |
| Alternator | | | |
| 1812162 | Alternator: 160 amp brushless with battery voltage sense. *This code replaced 1812160. | \$284 | 9# |
| 1812451 | Alternator: Delco 40SI 320 amp Brushless with battery voltage sense | \$1,153 | 14# |
| 1816160 | Alternator: 160 amp brush type T3 | \$17 | 0# |
| 1816200 | Alternator: Bosch 200 amp, brush type | \$212 | 0# |
| 1816260 | Alternator: PACCAR 160 amp, brush type | STD | 0# |
| Battery | | | |
| 1821210 | Batteries: 3 PACCAR GP31 threaded post (700-730) 2100-2190 CCA dual purpose. | \$186 | 57# |
| 1821215 | Batteries: 4 PACCAR GP31 threaded post (700-730) 2800-2920 CCA dual purpose. * Selection of four batteries requires either the standard T3 left-hand under cab battery box or the BOC cantilever battery box. | \$440 | 114# |
| 1821220 | Batteries: 2 PACCAR GP31 threaded post (700-730) 1400-1460 CCA dual purpose. * The use of two batteries only in cold weather climates may result in insufficient starting power for some truck applications over time. Consider selecting three batteries. | STD | 0# |
| 1821225 | Batteries: 2 PACCAR GP31 threaded post (1000) 2000 CCA starting. * The use of two batteries only in cold weather climates may result in insufficient starting power for some truck applications over time. Consider selecting three batteries. * This option is not available on the T170 model. | \$2 | 4# |
| 1825006 | Batteries: 4 Odyssey GP 31 AGM threaded post (1150) 4600 CCA * Selection of four batteries requires either the standard T3 left-hand under cab battery box or the BOC cantilever battery box. | \$1,483 | 188# |

| Starting & Recharging | | | |
| Battery | | | |
| 1825612 | Batteries: 2 Optima 31A Threaded post (900) 1800 CCA. * Optima batteries are required with in-cab battery box when AGM style is not specified. They are not available for other configurations. * The use of two batteries only in cold weather climates may result in insufficient starting power for some truck applications over time. Consider selecting three batteries. | \$595 | 6# |
| 1825623 | Batteries: 3 Optima 31A Threaded post (900) 2700 CCA. * Optima batteries are required with in-cab battery box. They are not available for other configurations. | \$1,034 | 66# |
| Battery Equipment | | | |
| 1840005 | Battery disconnect switches 2, mounted on battery box. * Not available with standard air dryer location back of battery box. * Only available with the standard left hand under cab battery box (6404406) or back of cab cantilever battery box (6400636). | \$335 | 2# |
| 1840006 | Battery disconnect switches 2, mounted in cab Requires battery box LH under. * Battery disconnect switches located on the driver's side cab floor require that the battery box be located LH under the cab due to proximity. The temporary across rails installation is also acceptable on class 7. * Battery disconnect switches on the cab floor are available only with an under cab battery box on the LH rail. | \$398 | 0# |
| 1840066 | Cab Power Cutoff SW on Cab Floor NFPA Compliant - Engine Shut off | \$195 | 2# |
| 1900996 | Jump start terminals under hood. | \$188 | 0# |
| 1901005 | Jump start terminals frame mounted BOC below top of frame flange. * This option is not available on the T170 model. | \$205 | 0# |
| Starter | | | |
| 1836100 | Starter: PACCAR 12 volt electrical system. W/ centralized power distribution incorporating plug-in style relays. Circuit protection for serviceability, 12-volt light system w/circuit protection circuits number & color coded. | STD | 0# |

T370: TRANSMISSIONS

| 2010831 | Transmission: Allison 2500HS 6-speed w/o PTO drive gear. 5th Gen controls. Includes heat exchanger. Highway Service only as defined by Allison. Transynd transmission fluid is standard on all Allison 1000, 2000, 3000 & 4000 series transmissions. | \$6,208 | 0# |
| 2010852 | Transmission: Allison 2100RDS 6-speed w/PTO drive gear. 5th Gen Controls. Includes heat exchanger. Rugged Duty Series for vocational applications. Transynd transmission fluid is standard on all Allison 1000, 2000, 3000 & 4000 series transmissions. | \$6,451 | 0# |
| 2010860 | Transmission: Allison 2500RDS 6-speed w/PTO drive gear. 5th Gen controls. Includes heat exchanger. Rugged Duty Series for vocational applications. Transynd transmission fluid is standard on all Allison 1000, 2000, 3000 & 4000 series transmissions. | \$6,577 | 0# |
| 2011194 | Transmission: Allison 3000HS 6-speed w/o PTO drive gear. 5th Gen controls. Includes heat exchanger & oil level sensor. Highway Service only as defined by Allison. Transynd transmission fluid is standard on all Allison 1000, 2000, 3000 & 4000 series transmissions. * Allison 3000 series transmissions used in off-road conditions require wheel slip which cannot be met with a rear axle ratio faster [numerically lower] than 5.91. * Allison 3000HS transmissions are for use in linehaul, pick-up and delivery, or regional haul services only. For other applications including those that may require a provision for a PTO consider the 3000RDS. * Allison 6-speed transmissions used on hydraulic braked vehicles with wheelbases in excess of 205 inches require a two centerbearing driveline configuration. * In some instances when a 6-speed Allison transmission is specified an upgraded driveline is required. Contact Application Engineering to verify which driveline is required for specific chassis. * PTO controls cannot be used with Allison transmissions that do not include PTO provisions, and a PTO cannot be added later without replacing the transmission. * This transmission is not available for use in fire or EMT/rescue service. | \$10,885 | 244# |
| 2011205 | Transmission: Allison 3000RDS 6-speed w/PTO drive gear. 5th Gen controls. Includes heat exchanger & oil level sensor. Rugged Duty Series for vocational applications. Transynd transmission fluid is standard on all Allison 1000, 2000, 3000 & 4000 series transmissions. Requires a push button shift control code. Oil temperature gauge is standard on class 8 models. * Allison 3000 series transmissions used in off-road conditions require wheel slip which cannot be met with a rear axle ratio faster [numerically lower] than 5.91. * Allison 6-speed transmissions used on hydraulic braked vehicles with wheelbases in excess of 205 inches require a two centerbearing driveline configuration. * In some instances when a 6-speed Allison transmission is specified an upgraded driveline is required. Contact Application Engineering to verify which driveline is required for specific chassis. * The right hand mounted 10 bolt PTO position is obscured by DPF pipe routing with the PX-7 engine. * This transmission is not available for use in fire or EMT/rescue service. | \$12,289 | 291# |

| 2429065 | PTO interlock for parking brakes. | \$121 | 2# |

T370: TRANSMISSIONS

| Option | Description | Price | Weight |
|----------------------|---|----------|--------|
| Transfer Case | | | |
| 2322238 | FABCO TC-237 2-Speed Transfer Case W/O PTO, W/O Neutral (873-1144-004). *Use with SPL140 Main Driveline. * Fabco Applications Approval required for all Transfer Case PTO Installations * Fabco transfer cases are limited to a maximum road speed of 72 MPH. * T3 with FABCO TC 237 is not available with Allison 6-speed transmissions (2010823 or 2010852) due to overspeed concerns, heat (no pump for a cooler) durability, driveline torsionals, vibration, ride complaints warranty, etc. * This transfer case is not available with 9 and 10 speed manual transmissions due to torque capacity. * Transfer case is required and only available with front drive axles. Includes two switches, one for front axle engage and the other to toggle between high and low gear operation. Includes a tell tale that denotes axle engage state which occupies one gauge spot. Warning message in Kenworth Driver Information Center will alert the operator when vehicle is traveling faster than 25 mph with the front axle engaged. * Transfer case occupies inside frame space from 36 - 52 inches behind the back of cab plane. | \$17,117 | 503# |
| 2322239 | FABCO TC-237 2-Speed Transfer Case W/O PTO, W/O Neutral (873-2144-004) *Use with SPL170 Main Driveline. * Fabco Applications Approval required for all Transfer Case PTO Installations * Fabco transfer cases are limited to a maximum road speed of 72 MPH. * T3 with FABCO TC 237 is not available with Allison 6-speed transmissions (2010823 or 2010852) due to overspeed concerns, heat (no pump for a cooler) durability, driveline torsionals, vibration, ride complaints warranty, etc. * This transfer case is not available with 9 and 10 speed manual transmissions due to torque capacity. * Transfer case is required and only available with front drive axles. Split-Shaft PTO

| | | | |
|---------|--|-----|----|
| 2410073 | Customer-installed split shaft PTO Informational only, nothing additional is provided. | \$0 | 0# |
| | * Not for use with a front drive axle. | | |
| | * Only to be used with Allison transmissions, this code indicates that an aftermarket split-shaft PTO will be installed. | | |

Clutch

Manually Adjusting

| | | | |
|---------|---|-------|-----|
| 2240001 | Clutch: ceramic to 605 lb-ft 14 in. Fuller. Includes manual adjusting clutch cover, extended grease fitting for clutch bearing and cross shaft, and synthetic lubricant for the transmission. | STD | 0# |
| | * Fuller 14 inch ceramic clutch for use when engine torque doesn't exceed 605 ft lbs. | | |
| 2240012 | Clutch: ceramic low inertia 606 to 860 lb-ft 14 in. Fuller required for export. Includes manual adjusting clutch cover, extended grease fitting for clutch bearing and cross shaft, and synthetic lubricant for the transmission. | \$129 | 30# |
| | * Fuller 14 inch manual adjustment clutch for use when engine torque is in the range of 606 - 860 ft lbs. | | |
| 2240035 | Clutch: Eaton Fuller 14in. medium-duty manual adjustment 606-1000. Includes manual adjusting clutch cover, extended grease fitting for clutch bearing and cross shaft, and synthetic lubricant for the transmission. | \$255 | 0# |
| | * This clutch is for use with engine torque 606 - 1000 lbs.. | | |
| 2240113 | Clutch: Eaton 14 in. Ceramic, Easy Pedal, Manual Adjust, *Use with 1250 LB-FT Engines Only. | \$105 | 0# |
| 2250385 | Clutch:UltraShift Plus Or Fuller Advantage Series Automated transmissions. | \$0 | 0# |

Solo

| | | | |
|---------|--|-------|-----|
| 2240023 | Clutch: Fuller 14 in. solo severe 606 to 860 lb-ft. For severe service. Includes adjustment free clutch cover, extended grease fitting for clutch bearing and cross shaft, and synthetic lubricant for the transmission. | \$392 | 30# |
| | * This clutch is limited to engine torque range of 620 - 860 ft lbs. | | |
| 2240040 | Clutch: Fuller 14 in. MD solo 606-1050 lb-ft. Includes adjustment free clutch cover, extended grease fitting for clutch bearing and cross shaft, and synthetic lubricant for the transmission. | \$359 | 30# |

Miscellaneous

| | | | |
|---------|---|-----|----|
| 2410018 | Torque converter included w/Allison Transmission. | \$0 | 0# |
| | * Allison transmissions require a torque converter, not a clutch. | | |

PTO

| | | | |
|---------|--|------|----|
| 2429358 | Rear transmission support springs for transmission PTO applications are required to ensure that engine flywheel housings are not overloaded when transmission PTO's are installed. | \$75 | 0# |
| | * Transmission support spring required with Allison 3000/3500-series transmissions with PTO provisions. | | |

Driveline

| | | | |
|---------|--|-------|-----|
| 2401205 | Driveline:1 Dana standard-duty; no centerbearing. *Standard duty is 1710 series. | STD | 0# |
| 2401405 | Driveline: 2 Dana standard-duty; 1 centerbearing. *Standard duty is 1710 series. | \$707 | 77# |
| | * Allison 2000 series transmissions require 1710 series drivelines with the S21/23/26-172 or S21/23/26-190 series rear axles when a non-driving front axle is specified. | | |

T370: TRANSMISSIONS

T370: FRONT AXLE

| Option | Description | Price | Weight |
|------------------------|--|---------|--------|
| Front Axles | | | |
| 10K & Under | | | |
| 2501010 | Dana Spicer E-1002IL Front Axle rated 10K 3-1/2in. drop. Use w/ air brakes only. * 10K air braked Dana E-1002IL front axles are available with 15 x 4 inch or 16.5 x 5 inch front brakes or air disc brakes. * 10K air braked front axle with 16,000 lb or 17,000 lb rear axles requires 15x4 inch front brakes. * 10K air braked front axle with 16,000 lb or 17,000 lb rear axles requires 15x4 inch front brakes. * Dana 10k light weight beam axles are not available with tires that have SLR greater than 19.5 inches. * Dana E-1002IL and D-1001IL front axles are only for use on full trucks. * Front axles less than 16K are not available with 385 front tires except for front drive axles. * Not available with air disc brakes. Use the equivalent Dana D-1xxx series axle instead. | \$204 | -52# |
| 2501011 | Dana Spicer E-1002IL Front Axle rated 10K 3-1/2in. drop, hydraulic brakes. * Dana 10k light weight beam axles are not available with tires that have SLR greater than 19.5 inches. * Front axles less than 16K are not available with 385 front tires except for front drive axles. * Hydraulic brake front axles do not require slack adjusters, no sales code is required. * Hydraulic braked Dana Spicer E-1002IL or E-1202IL front axles are available with 2 x 73 mm front brakes rated to 12K. * The E-1002IL or E-1202IL front axles are for use with a 12k power steering gear with 2010 engines. * This front axle has the brake code included with the hub package. | \$1,455 | -24# |
| 2501012 | Dana Spicer D-1002IL Front Axle Rated 10K 3.5" drop. Use With Air Disc Brakes Only * Dana 10k light weight beam axles are not available with tires that have SLR greater than 19.5 inches. * Dana D-series steer axles with integral ADB knuckle are only available with air disc brakes. See equivalent E-1xxx series axles for use with drum brakes. * Dana E-1002IL and D-1001IL front axles are only for use on full trucks. | \$201 | -16# |
| 12K to 13.2K | | | |
| 2502012 | Dana Spicer D-1201IL Front Axle rated 12K 3-1/2in. drop. Use with Air Disc Brakes Only. * Dana D-series steer axles with integral ADB knuckle are only available with air disc brakes. See equivalent E-1xxx series axles for use with drum brakes. | \$120 | -36# |
| 2502016 | Dana Spicer D-1301IL Front Axle rated 13K 3.5" drop. Use With Air Disc Brakes Only. * Dana D-series steer axles with integral ADB knuckle are only available with air disc brakes. See equivalent E-1xxx series axles for use with drum brakes. * Front axles with capacity of 13.2K or greater require 10-5/8 or 10-3/4 inch frame rail material. * Requires bolted rear cab support crossmember. s/c 6490430. * Requires the 13.2k or 14.6k air braked hub package. * Review frame rake with Division Applications Engineering for this suspension when used with Fire truck service and front end ratings (non-FDA) of 13K or greater. | \$232 | -36# |
| 2502230 | Dana Spicer E-1202IL Front Axle rated 12K 3-1/2in. drop. Use W/Air Brakes Only. Medium Duty Only. * Air Braked Dana E-1202IL front axles are available with 15 x 4 inch or 16.5 x 5 inch front brakes or air disc brakes * Dana 10k light weight beam axles are not available with tires that have SLR greater than 19.5 inches. * Front axles less than 16K are not available with 385 front tires except for front drive axles. * Not available with air disc brakes. Use the equivalent Dana D-1xxx series axle instead. | \$125 | 0# |

Tandem Axle Outer End Equipment

Spring Brake & Service Chambers

Dual

| | | | |
|----------------|--|-------|-----|
| 3485208 | Spring Brake: 3036 dual 30 square inches; 36 square inches spring chamber. * Hendrickson HAS402 is incompatible with the DSP40 rear axle or with 3036 spring brake chambers. * Not for use with rear air disc brakes * Spring brake chambers for tandem rear axle installations. * The minimum spring brake size for use on tandem rear axle chassis specified in fire service is 3036 sq inch. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use long stroke brake chambers instead. | \$161 | 16# |
| 3485209 | Spring Brake: 3030 high output dual. * Not for use with rear air disc brakes * Spring brake chambers for tandem rear axle installations. * These brake chambers are not available for use in fire service. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use long stroke brake chambers instead. | \$0 | 0# |

Differential Lock & Crosslock

| | | | |
|----------------|--|---------|-----|
| 3511400 | Driver Controlled Differential Lock (Crosslock) for Meritor Axles 40K to 52K forward rear axle. Under Speed Interlock is standard on T680. | \$1,011 | 20# |
| 3511410 | Driver Controlled Differential Lock (Crosslock) for Meritor Axles 40K to 58K rear rear axle. Under Speed Interlock is standard on T680. | \$995 | 20# |
| 3511420 | Driver Controlled Differential Lock (Crosslock) for Meritor Axles 40K to 52K forward rear & rear rear axle. Under Speed Interlock is standard on T680. | \$1,891 | 0# |
| 3511500 | Driver Controlled Differential Lock (Crosslock) for Paccar Axles 40K rated, forward rear axle, with cab control. | \$1,005 | 19# |
| 3532125 | Wheel Differential Lock for Dana Spicer axles DSP40/DSP41(P)/DSH40(P)/DSH44(P)/D40-155 rear rear axle. Under Speed Interlock is standard on T680. | \$1,029 | 15# |
| 3532130 | Wheel Differential Lock for Dana Spicer axles DSP40/DSP41(P)/DSH40(P)/DSH44(P)/D40-155 forward rear axle & rear rear. Under Speed Interlock is standard on T680. | \$1,928 | 37# |

Miscellaneous

| | | | |
|----------------|---|-------|-----|
| 3490902 | Rear air disc brake dustshields for tandem axles; includes pads and rotor shields. * Only for use with tandem axle rear air disc brakes. | \$593 | 12# |
|----------------|---|-------|-----|

Anti-Lock Brake System

4-Channel

| | | | |
|----------------|---|---------|----|
| 3495013 | Meritor WABCO 4S/4M anti-lock brake system. T300: w/ hydraulic brakes only. K300 all configurations. * For use with hydraulic brakes only. | \$1,168 | 0# |
| 3495226 | Bendix 4S/4M anti-lock brake system. * This anti-lock brake system is not available for use on hydraulic braked chassis. | STD | 0# |

| Option | Description | Price | Weight |
|-------------------------------|---|---------|--------|
| Anti-Lock Brake System | | | |
| 4-Channel | | | |
| 3495228 | Bendix 4S/4M anti-lock brake system w/ air traction control (ATC). | \$534 | 2# |
| | * This anti-lock brake system is not available for use on hydraulic braked chassis. | | |
| 3495229 | Bendix 4S/4M anti-lock brake system w/ air traction control (ATC) & electronic stability program (ESP) for tractor. | \$2,454 | 11# |
| | * 4S/4M ABS with ESP is available with tractors or single rear axle full trucks. * Bendix 4S/4M anti-lock brake system with Electronic Stability Program (ESP) is available for use with tractors and single rear axle full trucks. * Electronic Stability Control (ESC) is required on all US and Canadian tractors (with EPA2010+ engines) with a gross vehicle weight rating greater than 26k, an assigned front axle rating of 14.6k or less, and tandem rear drive axles with an assigned rear axle rating of 45k or less. This requirement does not apply to chassis with factory-installed lift axles. * ESP is restricted based on the following specifications: - Model - Vocation - Towing Connections - Drive Configuration - Wheelbase - Front Axle - Front Axle GAWR - Front Suspension - Steering Gear - Front Brakes - Rear Axle(s) GAWR - Rear Suspension - Rear Brakes - Auxiliary Axle(s) See Truck Sales/Applications Guidelines on DealerNet for ESP restrictions. * T3 with ESP air brakes requires the bolted rear cab support crossmember and 10-5/8" or 10-3/4" frame rails. | | |
| 3495233 | Bendix 4S/4M anti-lock brake system w/ air traction control (ATC) and electronic stability program (ESP) for full truck. Must code for additional body information. | \$2,787 | 0# |

T370: REAR SUSPENSION

| Option | Description | Price | Weight |
|------------------------|---|---------|--------|
| Single | | | |
| 31K & Under | | | |
| 3622215 | Rear suspension: single Hendrickson HAS210L 21K. Welded steel crossmember and gussets w/shocks at 8.3 in. laden height, 8.5 in. unladen height. Medium-duty. Includes air suspension dump valve. Not rear air disc brake compatible. * A heavy-duty rear suspension crossmember is required for use with front axle 13K or greater, a frame insert, or 10-3/4 inch rail. Add sales code 3832313. * Beam or spring rear suspensions are typically used with an asphalt spreader. * Engineering review and/or vendor approval will be required for Hendrickson air suspensions used as fire trucks. * Hendrickson HAS suspensions are not available with refuse packer applications. * Hendrickson HAS210L rear suspension requires use of accessory air system if hydraulic brakes are specified. Hendrickson air suspensions cannot be used in fire service. Not available with logger, mixer roll-off, concrete pump, oil field rig-up, oil well service, drilling derrick, or crane/boom operation. * Not compatible with rear air disc brakes. * Not compatible with rear air disc brakes. * With 385 front tires this suspension requires 24.5" rear tires for proper frame rake. | \$1,181 | -121# |
| 3622218 | Rear suspension: single Hendrickson HAS210 21K. Steel crossmember and gussets w/shocks at 8.8 in. height. Medium-duty for use with air disc brakes only. Engine < 1351 Lb Ft. Includes air suspension dump valve. * Available on T370 only. * Hendrickson HAS suspensions are not available with refuse packer applications. * Not available with Dana S14-110 rear axle. * With 385 front tires this suspension requires 24.5" rear tires for proper frame rake. | \$1,600 | -111# |
| 3626430 | Rear suspension: single Reyco 79KB multileaf 20K. Medium duty FDA only. Without helper spring. Unladen height: 16.5 in. Laden height: 14.7 in. Not rear air disc brake compatible. * Bolted rear suspension crossmember for use with Reyco 79KB rear suspensions when a frame insert or front drive axle is specified. * Not compatible with rear air disc brakes. * Rear suspension equipment for use on Reyco 79KB rear suspensions. Not available with 30K or greater rear axles or with front drive axles. * Requires a minimum wheelbase of 180 inches when used with a PACCAR PX-9 or Cummins ISC engine. * Requires a minimum wheelbase of 190 inches when used with a PX-7 engine. * Reyco 79KB with front drive axle and PX-7 engine has a minimum wheelbase of 190 inches. * This rear suspension for use with a single rear drive axle. * This rear suspension is for use with a single drive axle only. Not available with body types of fire pumper or tank. * This suspension is required with and for use with a front drive axle only. | \$854 | 90# |

T370: REAR SUSPENSION

| Option | Description | Price | Weight |
|------------------------|---|-------|--------|
| Single | | | |
| 31K & Under | | | |
| 3626431 | Rear suspension: single Reyco 79KB multileaf 21K. Medium duty FDA only. Without helper spring. Unladen height: 16.5 in. Laden height: 14.6 in. Not rear air disc brake compatible. * Bolted rear suspension crossmember for use with Reyco 79KB rear suspensions when a frame insert or front drive axle is specified. * Not compatible with rear air disc brakes. * Rear suspension equipment for use on Reyco 79KB rear suspensions. Not available with 30K or greater rear axles or with front drive axles. * Requires a minimum wheelbase of 180 inches when used with a PACCAR PX-9 or Cummins ISC engine. * Requires a minimum wheelbase of 190 inches when used with a PX-7 engine. * Reyco 79KB with front drive axle and PX-7 engine has a minimum wheelbase of 190 inches. * This rear suspension for use with a single rear drive axle. * This rear suspension is for use with a single drive axle only. Not available with body types of fire pumper or tank. * This suspension is required with and for use with a front drive axle only. | \$854 | 90# |
| 3626479 | Rear suspension: single Reyco 79KB taperleaf 20K. Medium-duty. Unladen Height: 9 in. Laden Height: 7.6 in. Not rear air disc brake compatible. * A bolted rear suspension crossmember is required with Reyco 79kb rear suspensions and front axle 13K or greater, a frame insert, 10-3/4 inch rails, or front drive axle. * If the vehicle will be a fire truck Reyco rear suspensions rated under 26K are not available. * Not available with 385 front tires. * Not compatible with rear air disc brakes. * Reyco recommends stabilizer bars for the 79KB rear suspension when the vehicle will be used as a refuse packer. | STD | 0# |
| 3626482 | Rear suspension: single Reyco 79KB taperleaf 20K. Medium-duty. For use with rear air disc brakes. Unladen Height: 9.3 in. Laden Height: 7.9 in. * Available with T370 only * Bolted rear suspension crossmember for use with Reyco 79KB rear suspensions when a frame insert or front drive axle is specified. * If the vehicle will be a fire truck Reyco rear suspensions rated under 26K are not available. * Not available with 385 front tires. * Not available with S14-110 or s14-130 (any dana rear axles with wall thickness less than 0.38in (9.5mm)) * Only available with rear air disc brakes. * Review frame rake with Division Applications Engineering for this suspension when used with Fire truck service and front end ratings (non-FDA) of 13K or greater. * Reyco recommends stabilizer bars for the 79KB rear suspension when the vehicle will be used as a refuse packer. | \$560 | 17# |

T370: REAR SUSPENSION

| Option | Description | Price | Weight |
|------------------------|---|---------|--------|
| Single | | | |
| 31K & Under | | | |
| 3626490 | Rear suspension: single Reyco 79KB taperleaf 21K. Medium-duty. Unladen Height: 11.4 in. Laden Height: 9.8 in. Not available with rear air disc brakes. * A bolted rear suspension crossmember is required with Reyco 79kb rear suspensions and front axle 13K or greater, a frame insert, 10-3/4 inch rails, or front drive axle. * If the vehicle will be a fire truck Reyco rear suspensions rated under 26K are not available. * Not compatible with rear air disc brakes. * Reyco 79KB rear suspension is for use with a single rear drive axle. * Reyco recommends stabilizer bars for the 79KB rear suspension when the vehicle will be used as a refuse packer. | \$0 | 0# |
| 3630021 | Rear suspension: single Kenworth Airglide 210L 21K. 6.5 in. ride height w/single leveling valve. Includes air suspension dump valve. * Available for use on trucks with body types of beverage, flatbed, or van. For tractors a trailer type of van or flatbed is allowed. Some additional body types are subject to engineering review. For complete definition of approved body/trailer types and intended services, please see Application Guidelines on DealerNet. * Cannot be used in any class D road service when specified for a Medium-Duty chassis. * Frame reinforcement is required with 9-7/8 rail and AG210 together. * GCW limit of 60,000 lbs. maximum. * Meritor RS23, RS26, and RS30 rear axles are not for use with AG210L. * Not available with 385 front tires. * Not compatible with rear air disc brakes. * S23 and S26 rear axles are not for use with the Kenworth AG210L rear suspension. * This rear suspension cannot be used with greater than 3% class C road service when specified on a Medium-Duty chassis. | \$1,057 | -145# |
| 3632010 | Rear suspension: Single Hendrickson Primaax EX232 23K, 8.5 in. ride height. | \$3,317 | -10# |
| 3632015 | Rear suspension: Single Hendrickson Primaax EX232 23K, 15.5 in. ride height. Not rear air disc brake compatible. * Not compatible with rear air disc brakes. * Recommend to only keep it published for models which have PX9 engine published. Then add restriction in prospector to only allow 130 amp alternator when there is a PX9 engine on the order. * Requires a minimum wheelbase of 180 inches when used with a PACCAR PX-9 or Cummins ISC engine. * Requires a minimum wheelbase of 190 inches when used with a PX-7 engine. * This rear suspension for use with a single rear drive axle. * This suspension is required with and for use with a front drive axle only. | \$4,985 | 243# |

| 40K & Under | | | |
| Hendrickson | | | |
| 3732100 | Rear suspension: Tandem Hendrickson HAS402 40K. 52 in. axle spacing. Steel crossmember & gussets with shocks at 7.9 in. height. Includes air suspension dump valve. Not rear air disc brake compatible. * Beam or spring rear suspensions are typically used with an asphalt spreader. * Engineering review and/or vendor approval will be required for Hendrickson air suspensions used as fire trucks. * Hendrickson HAS suspensions are not available with refuse packer applications. * Hendrickson HAS402 is incompatible with the DSP40 rear axle or with 3036 spring brake chambers. * Not available with 385 front tires. * Not compatible with rear air disc brakes. * Not for use with refuse roll-off, concrete mixer, oil field rig-up, oil well service, crane/boom, concrete pump, or logger vocations. * Tandem Hendrickson beam and Chalmers rear suspensions require an end of frame crossmember with cutoff of 60 inches or less. When cutoff exceeds this length a rear intermediate crossmember will be installed by the factory. * The Hendrickson HAS402 rear suspension is not for use in fire truck application with a body type other than pumper or tank. * This suspension is only for use with tandem axles. | \$4,955 | 449# |
| 3732104 | Rear suspension: Tandem Hendrickson HAS402 40K. 52 in. axle spacing, 8.8 in. ride height. Steel crossmember and gussets. With shocks. Includes air suspension dump valve. For use with rear air disc brakes only. * Hendrickson HAS suspensions are not available with refuse packer applications. * Only available with rear air disc brakes. * With 385 front tires this suspension requires 24.5" rear tires for proper frame rake. | \$5,557 | 489# |
| 3732114 | Rear suspension: Tandem Hendrickson HAS402 40K. 54 in. axle space, 10 in. ride height. Aluminum crossmember and gussets with shocks. Includes air suspension dump valve. Not rear air disc brake compatible. * Engineering review and/or vendor approval will be required for Hendrickson air suspensions used as fire trucks. | \$4,915 | 450# |
| 3737455 | Rear suspension: Tandem Hendrickson RT403 40K. 52 in. axle spacing. 7.19 in. saddle height w/barpin bushing. Unladen Height: 10.7 in. Laden Height: 9.7 in. Advertised axle spacing for this rear suspension is a nominal value. Actual spacing may be up to two inches greater than noted. This is important in situations where the body is likely to be pre-built before the chassis is delivered. Tire to body or bracket to body interference may be encountered. Communicate clear space requirements on the sales order. DSP40/P rear axles are not for use with Hendrickson HAS 402, Hendrickson Primaax, or Hendrickson beam-type rear suspensions. Hendrickson RT403 rear suspension for use with tandem axles up to 46K on T8 series. Hendrickson RT403 rear suspension requires bronze center bushings when used in refuse loader or packer applications. * Not compatible with rear air disc brakes. * RT403 with 6" or 7.19" saddle height and DSP40/41(P) require 45 degree interaxle yokes. * Tandem Hendrickson beam and Chalmers rear suspensions require an end of frame crossmember with cutoff of 60 inches or less. When cutoff exceeds this length a rear intermediate crossmember will be installed by the factory. * This suspension is only for use with tandem axles. | \$5,278 | 957# |

| * Hendrickson Primaax 46K rear suspensions for use with tandem rear axles capacities up to and including 46K. Not available in services of mixer or oil field rig-up. | | | |
| * Hendrickson Primaax rear suspensions are available with tandem rear axle capacities under 52K. | | | |
| 3742970 | Tandem Hendrickson HAULMAAX (HMX) 460 46K. 54 in. axle spacing. With shocks, track rods, rubber bolster bushings and 16.5 in. saddle height. Unladen Height: 10.6 in. Laden Height: 9.5 in. | \$6,121 | 543# |
| * Tandem Hendrickson beam and Chalmers rear suspensions require an end of frame crossmember with cutoff of 60 inches or less. When cutoff exceeds this length a rear intermediate crossmember will be installed by the factory. | | | |
| * The body type of 'other' is not available, the manufacturer requires definition of what the vehicle body will be installed. | | | |
| * The Hendrickson HMX rear suspensions are not for use on tractor chassis. Incompatible with front drive axles. | | | |
| 3747460 | Rear suspension: Tandem Hendrickson RT463 46K. 54 in. axle spacing. Steel beams & barpin bushing. 6 in. saddle height. Unladen Height: 11.1 in. Laden Height: 10 in. | \$5,233 | 1,055# |
| * Tandem Hendrickson beam and Chalmers rear suspensions require an end of frame crossmember with cutoff of 60 inches or less. When cutoff exceeds this length a rear intermediate crossmember will be installed by the factory. | | | |
| * Tandem rear suspension for use with axles rated up to 52K. | | | |

T370: REAR SUSPENSION

| Option | Description | Price | Weight |
|-----------------------------|---|-------|--------|
| Suspension Equipment | | | |
| 3830313 | Bolted rear suspension crossmembers for AG210L. Replaces T3 standard. * * Required with front axles 13K and greater. * Required with frame rail inserts. * Required with 10-3/4 inch frame rail. | \$41 | 0# |
| 3830502 | Delete dash mounted control for air suspension dump valve. Only available with an air suspension. | \$0 | 0# |
| 3830505 | Dual leveling valves for single air suspension. Dual leveling valves on single rear suspensions on only available on Neway ADZ for class 8 or Hendrickson HAS for medium duty. Dual leveling valves will not be approved on any other suspensions on T3. * Only applicable with Hendrickson HAS 21k and 23k rear suspensions. * Requires dual suspension pressure gauges (8221100). | \$153 | 0# |
| 3832001 | Torque rods for 46K PRIMAAX EX using disc brakes. Replacing standard. | \$411 | 23# |
| 3832026 | Chalmers shock absorbers. 52K and under suspension. | \$444 | 35# |
| 3832030 | Bronze center bushings for Hendrickson 403. * Bronze center bushings for Hendrickson RT403 rear suspensions. * The Hendrickson RT403 rear suspension requires bronze center bushings when used in the refuse loader or packer application. | \$169 | 6# |
| 3832033 | Inboard mounted shock absorbers for Hendrickson HAS single or dual. Mounted outboard on forward rear & inboard on rear rear axle. * Inboard mounted shock absorbers are for use on end dumps used to haul and spread asphalt. There is no other application for this option. * This option is for use on Hendrickson air suspensions only. Relocation applies only to the rear axle in a tandem set, forward axle will have the standard outboard mounting. | \$49 | 0# |
| 3832100 | Track rods: heavy duty for Hendrickson PRIMAAX EX single. Replaces standard duty track rods. | \$50 | 12# |
| 3832161 | Double Rebound Strap Kit: Hendrickson HAULMAAX rear suspension. | \$208 | 6# |
| 3832313 | Bolted rear suspension crossmembers for HAS 210/210L or 230/230L. Replaces T3 standard. * * Required with front axles 13K and greater. * Required with frame rail inserts. * Required with 10-3/4 inch frame rail. * A heavy-duty rear suspension crossmember is required for use with front axle 13K or greater, a frame insert, or 10-3/4 inch rail. Add sales code 3832313. * Bolted rear suspension crossmember for use with Hendrickson HAS 210 or 230. | \$191 | 4# |
| 3832315 | Bolted rear suspension crossmembers for RT403 or HAS402. Replaces T3 standard. * * Required with front axles 13K and greater. * Required with frame rail inserts. * Required with 10-3/4 inch frame rail. * Required with front drive axle. * Bolted rear suspension crossmember for use with RT403 or HAS402 rear suspensions. | \$34 | 15# |
| 3832320 | Bolted rear suspension crossmember for PRIMAAX EX single. Replaces T270, T370 standard. | \$0 | 16# |
| 3834100 | Air retention kit for rear suspension for use w/ outriggers. * For use with air suspensions only. | \$147 | 4# |

T370: REAR SUSPENSION

Front & Rear Axle Wheels & Rims

Tubeless Type Steel 22.5

Rear

| | | | |
|---------|---|-------|------|
| 5242367 | Rear Wheel: Accuride 29300 22.5x9 steel Steel Armor[TM] powder coat, hub-pilot mount. 10000lb. maximum rating. 5-hand holes. Not air disc brake compatible. Code is priced per pair of wheels. | \$419 | 79# |
| 5242389 | Rear Wheel: Accuride 51487 22.5x8.25 steel Steel Armor[TM] powder coat, hub-pilot mount. 7400lb. maximum rating. 5-hand hole. Air disc brake compatible. Code is priced per pair of wheels. | STD | 0# |
| 5245283 | Rear Wheel: Kenworth 7-spoke 88u68 22.5x8.25 aluminum with Lvl One [TM] finish, hub-pilot mount. 7300 lb. maximum rating. Air disc brake compatible. Code is priced per pair of wheels. Level 1 finish. | \$411 | -40# |

Tubeless Type Aluminum 24.5

Rear

| | | | |
|---------|--|------|-----|
| 5242310 | Rear Wheel: Accuride 28827 24.5x8.25 steel Steel Armor[TM] powder coat, hub-pilot mount. 8000lb. maximum rating. 2-hand hole. Code is priced per pair of wheels. | \$82 | 35# |
|---------|--|------|-----|

Miscellaneous Tires & Wheels

Wheel Equipment

Wheelguards

| | | | |
|---|-------------------------|-------|----|
| 5850040 | Wheelguards: all axles. | \$103 | 2# |
| * All Accuride EverSteel codes should be accompanied with the Accuride wheel guards (5850040) | | | |

Wheel Treatments

| | | | |
|---|--|-------|----|
| 5853906 | Powder coat white steel wheel. Use in conjunction with front, dual front, rear, spare or lift axle wheel code(s). All wheels on chassis must have same finish color. | \$0 | 0# |
| * All steel wheels must have the same color selection. | | | |
| 5853907 | Powder coat gray steel wheel. Use in conjunction with front, dual front, rear, spare or lift axle wheel code(s). All wheels on chassis must have same finish color. | \$0 | 0# |
| * All steel wheels must have the same color selection. | | | |
| 5853908 | Powder coat blacksteel wheel. Use in conjunction with front, dual front, rear, spare or lift axle wheel code(s). All wheels on chassis must have same finish color. | \$0 | 0# |
| * All steel wheels must have the same color selection. | | | |
| 5853909 | Powder coat red steel wheel. Use in conjunction with front, dual front, rear, spare or lift axle wheel code(s). All wheels on chassis must have same finish color. | \$0 | 0# |
| * All steel wheels must have the same color selection. | | | |
| 5854010 | Single Front Axle: 2 Polished wheels. Polished outboard surface of aluminum wheels. | \$143 | 0# |
| * Wheel treatment for aluminum wheels on the front axle. | | | |
| 5854011 | Single Rear Axle: 2 Polished wheels. Polished outboard surface of outer dual or single aluminum wheels. | \$184 | 0# |
| * Wheel treatment for aluminum wheels on single rear axles. | | | |
| 5854012 | Dual Rear Axle: 4 Polished wheels. Polished outboard surface of outer dual or single aluminum wheels. | \$347 | 0# |
| * Wheel treatment for aluminum wheels on tandem rear axles. | | | |
| 5854045 | Single Front Accuride- Finish: Extra Polish Both Surfaces of Outer Wheels, aluminum Only | \$82 | 0# |
| 5854047 | Single Rear Accuride- Finish: Extra Polish Both Surfaces of Outer Wheels, aluminum quantity 2 | \$20 | 0# |

T370: FRAME & EQUIPMENT

| Option | Description | Price | Weight |
|------------------------------------|---|---------|--------|
| Battery Boxes | | | |
| Parallel | | | |
| 6404411 | Battery box: Narrow steel parallel under cab with aluminum diamond plate cover with step. LH under cab. Battery box is 150 mm narrower than the standard battery box. Use with two or three batteries and small round DEF tank LH under cab. Air tanks will be frame mounted. Air dryer must be frame mounted or under the hood. Use with RH under exhaust. * The combination of the narrow under cab battery box (6404411) and an engine block heater requires the engine block heater receptacle to be mounted to the left hand fender (1500035). | \$258 | -25# |
| Cantilever | | | |
| 6400634 | Battery box cantilever aluminum BOC with smooth aluminum cover. | \$79 | 2# |
| 6400636 | Battery box cantilever aluminum BOC with fiberglass cover. * A battery box across the rails behind the cab or in the cab is only available on the T170 when dual 45 gallon rectangular fuel tanks are located under the cab. * Behind cab battery box cannot be used in combination with horizontal crossover style exhaust systems. * The optional cantilever battery box is available in the LH back of cab position only. | \$23 | 0# |
| 6400641 | Battery box cantilever aluminum BOC with polished smooth aluminum cover. | \$374 | 2# |
| Across or Between Rails BOC | | | |
| 6400631 | Battery box: Temporary across the rails. * Behind cab battery box cannot be used in combination with horizontal crossover style exhaust systems. | \$127 | -99# |
| 6400633 | Battery box: Temporary across the rails. Includes maximum cable length available. | \$165 | -99# |
| In-Cab | | | |
| 6405000 | In-cab steel battery box: under rider seat or in stand alone box. Requires appropriate AGM battery code, which varies by model, and appropriate rider seat code be selected prior to entering the workscreen. Includes 1 battery disconnect switch. * A battery box across the rails behind the cab or in the cab is only available on the T170 when dual 45 gallon rectangular fuel tanks are located under the cab. * Jump start terminals are recommended for use with an in-cab battery box. * The in-cab battery box can be used with either a passenger side battery box style seat or with deletion of the passenger seat. * The in-cab battery box requires Optima batteries, quantities of two or three. | \$1,809 | -41# |
| Battery Box Locations | | | |
| 6409901 | Battery box location: LH Side. | \$0 | 0# |
| 6409902 | Battery box location: RH Side. | \$92 | 15# |
| 6409906 | In-Cab battery box location: Under rider seat. | \$0 | 0# |
| 6409908 | Battery box location: BOC across the rails. * A battery box across the rails behind the cab or in the cab is only available on the T170 when dual 45 gallon rectangular fuel tanks are located under the cab. | \$0 | 0# |

Center Frame Equipment

Frame Access

Grabhandles

| | | | |
|----------------|---|------|----|
| 6410010 | Frame access grabhandle(s) LH mounted. Placement and quantity of grabhandles may vary due to FMCSR frame access requirements. * All orders must have complete frame access if any one of the three components is selected. Step and grab handle on the same side of the vehicle accompanied by deck plate. * Any changes to the rear cab area must comply with FMCSR 399. * Grab handles on the back of the cab or sleeper are for use on tractors only. | \$50 | 0# |
| 6410011 | Frame access grabhandle(s) RH mounted. Placement and quantity of grabhandles may vary due to FMCSR frame access requirements. * All orders must have complete frame access if any one of the three components is selected. Step and grab handle on the same side of the vehicle accompanied by deck plate. * Any changes to the rear cab area must comply with FMCSR 399. * Grab handles on the back of the cab or sleeper are for use on tractors only. | \$49 | 0# |

Deckplate

| | | | |
|----------------|---|-------|-----|
| 6414002 | Short aluminum frame access deck plate, 24 in. unless only 12 in. fits. | \$108 | 10# |
| 6414003 | Medium aluminum frame access deck plate, 36 in. | \$192 | 15# |
| 6414006 | Full aluminum frame access deck plate. Provides up to 72 in. of deck plate filling the space from hoses to fifth wheel. | \$275 | 24# |

Steps

| | | | |
|----------------|---|-------|-----|
| 6417007 | Frame access steps: 2 ladder-type, RH mount. Available when rear of tank extends less than 24 in. behind rear of cab, sleeper, or side extender. * Ladder steps require deck plate or box between the rails which has deck plate attached to the cover to help complete the frame access package. Total package involves a grab handle on any side of the chassis where a frame access step is present. | \$140 | 15# |
| 6417009 | Frame access steps: 2 for fuel/hydraulic tank BOC, RH mount. Available when rear of tank under extends more than 14 in. behind rear of cab, sleeper, or side extender. For tanks located totally behind a cab or sleeper the front of the tank must be within 14 in. from the rear of cab, sleeper, or side extender. * Fuel/Hydraulic frame access steps require deck plates, grab handles and the tanks located back of cab. | \$161 | 6# |
| 6418006 | Frame access steps: 2 ladder-type, LH mount. Available when rear of tank extends less than 24 in. behind rear of cab, sleeper, or side extender. * Ladder steps require deck plate or box between the rails which has deck plate attached to the cover to help complete the frame access package. Total package involves a grab handle on any side of the chassis where a frame access step is present. | \$140 | 15# |
| 6418008 | Frame access steps: 2 for fuel/hydraulic tank BOC, LH mount. Available when rear of tank under extends more than 14 in. behind rear of cab, sleeper, or side extender. For tanks located totally behind a cab or sleeper the front of the tank must be within 14 in. from the rear of cab, sleeper, or side extender. * Fuel/Hydraulic frame access steps require deck plates, grab handles and the tanks located back of cab. | \$161 | 6# |

Box Step Options

| | | | |
|----------------|---|-------|-----|
| 6409715 | Ladder-type step LH under cab below battery box or toolbox. * Left hand under cab battery box requires that a step be added under the box for cab ingress/egress when a front drive axle is specified. | \$195 | 20# |
|----------------|---|-------|-----|

T370: FRAME & EQUIPMENT

| Option | Description | Price | Weight |
|--|---|---------|--------|
| Center Frame Equipment | | | |
| Box Step Options | | | |
| 6409716 | Ladder-type step RH under cab below battery box or toolbox or DPF - SCR. * Right hand under cab battery box, toolbox, or DPF/SCR cab access assembly requires that a step be added under the box for cab ingress/egress when a front drive axle is specified. | \$195 | 20# |
| Toolboxes | | | |
| 6474349 | Steel toolbox: Under cab, aluminum diamond plate cover w/step, w/o lock. * The optional toolbox can be used in the RH under cab position only. * The toolbox will be located in the RH under cab position and cannot be used with exhaust styles that include a DPF/SCR in this location. * There is no option for a toolbox under the cab on a T170. | \$752 | 138# |
| 6474352 | Tool box: Narrow steel parallel under cab with aluminum diamond plate cover with step. RH under cab. Tool box is 150 mm narrower than other parallel under tool boxes. Use with small round DEF tank RH under cab. Use with horizontal exhaust. | \$1,411 | 139# |
| Toolbox Locations | | | |
| 6479902 | Toolbox location: RH side. | \$0 | 0# |
| DPF-SCR Covers | | | |
| 6451059 | T270/370 Non-polished 2010 or later DPF/SCR cover with cab access step assembly, RH under. End plates will be painted standard black frame color. * DPF/SCR under cab assembly for Medium-Duty chassis with 2010 EPA compliant engines. | \$0 | 0# |
| 6451110 | T270/T370 non-polished DPF/SCR cover, diamond plate with cab access step and polished end plates. For use with 2017 or later RH under exhaust systems. For use with frame paint color other than standard black. The cover will be unpolished diamond-plate and the end plates will be polished. * For use with custom frame paint and a right hand under cab DPF/SCR. | \$112 | 0# |
| Frame Crossmembers & Upgrades | | | |
| 6490122 | One-piece welded crossmember assembly with 12mm frame fasteners, center and rear frame. Standard crossmember. * * Not available with front axles 13K and greater * Not available with front drive axles * Not available with frame inserts * Not available with 10-3/4 in frame rails | \$0 | 0# |
| 6490123 | Five-piece bolted crossmember assembly with 12mm frame fasteners, center and rear frame. * Not available on T170 * Required with front axles 13K to 14.6K without frame inserts * Required with front axles up to 14.6K with 10-3/4 in frame rails * Required with front drive axles up to 14K | \$162 | -32# |
| 6490124 | Five-piece bolted crossmember assembly with 16mm frame fasteners, center and rear frame. * * Required with front axles 16K and greater with 10-3/4 in frame rails * Required with front axles 16K and greater with or without frame inserts. * Required with front drive axle at 16K * Not available on T170 | \$167 | -32# |

T370: FRAME & EQUIPMENT

| Option | Description | Price | Weight |
|--|---|-------|--------|
| Frame Crossmembers & Upgrades | | | |
| 6490427 | Aluminum underbell crossmember. Only with non-drive front axle 16K and greater. For T370 only. * Underbell Crossmember 6490427 required with Non-Drive Front Axles 16K and Greater. | \$86 | 19# |
| 6490430 | Bolted Rear Cab Support Crossmember. Replaces T3 standard. * * Required with front axles 13K and greater. * Required with front drive axles. * Required with frame inserts. * Required with 10-3/4" frame rails. * Required with tractors. * Bolted style rear cab support crossmember is not for use with hydraulic brakes. * Long transmissions, such as RT8908LL (2051362) and RTO14908LL (2057371), require bolted rear cab support crossmember 6490430. * Medium-duty tractors require a bolted rear cab support crossmember. * Not available on T170 | \$134 | 17# |
| Center Frame Clear Space | | | |
| 6491011 | One clear frame space area without custom frame layout. Use with first clear frame space area code or customer-installed APU code when not using a custom frame layout code. | \$359 | 0# |
| 6491012 | Two clear frame space areas without custom frame layout. Use with first and second clear frame space area codes or customer-installed APU code when not using a custom frame layout code. | \$718 | 0# |
| 6497020 | First clear frame space dimensioned from back of cab. | \$0 | 0# |
| 6497030 | Second clear frame space dimensioned from back of cab. | \$0 | 0# |
| First Request Area | | | |
| 6497101 | First - LH outside rail only. Clear frame space area. Does not include fasteners or piping. Requires a supplemental length and location code. The actual chassis layout will be determined at time of engineering. | \$0 | 0# |
| 6497102 | First - RH outside rail only. Clear frame space area. Does not include fasteners or piping. Requires a supplemental length and location code. The actual chassis layout will be determined at time of engineering. | \$0 | 0# |
| 6497103 | First - LH below rail only. Clear frame space area. Does not include fasteners or piping. Requires a supplemental length and location code. Sales tool graphics do not depict interference between requested location and other frame-mounted components. The actual chassis layout will be determined at time of engineering. | \$0 | 0# |
| 6497104 | First - RH below rail only. Clear frame space area. Does not include fasteners or piping. Requires a supplemental length and location code. Sales tool graphics do not depict interference between requested location and other frame-mounted components. The actual chassis layout will be determined at time of engineering. | \$0 | 0# |
| 6497105 | First - LH outside and LH below rail only. Clear frame space area. Does not include fasteners or piping. Requires a supplemental length and location code. Sales tool graphics do not depict interference between requested location and other frame-mounted components. The actual chassis layout will be determined at time of engineering. | \$0 | 0# |
| 6497106 | First - RH outside and RH below rail only. Clear frame space area. Does not include fasteners or piping. Requires a supplemental length and location code. Sales tool graphics do not depict interference between requested location and other frame-mounted components. The actual chassis layout will be determined at time of engineering. | \$0 | 0# |

Miscellaneous Center Frame Equipment

| | | | |
|---------|--|-------|----|
| 6679904 | Fifth wheel setting is outside standard range. Required when fifth wheel setting is more than 30 in. from bogie. * Fifth wheels positioned with a rear or fixed setting more than 30 inches from bogie are subject to an additional charge. This includes factory installed fifth wheels, angles or drillings for aftermarket fifth wheels. | \$718 | 0# |
|---------|--|-------|----|

Body Builder Requirements

| | | | |
|---------|---|---------|----|
| 6390091 | Frame layout picture to dealer prior to build date. Information only, no changes. This provides basic frame layout illustration in a PDF file. Adobe Reader or other software capable of viewing PDF files is required on your computer. A copy of the frame layout can be obtained once the engineering work has been completed. This drawing will help the body builder define clearance requirements for the chassis. | \$718 | 0# |
| 6390097 | DXF frame layout to dealer prior to build date. Information only, no changes. This provides a frame layout in a .DXF format data file suitable for use w/ many CAD programs. * With this option an electronic copy of the chassis frame layout will be forwarded to the dealership. The data is not viewable without the use of CAD oriented software. There is another option to have a paper copy of the chassis dimensions faxed to the dealership. | \$718 | 0# |
| 6391201 | Custom Frame Layout: one chassis | \$1,380 | 0# |
| 6391202 | Custom Frame Layout: two chassis | \$690 | 0# |
| 6391203 | Custom Frame Layout: 3-4 chassis | \$375 | 0# |

T370: FRAME & EQUIPMENT

| Option | Description | Price | Weight |
|----------------------------------|---|---------|--------|
| Body Builder Requirements | | | |
| 6391205 | Custom Frame Layout: 5-9 chassis | \$200 | 0# |
| 6391210 | Custom Frame Layout: 10-24 chassis | \$100 | 0# |
| 6391225 | Custom Frame Layout: 25-49 chassis | \$40 | 0# |
| 6391250 | Custom Frame Layout: 50 or more chassis | \$30 | 0# |
| 6679860 | Final end-of-frame cut-off dimension will be modified to less than or equal to 65 inches. | \$0 | 0# |
| 6679862 | Final end-of-frame cut-off dimension will be modified to 66 in. to 74 in. | \$0 | 0# |
| 6679864 | Final end-of-frame cut-off dimension will be modified to greater than or equal to 75 in. | \$0 | 0# |
| 6679914 | Any changes to rear cab/sleeper area must comply w/FMCSR 399. | \$0 | 0# |
| 6679915 | Customer-installed bulkhead and/or headache rack. * This body is indicative types that utilize an aftermarket headache rack. In those cases the frame access package must be altered after the vehicle is delivered to accommodate the installation of a headache rack and retain compliance with FMCSR 399. | \$0 | 0# |
| 6679995 | Customer will install structural end-of-frame crossmember before vehicle is placed in service. * This warning states the dealers intent for the body builder to meet the structural end of frame requirement associated the installation of a heavy-duty end of frame crossmember. | \$0 | 0# |
| 6790003 | Special frame drill: dealer to provide drawing with dimensions and revision level. Acceptable hole diameters range from 10.2 mm to 40.4 mm. Preferred file format is .pdf. Not for use for rear suspension, fifth wheel or other published frame drilling code. Does not replace clear frame space requests or custom frame layout. | \$1,437 | 0# |

Fifth Wheels

Holland Fixed Fifth Wheels

| | | | |
|---------|---|---------|------|
| 6541232 | Fifth Wheel: Fixed, Holland FW17Y700XL00 7.12 in. height. Outboard mounting angles, 50K vertical rating, LH release. The code for additional factory drilled settings is available. Accommodates a 2 in. SAE kingpin. Requires some style of trailer connections. | \$1,334 | 378# |
| 6541234 | Fifth Wheel: Fixed, Holland FW17Y800XL00 8.12 in. height. Outboard mounting angles, 50K vertical rating, LH release. The code for additional factory drilled settings is available. Accommodates a 2 in. SAE kingpin. Requires some style of trailer connections. | \$1,334 | 383# |

| 9030054 | Stop,Turn,Taillight: Trucklite 44 Series 6 LED Red With Two LED Backup Lights. Flange Mounted. Taillights Come On When Fog Lights Are On. With An LED License Plate. * This option is not available on the T170 model. | \$151 | 3# |

T370: LIGHTS & SIGNALS

| Option | Description | Price | Weight |
|---------------------------|---|--------|--------|
| Taillights | | | |
| 9030056 | Stop, Turn, Taillight: Trucklite 44 Series 6 LED red with two LED backup lights and LED License Plate. Grommet mounted. Taillights come on when fog lights are on. * This option is not available on the T170 model. | \$92 | 4# |
| 9070138 | Combination Stop, Tail, Turn & Backup Lights RH & LH. | STD | 0# |
| 9070144 | Additional 6 ft. Taillamp & ABS Harness: In frame * Additional 6 ft harness length available on full truck with wheelbase under 280 inches. | \$42 | 0# |
| 9090040 | Delete Stop, Tail, Turn & Backup Lights: Only The Lights & Small Jumper That Connects The Lights To The Aft Harness Are Deleted On Medium-Duty. Nothing Is Provided On Gliders. * Chassis specified without lights or safety equipments are considered incomplete vehicles and cannot be driven on the highway with the component/s missing. This restriction dictates special delivery requirements. | (\$59) | -6# |
| Miscellaneous | | | |
| 9090000 | Daytime Running Lamps. * Daytime running lamps required for Canada or on USA registered chassis with Canadian certification. | \$164 | 0# |
| 9090126 | Electric Backup Alarm: Meets SAE J994 & OSHA requirements. | \$106 | 4# |
| 9090151 | Wiring: Cust. Install Trlr Elec. Brake Controller. Class 8/T4 Content Includes Dash Signals: Ignition Power (20A), Ground, Stop Lamp and Electric Trailer Brake Controller Wired To EOF Junction Box. These Signals Are Located Near The NavPlus HD Area. No Need To Code For An Additional End of Frame Junction Box. EOF Junction Box Signals Are: Ground, Tail Lamp, Marker Lamp, Left Turn, Right Turn, Stop Lamp and Electric Trailer Brake Controller Wired To Dash. Medium Duty (not T4) Content Includes A MP 280 Series Connector In Dash Near Driver Door Connections With Signals: Battery Power (40A), Ground, Stop Lamp and Electric Trailer Brake Controller Wired To Chassis Connector. Medium Duty (not T4) 2 Way Deutsch Chassis Connector Located Near Back of Cab, With Signals: Ground and Electric Trailer Brake Controller Wired To Dash Connector. | \$134 | 1# |
| 9090312 | Body Builder Lighting Harness Coiled End Of Frame For Additional Customer Installed Exterior Lighting. Harness Includes Circuits for Additional Customer Installed Tail Lamps, Turn Lamps, Stop Lamps, and Marker Lamps. * Provides circuits for additional customer-installed tail lamps, turn lamps, stop lamps, and marker lamps. | \$87 | 0# |
| 9090845 | Circuit Breakers: Replacing fuses. Does not apply to any 5-amp fuse box position. Brakers include stop/brake/turn, tail lamp, high & low beams, marker/clearance lamps, horn, fuel heat, gauges, air dryer, HVAC controls, panel lamps. Some circuits will remain fuses. | \$37 | 0# |
| Beacon Lights | | | |
| Single | | | |
| 9080026 | Amber Beacon Lamp: Single strobe, 12V, daycab roof, mounted at rear on centerline of roof without bracket. SAE J1318 Class 2. * This option is not available on the T170 model. | \$295 | 6# |
| Dual | | | |
| 9080126 | Amber Beacon Lamp: Dual strobe, 12V centered over cab door w/ stainless steel brackets. SAE J1318 Class 2. * This option is not available on the T170 model. | \$905 | 11# |
| Customer-Installed | | | |
| 9080202 | Switch & Wiring: Customer-installed dual beacon lights w/o insulators. Coiled wire behind dash. | \$91 | 1# |

|--------|-------------|-------|--------|
|--------|-------------|-------|--------|

Air Drying Equipment

Moisture Ejection Valve

| | | | |
|---------|--|-------|----|
| 9102040 | Moisture ejection valve: Two Bendix DV-2 drain valves on service tanks use w/ AD-IS only. Heated. * DV-2 heated drain valves are for use only with the AD-IS air dryer. * When used with a parallel battery box left-hand under cab this option is not available with 385 front tires. | \$269 | 0# |
| 9108001 | Moisture ejection valve w/ pull cable drain. | \$14 | 0# |

Air Dryer

| | | | |
|---------|--|---------|------|
| 9101022 | Delete standard air dryer. * Cannot delete the air dryer on a hydraulic braked chassis with the accessory air system. * Only hydraulic brakes can be used on the T170 and there is no option for an accessory air system on this model. The air dryer and air compressor must be deleted. * This air dryer option is not available with air brakes. AD-IP can be used on hydraulic brakes when the accessory air system is specified. | (\$372) | -11# |
| 9101023 | Air dryer: Bendix AD-SP heated. With 2010 engine installations the dryer is mounted under the hood. * AD-IS is the preferred air dryer with hydraulic brakes and an accessory air system. * This air dryer is unnecessary on hydraulic braked chassis without an accessory air system. | \$0 | 0# |
| 9101215 | Air Dryer Bendix AD-IS heated Puraguard * This air dryer is unnecessary on hydraulic braked chassis without an accessory air system. | STD | 0# |
| 9101235 | Air Dryer: Bendix AD-IS Extended Purge heated. with PuraGuard | \$97 | 4# |

| 9140289 | Air tanks: mounted inside frame flanges where possible. This code requires the use of a custom frame layout code. | \$0 | 0# |
| Air & Electrical Supply Kits | | | |
| Tractor | | | |
| 9110037 | Air & Electrical Supply Kits: Tractor BOC-mounted kit w/ slidebar, spring hanger and composite gladhand/light plug holder mounted on back of cab/sleeper. Kit includes dash mounted trailer air supply valve, trailer hand control valve, and hoses/fittings for the valves. Dash mounted parking brake valve and tractor protection valve are standard. Air lines are detachable at one end only, light lines are detachable at both ends. Conspicuity components are standard. * Back of cab mounted tractor kits interfere with 2010+ vertical DPF/SCR exhaust systems. Must use a frame mounted tractor kit in that tractor application. * Tractor kit mounted on the rear cab face is not available on full trucks. Incompatible with request for NFPA compliance kit. | \$673 | 19# |
| 9110068 | Air & Electrical Supply Kits: Tractor LH frame- mounted kit w/ hosetenna. Includes composite gladhand/light plug holder. Kit includes dash mounted trailer air supply valve, trailer hand control valve, and hoses/fittings for the valves. Dash mounted parking brake valve and tractor protection valve are standard. Air lines are detachable at one end only, light lines are detachable at both ends. Conspicuity components are standard. Use code 9140177 for short hosetenna option, this is not available on the T3 series. | \$720 | 24# |
| Full Truck | | | |
| 9110020 | Full truck kit: Gladhands mounted at end-of- frame. Seven-way female receptacle mounted at end-of-frame in taillamp bracket. Kit includes dash mounted trailer air supply valve, trailer hand control valve, and hoses/fittings for the valves. Dash mounted parking brake valve, tractor protection valve, and spring brake inversion/relay valves are standard. | \$602 | 15# |
| Air & Light Line Options | | | |
| 9120012 | Air & light line length: 12 feet, Straight lines * Air and light lines are only required with an air system on vehicles with trailer connections. Trailer connections are unavailable on hydraulic braked chassis. | \$0 | 0# |
| 9120014 | Air & light line length: 14 feet, Straight lines * Air and light lines are only required with an air system on vehicles with trailer connections. Trailer connections are unavailable on hydraulic braked chassis. | \$0 | 0# |

| FRAME & EQUIPMENT | | | |
| Rails & Inserts | | | |
| 6054200 | Frame Rails: 10-5/8 x 3-1/2 x 5/16 in. Steel to 284 in. Truck frame weight is 2.91 lb.-in. per pair of rails. Section modulus is 14.80, RBM is 1,776,000 in.-lbs per rail. Frame rail availability may be restricted based upon application, axle/suspension capacity, fifth wheel setting, or component/dimensional specifications. The results of the engineering review may result in a change to the requested frame rail. If a change is required Kenworth Application Engineering will advise the dealer of the appropriate material specification for a substitute rail. | \$0 | 0# |
| Bumpers | | | |
| 6302460 | Bumper: Tapered painted steel channel. Requires a bumper setting code. | \$0 | 0# |
| Front Frame Miscellaneous | | | |
| 6390103 | Front mudflaps. | \$0 | 0# |
| 6390304 | Brackets, Front Drive: Aluminum up to 15,999 lbs. | \$0 | 0# |
| Battery Boxes | | | |
| 6405048 | Battery box module: Short length aluminum parallel under cab, aluminum diamond plate cover w/ step. Up to 2 air tanks may mount to bottom of box. Batteries will be oriented perpendicular on rail. | \$0 | 0# |
| DPF-SCR Covers | | | |
| 6451090 | T470,C5, T6, T8 non-polished DPF/SCR or CNG cover diamond plate w/ step. For use w/ 2010 or later exhaust systems. For T8, use extended length non-polished battery box on opposite rail to match the length of under cab components. End plates will be painted standard black frame color. | \$0 | 0# |
| Rear Frame Equipment | | | |
| 6742009 | Square end-of-frame w/o crossmember; non-towing. | \$0 | 0# |
| 6721102 | Rear mudflap arms: Betts B-25 standard-duty, straight. Includes B1732 mounting brackets as standard. | \$0 | 0# |
| 6722000 | Rear mudflap shields: White plastic antisail w/ Kenworth logo. | \$0 | 0# |
| FUEL TANKS & EQUIPMENT | | | |
| Round | | | |
| 7014056 | Fuel Tank: 56 US gallon 22in. aluminum BOC replace. Class 8 fuel tank includes an anti-siphon device on the filler neck. | \$0 | 0# |

FUEL TANKS & EQUIPMENT

DEF Tanks & Equipment

| | | | |
|---------|--|-----|----|
| 7722011 | Small round DEF tank. 11 gallons of usable volume. The DEF tank will be located on the side you specified. If you have specific configuration or body builder concerns, please utilize the Custom Frame Layout option. Standard capacity is calculated by fuel capacity of the vehicle and will accommodate two diesel fill-ups for every DEF fill-up. For 1:1 DEF fuel fill ratio, add 7889204. | \$0 | 0# |
|---------|--|-----|----|

CAB EXTERIOR

Cabs

| | | | |
|---------|---|-----|----|
| 8024310 | Cab: Curved Glass Conventional. Cab Includes aluminum & fiberglass fully hucked cab w/ all aluminum bulkhead doors & continuous stainless steel piano-style door hinges. Single electric horn standard. Incandescent exterior lights include diagnosable bulb detection and warning. Trailer cable on tractors includes integrity detection. Standard features include multiplex wiring for interior lights, automated pre-trip inspection, short and open check diagnostics. Warning alarm will sound when lights are left on. | \$0 | 0# |
|---------|---|-----|----|

Windows

| | | | |
|---------|--|-----|----|
| 8871438 | Rear Cab Stationary Window 17 in. x 36 in. | \$0 | 0# |
|---------|--|-----|----|

Hoods, Fenders & Grilles

| | | | |
|---------|---|-----|----|
| 8090450 | Hood: Sloped Aerodynamic T440 Hood. Includes hood and mounted grille, split fenders w/ mudflaps, & separate bumper. | \$0 | 0# |

T440/T470: REQUIRED INFORMATION

| Option | Description | Price | Weight |
|-------------------------|--|-------|--------|
| Intended Service | | | |
| 0093005 | Local pickup & delivery: Vehicles which haul freight, typically operating within a 100-mile radius, on public streets & highways, & other paved surfaces, including limited Class C roads. Includes package & freight delivery, as well as fuel oil or petroleum distribution, etc. Road usage: minimum 3% Class B, do not code for Class D. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for pick-up and delivery service should be: CLASS A 0-97% ; CLASS B 3-100% ; CLASS C 0-50% ; CLASS D 0% | \$0 | 0# |
| 0093007 | Regional Haul: Vehicles used to haul freight on public roads consisting of a mixture of over the road, urban and/or suburban hauling. Pickup to delivery distance typically in the 100 to 300 miles range but some LTL applications may exceed 300 mile limit. Road usage: minimum 19% Class B, do not code for Class D. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road class profile for chassis in regional haul service is: CLASS A 0-81% ; CLASS B 1-100% ; CLASS C 0-20% ; CLASS D 0% | \$0 | 0# |
| 0093015 | Concrete ready mix: Vehicles which deliver Ready-Mix concrete from batch plant to job site. Typically includes some operation off of paved roads. Road usage: any combination, which includes minimum 5% Class B. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for mixer service should be: CLASS A 0-95% ; CLASS B 5-100% ; CLASS C 0-30% ; CLASS D 0-5% | \$0 | 0# |
| 0093025 | Snowplow: Vehicles which are configured for mounting a snowplow to the front. May also have dump or other body. Typically includes some operation off of paved roads. Road usage: majority of Class A & B, do not code for Class D. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for snowplow service should be: CLASS A 0-95% ; CLASS B 5-100% ; CLASS C 0-30% ; CLASS D 0% | \$0 | 0# |
| 0093035 | Mining service: Vehicles used to service earthmoving & mining equipment. Includes bodies such as mechanic's service bodies, tire hoists, fuel/lube, etc. Typically includes some operation off of paved roads. Road usage: any combination, which includes some Class C. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for mining service should be: CLASS A 0-97% ; CLASS B 0-95% ; CLASS C 1-100% ; CLASS D 0-99% | \$0 | 0# |
| 0093090 | Utility vehicle: Used to service utility or communication equipment. Typically operates within 100 mile radius on public roads & may or may not have a man lift. Duty cycle includes long engine idle times. Road usage: any combination of A & B, may include some class C roads. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * Typical road use profile for a vehicle operating in Utility service is: CLASS A 0-99% ; CLASS B 1-100% ; CLASS C 0-50% ; CLASS D 0 % | \$0 | 0# |

T440/T470: REQUIRED INFORMATION

| Option | Description | Price | Weight |
|-------------------------|---|-------|--------|
| Intended Service | | | |
| 0093091 | <p>Refuse hauler: Vehicles which haul refuse, recycled material, etc. Includes Roll-on/roll-off container movement, as well as hauling refuse from transfer stations to landfills. Typically includes operation in landfills, over rough, uneven surfaces. Road usage: any combination, which includes some Class B.</p> <ul style="list-style-type: none">* A clog resistant radiator is recommended for operation in environments where high dust levels are found.* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.* In off-road areas where tanks may tend to rotate the 7 inch tank supports or mechanical anti-roll options are recommended.* The road use profile for refuse haulers should be: CLASS A 0-99% ; CLASS B 1-100% ; CLASS C 0-99% ; CLASS D 0-5% | \$0 | 0# |
| 0093095 | <p>Refuse packer: Vehicles which pick up refuse or recycled material from curbside containers in residential areas. Operation typically includes very frequent stops & starts. Unloading can be at transfer station or at landfill. Road usage: some Class B required, with maximum of 5% Class D.</p> <ul style="list-style-type: none">* A clog resistant radiator is recommended for operation in environments where high dust levels are found.* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.* Intended service of refuse packer requires use of a 37.4 CFM air compressor on ISX* Intended service refuse packer requires use of a 30.4 CFM air compressor.* MX engines not approved for refuse loader/packer applications except for the following MX-11 engines: 0700198 and 0700199.* Refuse loader/packer body type is only for use with refuse packer intended service.* The DSP41/P rear axle is not for use in refuse packer service per TE1568.* The road use profile for refuse packer service should be: CLASS A 0-50% ; CLASS B 1-100% ; CLASS C 0-99% ; CLASS D 0-5% | \$0 | 0# |
| 0093105 | <p>Oil field well servicing: Vehicles which carry well servicing equipment, e.g., pumpers, blenders, cementers, data loggers, etc. Typically involve considerable hours of stationary operation, but low mileage. Typically operate on prepared (although often unpaved) roadways. Road usage: any combination, w/minimum 5% Class C.</p> <ul style="list-style-type: none">* A Severe Service kit is required on all chassis operating in the Canadian oil fields.* A steel bumper with center mounted tow hook is required on Canadian chassis used in logging or oil field service.* Accurate body data is required to help engineering determine the vehicle application. Specification of oil field service or oil well service covers a broad spectrum and requires a narrative line that describes the body type.* Body builders must frequently add sub-frame to meet rail RBM requirements in services of oil field rig up or with oil field well service bodies. Adding the sales code when applicable will assist in the engineering evaluation of these chassis.* Cab door bearing blocks are required on all chassis operating in Canada in the logging or oil field vocations. This is included as part of a Severe Service kit.* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.* The road use profile for oil field well service should be: CLASS A 0-80% ; CLASS B 0-95% ; CLASS C 5-100% ; CLASS D 0-95% | \$0 | 0# |

T440/T470: REQUIRED INFORMATION

| Option | Description | Price | Weight |
|-------------------------|---|-------|--------|
| Intended Service | | | |
| 0093111 | <p>Wrecker service: Vehicles w/ recovery bodies used for recovering & towing stranded vehicles & equipment. Road usage: minimum 5% Class B & maximum 10% Class D.</p> <ul style="list-style-type: none">* Body manufacturer's often have specific RBM requirements in excess of Kenworth standards. It is the dealer's responsibility to contact the body builder and communicate the frame RBM or section modulus requirements to Kenworth engineering.* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.* For the purpose of frame strength analysis the body load is assumed to be a distributed load. It is further understood that the load of the crane and it's payload will be supported by outriggers in contact with the ground during operation of the crane. If these assumptions don't accurately represent the body load please contact Application Engineering for assistance.* The road use profile for use with wrecker service should be: CLASS A 0-95% ; CLASS B 5-100% ; CLASS C 0-95% ; CLASS D 0-10% | \$0 | 0# |
| 0093121 | <p>Fire truck service: Vehicles used in fighting fires. Typically have pumps, etc., mounted in the body. Road usage: minimum 5% Class B & maximum 5% Class D.</p> <ul style="list-style-type: none">* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.* NFPA compliance 1901 kit is required with Fire service.* The road use profile for fire or EMT service should be: CLASS A 0-80% ; CLASS B 5-100% ; CLASS C 0-95% ; CLASS D 0-10%* With fire truck service an ember separator may be required to meet local or NFPA compliance. | \$0 | 0# |
| 0093122 | <p>EMT/rescue service: Vehicles used responding to emergencies & rescue operations. Typically configured for rapid response, & carry medical & other rescue equipment. Road usage: minimum 5% Class B & maximum 5% Class D.</p> <ul style="list-style-type: none">* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.* The road use profile for fire or EMT service should be: CLASS A 0-80% ; CLASS B 5-100% ; CLASS C 0-95% ; CLASS D 0-10% | \$0 | 0# |
| 0093125 | <p>Crane/cherry picker: Vehicles equipped w/ cranes, man-lifts, hoists, cherry-pickers, bridge inspection units, etc. Road usage: any combination, w/minimum 5% Class B.</p> <ul style="list-style-type: none">* Body builders must frequently add sub-frame to meet rail RBM requirements with crane/cherry picker bodies. Adding the sales code when applicable will assist in the engineering evaluation of these chassis.* Body manufacturer's often have specific RBM requirements in excess of Kenworth standards. It is the dealer's responsibility to contact the body builder and communicate the frame RBM or section modulus requirements to Kenworth engineering.* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.* The road use profile for crane/cherry picker service should be: CLASS A 0-95% ; CLASS B 5-100% ; CLASS C 0-80% ; CLASS D 0-80% | \$0 | 0# |
| 0093130 | <p>Construction: Vehicles used in the construction industry, other than those listed above. Use typically involves operating on the jobsite, to pick up or deliver construction materials, or to position the vehicle for its intended use at the construction site. Includes such activities as delivery of precast concrete, concrete pumpers, flatbeds or roll-offs for delivery of construction materials or equipment, etc. Typically includes some operation off of paved roads. Road usage: any combination, which includes some Class C.</p> <ul style="list-style-type: none">* For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines.* The road use profile for construction service should be: CLASS A 0-97% ; CLASS B 0-99% ; CLASS C 1-100% ; CLASS D 0-99% | \$0 | 0# |

T440/T470: REQUIRED INFORMATION

| Option | Description | Price | Weight |
|---------------------------|--|-------|--------|
| Intended Service | | | |
| 0093135 | Agriculture: Vehicles used in the agriculture industry, other than those listed above. Use typically involves transportation of agricultural & dairy products to/from/on/around farm sites, & includes operation off of improved surfaces while on the farm. Includes applications such as milk tankers for farm pickup, feed trucks, grain haulers which load in the field, etc. Can be trucks or tractors. Road usage: any combination, which includes both Class C & D. * A clog resistant radiator is recommended for operation in environments where high dust levels are found. * For assistance determining applicable body or trailer types for this service refer to DealerNet/Product Information/Body and Trailer Guidelines. * The road use profile for chassis in agriculture service should be: CLASS A 0-95% ; CLASS B 0-98% ; CLASS C 1-95% ; CLASS D 1-95% | \$0 | 0# |
| Commodity Hauled | | | |
| Building Materials | | | |
| 0091010 | Pre-cast concrete (blocks, pavers, etc.). * Precast concrete commodity is applicable with intended service codes of regional haul, pickup and delivery, construction or agriculture. | \$0 | 0# |
| 0091020 | Ready-mix concrete. * Ready-mix concrete commodity is applicable with intended service codes of mixer, pickup and delivery, construction or crane/cherry picker [pumper trucks]. | \$0 | 0# |
| 0091030 | Lumber. * Lumber commodity is applicable with intended service codes of line haul, regional haul, pickup and delivery, construction or crane/cherry picker. | \$0 | 0# |
| 0091040 | Other building materials. * Other/building material commodity is applicable with intended service codes of heavy equipment transport, line haul, regional haul, pickup and delivery, construction or crane/cherry picker. | \$0 | 0# |
| 0091041 | Asphalt. * Asphalt commodity is applicable with intended service codes of line haul, regional haul, pickup and delivery, or construction. * Beam or spring rear suspensions are typically used with an asphalt spreader. * For dump trucks used to spread asphalt there is an option to switch ABS off to improve performance on loose surfaces. Use 8205012 if the road conditions require this. * Vocations of snowplow, mining haulers, construction, pick-up and delivery or regional haul are appropriate for this commodity. | \$0 | 0# |
| 0091042 | Gravel/crushed rock/sand. * Gravel/crushed rock commodity is applicable with intended service codes of line haul, regional haul, pickup and delivery, snowplow, mining hauler, or construction. * Vocations of snowplow, mining haulers, construction, pick-up and delivery or regional haul are appropriate for this commodity. | \$0 | 0# |
| 0091043 | Topsoil/bark. * A clog resistant radiator is recommended for operation in environments where high dust levels are found. * The commodity of bark or topsoil most closely matches the intended service of pick-up and delivery, agriculture, or construction. | \$0 | 0# |

| Commodity Hauled | | | |
| Forest Products | | | |
| 0091190 | Wood chips. | \$0 | 0# |
| * In some chip hauling vocations the entire chassis is inclined during unloading. For this operation a front filler neck on fuel tanks is important. | | | |
| * Wood chips commodity is applicable to intended services of agriculture, construction, line haul, regional haul, or pickup and delivery. | | | |
| 0091200 | Other forest products. | \$0 | 0# |
| * Other forest products commodity is applicable to intended services of agriculture, construction, line haul, regional haul, or pickup and delivery. | | | |
| Minerals | | | |
| 0091210 | Coal. | \$0 | 0# |
| * Coal commodity is applicable to intended services of agriculture, construction, line haul, regional haul, or pickup and delivery. | | | |
| * Vocations of snowplow, mining haulers, construction, pick-up and delivery or regional haul are appropriate for this commodity. | | | |
| 0091220 | Excavated earth. | \$0 | 0# |
| * Vocations of snowplow, mining haulers, construction, pick-up and delivery or regional haul are appropriate for this commodity. | | | |
| 0091230 | Rock. | \$0 | 0# |
| * Rock commodity is applicable to intended services of mining hauler or snowplow. | | | |
| * Vocations of snowplow, mining haulers, construction, pick-up and delivery or regional haul are appropriate for this commodity. | | | |
| 0091240 | Other minerals. | \$0 | 0# |
| * Other minerals commodity is applicable to intended services of mining hauler or snowplow. | | | |
| * Vocations of snowplow, mining haulers, construction, pick-up and delivery or regional haul are appropriate for this commodity. | | | |
| Dry Goods | | | |
| 0091090 | General freight. | \$0 | 0# |
| * General freight commodity is applicable with intended service codes of line haul, regional haul, pickup and delivery, construction or agriculture. | | | |
| 0091100 | Heavy machinery. | \$0 | 0# |
| * Heavy machinery commodity is applicable with intended service codes of snowplow, heavy equipment transport, crane/cherry picker, regional haul, pickup and delivery, oil field rig move, mining service, oil field well service, wrecker or EMT/rescue. | | | |
| 0091110 | Oil field equipment. | \$0 | 0# |
| * A steel bumper with center mounted tow hook is required on Canadian chassis used in logging or oil field service. | | | |
| * Oil field equipment commodity is applicable with intended service codes of heavy equipment transport oil field rig move, oil field well service, or mining service. | | | |

Commodity Hauled

Miscellaneous

| | | | |
|---------|--|-----|----|
| 0091260 | Refuse/recycled material. * A clog resistant radiator is recommended for operation in environments where high dust levels are found. * Refuse/recycle commodity is applicable to intended services of oil field rig move, refuse hauler, or refuse packer. | \$0 | 0# |
| 0091270 | Fire apparatus. * Fire apparatus commodity is applicable to intended services of fire truck, oil field well service, construction or agriculture. * NFPA compliance 1901 kit is required with Fire service. | \$0 | 0# |
| 0091271 | EMT/rescue. * EMT/rescue equipment commodity is applicable with intended service code of EMT/rescue. | \$0 | 0# |

Body Type

| | | | |
|---------|--|-----|----|
| 0095010 | End dump. * End dump body type is for use in the following services: local P&D, regional haul, snowplow, mining hauler, construction, refuse hauler, or agriculture. * For the purpose of frame strength analysis the body load is assumed to be a distributed load and also as a two-point load supported on a lifting ram located approximately 2ft behind the cab and at the hinge point at the end of the frame. If these assumptions don't accurately represent the body load please contact Application Engineering for assistance. * Not approved for use with AG400L rear suspensions. * The road use profile for dump truck service should be: CLASS A 0-97% ; CLASS B 0-99% ; CLASS C 1-100% ; CLASS D 0-99% * This body type is generally prohibited with tag axles. OAR review can be requested when customer need dictates the tag axle. | \$0 | 0# |
| 0095030 | Transfer dump. * AutoShift transmission are not suited for use in transfer dump applications. * For the purpose of frame strength analysis the body load is assumed to be a distributed load and also as a two-point load supported on a lifting ram located approximately 2ft behind the cab and at the hinge point at the end of the frame. If these assumptions don't accurately represent the body load please contact Application Engineering for assistance. * Not approved for use with AG400L rear suspensions. * This body type is generally prohibited with tag axles. OAR review can be requested when customer need dictates the tag axle. * Transfer dump body type is for use in the following services: local P&D, regional haul, refuse hauler, or construction. | \$0 | 0# |
| 0095035 | Stone slinger. * A stone slinger body type is used for the commodities of rock or other minerals. * Not approved for use with AG400/AG460/AG690 rear suspensions. * Not approved for use with AG400L rear suspensions. * Stone slinger body type is for use in the following services: local P&D or construction. * The following body types are not available with a trailer: Stone slinger, concrete mixer/non-booster axle, concrete mixer w/ approved frame reinforcement, concrete pump, volumetric mixer, roll-back flatbed, refuse loader/packer, beverage, drilling derrick, cotton module, wrecker, crane/boom, fire truck/pumper, or vacuum tank. * This body type is compatible with full trucks only. | \$0 | 0# |

T440/T470: REQUIRED INFORMATION

| Option | Description | Price | Weight |
|--|---|-------|--------|
| Body Type | | | |
| 0095040 | Concrete mixer, non-booster-axle. | \$0 | 0# |
| <ul style="list-style-type: none">* For mixers other than boost-a-load the minimum rail material for use without an insert is 10-11/16 inch* For the purpose of frame strength analysis the body load is assumed to be a two-point load. The forward pedestal is located close to the back of cab and the rear pedestal is located near the end of the frame. If these assumptions don't accurately represent the body load please contact Application Engineering for assistance.* Mixer body manufacturers often have very specific requirements regarding frame strength and crossmember placement. This should be discussed with the customer and communicated to engineering using sales codes or narrative lines on the DTPO.* Non-booster axle concrete mixer body is for use in the following service: concrete ready mix.* Not approved for use with AG400L rear suspensions.* PX-9 with this body type is not available with a GCW over 80,000 lbs.* The following body types are not available with a trailer: Stone slinger, concrete mixer/non-booster axle, concrete mixer w/ approved frame reinforcement, concrete pump, volumetric mixer, roll-back flatbed, refuse loader/packer, beverage, drilling derrick, cotton module, wrecker, crane/boom, fire truck/pumper, or vacuum tank. | | | |
| 0095050 | Booster axle mixer w/ approved frame reinforcement. | \$0 | 0# |
| <ul style="list-style-type: none">* ABS with Bendix electronic stability program (ESP) can be specified with up to one non-steerable, factory-installed pusher or tag; up to four steerable, factory-installed pushers; or up to three steerable, factory-installed pushers with a steerable, factory-installed tag. Approvals for lift axles are limited to 6x4 and 6x2 axle configurations. Lift axle weight rating is limited to 13.2K with selection of Mixer Boost A-Load.* Boost-a-load mixers require that reinforcement side plates for the frame be installed at the factory.* Booster axle concrete mixer is for use in the following service: concrete ready mix.* Concrete mixers that will use a lift axle must specify an 11-5/8 inch main rail.* Concrete mixers with a wheelbase over 260 inches require a minimum rail material of 11-5/8 inches when there is no lift axle specified.* Concrete mixers with a wheelbase under 261 inches require a minimum rail material of 10-3/4 inches when there is no lift axle specified.* For the purpose of frame strength analysis the body load is assumed to be a two-point load. The forward pedestal is located approximately 4ft from the back of cab and the rear pedestal is located near the end of the frame. It is understood that the chassis will be equipped with a lift axle of 12000lb capacity located approximately 12.5ft from the centerline of the rear drive axle. If these assumptions don't accurately represent the body load please contact Application Engineering for assistance.* Mixer body manufacturers often have very specific requirements regarding frame strength and crossmember placement. This should be discussed with the customer and communicated to engineering using sales codes or narrative lines on the DTPO.* Not approved for use with AG400L rear suspensions.* PX-9 with this body type is not available with a GCW over 80,000 lbs.* The following body types are not available with a trailer: Stone slinger, concrete mixer/non-booster axle, concrete mixer w/ approved frame reinforcement, concrete pump, volumetric mixer, roll-back flatbed, refuse loader/packer, beverage, drilling derrick, cotton module, wrecker, crane/boom, fire truck/pumper, or vacuum tank. | | | |

T440/T470: REQUIRED INFORMATION

|---|--------------------|-------|--------|
| Body Type | | | |
| 0095055 | Concrete pump. | \$0 | 0# |
| <ul style="list-style-type: none">* Concrete pump body type is for use in the following services: concrete ready mix or construction.* Concrete pumper body type is used for the commodity of ready mix concrete only.* If this concrete pump is equipped with an aerial boom the body manufacturer may have RBM requirements in excess of Kenworth's frame requirements. The dealer should contact the body manufacturer and communicate the requirements in a narrative line on the DTPO.* Not approved for use with AG400/AG460/AG690 rear suspensions.* Not approved for use with AG400L rear suspensions.* The following body types are not available with a trailer: Stone slinger, concrete mixer/non-booster axle, concrete mixer w/ approved frame reinforcement, concrete pump, volumetric mixer, roll-back flatbed, refuse loader/packer, beverage, drilling derrick, cotton module, wrecker, crane/boom, fire truck/pumper, or vacuum tank.* This body type is compatible with full trucks only. | | | |
| 0095056 | Volumetric mixer. | \$0 | 0# |
| <ul style="list-style-type: none">* PX-9 with this body type is not available with a GCW over 80,000 lbs.* The following body types are not available with a trailer: Stone slinger, concrete mixer/non-booster axle, concrete mixer w/ approved frame reinforcement, concrete pump, volumetric mixer, roll-back flatbed, refuse loader/packer, beverage, drilling derrick, cotton module, wrecker, crane/boom, fire truck/pumper, or vacuum tank.* Volumetric mixer body is for use in the following services: concrete ready mix, mining service, or construction. | | | |
| 0095060 | Roll on/roll off. | \$0 | 0# |
| <ul style="list-style-type: none">* For the purpose of frame strength analysis the body load is assumed to be a distributed load and also as a point load supported on the tail roller at the end of the frame. If these assumptions don't accurately represent the body load please contact Application Engineering for assistance.* Not approved for use with AG400/AG460/AG690 rear suspensions.* Not approved for use with AG400L rear suspensions.* Roll on/roll off body type is for use in the following services: local P&D, mining hauler, mining service, heavy equipment transport, refuse hauler, construction, or agriculture.* Roll-off/back body types are generally prohibited with tag axles. OAR review can be requested when customer need dictates the tag axle. | | | |
| 0095065 | Roll back flatbed. | \$0 | 0# |
| <ul style="list-style-type: none">* For the purpose of frame strength analysis the body load is assumed to be a distributed load and also as a point load supported on the tail roller at the end of the frame. If these assumptions don't accurately represent the body load please contact Application Engineering for assistance.* Installation of an aftermarket headache rack is frequently required for this vocation. The rack may impede access to grab handles mounted on the back of the cab. Compliance with FMCSR 399 must be maintained.* Roll back flat bed body is for use in the following services: local P&D, mining service, heavy equipment transport, wrecker service, construction, or agriculture.* Roll-off/back body types are generally prohibited with tag axles. OAR review can be requested when customer need dictates the tag axle.* The following body types are not available with a trailer: Stone slinger, concrete mixer/non-booster axle, concrete mixer w/ approved frame reinforcement, concrete pump, volumetric mixer, roll-back flatbed, refuse loader/packer, beverage, drilling derrick, cotton module, wrecker, crane/boom, fire truck/pumper, or vacuum tank.* This body type is compatible with full trucks only. | | | |

T440/T470: REQUIRED INFORMATION

| Option | Description | Price | Weight |
|------------------|--|-------|--------|
| Body Type | | | |
| 0095070 | Refuse loader/packer. <ul style="list-style-type: none">* 18.7 CFM compressor N/A with body type refuse loader/packer.* A clog resistant radiator is recommended for operation in environments where high dust levels are found.* Body type refuse loader/packer requires 30.4 CFM compressor* Body type refuse loader/packer requires use of the 37.4 CFM air compressor on MX engines.* Hendrickson recommends track rods on refuse loader or packer vehicles specifying a beam suspension with axle spacing of 52 or 54 inches.* MX engines not approved for refuse loader/packer applications except for the following MX-11 engines: 0700198 and 0700199.* Not approved for use with AG400/AG460/AG690 rear suspensions.* Not approved for use with AG400L rear suspensions.* PX-9 with this body type is not available with a GCW over 80,000 lbs.* Refuse loader/packer body type is only for use with refuse packer intended service.* The following body types are not available with a trailer: Stone slinger, concrete mixer/non-booster axle, concrete mixer w/ approved frame reinforcement, concrete pump, volumetric mixer, roll-back flatbed, refuse loader/packer, beverage, drilling derrick, cotton module, wrecker, crane/boom, fire truck/pumper, or vacuum tank. | \$0 | 0# |
| 0095080 | Refuse, other. <ul style="list-style-type: none">* A clog resistant radiator is recommended for operation in environments where high dust levels are found.* Not approved for use with AG400L rear suspensions.* Other refuse body types are for use in the following services: local P&D, refuse hauler, or refuse packer. | \$0 | 0# |
| 0095095 | Beverage. <ul style="list-style-type: none">* Beverage body type is for use in the following services: regional haul or local P&D.* The following body types are not available with a trailer: Stone slinger, concrete mixer/non-booster axle, concrete mixer w/ approved frame reinforcement, concrete pump, volumetric mixer, roll-back flatbed, refuse loader/packer, beverage, drilling derrick, cotton module, wrecker, crane/boom, fire truck/pumper, or vacuum tank. | \$0 | 0# |
| 0095099 | Oil Field Winch/Equipment BOC for use w/Tractors. <ul style="list-style-type: none">* For use with intended services of mining service, heavy equipment transport, oil field rig move, or oil field well servicing.* For use with tractors.* Requires the selection of oil field equipment for commodity hauled. | \$0 | 0# |

T440/T470: REQUIRED INFORMATION

| Option | Description | Price | Weight |
|------------------|---|-------|--------|
| Body Type | | | |
| 0095100 | Oil well servicing equipment. * A Severe Service kit is required on all chassis operating in the Canadian oil fields. * Accurate body data is required to help engineering determine the vehicle application. Specification of oil field service or oil well service covers a broad spectrum and requires a narrative line that describes the body type. * Cab door bearing blocks are required on all chassis operating in Canada in the logging or oil field vocations. This is included as part of a Severe Service kit. * Not approved for use with AG400/AG460/AG690 rear suspensions. * Not approved for use with AG400L rear suspensions. * Oil field well service equipment body type is for use in the following service: oil field well service. * The body installed on oil field rig up or oil field well servicing trucks may make a substantial contribution to the available frame RBM. To assist in engineering these vehicle a narrative line should be added to the DTPO describing the body sub-frame characteristics. Contact Application Engineering for assistance as needed. | \$0 | 0# |
| 0095102 | Coil Tubing Unit. * Coil tubing unit body type is for use in the following service: oil field well servicing. | \$0 | 0# |
| 0095105 | Drilling derrick. * Body manufacturer's often have specific RBM requirements in excess of Kenworth standards. It is the dealer's responsibility to contact the body builder and communicate the frame RBM or section modulus requirements to Kenworth engineering. * Drilling derrick body type is for use in the following services: mining service, oil field well service, construction, or agriculture. * For the purpose of frame strength analysis the body load is assumed to be a distributed load. It is further understood that the load of the crane and it's payload will be supported by outriggers in contact with the ground during operation of the crane. If these assumptions don't accurately represent the body load please contact Application Engineering for assistance. * Not approved for use with AG400/AG460/AG690 rear suspensions. * Not approved for use with AG400L rear suspensions. * The following body types are not available with a trailer: Stone slinger, concrete mixer/non-booster axle, concrete mixer w/ approved frame reinforcement, concrete pump, volumetric mixer, roll-back flatbed, refuse loader/packer, beverage, drilling derrick, cotton module, wrecker, crane/boom, fire truck/pumper, or vacuum tank. * This body type is compatible with full trucks only. | \$0 | 0# |
| 0095110 | Tank. * Tank bodies should specify a commodity the is a liquid or some other type of bulk product. * Tanker body type is for use in the following services: linehaul, local P&D, regional haul, snowplow, mining hauler, mining service, refuse hauler, oil field well service, fire truck, EMT/rescue, construction, or agriculture. | \$0 | 0# |
| 0095115 | Dry bulk hopper. * A clog resistant radiator is recommended for operation in environments where high dust levels are found. * A dry bulk hopper body type is used for the commodities of bark/topsoil, dry bulk goods, other food/farm products, other forest products, grain, dry bulk, or feedlot type commodities * Dry bulk hopper body type is for use in the following services: linehaul, pickup & delivery, regional haul, mining hauler, construction, or agriculture. * This body type is compatible with full trucks only. | \$0 | 0# |

| Stationary Application | | | |
| 0072000 | Chassis operation will not include a stationary application. Stationary operation is defined as running the engine under load while stationary at a substantial fraction of engine gross horsepower (60% or greater) for an extended period of time (longer than 5 - 10 minutes). * Stationary application use codes are required when vehicle service or components are indicative applications requiring special cooling review. Vocations where stationary operation may exist include concrete pumper, oil well service, Coil Tubing Unit, drilling derrick, fire pumper, vacuum tank, chassis with a front engine PTO used other than as a snowplow, or chassis using a split-shaft PTO. | \$0 | 0# |
| 0072001 | Chassis operation will include stationary application used in lower 48 states [US only]. Stationary operation is defined as running the engine under load while stationary at a substantial fraction of engine gross horsepower (60% or greater) for an extended period of time (longer than 5 - 10 minutes). * Required for Cummins engines with single fuel tank; for PACCAR PX-9 with single fuel tank Restricted for PACCAR MX engines w/o stationary applications (ref 0072001, 0072002, and 0072003) * Stationary application use codes are required when vehicle service or components are indicative applications requiring special cooling review. Vocations where stationary operation may exist include concrete pumper, oil well service, Coil Tubing Unit, drilling derrick, fire pumper, vacuum tank, chassis with a front engine PTO used other than as a snowplow, or chassis using a split-shaft PTO. * Stationary cooling definition for US lower 48 states only. Indicates that the chassis will not be operating in conditions considered to be a stationary application. Vocations where stationary operation may exist include concrete pumper, oil well service, drilling derrick, fire pumper, vacuum tank, chassis with a front engine PTO used other than as a snowplow, or chassis using a split-shaft PTO. | \$0 | 0# |
| 0072002 | Chassis operation will include stationary application used in Canada or Alaska. Stationary operation is defined as running the engine under load while stationary at a substantial fraction of engine gross horsepower (60% or greater) for an extended period of time (longer than 5 - 10 minutes). * Required for Cummins engines with single fuel tank; for PACCAR PX-9 with single fuel tank Restricted for PACCAR MX engines w/o stationary applications (ref 0072001, 0072002, and 0072003) * Stationary application use codes are required when vehicle service or components are indicative applications requiring special cooling review. Vocations where stationary operation may exist include concrete pumper, oil well service, Coil Tubing Unit, drilling derrick, fire pumper, vacuum tank, chassis with a front engine PTO used other than as a snowplow, or chassis using a split-shaft PTO. | \$0 | 0# |

Air Compressor

| | | | |
|---------|---|---------|-----|
| 1002060 | Air compressor: Cummins 18.7 CFM For Cummins And PACCAR PX engines. * 18.7 cfm air compressor for use on Cummins or PACCAR PX-9 engines. Not for use on 2017 emissions X15 engines. * 18.7 CFM compressor N/A with body type refuse loader/packer. * Required with ISX12G engine. | STD | 0# |
| 1002065 | Air compressor: Cummins 30.4 CFM ISL, PX-8, PX-9 replacing 18.7. * Body type refuse loader/packer requires 30.4 CFM compressor * Intended service refuse packer requires use of a 30.4 CFM air compressor. * The 30.4 CFM air compressor can be used on T4 series chassis in combination with a 2010 PX-9 engine only. | \$1,954 | 30# |

Air Intake System

Air Cleaner

Engine-Mounted

| | | | |
|---------|---|-----|----|
| 1051092 | Engine mount Powercore air cleaner. w/constant torque SS clamps, pop-up air restriction indicator. Pop-up indicator is standard. * Inside/outside air intake is available with engine mounted Powercore air cleaners. * PX-9 engines require an engine mounted air cleaner. | STD | 0# |
|---------|---|-----|----|

| Option | Description | Price | Weight |
|---------------------------------|---|---------|--------|
| Air Intake System | | | |
| Air Intake Equipment | | | |
| 1093108 | Inside/outside air intake: for Powercore engine mounted w/cowl inlet. * Inside/outside air intake is available with engine mounted Powercore air cleaners. * Inside/outside air not available with PACCAR MX-11 or MX-13 engines. | \$490 | 0# |
| 1098005 | Filter minder air restriction indicator mounted on air cleaner replacing standard pop-up indicator. | \$50 | 0# |
| Cooling System | | | |
| 1121200 | Cooling module: 1000 square inches T170/T270/T370/T470. Includes metal surge tank on T170/T270/T370. * This cooling module is available with a 2010+ EPA compliant engines. C500 available with export engines as well as 2010+ EPA compliant engines. * This radiator can be used with straight through rails on the T470. Not for use on the T440. | (\$429) | 0# |
| 1121210 | Cooling module: 1000 square inches. Clog resistant. Includes metal surge tank on T170/T270/T370. * A clog resistant radiator is recommended for operation in environments where high dust levels are found. * Low clog radiators have reduced cooling capacity compared to a standard radiator. Chassis configuration may be subject to engineering review for cooling capacity. * Not available on T440 or ISL-G. * This cooling module is available with a 2010+ EPA compliant engines. C500 available with export engines as well as 2010+ EPA compliant engines. * This radiator can be used with straight through rails on the T470. Not for use on the T440. | (\$177) | 0# |
| 1122505 | Cooling module: 1300 square inches. Includes aluminum radiator core, aluminum charge air cooler, translucent surge tank and washer bottle, silicone hoses, and extended life coolant. Drain valve is not available w/Allison transmissions. * 1300 sq inch cooling module for W900S with 2007 engine or 2013 PX-9 or ISL-G and T440 with 2010+ engines. * This cooling module is available with a 2010+ EPA compliant engines. C500 available with export engines as well as 2010+ EPA compliant engines. | STD | 0# |
| Cooling System Equipment | | | |
| 1105230 | Fan Hub: Horton 2-Speed for ISL9, ISL-G, PX-8 or PX-9 * This fan hub is required on PX-9 engines with Intended Service Logger, Concrete Ready-Mix, Mining Haulers, Heavy Equipment Transport, Refuse Packer, Oil Field Rig Mover, Oil Field Well Servicing, SnowPlow, Mining Service, Utility Vehicle, Refuse Hauler, Wrecker Service, Fire Truck Service, EMT/Rescue Service, Crane/Cherry Picker, Construction or Agriculture. | \$378 | 0# |
| 1105231 | Fan Hub: Horton On/Off for PX-9 or ISLG * ENGINE COOLING OPTIONS; For PX-9 and ISL-G only * Horton ON/OFF fan hubs are available in Linehaul, Regional Haul and Pickup & Delivery intended services. Horton ON/OFF are available in ALL intended services for Canadian/Quebec Registry. * Not available on T470. | STD | 0# |
| 1107060 | Fan Hub: Borg Warner On/Off for PX-9 or ISLG | \$22 | 0# |
| 1160105 | Radiator winterfront. * Radiator Winterfront (1160105) available only on T470 models only w/ 8090410 (Hood) * Winterfront required for T680 ISX12N models. Optional for diesel engines. | \$118 | 2# |

T440/T470: ENGINE EQUIPMENT

| Option | Description | Price | Weight |
|---------------------------------|--|---------|--------|
| Cooling System Equipment | | | |
| 1160205 | Bug screen: Front of grille on C500 ,T800, T880, and W900. Behind grille on T660, T680, and T300 (Medium Duty). | \$229 | 2# |
| 1160728 | Lower radiator drain valve Okay for use w/2010+ engine cooling modules, other than 1780 square inches. * Lower radiator drain valve is not for use with 1780 sq inch radiator, or when the chassis specifies an Allison transmission. | \$16 | 0# |
| Exhaust Systems | | | |
| 1227053 | Exhaust: Single Independent CNG Catalyst, Right Hand With Back of Cab Vertical Mounted Muffler, 2018 | \$1,188 | 0# |
| 1247019 | Exhaust: Single Horizontal CNG Catalyst With Single Horizontal Tailpipe, 2018 | \$3,500 | 0# |
| 1247033 | Exhaust: L9N Single Right Hand Under Cab Catalyst With Single Vertical Tailpipe Right Hand Side of Cab * This exhaust style is exclusive to L9N and ISX12N engines. | \$2,194 | 0# |
| 1247166 | Exhaust: 2017 EPA RH Under DPF/SCR w/ RH side of cab vertical tailpipe w/ daycabs, extended daycabs, or modular sleepers. * Not available with ISX-12. * Not available with under cab fairings. * Side of cab exhaust on T680 is not available with the high roof sleeper configuration. * The NFPA compliant grab handles are required with the NFPA kit in all cases where SOC exhaust is not specified. The grab handle installation interferes with side of cab exhaust, so in that instance the body builder is responsible for installing compliant handles. * This exhaust is only for use with a daycab or 42 inch modular sleeper. Cannot be used on 1.9m twin steer chassis, or with wide sheet metal fenders. * With this exhaust style a RH under cab step assembly is combined with a DPF/SCR cover. You will not be able to request an alternate under cab component on the RH rail. | STD | 0# |
| 1247173 | Exhaust: 2017 EPA RH Under Cab DPF/SCR w/ Single Vertical RH Back of Cab Tailpipe. Not Available w/ Sleepers. * Not available with ISX-12. * Not available with under cab fairings. * Right hand frame access ladder steps are not available with this exhaust on T680 as it has been identified as posing a safety concern due to proximity to the exhaust. * This exhaust cannot be used on 1.9m twin steer chassis, or with wide sheet metal fenders. Must use side extenders if an extended daycab is specified. Not for use with a sleeper. * With this exhaust style a RH under cab step assembly is combined with a DPF/SCR cover. You will not be able to request an alternate under cab component on the RH rail. | \$875 | 13# |

Exhaust Systems

| | | | |
|---------|--|---------|------|
| 1247178 | Exhaust: 2017 EPA RH Under Cab DPF/SCR w/ Single RH Sleeper Mounted Tailpipe. *N/A w/ FEPTO. *For use w/ AEROCAB Sleepers Only (modular sleepers use side of cab codes). * Cannot be used on 1.9m twin steer chassis, or with wide sheet metal fenders. Not for use with PX-9 engines except on the T4 series. * Cannot be used on T800SH models with a 22K rated taperleaf front spring. * Cannot be used on W900B models with a 22K rated taperleaf front spring. * Exhaust system cannot be used on T800 with the AG130 front spring. * Not available with ISX-12. * Not available with under cab fairings. * The AeroCab style exhaust is incompatible with the Allison 4500 transmission w/o PTO when used in conjunction with the AG130 front air suspension. * This exhaust restricts access for jackshaft with RH mounted PTOs. * With this exhaust style a RH under cab step assembly is combined with a DPF/SCR cover. You will not be able to request an alternate under cab component on the RH rail. | \$1,221 | 67# |
| 1247192 | Exhaust: 2017 EPA RH Under Cab DPF/SCR w/ RH Horizontal Tailpipe Below Rail. * Due to heat issues, battery boxes BOC on the RH rail are not available with this exhaust. * Not available with auxiliary transmission on T4 models. * Not available with ISX-12. * Not available with under cab fairings. * This exhaust is not available on T440/470 with wheelbase less than 182 inches. * When used on T880SH or T4 models, this exhaust is only available with a PX-9 engine. * With this exhaust style a RH under cab step assembly is combined with a DPF/SCR cover. You will not be able to request an alternate under cab component on the RH rail. | \$15 | -21# |

Exhaust Accessories

Single Tailpipes

| | | | |
|---------|--|--------|-----|
| 1290124 | Tailpipe: 5 in. single 24 in. 45 degree curved. * Single five inch diameter vertical tailpipe is for use with SCR/DPF exhaust and side of cab, side of sleeper, back of cab mounted, or independent mounted tailpipe positions. * This tailpipe does not meet the minimum length requirement of 36 inches required for use with AeroCab flattop sleepers. * This tailpipe does not meet the minimum length requirement of 48 inches required for use with AeroCab Aerodyne or Aerodynamic sleepers. * This tailpipe does not meet the minimum length requirement of 48 inches required for use with T680 high roof sleeper. * This tailpipe is available only with 2010+ engines. * This tailpipe is not available on the T440 or T470 with independent mounted SCR/DPF exhaust. | (\$58) | -3# |

Heating & Starting Aids

In-tank Fuel Heater

| | | | |
|----------------|--|-------|-----|
| 1509058 | Fuel tank heater: single Arctic Fox w/thermostat. * Arctic Fox in-tank fuel heater requires a minimum tank size of 22 inches x 56 gallons, 24.5 inches x 75 gallons, or 28.5 inches x 105 gallons. * In-tank fuel heaters are unavailable with steel fuel tank material. * ISL-G and ISX12-G engines do not utilize any fuel heat components designed for diesel engines. * Single in-tank fuel heater is for use only with one fuel tank. | \$459 | 6# |
| 1509065 | Fuel tank heater: dual Arctic Fox w/thermostat. * Arctic Fox in-tank fuel heater requires a minimum tank size of 22 inches x 56 gallons, 24.5 inches x 75 gallons, or 28.5 inches x 105 gallons. * Dual in-tank fuel heaters are for use only with two fuel tanks. * In-tank fuel heaters are unavailable with steel fuel tank material. * ISL-G and ISX12-G engines do not utilize any fuel heat components designed for diesel engines. | \$723 | 15# |

Heater Accessories

| | | | |
|----------------|--|-------|----|
| 1507008 | Block heater & oil pan heater wired to separate plugs. * This option provides two separate 15amp plugs in situations where one 20 amp plug would normally be supplied [engine/block heater wattage exceeds 1750]. | \$0 | 0# |
| 1509000 | Shutoff valves for trailer heat w/a short loop of hose. | \$141 | 0# |

Fuel Cooler

| | | | |
|----------------|---|-----|----|
| 1500029 | Kenworth Fuel Cooler Required for Cummins engines with a single fuel tank. Required for PACCAR MX-13 engine with a single fuel tank and stationary use: High RPM, low vehicle speed, sustained for longer than 1 hour. Optional for all other applications. * On the T470 the fuel cooler and power steering cooler are a single unit. Add a power steering cooler when a fuel cooler is specified. * On the T470 the fuel cooler and power steering cooler are a single unit. The power steering cooler must be added to orders specifying a single fuel tank, since a fuel cooler is required in this instance. * Required for Cummins engines with single fuel tank; for PACCAR PX-9 with single fuel tank Restricted for PACCAR MX engines w/o stationary applications (ref 0072001, 0072002, and 0072003) | STD | 0# |

This product has extended forward and reverse gear ratio coverage specifically designed for dump truck or other construction applications. *Torque Limit: 1450 pound-feet. * AMT transmissions require column mounted transmission control 8201052, 8201053. * For 62 inch AeroCab sleepers requesting a ten speed transmission and horizontal DPF/SCR exhaust the intermediate duty driveline with a single centerbearing is not available. * Fuller overdrive transmissions with 400hp+ engine and GCW exceeding 90K require a code for transmission oil cooler. * Not available with an ISX12G engine. * This transmission is available with a maximum engine torque of 1450 ft lbs. * UltraShift Plus transmissions require ABS that includes air traction control. * UltraShift Plus VCS transmissions are approved for use in pickup & delivery, linehaul, construction, concrete ready-mix, wrecker, utility, logging, mining, oil field, refuse, fire service, rescue, agriculture, crane/cherry picker, mixer, or snowplow. It is not available for use in heavy haul. * With 2007+ EPA engines the transmission gear display for AutoShift or UltraShift transmissions will be located in the Kenworth Driver Information Center. | \$12,499 | 453# |
| 2058422 | Fuller Advantage Automated FAO-14810C-EA3 10SPD No Cooler w/ HSA *Use w/ 2250385 Only. * AMT transmissions require column mounted transmission control 8201052, 8201053. * For use with clutch for Ultrashift or Fuller Advantage * Limited to 100,000 GCW. * The combination of ISX12G and EA3 Transmissions is restricted to only Linehaul and Regional Haul Applications for the US and Canada * This transmission is approved for use in pickup & delivery, linehaul, construction, concrete ready-mix, wrecker, utility, logging, mining, oil field, refuse, fire service, rescue, agriculture, crane/cherry picker, mixer, or snowplow. It is not available for use in heavy haul. * This transmission is available with a maximum engine torque of 1450 ft lbs. | \$7,444 | 367# |
| 11-Speed | | | |
| 2057420 | Transmission: Eaton FO-14E309ALL-VMS UltraShift Plus 11-speed w/Hill Start Aid feature. Standard with synthetic lubricant. This product has a deep drive ratio intended for use in mixer applications, or where deep reduction is needed. *Torque Limit: 1450 pound-feet. * AMT transmissions require column mounted transmission control 8201052, 8201053. * Fuller overdrive transmissions with 400hp+ engine and GCW exceeding 90K require a code for transmission oil cooler. * Not available with an ISX12G engine. * The UltraShift Plus VMS requires written manufacturers approval when used in vocations of linehaul, regional haul, city delivery, logging, oil field, or mining services. * This transmission is available with a maximum engine torque of 1450 ft lbs. * UltraShift Plus transmissions require ABS that includes air traction control. * UltraShift Plus VMS transmissions are not approved for use in heavy haul applications. * With 2007+ EPA engines the transmission gear display for AutoShift or UltraShift transmissions will be located in the Kenworth Driver Information Center. | \$14,134 | 453# |

5-Speed

| | | | |
|--|--|----------|------|
| 2011192 | Transmission: Allison 3000HS 5-speed w/o PTO drive gear. 5th Gen Controls. Includes heat exchanger & oil level sensor. Highway Service only as defined by Allison. CTransynd transmission fluid is standard on all Allison 1000, 2000, 3000 & 4000 series transmissions. | \$12,722 | 244# |
| * A PTO provision is not available with this Allison transmission. | | | |
| * Allison 3000 series transmissions are only available with MX-11 (0700192, and 0700198), or ISX12 (0125719, 0125730) engines. | | | |
| * Allison 3000-series transmissions are for use with engines rated at 370 HP or less. | | | |
| * Allison transmissions require the additional selection of a push button or lever shift module. | | | |
| * The Allison 3000 series transmissions will accept engine torque up to 1250 ft lbs. | | | |
| * The Allison 3000RDS is available on the T800 with a short hood [T800SH] or W900 with a sloped hood [W900S] due to PX-9 engine limitation, T680 and T4 series models only. Limited to use in linehaul or pick-up and delivery services only. For emergency services of fire or EMT/rescue use the EVS version. For other vocations use the RDS version. | | | |
| * There is no PTO provision available with this transmission. If a PTO will be required in the future use the RDS series transmission. | | | |

| Allison | | | |
| 5-Speed | | | |
| 2011203 | Transmission: Allison 3000RDS 5-speed w/PTO drive gear. 5th Gen Controls. Includes heat exchanger & oil level sensor. Rugged Duty Series for vocational applications. Transynd transmission fluid is standard on all Allison 1000, 2000, 3000 & 4000 series transmissions. Requires a push button shift control code. Oil temperature gauge is standard on class 8 models. * Allison 3000 series transmissions are only available with MX-11 (0700192, and 0700198), or ISX12 (0125719, 0125730) engines. * Allison 3000-series transmissions are for use with engines rated at 370 HP or less. * Allison transmissions require the additional selection of a push button or lever shift module. * The Allison 3000 series transmissions will accept engine torque up to 1250 ft lbs. * The maximum GVWR for this transmission when used in mixer or refuse service is 60,000 lbs. | \$14,198 | 291# |
| 2011228 | Transmission: Allison 3500RDS 5-speed w/PTO drive gear. Limited to 860 lb.-ft. 5th Gen controls. Includes heat exchanger & oil level sensor. Rugged Duty Series for vocational applications. Transynd transmission fluid is standard on all Allison 1000, 2000, 3000 & 4000 series transmissions. * Allison transmissions require the additional selection of a push button or lever shift module. * The Allison 3500RDS is available on the T880 short hood, T880 set forward, W900 sloped hood due to PX-9 engine limitation, and T4 series models only. Not available for emergency services of fire or EMT/rescue. * This transmission is available with a maximum engine torque of 1050 ft lbs. | \$14,877 | 291# |
| 2012193 | Transmission: Allison 3000EVS 5-speed w/PTO drive gear. 5th Gen controls. Includes heat exchanger & oil level sensor. Emergency Vehicle Series for vocational applications. Transynd transmission fluid is standard on all Allison 1000, 2000, 3000 & 4000 series transmissions. * A PTO provision is not available with this Allison transmission. * Allison 3000 series transmissions are only available with MX-11 (0700192, and 0700198), or ISX12 (0125719, 0125730) engines. * Allison EVS transmissions are not available with ISL-G or ISX12-G engines. * Allison transmissions require the additional selection of a push button or lever shift module. * Available for T800, T4 series or W900S with a PX-9. EVS transmissions are available only for fire or EMT/rescue service. * The Allison 3000 series transmissions will accept engine torque up to 1250 ft lbs. * The Allison 3000EVS is limited to emergency services only. See HS or RDS version for services other than fire or EMT/rescue. | \$16,523 | 291# |
| 2016153 | Transmission: Allison 4000RDS 5-speed w/o Retarder w/PTO provision 5th generation. For vocational applications. Includes shift control, transmission oil temperature gauge, oil level sensor & heat exchanger. Transynd transmission fluid is standard on all Allison 1000, 2000, 3000 & 4000 series transmissions. * Allison RDS transmissions are restricted to 1550 ft lbs of engine torque when used as a refuse hauler. * Allison transmissions require the additional selection of a push button or lever shift module. * This transmission is available with a maximum engine torque of 1850 ft lbs. | \$27,699 | 647# |
| 2016156 | Transmission: Allison 4500RDS 5-speed w/o Retarder w/PTO provision 5th generation. For vocational applications. Includes shift control, transmission oil temperature gauge, oil level sensor & heat exchanger. Transynd transmission fluid is standard on all Allison 1000, 2000, 3000 & 4000 series transmissions. * Allison RDS transmissions are restricted to 1550 ft lbs of engine torque when used as a refuse hauler. * Allison transmissions are not available on the W900L. * Allison transmissions require the additional selection of a push button or lever shift module. * This transmission is available with a maximum engine torque of 1850 ft lbs. | \$29,443 | 647# |

|--------|-------------|-------|--------|

Front Springs

15K & Over Capacity

| | | | |
|----------------|---|---------|------|
| 2867022 | Front Springs: Taperleaf 22K w/shock absorbers. C500 standard with a single stage spring and threaded pins. T800/T880/T440/T470/W900B standard with a multi-stage spring and rubber pins. For T800/T880/T440/T470/W9B, this is a three stage spring. The spring rate increases when loaded closer to the full capacity of the spring. Not available on W900L or W900S. * 22K rated taperleaf front spring are not for use on C500 with front drive axle * Aluminum front drive bracket is not for use with front springs rated at 16k or greater. * Iron shackle brackets are standard with a spring capacity of 16K or greater , no code required. * Springs for use with 20K capacity or greater front axles. * These front springs are not available on the W900S. * These springs are not for use on the W900L. | \$2,155 | 426# |
|----------------|---|---------|------|

Front Spring Equipment

| | | | |
|----------------|--|------|----|
| 2900020 | Front Frame Raised: 1/2 in. * Available with T4 and these front springs (2864016, 2865018, 2866020, 2867022) * Available with T800, T880 or W990 and these front springs (2884000, 2864016, 2865018, 2866020, 2867022, 2866025, 2867027) * Available with W900S and front springs 2866020 | \$19 | 0# |
| 2900024 | Front Frame Raised: 1 in. * Available with T4 and these front springs (2864016, 2865018, 2866020, 2867022) * Available with T800, T880 or W990 and these front springs (2884000, 2864016, 2865018, 2866020, 2867022, 2866025, 2867027) * Available with W900B and these front springs (2864016, 2864019, 2865018, 2866021, 2867022) * Available with W900S and front springs 2866020 | \$39 | 0# |
| 2900615 | Threaded bushings for taperleaf springs 12K - 14.6K replacing rubber: T6/T8, W900B, W990. W9L gets as standard: code not required. Not available with W9S. 13K - 14.6K for T370. * Front spring threaded bushing code 2900615 is only available with 12K-14.6K taperleaf springs. * Front spring threaded bushings are standard on W900L, no code required. | \$44 | 0# |
| 2900616 | Threaded Bushings for taperleaf spring 16K, 18/20K, 22K, 40K replacing rubber. * Front spring threaded bushing code 2900616 is only available with 16K, 18K, 20K, 22K and 40K taperleaf springs. * Front spring threaded bushings are standard on W900L, no code required. | \$88 | 0# |

Power Steering

Single Gear

| | | | |
|----------------|---|------|-----|
| 2893651 | Single power steering gear: 13.2K TRW TAS65. * Creep loading of the front axle with pushers raised may compromise park-steer performance with a TAS65, M100P, or HD94 single gear is used with a single lift axle, or a TAS85, SD110 or M110P single gear is used with more than one lift axle. * Single light weight steering gears are not for use with 2900702 (setback axle W900S). * Single power steering gear rated to 13.2K is compatible with front axle capacities under 20K. * Steering gear for single front axle installations only. | \$86 | -1# |
|----------------|---|------|-----|

Power Steering

Single Gear

| | | | |
|----------------|--|-------|-----|
| 2893881 | Single power steering gear: 16K TRW TAS85 W900B/W990 available, but not available W900S, W900L or T3. * Creep loading of the front axle with pushers raised may compromise park-steer performance with a TAS65, M100P, or HD94 single gear is used with a single lift axle, or a TAS85, SD110 or M110P single gear is used with more than one lift axle. * Iron front drive brackets are required on T4 Series, T660, T800, T880 and W900B models when a single TAS85 power steering gear is specified. The upgraded drive bracket is standard with front spring capacities over 14.6K. * Single light weight steering gears are not for use with 2900702 (setback axle W900S). * Single power steering gear rated to 16K is compatible with front axle capacities up to 20K. * Single TAS85 power steering gear is not available on W900S or W900L. * Steering gear for single front axle installations only. * The creep loading of the front axle [load with lift axle raised] may compromise park-steer performance with a single power steering gear and a non-steerable pusher. Consider using dual steering gears in this application. | \$404 | 18# |
| 2895121 | Single power steering gear: 13.2K Sheppard M100P. * Creep loading of the front axle with pushers raised may compromise park-steer performance with a TAS65, M100P, or HD94 single gear is used with a single lift axle, or a TAS85, SD110 or M110P single gear is used with more than one lift axle. * Single light weight steering gears are not for use with 2900702 (setback axle W900S). * Single power steering gear rated to 13.2K is compatible with front axle capacities under 20K. * Steering gear for single front axle installations only. | STD | 0# |

Dual Gear

| | | | |
|----------------|--|---------|-----|
| 2893622 | Dual power steering gears: 20K TRW TAS65. * Dual power steering gears rated to 20K are not compatible with axles rated at 14.6K or below, except on the W900L. Will derate the D2200 front axle to 20K. * Dual, triple, or quadruple power steering gears require the use of a power steering cooler. * Steering gear for single front axle installations only. * The creep loading of the front axle [load with lift axle raised] may compromise park-steer performance with this capacity power steering gears and three pushers. Consider using larger capacity dual gears in this application. | \$1,340 | 60# |
| 2893662 | Dual power steering gears: 22K TRW TAS65. * Dual power steering gear rated at 22K is available with the D2200 front axle only. * Dual, triple, or quadruple power steering gears require the use of a power steering cooler. * Steering gear for single front axle installations only. * The creep loading of the front axle [load with lift axle raised] may compromise park-steer performance with this capacity power steering gears and three pushers. Consider using larger capacity dual gears in this application. | \$1,340 | 60# |

| 3031094 | Single Dana Spicer P22060S single reduction rear axle. T300/K300: use with/air brakes. Single rear axle 22K capacity rated at 21K. | (\$763) | -117# |
|---------|--|---------|-------|

- * Available for intended services of linehaul, regional haul, or pick-up and delivery only.
- * Factory and customer installed pusher axles are not available with single rear axles.
- * For single rear axle installations the manufacturer's application guideline will be the final authority on ratio approval.
- * In most cases single rear axles are available with engines where torque does not exceed 1650 ft lbs.
- * P22060S rear axle cannot be specified with PX-9 engines with torque in excess of 950 ft lbs.
- * RSD compliant chassis with single rear axles are not available with steer axle GAWR greater than 14.6K.
- * RSD compliant vehicles with single rear axle are limited to a maximum rear GAWR of 23,000 lbs.
- * RSD compliant vehicles with single rear axle are not available with any lift axles.
- * This rear axle is incompatible with intermediate duty drivelines.
- * With a single rear axle and a tag, both rear axle and rear suspension must be rated at 26k or higher. Final approval of this setup is contingent upon creep rating review and approval by Kenworth Technical Support.

Engine torque limit for Pickup & Delivery applications is 1850 ft-lb. All other applications is 1650 ft-lb. Contact Kenworth Application Engineering for GCWR limits for applications other than Linehaul. * Wide base single tires are not available on Meritor MT40-14x3, MT40-14x4, MP40-14x3, MP40-14x4, MT44-14x5 or MP44-14x5 standard axles. | | |

T440/T470: REAR AXLE

| Option | Description | Price | Weight |
|-------------------------------|---|---------|--------|
| Tandem Drive Rear Axle | | | |
| 40K & Under | | | |
| 3122248 | Dual Meritor MT40-14x4 Hypoid DualTrac rear axle rated at 40K. w/heavy-wall housing. Tandem rear axles. * 6S/6M ABS systems are required on RSD tractors (all US, Canada, or Mexico (with EPA2010+ engines) chassis with factory- or customer-installed fifth wheel with rear GAWR under 29K per axle, except twin steer chassis) with the following configuration: Tandem rear axle with steer axle GAWR up to and including 14.6K and drive axle GAWR over 40K. * A Meritor MT40-14 drive axle with any suspension other than AG380 and AG400L and axle ratio between 2.64-7.17 requires the use of hypoid gearing. * A Meritor MT40-14 drive axle with the combination of AG380 or AG400L suspension, axle ratio between 2.47-4.11 and diff lock requires the use of hypoid gearing. * A Meritor MT40-14 drive axle with the combination of AG380 or AG400L suspension, axle ratio between 4.33-7.17 requires the use of hypoid gearing. * Meritor Dualtrac axles using single wheels/tires require one of the following wheels: 5245278 or 5245215. Dual wheels and tires are also allowed. * The MT40-14x3 and MT40-14x4 rear axles can be used in Linehaul operation with engine torque up to 2050 ft-lb with GCWR up to 80,000 lbs or 1850 ft-lb with GCWR up to 105,000 lbs. Engine torque limit for Pickup & Delivery applications is 1850 ft-lb. All other applications is 1650 ft-lb. Contact Kenworth Application Engineering for GCWR limits for applications other than Linehaul. | \$9,838 | 797# |
| 3122250 | Dual Meritor MP40-14x3 rear axle rated at 40K. Tandem rear axles with pump. * Can be used in Linehaul operation with engine torque up to 2050 ft-lb with GCWR up to 80,000 lbs or 1850 ft-lb with GCWR up to 105,000 lbs. Engine torque limit for Pickup & Delivery applications is 1850 ft-lb. All other applications is 1650 ft-lb. Contact Kenworth Application Engineering for GCWR limits for applications other than Linehaul. * Maximum Vocational Warranty coverage may not be available from Meritor with this rear axle used in Logger, Construction, or Heavy Haul vocations. Contact Meritor for further information. * Not compatible with Hendrickson Primaax, Hendrickson HAS, Neway AD, Chalmers or Hendrickson Beam rear suspensions. * Wide base single tires are not available on Meritor MT40-14x3, MT40-14x4, MP40-14x3, MP40-14x4, MT44-14x5 or MP44-14x5 standard axles. | \$9,288 | 735# |
| 3122251 | Dual Meritor MP40-14x3 DualTrac rear axle rated at 40K. Tandem rear axles with pump. * Can be used in Linehaul operation with engine torque up to 2050 ft-lb with GCWR up to 80,000 lbs or 1850 ft-lb with GCWR up to 105,000 lbs. Engine torque limit for Pickup & Delivery applications is 1850 ft-lb. All other applications is 1650 ft-lb. Contact Kenworth Application Engineering for GCWR limits for applications other than Linehaul. * Maximum Vocational Warranty coverage may not be available from Meritor with this rear axle used in Logger, Construction, or Heavy Haul vocations. Contact Meritor for further information. * Meritor Dualtrac axles using single wheels/tires require one of the following wheels: 5245278 or 5245215. Dual wheels and tires are also allowed. * Not compatible with Hendrickson Primaax, Hendrickson HAS, Neway AD, Chalmers or Hendrickson Beam rear suspensions. | \$9,930 | 767# |
| 3122252 | Dual Meritor MP40-14x4 rear axle rated at 40K. w/ heavy-wall housing with pump. Tandem rear axles. * Can be used in Linehaul operation with engine torque up to 2050 ft-lb with GCWR up to 80,000 lbs or 1850 ft-lb with GCWR up to 105,000 lbs. Engine torque limit for Pickup & Delivery applications is 1850 ft-lb. All other applications is 1650 ft-lb. Single Axle Outer End Equipment

Brakes

| | | | |
|----------------|--|--------|-----|
| 3302001 | Single rear Bendix air disc brakes for single rear axles to 23K capacity. * Air disc brakes on rear axle requires the use of air disc brakes on the front axle of the chassis. * Maximum capacity for single axle air disc brakes is 23K with aluminum hubs and 26K with iron hubs. * Rear air disc brakes are not compatible with HAS or Reyco rear suspensions. * Single rear axle air disc brake. The disc brakes require splined rotors. Requires Preset Plus oil seals. Slack adjusters are included. * Specifying air disc brakes on any axle requires that the wheels on all axles be air disc brake compatible, including any lift axles. * The maximum GVWR for a single rear axle chassis equipped with air disc brakes is 47K. * The static loaded radius of the rear tires cannot exceed 21.9 inches when air disc brakes are specified. This SLR is typical with tires smaller than 48 inches in diameter. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use an RSD-compliant brake code instead. | \$31 | 20# |
| 3304010 | Rear Brakes, Bendix RSD-Compliant HP-ES S-Cam 16.5x7 in. single axle drum brake, Max GAWR 23k. * Maximum axle GAWR for this code: 23,000 lbs. * RSD vehicles with Bendix brakes are not available with multiple lift axles or with tag axles. One pusher (other than 8k or 10k) is allowed. | (\$38) | 10# |
| 3306012 | Rear Brakes, Bendix RSD-Compliant ADB22X Disc brake for single axle, Max GAWR 23k. * Air disc brakes on rear axle requires the use of air disc brakes on the steer axle as well. * Maximum axle GAWR for this code: 23,000 lbs. * Rear air disc brakes are not compatible with HAS or Reyco rear suspensions. * RSD vehicles with Bendix brakes are not available with multiple lift axles or with tag axles. One pusher (other than 8k or 10k) is allowed. * Single rear axle air disc brake. The disc brakes require splined rotors. Requires Preset Plus oil seals. Slack adjusters are included. | \$28 | 20# |
| 3330004 | Single Rear Brakes 16-1/2x7 in. Bendix ES- extended service S-cam. * Bendix ES 16-1/2 x 7 inch rear brakes are not available with request for Extended Warranty. * These rear brakes are applicable for use with a single rear axle. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use an RSD-compliant brake code instead. | STD | 0# |

Tandem Axle Outer End Equipment

Spring Brake & Service Chambers

Dual

| | | | |
|----------------|---|-------|-----|
| 3485207 | Spring Brake: 3030 long stroke dual 30 square inches travel; replaces standard 2-1/2 in. travel. Helps keep brakes in adjustment longer. * 3030 high output spring brakes for tandem rear axles when no more than one pusher axle is specified. * Long stroke brake chambers are not compatible with Neway AD rear suspensions. There is no option for inverted or high mounting these chambers. * Long stroke brake chambers are required for RSD-compliant chassis with drum brakes. * Spring brakes with 3030 chamber size for use on tandem rear axle with capacities up to 52K. Not for use in fire service. | \$24 | 4# |
| 3485208 | Spring Brake: 3036 dual 30 square inches; 36 square inches spring chamber. * 3036 spring brake chambers for use on tandem rear axle capacities up to 58K. Not available for fire service, see 3636 chamber size. * Multiple lift axles require the use of 3036 spring brake chambers. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use long stroke brake chambers instead. | \$188 | 16# |
| 3485209 | Spring Brake: 3030 high output dual. * 3030 high output spring brakes for tandem rear axles when no more than one pusher axle is specified. * Neway AD390 rear suspension requires high output spring brakes when used with drum brakes on axles other than Sisu. Sisu rear axles utilize a spring brake that is acceptable for use with this suspension. This doesn't apply to K500. * This code not available with any RSD-Compliant vehicle (Tractor for US, Canada, or Mexico with 2010+ EPA engine). Use long stroke brake chambers instead. | \$0 | 0# |
| 3485213 | Spring Brake: 3036 long stroke dual 30 square inches; 36 square inches spring chamber. * 3036 Longstroke brake chambers are not available with Neway ADZ suspensions. * 3036 spring brake chambers for use on tandem rear axle capacities up to 58K. Not available for fire service, see 3636 chamber size. * Long stroke brake chambers are not compatible with Neway AD rear suspensions. There is no option for inverted or high mounting these chambers. * Long stroke brake chambers are required for RSD-compliant chassis with drum brakes. * Not available with Kenworth AG380 rear suspension. | \$238 | 16# |

Brake Equipment

| | | | |
|----------------|--|------|----|
| 3500006 | Inverted chambers for 16-1/2 x 7 in. brakes; Replaces standard mount w/ higher mount. * Inverted rear brake chambers are only available on Chalmers or Hendrickson beam type rear suspensions. The option will not work with Chalmers low mount suspension requesting 3036 brake chambers. Not available with Hendrickson HMX with saddle height below 17.5 inches. * Recommended for asphalt spreaders. * The option to invert rear brake chambers is not available with an LMS brake package or with axle capacities of 58K or greater. Not for use with air disc brakes. | \$10 | 0# |
| 3500012 | Replace standard mount w/ high mount for rear rear axle brake chambers. * High mount brake chambers are not available with some high capacity rear axles where the chambers are already in the highest possible position. * High mounted rear brake chambers are applicable to high mount Chalmers, standard height Hendrickson HMX except with 3036 chamber size, or Hendrickson beam suspensions other than HMX with 16.5 inch [low] saddle height. | \$0 | 0# |

| Tandem Axle Outer End Equipment | | | |
| Brake Equipment | | | |
| 3500021 | Brake cam tube bracket required w/ wide base tires w/ Airglide 380, 400, 400L, 460, 690 & Primaax suspension. * 50R/22.5 or 55R/22.5 rear tires require the use of a brake camshaft tube brace in applications other than with Meritor rear brakes, air disc brakes on rear axle, or with a Reyco rear suspension. * Brake camshaft tube brace is not available with Reyco rear suspensions, rear air disc brakes, axles rated over 46K, or Meritor rear brakes. | \$0 | 4# |
| Differential Lock & Crosslock | | | |
| 3511400 | Driver Controlled Differential Lock (Crosslock) for Meritor Axles 40K to 52K forward rear axle. Under Speed Interlock is standard on T680. * Crosslock for tandem rear axles rated under 58k. Not available on dead axle tandem installations. | \$1,212 | 19# |
| 3511401 | Driver Controlled Differential Lock (Crosslock) for FUELite MA40-165. * Bendix eTrac traction enhancement system requires differential lock code 3531001 (Dana) OR 3511401 (Meritor). * Meritor FUELite dead axle tandem requires differential lock code 3511401. | \$1,250 | 0# |
| 3511410 | Driver Controlled Differential Lock (Crosslock) for Meritor Axles 40K to 58K rear rear axle. Under Speed Interlock is standard on T680. * Crosslock for tandem rear axles rated under 58k. Not available on dead axle tandem installations. | \$1,297 | 19# |
| 3511420 | Driver Controlled Differential Lock (Crosslock) for Meritor Axles 40K to 52K forward rear & rear rear axle. Under Speed Interlock is standard on T680. * Crosslock for tandem rear axles rated under 58k. Not available on dead axle tandem installations. * Engagement of both traction control devices may seriously impair the steering of the vehicle. Use code 3573110, 3573111, or 3573112 to provide separate switches and help alleviate the issue. | \$2,246 | 39# |
| 3511500 | Driver Controlled Differential Lock (Crosslock) for Paccar Axles 40K rated, forward rear axle, with cab control. | \$1,181 | 19# |
| 3532120 | Wheel Differential Lock for Dana Spicer axles DSH40(P)/DSH44(P)/DSP40(P)/DSP41(P)/D40-145(P)(H)(S)/D40-155 forward rear axle. Under Speed Interlock is standard on T680. | \$1,211 | 22# |
| 3532125 | Wheel Differential Lock for Dana Spicer axles DSP40/DSP41(P)/DSH40(P)/DSH44(P)/D40-155 rear rear axle. Under Speed Interlock is standard on T680. * Wheel diff lock option in rearmost tandem axle for use on DS404, DS405, DS454, DSH40,DSH44, DSP40, or DSP41 rear axles. | \$1,277 | 15# |
| 3532130 | Wheel Differential Lock for Dana Spicer axles DSP40/DSP41(P)/DSH40(P)/DSH44(P)/D40-155 forward rear axle & rear rear. Under Speed Interlock is standard on T680. * Engagement of both traction control devices may seriously impair the steering of the vehicle. Use code 3573110, 3573111, or 3573112 to provide separate switches and help alleviate the issue. * Wheel diff lock option in both tandem axles for use on DS404, DS405, DS454, DSH40,DSH44, DSP40, DSP41 or Advantec rear axles. | \$2,339 | 37# |
| 3532190 | Wheel Differential Lock for Dana Spicer axles D40-170/172(P)/D46-170/172(H)(P)(WT) forward rear axle. Under Speed Interlock is standard on T680. * Traction control device for use with Dana Spicer D40-172 or D46-172 rear axles. | \$1,243 | 55# |
| 3532191 | Wheel Differential Lock for Dana Spicer axles D52-190P or D46-590HP forward rear axle. * Traction control device for use with Dana Spicer D52-190 or D46-590 rear axles. | \$1,061 | 19# |

Anti-Lock Brake System

4-Channel

| | | | |
|---------|---|---------|-----|
| 3495226 | Bendix 4S/4M anti-lock brake system. | STD | 0# |
| 3495228 | Bendix 4S/4M anti-lock brake system w/ air traction control (ATC). | \$617 | 2# |
| 3495229 | Bendix 4S/4M anti-lock brake system w/ air traction control (ATC) & electronic stability program (ESP) for tractor. | \$2,145 | 11# |

* Bendix 4S/4M anti-lock brake system with Electronic Stability Program (ESP) and Meritor Wabco 4S/4M anti-lock brake system with Electronic Stability Control (ESC) are available for use with tractors and single rear axle full trucks.

* Bendix electronic stability program (ESP) is not available with options that indicate customer-installed lift axles such as clear frame space for customer-installed lift axles, lift axle controls, Kenworth-installed air systems and controls (3828801), pusher location codes, etc..

* Electronic Stability Control (ESC) is required on all US and Canadian tractors (with EPA2010+ engines) with a gross vehicle weight rating greater than 26k, an assigned front axle rating of 14.6k or less, and tandem rear drive axles with an assigned rear axle rating of 45k or less. This requirement does not apply to chassis with factory-installed lift axles.

* ESP is restricted based on the following specifications:

- Model
- Vocation
- Towing Connections
- Drive Configuration
- Wheelbase
- Front Axle
- Front Axle GAWR
- Front Suspension
- Steering Gear
- Front Brakes
- Rear Axle(s) GAWR
- Rear Suspension
- Rear Brakes
- Auxiliary Axle(s)

See Truck Sales/Applications Guidelines on DealerNet for ESP restrictions.

* Not available with pre-2010 EPA emission engines.

Customer-Installed Lift Axles

Kenworth-Offered Lift Axles

Customer-Installed Information Codes

| | | | |
|---|--|-----|----|
| 3840220 | Customer-installed: Non-steerable tag information. Watson Chalin AL2200. The rail will be drilled for the installation. | \$0 | 0# |
| 3840221 | Customer-installed: Steerable pusher information. Watson Chalin SL1093SSR. Kenworth will provide frame and driveline layout the same as for a factory installed axle. The rail will be drilled for the installation. Clearances and design are based upon the Kenworth standard tire and a location code | \$0 | 0# |
| * Factory and customer installed pusher axles are not available with single rear axles. | | | |

Clear Frame Request

| | | | |
|--|--|---------|----|
| 3840005 | Clear frame: For 1 customer-installed steerable Kenworth offered pusher axle. Kenworth will provide frame and driveline layout the same as for a factory installed axle. The rail will not be drilled for the installation. Clearances and design are based upon the Kenworth standard tire, the selected lift axle type, and a location code. Type and axle spacing required. | \$1,132 | 0# |
| * Vehicles with lift axles have special engineering needs. It is not uncommon to be asked to add wheelbase, an additional driveline centerbearing, or to relocate components on these chassis. | | | |
| 3840010 | Clear frame for 2 customer-installed steerable Kenworth offered pusher axles. Type and axle spacing required. | \$1,132 | 0# |
| * Contingent on acceptable frame strength and creep loading. GAWR and GVW may need to be limited to be compliant. | | | |
| * Vehicles with lift axles have special engineering needs. It is not uncommon to be asked to add wheelbase, an additional driveline centerbearing, or to relocate components on these chassis. | | | |
| 3840015 | Clear frame: For 3 customer-installed steerable Kenworth offered pusher axles. Type and axle spacing required. | \$1,332 | 0# |
| * Contingent on acceptable frame strength and creep loading. GAWR and GVW may need to be limited to be compliant. | | | |
| * Vehicles with lift axles have special engineering needs. It is not uncommon to be asked to add wheelbase, an additional driveline centerbearing, or to relocate components on these chassis. | | | |
| 3840020 | Clear frame: For 1 customer-installed non-steerable Kenworth offered pusher axle. Kenworth will provide frame and driveline layout the same as for a factory installed axle. The rail will not be drilled for the installation. Clearances and design are based upon the Kenworth standard tire, the selected lift axle type, and a location code. Type and axle spacing required. | \$1,132 | 0# |
| * Vehicles with lift axles have special engineering needs. It is not uncommon to be asked to add wheelbase, an additional driveline centerbearing, or to relocate components on these chassis. | | | |

Non-Kenworth-Offered Lift Axles

Clear Frame Request

| | | | |
|--|---|---------|----|
| 3840300 | Clear frame: For 1 customer-installed non-Kenworth offered steerable pusher. Kenworth will provide clear frame 34 inches ahead and 24 inches behind the coded location. Intermediate, centerbearing and forward suspension crossmembers may be located within the clear frame area. The driveline will be installed as if there were no lift axle on the truck. The lift axle installer must address any driveline clearance issues. | \$1,132 | 0# |
| * Vehicles with lift axles have special engineering needs. It is not uncommon to be asked to add wheelbase, an additional driveline centerbearing, or to relocate components on these chassis. | | | |
| 3840350 | Clear frame: For 1 customer-installed non steerable, non-Kenworth offered pusher. Kenworth will provide clear frame 29 inches ahead and 24 inches behind the coded location. Intermediate, centerbearing and forward suspension crossmembers may be located within the clear frame area. The driveline will be installed as if there were no lift axle on the truck. The lift axle installer must address any driveline clearance issues. | \$1,132 | 0# |
| * Vehicles with lift axles have special engineering needs. It is not uncommon to be asked to add wheelbase, an additional driveline centerbearing, or to relocate components on these chassis. | | | |

T440/T470: REAR SUSPENSION

| Option | Description | Price | Weight |
|------------------------|---|---------|--------|
| Single | | | |
| 31K & Under | | | |
| 3626478 | Rear suspension: single Reyco 79KB taperleaf 21K. Unladen Height: 11.0 in. Laden Height: 9.4 in. Not available with shocks or swaybars. * Rear air disc brakes are not compatible with HAS or Reyco rear suspensions. * Rear air disc brakes are not compatible with Reyco 79KB rear suspensions. * Reyco 79KB rear suspension for the T4 series with axles rated at 23K or less. Not appropriate for fire apparatus body. * Reyco 79KB rear suspensions are not for use with a lift axle. | STD | 0# |
| 3630023 | Rear suspension: single Kenworth Airglide 230 23K 4-bag air suspension w/10.5 in. ride height. Includes shocks and torque rods. Includes air suspension dump valve. * Air suspensions used on dump trucks, trailer dumps, or with no tilt fifth wheels will require the feature which automatically dumps the air from the suspension when PTO is engaged. This allows the suspension to deflate while hoist is up and helps alleviate any imbalance that can occur with air bags inflated. * Air suspensions, with the exception of Hendrickson PRIMAAX 3752027, are not available for use in mixer service. * The AG230 rear suspension is limited in application. Services of logger, concrete ready-mix, mining hauler, mining service, heavy equipment transport, refuse packer, and oil field rig move are not permitted. Refer to DealerNet for detailed information. * The Kenworth AG230 is not available with dual leveling valves or over inflation valve. * This rear suspension is for use with Dana S21/S23/S26 series or Meritor RS23- 160/161 rear axles. * This rear suspension is not available with body types of concrete mixer, booster-axle mixer, logger, oil field rig-up, refuse loader/packer, stone slinger, super dump, transfer dump, coil tubing unit, cotton module, crane/boom, or self-loading logger are not permitted. Refer to DealerNet for detailed information. * This rear suspension is not available with trailer types of end dump or logger. Refer to DealerNet for detailed information. | \$2,130 | 113# |
| 3632270 | Rear suspension: single Hendrickson HAS230 23K. W/aluminum crossmembers & gussets. Air suspension w/10 in. height. Maximum torque is 1350 lb-ft. Includes air suspension dump valve. * Air suspensions used on dump trucks, trailer dumps, or with no tilt fifth wheels will require the feature which automatically dumps the air from the suspension when PTO is engaged. This allows the suspension to deflate while hoist is up and helps alleviate any imbalance that can occur with air bags inflated. * Air suspensions, with the exception of Hendrickson PRIMAAX 3752027, are not available for use in mixer service. * Engineering review and/or vendor approval will be required for Hendrickson air suspensions used as fire trucks. * Hendrickson air suspensions are not available with body types that have a high center of gravity such as logger, mixer, roll-off, concrete pump, oil field rig-up, oil well service, drilling derrick, or crane/boom operation. * Hendrickson HAS single axle rear suspensions cannot exceed 1350 ft. lb. engine torque. * Hendrickson HAS suspensions are not available with rear axle ratios numerically greater [slower] than 4.60. * Hendrickson HAS suspensions are not available with refuse packer applications. * Rear air disc brakes are not compatible with HAS or Reyco rear suspensions. * Rear air disc brakes are not compatible with Hendrickson HAS or Reyco 102 rear suspensions * Without an EDGE kit the Hendrickson HAS230 can be used with engine torque up to 1050 ft lbs. The EDGE kit option 3832020 is required when engine torque exceeds this limit. Reference TE1461. | \$680 | -83# |

| Tandem | | | |
| 40K & Under | | | |
| Hendrickson | | | |
| 3732105 | Rear suspension: Tandem Hendrickson HAS402 40K. 52 in. axle spacing. Aluminum crossmember & gussets w/shocks at 10 in. height. Includes air suspension dump valve. * Advertised axle spacing for this rear suspension is a nominal value. Actual spacing may be up to two inches greater than noted. This is important in situations where the body is likely to be pre-built before the chassis is delivered. Tire to body or bracket to body interference may be encountered. Communicate clear space requirements on the sales order. * Air suspensions used on dump trucks, trailer dumps, or with no tilt fifth wheels will require the feature which automatically dumps the air from the suspension when PTO is engaged. This allows the suspension to deflate while hoist is up and helps alleviate any imbalance that can occur with air bags inflated. * Air suspensions, with the exception of Hendrickson PRIMAAX 3752027, are not available for use in mixer service. * DSP40/P rear axles are not for use with Hendrickson HAS 402, Hendrickson Primaax, or Hendrickson beam-type rear suspensions. * Engineering review and/or vendor approval will be required for Hendrickson air suspensions used as fire trucks. * Hendrickson air suspensions are not available with body types that have a high center of gravity such as logger, mixer, roll-off, concrete pump, oil field rig-up, oil well service, drilling derrick, or crane/boom operation. * Hendrickson HAS suspensions are not available with rear axle ratios numerically greater [slower] than 4.60. * Hendrickson HAS suspensions are not available with refuse packer applications. * Optional dual air suspension leveling valves are not available on Kenworth AG380, Kenworth AG400L, or Hendrickson HAS. This is not an option for Neway ADZ tridem, Kenworth AG690 or Primaax tridem suspensions which are standard with dual valves. * Rear air disc brakes are not compatible with Hendrickson HAS or Reyco 102 rear suspensions * The EDGE kit option 3832020 is required by Hendrickson to help combat frame rise during torque application on HAS402 rear suspensions. * The Hendrickson HAS402 rear suspension is not compatible with multiple lift axles. * The maximum front axle rating for the use with the Hendrickson HAS rear suspension is 16,000 lbs. This is the assigned rating, not a limitation of the component capacities. * The upper torque limit for Hendrickson HAS402 suspensions is 1650 ft lbs. No GCW in excess of 80K is acceptable. | \$4,635 | 467# |
| 3732970 | Tandem Hendrickson HAULMAAX (HMX) 400 40K. 54 in. axle spacing. With shocks and 16.5 in. saddle height. Unladen Height: 10.6 in. Laden Height: 9.5 in. * Advertised axle spacing for this rear suspension is a nominal value. Actual spacing may be up to two inches greater than noted. This is important in situations where the body is likely to be pre-built before the chassis is delivered. Tire to body or bracket to body interference may be encountered. Communicate clear space requirements on the sales order. * DSP40/P rear axles are not for use with Hendrickson HAS 402, Hendrickson Primaax, or Hendrickson beam-type rear suspensions. * Hendrickson HMX rear suspensions are approved for tank service only when the commodity is water, milk, liquefied gas, or compressed gas. * HMX 400 suspension is limited for use with single pusher axles rated at 13,200 lbs or less, final approved rating of lift axle is subject to creep review. * The body type of 'other' is not available, the manufacturer requires definition of what the vehicle body will be installed. * The Hendrickson HMX rear suspensions are not for use on tractor chassis. Available with tandem rear axles up to 52K capacity. Incompatible with front drive axles, or quantity two inserts on 11-5/8 inch rail material. * When used with 10-5/8 inch rails a HMX suspension requires a frame insert through the rear suspension area, either full or partial. | \$4,912 | 535# |

| 3742994 | Rear suspension: Tandem Hendrickson ULTIMAAX 460 46K, 54 in. axle spacing, 18.25 in. saddle height. Includes shock absorbers. | \$8,522 | 937# |
| 3742996 | Rear suspension: Tandem Hendrickson ULTIMAAX 460 46K, 60 in. axle spacing, 17.50 in. saddle height. Includes shock absorbers. | \$8,717 | 937# |
| 3742998 | Rear suspension: Tandem Hendrickson ULTIMAAX 460 46K, 60 in. axle spacing, 18.25 in. saddle height. Includes shock absorbers. | \$8,717 | 937# |
| 3747460 | Rear suspension: Tandem Hendrickson RT463 46K. 54 in. axle spacing. Steel beams & barpin bushing. 6 in. saddle height. Unladen Height: 11.1 in. Laden Height: 10 in. * Advertised axle spacing for this rear suspension is a nominal value. Actual spacing may be up to two inches greater than noted. This is important in situations where the body is likely to be pre-built before the chassis is delivered. Tire to body or bracket to body interference may be encountered. Communicate clear space requirements on the sales order. * DSP40/P rear axles are not for use with Hendrickson HAS 402, Hendrickson Primaax, or Hendrickson beam-type rear suspensions. * Hendrickson RT463 rear suspensions are for use with tandem axles rated up to and including 52K. * The Hendrickson RT463 or RT523 rear suspension requires the addition of transverse track rods when used as a mining hauler. RT/RTE rear suspensions with axle spacing of 60 and 72 inches are standard with track rods. * YOKES; the combination of SPL170 interaxle, RT463 rear suspension, D46-172 rear axle require the 45 deg yoke. | \$5,001 | 1,055# |
| 3747461 | Rear suspension: Tandem Hendrickson RT463 46K. 54 in. axle spacing. Steel beams & barpin bushing. 7.19 in. saddle height. Unladen Height: 12.5 in. Laden Height: 11.2 in. * Advertised axle spacing for this rear suspension is a nominal value. Actual spacing may be up to two inches greater than noted. This is important in situations where the body is likely to be pre-built before the chassis is delivered. Tire to body or bracket to body interference may be encountered. Communicate clear space requirements on the sales order. * DSP40/P rear axles are not for use with Hendrickson HAS 402, Hendrickson Primaax, or Hendrickson beam-type rear suspensions. * Hendrickson RT463 beam suspensions for use with tandem axle capacity up to and including 52K. * The Hendrickson RT463 or RT523 rear suspension requires the addition of transverse track rods when used as a mining hauler. RT/RTE rear suspensions with axle spacing of 60 and 72 inches are standard with track rods. * YOKES; the combination of SPL170 interaxle, RT463 rear suspension, D46-172 rear axle require the 45 deg yoke. | \$5,076 | 1,055# |
| 3747462 | Rear suspension: Tandem Hendrickson RT463 46K. 54 in. axle spacing. 7.94 in. saddle height. Steel beams & barpin bushing. Unladen Height: 13.3 in. Laden Height: 11.9 in. * Advertised axle spacing for this rear suspension is a nominal value. Actual spacing may be up to two inches greater than noted. This is important in situations where the body is likely to be pre-built before the chassis is delivered. Tire to body or bracket to body interference may be encountered. Communicate clear space requirements on the sales order. * DSP40/P rear axles are not for use with Hendrickson HAS 402, Hendrickson Primaax, or Hendrickson beam-type rear suspensions. * Hendrickson RT463 beam suspensions for use with tandem axle capacity up to and including 52K. * The Hendrickson RT463 or RT523 rear suspension requires the addition of transverse track rods when used as a mining hauler. | Tandem | | | |
| 44K to 52K | | | |
| Neway | | | |
| 3754154 | Rear suspension: Tandem Neway ADZ252 52K. 60 in. axle spacing. Air suspension w/ 12 in. ride height & single leveling valve. Includes air suspension dump valve. * Dual leveling valves required on Single or Tandem ADZ suspensions with the following intended services: Logger w/ full truck, snowplow, mining hauler, mining serv w/ full truck, refuse hauler, oil field rig move, fire truck, construction. OR with the following body types: Roll-on/roll-off, end dump, tank. * Neway ADZ suspension combined with Accuride 9" steel wheels are not compatible with any 315/80R22.5 tire. * Neway ADZ suspensions are not compatible with 12R24, 14R20, 14R24, or 14R25 tires. * Neway rear suspension for use with axles rated up to 52K. * Steel wheels with Michelin XDN2 GRIP 315/80R22.5 tires or Goodyear G289 315/80R22.5 tires are not available with Neway ADZ suspension. * This component requires a long lead-time. Refer to the long lead-time report for potential delivery date availability. | \$11,006 | 758# |
| Suspension Equipment | | | |
| 3830502 | Delete dash mounted control for air suspension dump valve. Only available with an air suspension. * Delete dash control for air suspension dump valve is not available with suspension over inflation valve code 3839002, suspension air retention code 3834100 or traction enhancement code 3830500. | \$0 | 0# |
| 3830505 | Dual leveling valves for single air suspension. Dual leveling valves on single rear suspensions on only available on Neway ADZ for class 8 or Hendrickson HAS for medium duty. Dual leveling valves will not be approved on any other suspensions on T3. * Only applicable with single axle ADZ suspensions. * Requires dual suspension pressure gauges (8221100). | \$139 | 0# |
| 3830510 | Dual leveling valves for tandem air suspension. * Optional dual air suspension leveling valves are not available on Kenworth AG380, Kenworth AG400L, or Hendrickson HAS. This is not an option for Neway ADZ tridem, Kenworth AG690 or Primaax tridem suspensions which are standard with dual valves. * Optional equipment for air suspensions only. * The Kenworth AG230 is not available with dual leveling valves or over inflation valve. | \$177 | 2# |
| 3832001 | Torque rods for 46K PRIMAX EX using disc brakes. Replacing standard. | \$430 | 23# |
| 3832004 | Heavy-duty track rods for Neway AD tandem or Hendrickson beam suspensions rated up to 46K. * Heavy-duty track rods are standard when a rear suspension sub-frame is specified. The option code is not required. * Track rods for tandem Neway AD tandem rear suspensions or Hendrickson beam suspensions. * Transverse track rods are required when optional heavy-duty track rods are requested. RT/RTE rear suspensions with axle spacing of 60 and 72 inches are standard with track rods. All Haulmaax (HMX) suspensions are standard with track rods. | \$163 | 0# |
| 3832008 | Heavy-duty torque rods for Hendrickson beam. 46K and under suspensions. * Heavy-duty torque rods for Hendrickson beam suspensions. Code is not available on Hendrickson beam suspensions with capacity over 46k, where the feature is standard. | \$323 | 15# |
| 3832018 | Delete shock absorbers. Hendrickson HAULMAAX (HMX) suspension. * Option to delete standard shock absorbers on Hendrickson HMX rear suspensions for mixer chassis only. | (\$225) | -30# |

T440/T470: REAR SUSPENSION

| Option | Description | Price | Weight |
|-----------------------------|---|---------|--------|
| Suspension Equipment | | | |
| 3832020 | Edge kit for HAS single or tandem rear suspension * EDGE [Efficient Driveline Geometry] kit offered by Hendrickson to correct frame rise issues encountered with high torque engines and torque reactive rear suspensions. * The EDGE kit option 3832020 is required by Hendrickson to help combat frame rise during torque application on HAS402 rear suspensions. * Without an EDGE kit the Hendrickson HAS230 can be used with engine torque up to 1050 ft lbs. The EDGE kit option 3832020 is required when engine torque exceeds this limit. Reference TE1461. | \$123 | 10# |
| 3832021 | Delete shock absorber for Hendrickson ULTIMAAX suspension. | (\$368) | -31# |
| 3832026 | Chalmers shock absorbers. 52K and under suspension. * Rear axle shock absorbers for use with a Chalmers rear suspension. There is no option to relocate these shocks. * Rear shock absorbers are recommended for use on tractors that specify a Chalmers rear suspension. | \$465 | 35# |
| 3832030 | Bronze center bushings for Hendrickson 403. | \$178 | 6# |
| 3832072 | Transverse track rods for Hendrickson RT/RTE suspensions w/52 or 54 in. axle spacing. * An end of frame crossmember is required for use with transverse track rods on Hendrickson beam suspensions. * On 46-52K suspensions this option replaces the standard bronze center bushings with rubber bushings. * The Hendrickson RT463 or RT523 rear suspension requires the addition of transverse track rods when used as a mining hauler. RT/RTE rear suspensions with axle spacing of 60 and 72 inches are standard with track rods. * Track rods for use only on Hendrickson beam rear suspensions rated at 52k or less. | \$505 | 108# |
| 3832098 | Track rods: heavy duty for Hendrickson Primaax EX tandem. Replaces standard duty track rods. * Ultrarod Plus track rods are required for use in services other than linehaul, regional haul, pick-up and delivery, wrecker, EMT/rescue or when the vehicle will operate outside the U.S. * Ultrarod Plus track rods for use on tandem 46K Primaax EX rear suspensions only. 52K Primaax EX comes standard with Ultrarod Plus. | \$62 | 24# |
| 3832161 | Double Rebound Strap Kit: Hendrickson HAULMAAX rear suspension. | \$219 | 6# |
| 3834100 | Air retention kit for rear suspension for use w/ outriggers. * Delete dash control for air suspension dump valve is not available with suspension over inflation valve code 3839002, suspension air retention code 3834100 or traction enhancement code 3830500. * For use with air suspensions only. * The air retention option is not for use with the over-inflation option (S/C 3839002). | \$249 | 4# |
| 3836500 | Heavy-duty gussets for forward suspension crossmember on Airglide 400/460, Chalmers, or Hendrickson beam suspensions. This replaces the standard gussets. * Mexico registry requires three hole gussets in the forward suspension crossmember when a Kenworth AG400/AG460, Hendrickson or Chalmers rear suspension is specified. * Three hole gussets for forward suspension crossmember for use with Hendrickson, Chalmers or KW Airglide rear suspensions other than AG380 or AG400L. | \$69 | 12# |
| 3839002 | Air suspension over-inflation valve w/warning light to temporarily raise the frame. * Delete dash control for air suspension dump valve is not available with suspension over inflation valve code 3839002, suspension air retention code 3834100 or traction enhancement code 3830500. * The air suspension over inflation valve is available for Neway, Hendrickson Primaax, or with Kenworth Airglide rear suspensions other than the AG380 or AG400L. * The Kenworth AG230 is not available with dual leveling valves or over inflation valve. | \$299 | 0# |

T440/T470: REAR SUSPENSION

| Option | Description | Price | Weight |
|---------------------------------|--|---------|--------|
| Suspension Equipment | | | |
| 3839140 | Chalmers 40K severe service upgrade. Use with Chalmers 8xx-40 series suspensions. Separate suspension code required. | \$370 | 16# |
| 3839146 | Chalmers 46K severe service upgrade. Use with Chalmers 8xx-46 series suspensions. Separate suspension code required. | \$673 | 30# |
| 3839152 | Chalmers 52K severe service upgrade. Use with Chalmers 8xx-52 series suspensions. Separate suspension code required. | \$2,446 | 87# |
| Suspension Miscellaneous | | | |
| 3830152 | Air Springs: Heavy-duty for Airglide 460. Replaces standard duty air springs. * Heavy duty air springs (3830152) are required with selection of AG460 rear suspension and one of the following: Canadian registry, class D highway usage, wrecker, construction, logger, or refuse intended services. | \$43 | 28# |
| 3839046 | Heavy duty barpin brackets for tandem Hendrickson beam rear suspensions. * Canadian logging trucks require heavy-duty barpin brackets when a D40-172 or D46-172 rear axle is specified with a Hendrickson beam rear suspension. | \$528 | 0# |

* 12K, 13.2K or 14.6K front axles used with wide based tires on chassis with wheelbase in excess of 244 inches are unavailable due to turn angle limitation resulting from steering geometry.

* Special delivery requirements may be required due to potential for front axle/wheel over all width. See shipping policy TA005.

* The Alcoa 83462 front wheel interferes with the steer arm in the D2000 axle installation. D2200 is not an issue.

Rails & Inserts

Rail Material

10.625 x 3.5 x 0.3125 Steel Frame

| | | | |
|----------------|--|-------|----|
| 6054200 | Frame Rails: 10-5/8 x 3-1/2 x 5/16 in. Steel to 284 in. Truck frame weight is 2.91 lb.-in. per pair of rails. Section modulus is 14.80, RBM is 1,776,000 in-lbs per rail. Frame rail availability may be restricted based upon application, axle/suspension capacity, fifth wheel setting, or component/dimensional specifications. The results of the engineering review may result in a change to the requested frame rail. If a change is required Kenworth Application Engineering will advise the dealer of the appropriate material specification for a substitute rail. * 10-5/8 inch rails are appropriate for axles rated at 52K or less. Both frame strength considerations and physical fit of the suspension with a 10-5/8 inch rail can be a problematic. * A T800 (72 or 86 inch sleeper) or T680/T880 (76 inch sleeper) with 10-5/8 single frame rail and wheelbase 242 or greater has adequate frame strength but may result in frame beaming and associated ride quality concerns. Alleviate this potential by increasing frame size or adding frame inserts. * Rear fifth wheel settings exceeding 36 inches ahead of bogie require an inserted frame, or larger frame material. * Tridem rear axles require a minimum rail of 10-3/4 with full insert, 10-11/16, or 11-5/8 inch material. * W900 models with 10-5/8 single frame rail and 72 or 86 inch sleeper and wheelbase 256 or greater has adequate frame strength but may result in frame beaming and associated ride quality concerns. Alleviate this potential by increasing frame size or adding frame inserts. * When specifying a lift axle this rail material in not sufficient without an insert. The minimum single rail size is 10-3/4 inch. * With front axle capacities over 14.6k this rail material in not sufficient without an insert. The minimum single rail size is 10-3/4 inch. | STD | 0# |
| 6054400 | Frame Rails: 10-5/8 x 3-1/2 x 5/16 in. Steel to 285 in. to 336 in. Truck frame weight is 2.91 lb.-in. per pair of rails. Section modulus is 14.80, RBM is 1,776,000 in-lbs per rail. Frame rail availability may be restricted based upon application, axle/suspension capacity, fifth wheel setting, or component/dimensional specifications. The results of the engineering review may result in a change to the requested frame rail. If a change is required Kenworth Application Engineering will advise the dealer of the appropriate material specification for a substitute rail. * 10-5/8 inch rails are appropriate for axles rated at 52K or less. | Bumper Style | | | |
| Steel Channel | | | |
| 6302460 | Bumper: Tapered painted steel channel. Requires a bumper setting code. * Requires a code for a bumper setting in addition to the bumper style sales code. * The W900L model with 82362/82365 front wheels and 445/65R22.5 tires may encounter tire rub when used with a steel channel bumper. The combination is not acceptable. * This bumper is not for use on the T800W or T800 with extended frame rails. | STD | 0# |
| 6302461 | Bumper: Tapered chrome steel channel. Requires a bumper setting code. * Requires a code for a bumper setting in addition to the bumper style sales code. * The W900L model with 82362/82365 front wheels and 445/65R22.5 tires may encounter tire rub when used with a steel channel bumper. The combination is not acceptable. * This bumper is not for use on C500 twin steer, T800 with extended frame rails, T800W, the W900S, or on W900B/L with cast center mounted tow hook. | \$700 | 5# |
| 6309460 | Bumper: For T470. 3-piece off-set. Painted steel. Requires 73 in. bumper setting code. * The 3-piece offset bumpers are for use only on the T470. | \$374 | -15# |
| Other Bumper Style | | | |
| 6309910 | Delete bumper: Requires a bumper setting code. * Package for customer installed Braden winch is for use only with T470 hood with 50.5 inch bumper setting. The bumper must be deleted when the winch frame drill is requested. * Special delivery requirements may be required when bumper deletion is requested. See shipping policy TA005. | (\$337) | -94# |
| Bumper Setting | | | |
| 6319050 | 50 in. Bumper setting. Requires a bumper code. * The 50 inch bumper setting is applicable to the T800 with export engines, or the T440. | \$0 | 0# |
| 6319073 | 73 in. Bumper setting. Requires a bumper code. * T470 with front engine PTO requires the 73 inch bumper setting. * The 66 and 73 inch bumper settings for the T800 are applicable only to pre-2010 EPA platform engines using the short hood or 2010+ engine with straight split-fender hood with extended rails or front engine PTO provision. * The 66 and 73 inch bumper settings are available in the T800SH only in a front engine PTO application. * The 73" bumper setting on the T470 will receive the extended rails. A sales code is added to the order so that the dealer/customer is aware of what they are receiving. * The extended front frame rail option is available only with the 73 inch bumper setting. | \$0 | 0# |
| 6319505 | 50.5in. Bumper setting. Requires a bumper code. * The 50.5 inch bumper setting is exclusive to T470 model. | \$0 | 0# |
| Bumper Equipment | | | |
| 6321005 | Removable Front Tow Hooks: 2. * If this chassis is being delivered to a body builder you may want to consider ordering tow pins to help facilitate undecking per TA005 Section 7. * Requires a 48.5 inch bumper setting when used on the T800 model. * This tow hook is NFPA compliant when specified on the T440, T470, or T800 models. | \$266 | 15# |

T440/T470: FRAME & EQUIPMENT

| Option | Description | Price | Weight |
|----------------------------------|---|-------|--------|
| Bumpers | | | |
| Bumper Equipment | | | |
| 6324025 | Front tow hook: Center mounted, cast. Requires iron front drive brackets. * Extra duty radiator support crossmember is standard with cast front tow hook option, without the sales code. The hook is not available on the W900S. * For T440 only available with 50 inch bumper setting. * For T470 only available with 50.5" bumper setting. * For the W900 models with export engines requesting a cast center mount tow hook with 12K front springs requires the use of steel front drive brackets. The upgraded drive bracket is standard with higher capacity springs or with Severe Service, no code required. * If this chassis is being delivered to a body builder you may want to consider ordering tow pins to help facilitate undecking per TA005 Section 7. * Iron front drive brackets are required when a cast center tow hook is specified. Iron drive brackets are included when front spring capacity is 16K or greater, with requests for Severe Service, or when the upgraded drive bracket code is specified. * Not for use with a front engine PTO configuration. * The center mounted front tow hook requires selection of steel front drive brackets (6390305) with C500 or iron front drive brackets (6390312) with T800/T880 except with a 16K or greater front spring rating or request for severe service. * The W900 is available with a cast center tow hook when a 31.5 or 35 inch bumper setting is specified. * This tow hook is NFPA compliant when specified on the T800 model. * W900L with front center mounted tow hook requires a Straight Steel Box Bumper. Use 6303360 or 6303428. | \$253 | 28# |
| 6482102 | Customer installed Braden winch: includes frame drill. Braden winch installation will add 1153 lbs. to the chassis at 60 inches ahead of the front axle C/L. Use the 'Additional Payload' feature of Prospector's weight distribution workscreen to observe the effect of this additional weight on axle loads. (Enter 1153 lbs. at -60 from the front axle C/L.). * Package for customer installed Braden winch is for use only with T470 hood with 50.5 inch bumper setting. The bumper must be deleted when the winch frame drill is requested. | \$210 | -6# |
| Front Frame Miscellaneous | | | |
| 6390021 | Iron shackle brackets. Code is not required with front springs greater than or equal to 16,000 lbs. * Iron shackle brackets are standard on W900L and C500 for all front suspension ratings. * Iron shackle brackets are standard with a spring capacity of 16K or greater , no code required. * The iron shackle bracket option is available with front spring capacities of 14.6K or less. * W900B chassis with an export engine requires iron shackle brackets. For springs rated under 16K sales code 6390021 must be used. Springs rated at 16K or greater include iron brackets without an additional sales code. * W900B with a 2007+ engine will be built with the iron shackle brackets in all configurations, no code required. | \$111 | 11# |
| 6390033 | T470 W/ extended front frame rail. Must code for rail separately. * T4 series snowplows utilizing extended frame rails require a single parent rail of 10-11/16. The 10-5/8 or 10-3/4 inch rails can be used only when combined with an insert. * The 73" bumper setting on the T470 will receive the extended rails. A sales code is added to the order so that the dealer/customer is aware of what they are receiving. * The extended front frame rail option is available only with the 73 inch bumper setting. | \$0 | 0# |
| 6390103 | Front mudflaps. * Not available on Aerodynamic models with split fender hood. Split Fender provides necessary coverage. | STD | 0# |

T440/T470: FRAME & EQUIPMENT

| Option | Description | Price | Weight |
|----------------------------------|--|-------|--------|
| Front Frame Miscellaneous | | | |
| 6390110 | Mudflaps, Front: Extra wide for use w/ tires that are wide base singles. * Extra wide front mud flaps are for use with either wide base front tires or rubber fender extenders. * Extra wide front mud flaps are not for use with sheet metal hood, on the C500 model, on the T800 twin steer, or T800 short hood configurations. | \$59 | 6# |
| 6390304 | Brackets, Front Drive: Aluminum up to 15,999 lbs. * Aluminum front drive bracket is not for use with front springs rated at 16k or greater. | STD | 0# |
| 6390312 | Brackets: Iron front spring drive. Included with front spring capacity of 16,000 lbs or greater; code not required. | \$38 | 47# |
| Mixer Equipment | | | |
| 6340110 | Side plate on chassis rail for mixer boost-a-load * ABS with Bendix electronic stability program (ESP) can be specified with up to one non-steerable, factory-installed pusher or tag; up to four steerable, factory-installed pushers; or up to three steerable, factory-installed pushers with a steerable, factory-installed tag. Approvals for lift axles are limited to 6x4 and 6x2 axle configurations. Lift axle weight rating is limited to 13.2K with selection of Mixer Boost A-Load. * Dual side of cab exhaust not available with mixer side plates. * Minimum size for tanks located under the cab is 22 inch diameter x 60 gallons, or 24.5 inch diameter x 75 gallons, or 28.5 inch diameter x 105 gallons. * Side plate reinforcement for rails can be used for T800, T880, and W900S. Requires code for mixer service. Required with coding for a Boost-a-load mixer. Not for use with LNG. Not for use on T800 twin steer chassis with 2007+ EPA engine. | \$167 | 46# |
| 6350105 | Front engine skid protector. Painted bumper color. C500B requires 56.5 in. bumper setting. * Front engine protector skid plate option is available on C5 with 56.5" bumper setting, C5 twin steer with 92.5" bumper setting, and on T880, T800 or T4 with steel bumper. * Skid plate front engine protector is not available with a mixer packer or a T800 with Allison transmission. * The front skid plate for the T440 can be used with a steel bumper or with an Allison transmission * The front skid plate for the T470 can be used with an Allison transmission. | \$569 | 79# |
| Battery Boxes | | | |
| Parallel | | | |
| 6403678 | Battery box: Aluminum parallel BOC w/ ABS cover. * Parallel aluminum box with ABS cover used behind the cab. Aluminum material is not for use with Severe Service. Not for twin steer because they have a box between the steer axles. Not for 62 inch AeroCab on T660 with full chassis fairings due to fairing group and bracket spacing. Severe Service requires a steel battery box. * This box style is incompatible with full length chassis fairings. * When a pusher axle is specified the battery box behind the cab will always be located forward of the lift axle. Requests for the box to be located between the pusher and the forward drive axles will not be approved. | \$138 | 22# |
| 6404207 | Battery box: Steel parallel BOC w/ ABS cover. * Parallel steel battery box with ABS cover. Not for use C500 or T800 twin steer due to required box location between the steer axles. Not full length chassis fairings. * This box style is incompatible with full length chassis fairings. * When a pusher axle is specified the battery box behind the cab will always be located forward of the lift axle. Requests for the box to be located between the pusher and the forward drive axles will not be approved. | \$139 | 11# |

T440/T470: FRAME & EQUIPMENT

| Option | Description | Price | Weight |
|----------------------|---|-------|--------|
| Battery Boxes | | | |
| Parallel | | | |
| 6405002 | Battery box: Aluminum parallel module BOC w/ step, aluminum diamond plate cover. Up to 2 air tanks may be mounted to bottom of box. Batteries will be oriented perpendicular to the frame rail in a single row. * Aluminum battery box material is not applicable to Severe Service requests. * Cantilever battery boxes are also known as COE style. The aluminum version of the boxes are not applicable to Severe Service. This box style wont fit behind full chassis fairings. Not for twin steers which have the battery box located between the steer axles. * The following right hand frame access steps may not be mounted next to under frame DPF/SCR: ladder steps, battery/tool box w/ steps, or steps on a 28.5" fuel tank or hydraulic tank. * When a pusher axle is specified the battery box behind the cab will always be located forward of the lift axle. Requests for the box to be located between the pusher and the forward drive axles will not be approved. | \$278 | 44# |
| 6405048 | Battery box module: Short length aluminum parallel under cab, aluminum diamond plate cover w/ step. Up to 2 air tanks may mount to bottom of box. Batteries will be oriented perpendicular on rail. * Aluminum battery box material is not applicable to Severe Service requests. * Parallel integral step boxes are not for use on twin steers because they have a box between the steer axles. Aluminum boxes are not for use with severe service. | STD | 0# |
| 6405080 | T8 parallel non-polished aluminum battery box module w/ integral step. Extended length for use w/ 2010 and later SCR style exhaust. Up to 2 air tanks may mount to bottom of box. Batteries will be oriented perpendicular on rail. * Aluminum battery box material is not applicable to Severe Service requests. * Dual AeroCab style exhaust requires that any battery box used in the LH under cab location be the extended length. This style includes an accommodation for the LH side of cab vertical tailpipe, when present. * Matching the cover lengths between battery box and DPF/SCR cover under the cab can be achieved using an extended length battery box. * T660/T680: Available only with split fender option. | \$71 | 72# |
| 6405102 | Short length steel parallel battery box module under cab, aluminum integral step, diamond plate cover. Up to 2 air tanks may mount to bottom of box. Batteries will be oriented perpendicular on rail. | \$47 | 53# |
| 6405103 | Steel parallel battery box module: BOC w/ aluminum diamond plate cover w/step. Up to 2 air tanks may be mounted to bottom of box. Batteries oriented perpendicular. | \$355 | 92# |
| 6405180 | T8 parallel non-polished steel battery box module w/ integral step. Extended length for use w/ 2010 and later SCR style exhaust. Up to 2 air tanks may mount to bottom of box. Batteries will be oriented perpendicular on rail. * Dual AeroCab style exhaust requires that any battery box used in the LH under cab location be the extended length. This style includes an accommodation for the LH side of cab vertical tailpipe, when present. * Matching the cover lengths between battery box and DPF/SCR cover under the cab can be achieved using an extended length battery box. * Steel battery box for single steer axle chassis. No twin steer configurations. | \$236 | 125# |
| Cantilever | | | |
| 6400634 | Battery box cantilever aluminum BOC with smooth aluminum cover. * Cantilever battery boxes are also known as COE style. The aluminum version of the boxes are not applicable to Severe Service. This box style wont fit behind full chassis fairings. Not for twin steers which have the battery box located between the steer axles. | \$366 | 10# |

|------------------------------------|---|-------|--------|
| Battery Boxes | | | |
| Cantilever | | | |
| 6400636 | Battery box cantilever aluminum BOC with fiberglass cover. * Cantilever battery boxes are also known as COE style. The aluminum version of the boxes are not applicable to Severe Service. This box style wont fit behind full chassis fairings. Not for twin steers which have the battery box located between the steer axles. * When a pusher axle is specified the battery box behind the cab will always be located forward of the lift axle. Requests for the box to be located between the pusher and the forward drive axles will not be approved. | \$109 | 8# |
| 6400641 | Battery box cantilever aluminum BOC with polished smooth aluminum cover. | \$461 | 10# |
| 6401200 | Battery box cantilever steel BOC w/ fiberglass cover. * Cantilever battery boxes, also known as COE style, wont fit behind full chassis fairings. Not for twin steers which have the battery box located between the steer axles. * When a pusher axle is specified the battery box behind the cab will always be located forward of the lift axle. Requests for the box to be located between the pusher and the forward drive axles will not be approved. | \$334 | 24# |
| 6401233 | Steel cantilever battery box BOC w/ smooth aluminum cover. Vocational Style. * Battery box insulation not available for vocational battery boxes. * This cantilever style box is labeled vocational and is 3 inches narrower than a regular cantilever style box. The batteries are positioned parallel to the frame rail with a maximum quantity of three. Jumpstart terminals or disconnect switches cannot be located on this box. * When a pusher axle is specified the battery box behind the cab will always be located forward of the lift axle. Requests for the box to be located between the pusher and the forward drive axles will not be approved. | \$543 | 39# |
| 6401235 | Steel cantilever battery box BOC w/ smooth polished aluminum cover. Vocational Style. | \$591 | 39# |
| Across or Between Rails BOC | | | |
| 6400500 | Battery box: Aluminum between the rails BOC w/ FMCSR cover. * Battery box between the rails is not practical for most full truck applications. * Between rails battery boxes are not for use on C500 or T800 twin steer chassis. These chassis utilize a battery box between the steer axles. * Considerable wheelbase must be added to accommodate a between rails battery box when used with an auxiliary transmission. In many cases the solution is not preferable. * The SPL350 and single shaft SPL250 drivelines cannot be used in combination with a battery box behind the cab located between the rails. A center bearing is required with SPL250 to maneuver beyond the box position. * When a pusher axle is specified the battery box behind the cab will always be located forward of the lift axle. Requests for the box to be located between the pusher and the forward drive axles will not be approved. | \$765 | 11# |

Battery Boxes

Across or Between Rails BOC

| | | | |
|--|---|-------|-------|
| 6400508 | Battery box: Aluminum between the rails BOC w/ aluminum cover. | \$487 | -8# |
| <ul style="list-style-type: none">* Battery box between the rails is not practical for most full truck applications.* Between rails battery boxes are not for use on C500 or T800 twin steer chassis. These chassis utilize a battery box between the steer axles.* Considerable wheelbase must be added to accommodate a between rails battery box when used with an auxiliary transmission. In many cases the solution is not preferable.* The SPL350 and single shaft SPL250 drivelines cannot be used in combination with a battery box behind the cab located between the rails. A center bearing is required with SPL250 to maneuver beyond the box position.* When a pusher axle is specified the battery box behind the cab will always be located forward of the lift axle. Requests for the box to be located between the pusher and the forward drive axles will not be approved. | | | |
| 6400631 | Battery box: Temporary across the rails. | \$143 | -110# |
| <ul style="list-style-type: none">* The temporary battery box is for use on full trucks only, as the body builder would be responsible for locating the batteries. No tractors are allowed [complete or incomplete].* When a pusher axle is specified the battery box behind the cab will always be located forward of the lift axle. Requests for the box to be located between the pusher and the forward drive axles will not be approved. | | | |
| 6400633 | Battery box: Temporary across the rails. Includes maximum cable length available. | \$197 | -110# |

In-Cab

| | | | |
|---|---|---------|-----|
| 6405000 | In-cab steel battery box: under rider seat or in stand alone box. Requires appropriate AGM battery code, which varies by model, and appropriate rider seat code be selected prior to entering the workscreen. Includes 1 battery disconnect switch. | \$1,934 | -9# |
| <ul style="list-style-type: none">* 1.9 meter cabs with in cab battery box require Optima batteries.* An in cab battery box on T680 and T880 requires specific AGM batteries (1821271 or 1821275).* Dual exhaust not available in combination with Rear Engine PTO and an in-cab battery box.* In-cab battery box is not available with 52 inch or 76 inch sleepers.* In-cab battery box is not compatible with requests for Body Builder Battery Power Prewire (s/c 1901084).* Not available with 42 inch modular sleepers due to interference with HVAC lines.* On 1.9M cab, when lime green seat belt code 8496561 is selected in combination with in cab battery box, only the driver seat belt will be green. Rider's belt will be black.* Specific batteries (1825612, 1825623, 1821271 or 1821275) required for an in-cab battery box.* The in-cab battery box can be used with either a passenger side battery box style seat or with deletion of the passenger seat.* The in-cab battery box cannot be used with optional disconnect switches, box insulation, steel battery hold downs, or the Canadus battery energizer.* The in-cab battery box is incompatible with records holder on seat base, fire extinguisher mounted outboard, or trailer battery charge circuits. | | | |

Battery Box Locations

Battery Boxes

Battery Box Locations

| | | | |
|---------|--|-----|----|
| 6409903 | Battery box location: BOC between the rails. | \$0 | 0# |
|---------|--|-----|----|

- * Battery disconnect switches located on the battery box end are not for use with full length chassis fairings or with a battery box located BOC between the rails.
- * This location is not available with an in-cab battery box.

| | | | |
|---------|--|-----|----|
| 6409906 | In-Cab battery box location: Under rider seat. | \$0 | 0# |
|---------|--|-----|----|

- * 1.9 meter cabs with in cab battery box require Optima batteries.
- * An in cab battery box on T680 and T880 requires specific AGM batteries (1821271 or 1821275).
- * Dual exhaust not available in combination with Rear Engine PTO and an in-cab battery box.
- * In-cab battery box is not available with 52 inch or 76 inch sleepers.
- * Specific batteries (1825612, 1825623, 1821271 or 1821275) required for an in-cab battery box.

| | | | |
|---------|---|-----|----|
| 6409908 | Battery box location: BOC across the rails. | \$0 | 0# |
|---------|---|-----|----|

- * This location is not available with an in-cab battery box.

Battery Box Equipment

| | | | |
|---------|---|-------|----|
| 6409136 | Insulate battery box w/ acid-resistant & cross-linked polyolefin foam sheets. | \$104 | 2# |
|---------|---|-------|----|

- * Battery box insulation not available for vocational battery boxes.
- * The battery box required on Aerodynamic models is located LH under the cab and is not available with steel hold downs or battery box insulation.

Center Frame Equipment

Frame Access

Grabhandles

| | | | |
|---------|---|------|----|
| 6410010 | Frame access grabhandle(s) LH mounted. Placement and quantity of grabhandles may vary due to FMCSR frame access requirements. | \$53 | 0# |
|---------|---|------|----|

- * All orders must have complete frame access if any one of the three components is selected. Step and grab handle on the same side of the vehicle accompanied by deck plate.
- * Any changes to the rear cab or sleeper area that impact grab handle position or access must comply with FMCSR 399.
- * Code for a grab handle mounted to the back of cab or sleeper cannot be used in combination with other styles of frame mounted grab handles.

| | | | |
|---------|---|------|----|
| 6410011 | Frame access grabhandle(s) RH mounted. Placement and quantity of grabhandles may vary due to FMCSR frame access requirements. | \$51 | 0# |
|---------|---|------|----|

- * All orders must have complete frame access if any one of the three components is selected. Step and grab handle on the same side of the vehicle accompanied by deck plate.
- * Any changes to the rear cab or sleeper area that impact grab handle position or access must comply with FMCSR 399.

| | | | |
|---------|---|------|----|
| 6410028 | Frame access grabhandle, additional LH mounted in side extender. Placement and quantity of grabhandles may vary due to FMCSR frame access requirements. | \$91 | 2# |
|---------|---|------|----|

- * Requesting an additional grab handle requires a primary handle that can be mounted on the back of the cab, or if coded for side extenders the primary handle will be inside the extenders.
- * The additional grab handle located in the side extender is for use only with side extenders and a primary grab handle mounted to the back of cab or sleeper on the same side. Not available as the only handle option.

Not available as the only handle option. | \$91 | 2# |
| 6418508 | Ladder step access handle LH mounted to battery box /toolbox. Placement and quantity of grabhandles may vary due to FMCSR frame access requirements. * All orders must have complete frame access if any one of the three components is selected. Step and grab handle on the same side of the vehicle accompanied by deck plate. * Any changes to the rear cab or sleeper area that impact grab handle position or access must comply with FMCSR 399. * Battery or toolbox frame access grab handle can be used only with an integral step box on the LH rail. * Code for a grab handle mounted to the back of cab or sleeper cannot be used in combination with other styles of frame mounted grab handles. | \$233 | 8# |
| 6418509 | Ladder step access handle: RH mounted to battery box/toolbox. Placement and quantity of grabhandles may vary due to FMCSR frame access requirements. * All orders must have complete frame access if any one of the three components is selected. Step and grab handle on the same side of the vehicle accompanied by deck plate. * Any changes to the rear cab or sleeper area that impact grab handle position or access must comply with FMCSR 399. * Battery or toolbox frame access grab handle can be used only with an integral step box on the RH rail. | \$233 | 8# |
| 6418510 | Ladder step access handle: LH mounted to frame step. Narrate location. Placement and quantity of grabhandles may vary due to FMCSR frame access requirements. * All orders must have complete frame access if any one of the three components is selected. Step and grab handle on the same side of the vehicle accompanied by deck plate. * Any changes to the rear cab or sleeper area that impact grab handle position or access must comply with FMCSR 399. * Code for a grab handle mounted to the back of cab or sleeper cannot be used in combination with other styles of frame mounted grab handles. * When using the grab handle mounted to the ladder step you must also code for a ladder step on the same side of the vehicle. | \$187 | 8# |
| 6418512 | Ladder step access handle: RH mounted to frame step. Narrate location. Placement and quantity of grabhandles may vary due to FMCSR frame access requirements. * All orders must have complete frame access if any one of the three components is selected. Step and grab handle on the same side of the vehicle accompanied by deck plate. * Any changes to the rear cab or sleeper area that impact grab handle position or access must comply with FMCSR 399. * Ladder step frame access grab handle can be used only with a ladder step on the RH rail. | \$187 | 8# |
| Deckplate | | | |
| 6414002 | Short aluminum frame access deck plate, 24 in. unless only 12 in. fits. | \$114 | 10# |
| 6414003 | Medium aluminum frame access deck plate, 36 in. | \$201 | 15# |
| 6414006 | Full aluminum frame access deck plate. Provides up to 72 in. of deck plate filling the space from hoses to fifth wheel. | \$289 | 24# |

T440/T470: FRAME & EQUIPMENT

| Option | Description | Price | Weight |
|-------------------------------|--|-------|--------|
| Center Frame Equipment | | | |
| Frame Access | | | |
| Steps | | | |
| 6417007 | Frame access steps: 2 ladder-type, RH mount. Available when rear of tank extends less than 24 in. behind rear of cab, sleeper, or side extender. * Frame mounted ladder steps cannot be used in combination with wheel to wheel full chassis fairings on the same side. * Ladder style frame access steps cannot be used with full length chassis fairings. Not for use with extended steps for frame access mounted to a tank under cab. Not T8 non-sleeper chassis with 22 x 120 gal tank RH under or 24 x 135 or 24 x 150 gal RH under as the step will be located too far behind the cab to make the grab handle accessible. * The following right hand frame access steps may not be mounted next to under frame DPF/SCR: ladder steps, battery/tool box w/ steps, or steps on a 28.5" fuel tank or hydraulic tank. * Use of a tank larger than 120 gallons under 38 inch AeroCab or 42 inch modular sleeper will not permit the use of ladder style frame access steps. The step position will be too far from the grab handle on the back of the sleeper. * Use of a tank larger than 135 gallons under 62 inch AeroCab sleeper will not permit the use of ladder style frame access steps. The step position will be too far from the grab handle on the back of the sleeper. | \$147 | 15# |
| 6417009 | Frame access steps: 2 for fuel/hydraulic tank BOC, RH mount. Available when rear of tank under extends more than 14 in. behind rear of cab, sleeper, or side extender. For tanks located totally behind a cab or sleeper the front of the tank must be within 14 in. from the rear of cab, sleeper, or side extender. * Tank mounted frame access steps RH behind the cab require that a tank be selected in the same location. * The following right hand frame access steps may not be mounted next to under frame DPF/SCR: ladder steps, battery/tool box w/ steps, or steps on a 28.5" fuel tank or hydraulic tank. * This component is not available with full length chassis fairings due to interference issues. | \$168 | 6# |
| 6418006 | Frame access steps: 2 ladder-type, LH mount. Available when rear of tank extends less than 24 in. behind rear of cab, sleeper, or side extender. * Frame mounted ladder steps cannot be used in combination with wheel to wheel full chassis fairings on the same side. * Ladder style frame access steps cannot be used with full length chassis fairings. Not for use with extended steps for frame access mounted to a tank under cab. Not T8 non-sleeper chassis with 22 x 120 gal tank RH under or 24 x 135 or 24 x 150 gal RH under as the step will be located too far behind the cab to make the grab handle accessible. * Use of a tank larger than 120 gallons under 38 inch AeroCab or 42 inch modular sleeper will not permit the use of ladder style frame access steps. The step position will be too far from the grab handle on the back of the sleeper. * Use of a tank larger than 135 gallons under 62 inch AeroCab sleeper will not permit the use of ladder style frame access steps. The step position will be too far from the grab handle on the back of the sleeper. * When using the grab handle mounted to the ladder step you must also code for a ladder step on the same side of the vehicle. | \$147 | 15# |
| 6418008 | Frame access steps: 2 for fuel/hydraulic tank BOC, LH mount. Available when rear of tank under extends more than 14 in. behind rear of cab, sleeper, or side extender. For tanks located totally behind a cab or sleeper the front of the tank must be within 14 in. from the rear of cab, sleeper, or side extender. * Tank mounted frame access steps LH behind the cab require that a tank be selected in the same location. * This component is not available with full length chassis fairings due to interference issues. | \$168 | 6# |

| DPF-SCR Covers | | | |
| 6451112 | T470,C5, T6, T8 non-polished DPF/SCR or CNG cover, diamond plate with cab access step and polished end plates. For use with 2017 or later RH under exhaust systems. For T8, use extended length non-polished battery box on opposite rail to match the length of under cab components. For use with frame paint color other than standard black. The cover will be unpolished diamond-plate and the end plates will be polished. * Classic panel lights will not fit under the cab when the DPF/SCR is located in the RH under cab step assembly. * For use with custom frame paint and a non-aero right hand under cab DPF/SCR when a polished DPF/SCR cover is not desired. * Material mismatch side to side under the cab is undesirable. A polished battery box cover and non-polished DPF/SCR cover is not allowed. * This new generation of DPF covers support SCR on the chassis as well. The cover has a new length, 51 inches for W900 models, and 42" for all other models. The cover matches the battery box length for 'extended' length battery boxes. AeroCab length boxes are not for use with 2010+ engines. * Under cab fairings are not compatible with the DPF/SCR step cover assembly. | \$140 | 0# |
| Frame Crossmembers & Upgrades | | | |
| 6390002 | Two aluminum intermediate crossmembers with heavy-duty aluminum gussets. Includes one forward and one rear intermediate crossmember. * This is the standard installation with severe service kits, no code required. * Upgrading to 3-hole gussets on intermediate crossmembers is recommended for vehicles operating in Canada with GCWs exceeding 120K. | \$148 | 19# |
| 6421050 | Steel intermediate frame crossmembers & gussets. Does not include suspension crossmembers. | \$232 | 44# |
| 6490012 | Two steel intermediate crossmembers with heavy-duty aluminum gussets. Includes one forward and one rear intermediate crossmember. | \$218 | 52# |
| 6490018 | Steel forward intermediate crossmember: One with heavy-duty aluminum gussets, replacing standard. * This option upgrades to material or gusset style it does not supply an additional crossmember. | \$109 | 17# |
| 6490028 | Aluminum rear intermediate crossmember: One with heavy-duty aluminum gussets, replacing standard. * Severe Service packages include upgrading the crossmembers from the standard 2-hole to 3-hole gussets. There is no need to use an additional code to get this upgrade. * This option upgrades to material or gusset style it does not supply an additional crossmember. | \$74 | 9# |
| 6490033 | Aluminum forward intermediate crossmember: One additional with standard-duty aluminum gussets. | \$220 | 29# |
| 6490034 | Aluminum rear intermediate crossmember: One additional with standard-duty aluminum gussets. * In most cases a cutoff of at least 60 inches is required to locate an additional rear intermediate crossmember with tandem rear axles. * Tandem axles with cutoff exceeding 65 inches, or single rear axles with cutoff exceeding 55 inches can add a rear intermediate crossmember. | \$227 | 29# |
| 6490086 | Steel forward intermediate crossmember: One additional with standard-duty steel gussets. | \$270 | 60# |
| 6490088 | Steel rear intermediate crossmember: One additional with standard-duty steel gussets. * Additional rear intermediate crossmember for use with tandem rear axle chassis with cutoff below 66 inches, or on single rear axle chassis with cutoff below 56 inches. Chassis with cutoff specified beyond the listed dimension will have a rear intermediate crossmember standard in most cases. | \$270 | 60# |
| 6490089 | Steel forward intermediate crossmember: One additional with heavy-duty aluminum gussets. | \$337 | 81# |
| 6490090 | Aluminum forward intermediate crossmember: One additional with heavy-duty aluminum gussets. | \$275 | 38# |

| Option | Description | Price | Weight |
|--|--|-------|--------|
| Frame Crossmembers & Upgrades | | | |
| 6490091 | Aluminum rear intermediate crossmember: One additional with heavy-duty aluminum gussets. | \$275 | 38# |
| 6490092 | Aluminum forward intermediate crossmember: One with heavy-duty aluminum gussets, replacing standard. * Severe Service packages include upgrading the crossmembers from the standard 2-hole to 3-hole gussets. There is no need to use an additional code to get this upgrade. * This option upgrades to material or gusset style it does not supply an additional crossmember. | \$74 | 9# |
| 6490095 | Steel rear intermediate crossmember: One with heavy-duty aluminum gussets, replacing standard. * This option upgrades to material or gusset style it does not supply an additional crossmember. | \$109 | 17# |
| 6490120 | Invert rear intermediate crossmember. A separate sales code is required for one of the following: an additional crossmember; steel crossmember; and if crossmember is not standard aluminum gussets on non-severe service. * Rear intermediate crossmember requirement is suspension/cutoff dependent. If rear intermediate crossmember is not required this code will be deleted from order unless an additional rear intermediate crossmember is requested. * The option to invert the rear intermediate crossmembers requires that you upgrade from the standard 2-hole gussets to 3-hole gussets when Severe Service is not requested. * With double inserts requires the use of a steel crossmember. | \$0 | 0# |
| 6490416 | Heavy-duty rear cab supports: W/steel crossmembers & aluminum gussets. * Heavy-duty rear cab support is not compatible with an air cab suspension. * The Severe Service kit on T800 models requires a heavy-duty rear cab support crossmember and reinforced cab sills. | \$103 | 26# |
| 6490440 | Heavy-duty BOC crossmember assembly. * The heavy-duty back of cab crossmember assembly is restricted from use with front drive axles, transfer cases, auxiliary transmissions, and with a front engine PTO. * The heavy-duty crossmember assembly is required in the following conditions except when a front drive axle, transfer case, auxiliary transmission, front engine PTO, or T800SH with a rear engine PTO are specified: T800 logger with wheelbases in excess 259 inches, T800 dump truck with wheelbases in excess of 219 inches, W900 dump truck with wheelbases in excess of 239 inches, and for W900S or T800 mixer chassis. | \$178 | 23# |

|---------|--|---------|----|
| 6679864 | Final end-of-frame cut-off dimension will be modified to greater than or equal to 75 in. * Final cut-off dimension is used to assist in the evaluation of frame strength when and if the final end of frame may be reduced by the body builder for body types of end dump, super dump with flying tag, transfer dump, roll-on/roll-off, roll back flatbeds, or cotton modules. Required if cutoff exceeds 65 inches in these vocations. | \$0 | 0# |
| 6679901 | Hydraulic end of tank is difficult to fill. | \$0 | 0# |
| 6679914 | Any changes to rear cab/sleeper area must comply w/FMCSR 399. | \$0 | 0# |
| 6679915 | Customer-installed bulkhead and/or headache rack. | \$0 | 0# |
| 6679995 | Customer will install structural end-of-frame crossmember before vehicle is placed in service. * Warning for use when square end of frame without a crossmember is utilized with rear suspension configurations that require an end of frame crossmember. Provides dealer acknowledgement that the final-stage manufacturer must install the crossmember before placing the vehicle into service. * With cutoff 60" or less customer or body builder must install structural end of frame crossmember with Chalmers or Hendrickson beam rear suspensions. Use code 6679995 for full trucks when the crossmember will be installed by the body builder. | \$0 | 0# |
| 6790003 | Special frame drill: dealer to provide drawing with dimensions and revision level. Acceptable hole diameters range from 10.2 mm to 40.4 mm. Preferred file format is .pdf. Not for use for rear suspension, fifth wheel or other published frame drilling code. Does not replace clear frame space requests or custom frame layout. | \$1,510 | 0# |

Fifth Wheels

Holland Fixed Fifth Wheels

| | | | |
|---------|--|---------|------|
| 6541104 | Fifth Wheel: Fixed, Holland FW31Y600XL00 6.0 in. height. No lube, outboard mounting angles, 55K vertical rating, LH release. The code for additional factory drilled settings is available. Accommodates a 2 in. SAE kingpin. Requires some style of trailer connections. | \$1,958 | 356# |
| 6541232 | Fifth Wheel: Fixed, Holland FW17Y700XL00 7.12 in. height. Outboard mounting angles, 50K vertical rating, LH release. The code for additional factory drilled settings is available. Accommodates a 2 in. SAE kingpin. Requires some style of trailer connections. | \$1,402 | 378# |
| 6541234 | Fifth Wheel: Fixed, Holland FW17Y800XL00 8.12 in. height. Outboard mounting angles, 50K vertical rating, LH release. The code for additional factory drilled settings is available. Accommodates a 2 in. SAE kingpin. Requires some style of trailer connections. | \$1,402 | 383# |
| 6541236 | Fifth Wheel: Fixed, Holland FW17Y900XL00 9.12 in. height. Outboard mounting angles, 50K vertical rating, LH release. The code for additional factory drilled settings is available. Accommodates a 2 in. SAE kingpin. Requires some style of trailer connections. | \$1,429 | 388# |
| 6541272 | Fifth Wheel: Fixed, Holland FW17Z600XL00 5.81 in. height. Outboard mounting angles, 50K vertical rating, LH release. The code for additional factory drilled settings is available. Accommodates a 2 in. SAE kingpin. Requires some style of trailer connections. * Aluminum mounting plate not available with integrated plate mount fifth wheels. | \$1,316 | 333# |
| 6541273 | Fifth Wheel: Fixed, Holland FW17Z700XL00 6.81 in. height. Outboard mounting angles, 50K vertical rating, LH release. The code for additional factory drilled settings is available. Accommodates a 2 in. SAE kingpin. Requires some style of trailer connections. * Aluminum mounting plate not available with integrated plate mount fifth wheels. | \$1,316 | 341# |
| 6541275 | Fifth Wheel: Fixed, Holland FW17Z800XL00 7.81 in. height. Outboard mounting angles, 50K vertical rating, LH release. The code for additional factory drilled settings is available. Accommodates a 2 in. SAE kingpin. Requires some style of trailer connections. * Aluminum mounting plate not available with integrated plate mount fifth wheels. | \$1,316 | 351# |

| Jost Air-Sliding Fifth Wheels | | | |
| 6593716 | Fifth Wheel: Air, Jost JSK36NSL-A9PX48 48.0 in. slide, 8.75 in. height. Lightweight top plate. Outboard mounting angles, 45K vertical rating, LH release. Air slide control valve standard in dash. Accommodates a 2 in. SAE kingpin. Requires some style of trailer connections. | \$2,532 | 609# |
| Fixed Fifth Wheel Placement | | | |
| 6607023 | Fifth Wheel: Fixed angle drilled for 4 additional settings in 2 in. increments. Includes coded setting plus 2 settings ahead and 2 behind. Use with code 6670496-504 to determine the factory setting relative to the coded fixed setting. | \$755 | 0# |
| 6607024 | Fifth Wheel: Fixed angle drilled for 8 additional settings in 2 in. increments. Includes coded setting plus 4 settings ahead and 4 behind. Use with code 6670494-508 to determine the factory setting relative to the coded fixed setting. | \$755 | 0# |
| 6670494 | Fix fifth wheel placement at -6 in. from coded rear or fixed setting for use with 6607024 angle drill. Determines factory setting for fixed fifth wheels only. * Determines factory setting for fixed fifth wheels only. Use of this code will instruct the factory to place the fifth wheel at the coded rear setting. That would allow for 5 optional settings ahead and no optional settings behind with 6607010 or 7 settings ahead and 1 settings behind with 6607019 , each spaced 2 inches apart. * User specified fifth wheel placement is for use only with a fixed fifth wheel and code for optional additional drillings. | \$0 | 0# |
| 6670495 | Fix fifth wheel placement at -8 in. from coded rear or fixed setting for use with 6607024 angle drill. Determines factory setting for fixed fifth wheels only. * Determines factory setting for fixed fifth wheels only. Use of this code will instruct the factory to place the fifth wheel at the coded rear setting. That would allow for 6 optional settings ahead and no optional settings behind with 6607010 or 8 settings ahead and no optional settings behind with 6607019 , each spaced 2 inches apart. * User specified fifth wheel placement is for use only with a fixed fifth wheel and code for optional additional drillings. | \$0 | 0# |
| 6670496 | Fix fifth wheel placement at -4 in. from coded rear or fixed setting for use with 6607023 or 6607024 angle drill. Determines factory setting for fixed fifth wheels only. Use of this code will instruct the factory to place the fifth wheel 4 inches behind the coded rear setting. That would allow for 4 optional settings ahead, each spaced 2 inches apart. * Determines factory setting for fixed fifth wheels only. Use of this code will instruct the factory to place the fifth wheel at the coded rear setting. That would allow for 4 optional settings ahead and no optional settings behind with 6607010 or 6 settings ahead and 2 settings behind with 6607019 , each spaced 2 inches apart. * User specified fifth wheel placement is for use only with a fixed fifth wheel and code for optional additional drillings. | \$0 | 0# |
| 6670498 | Fix fifth wheel placement at -2 in. from coded rear or fixed setting for use with 6607023 or 6607024 angle drill. Determines factory setting for fixed fifth wheels only. Use of this code will instruct the factory to place the fifth wheel 2 inches behind the coded rear setting. That would allow for 3 optional settings ahead and 1 optional setting behind, each spaced 2 inches apart. * Determines factory setting for fixed fifth wheels only. Use of this code will instruct the factory to place the fifth wheel at the coded rear setting. That would allow for 3 optional settings ahead and 1 optional setting behind with 6607010 or 5 settings ahead and 3 settings behind with 6607019 , each spaced 2 inches apart. * User specified fifth wheel placement is for use only with a fixed fifth wheel and code for optional additional drillings. | \$0 | 0# |

| Fixed Fifth Wheel Placement | | | |
| 6670500 | Fix fifth wheel placement at 0 in. from coded rear or fixed setting for use with 6607023 or 6607024 angle drill. Determines factory setting for fixed fifth wheels only. Use of this code will instruct the factory to place the fifth wheel at the coded rear setting. That would allow for 2 optional settings ahead and two optional settings behind, each spaced 2 inches apart. * Determines factory setting for fixed fifth wheels only. Use of this code will instruct the factory to place the fifth wheel at the coded rear setting. That would allow for 2 optional settings ahead and two optional settings behind with 6607010 or 4 settings ahead and 4 settings behind with 6607019, each spaced 2 inches apart. * User specified fifth wheel placement is for use only with a fixed fifth wheel and code for optional additional drillings. | \$0 | 0# |
| 6670502 | Fix fifth wheel placement at +2 in. from coded rear or fixed setting for use with 6607023 or 6607024 angle drill. Determines factory setting for fixed fifth wheels only. Use of this code will instruct the factory to place the fifth wheel 2 inches ahead the coded rear setting. That would allow for 1 optional setting ahead and 3 optional settings behind, each spaced 2 inches apart. * Determines factory setting for fixed fifth wheels only. Use of this code will instruct the factory to place the fifth wheel at the coded rear setting. That would allow for 1 optional setting ahead and 3 optional settings behind with 6607010 or 3 settings ahead and 5 settings behind with 6607019, each spaced 2 inches apart. * User specified fifth wheel placement is for use only with a fixed fifth wheel and code for optional additional drillings. | \$0 | 0# |
| 6670504 | Fix fifth wheel placement at +4 in. from coded rear or fixed setting for use with 6607023 or 6607024 angle drill. Determines factory setting for fixed fifth wheels only. Use of this code will instruct the factory to place the fifth wheel 4 inches ahead the coded rear setting. That would allow for 4 optional settings behind, each spaced 2 inches apart. * Determines factory setting for fixed fifth wheels only. Use of this code will instruct the factory to place the fifth wheel at the coded rear setting. That would allow for no optional settings ahead and 4 optional settings behind with 6607010 or 2 settings ahead and 6 settings behind with 6607019, each spaced 2 inches apart. * User specified fifth wheel placement is for use only with a fixed fifth wheel and code for optional additional drillings. | \$0 | 0# |
| 6670506 | Fix Fifth Wheel Placement at +6 in. from coded rear or fixed setting for use w/ 6607024 angle drill. Use to determine factory setting for fixed fifth wheels only. * Determines factory setting for fixed fifth wheels only. Use of this code will instruct the factory to place the fifth wheel at the coded rear setting. That would allow for no optional settings ahead and 5 optional settings behind with 6607010 or 1 settings ahead and 7 settings behind with 6607019, each spaced 2 inches apart. * MISC FRAME 5TH WHEEL; these options for use with an adjustable plate mount fifth wheel. * User specified fifth wheel placement is for use only with a fixed fifth wheel and code for optional additional drillings. | \$0 | 0# |
| 6670508 | Fix Fifth Wheel Placement at +8 in. from coded rear or fixed setting for adjustable plate mount only. For use w/ 6607024 angle drill. Determines factory setting for fixed fifth wheels only. * Determines factory setting for fixed fifth wheels only. Use of this code will instruct the factory to place the fifth wheel at the coded rear setting. That would allow for no optional settings ahead and 6 optional settings behind with 6607010 or no optional settings ahead and 8 settings behind with 6607019, each spaced 2 inches apart. * User specified fifth wheel placement is for use only with a fixed fifth wheel and code for optional additional drillings. | \$0 | 0# |

Fifth Wheels

Fifth Wheel Equipment

| | | | |
|---------|---|-------|------|
| 6600033 | Aluminum Fifth Wheel Angles Replacing Steel on fixed or outboard mounted sliding fifth wheels. * Aluminum angles are not compatible with inboard mounted fifth wheels. * Aluminum replacing standard steel fifth wheel angles. Not for use with Reyco, Neway, Hendrickson air, Hendrickson RT or Primaax rear suspensions. * For use only on tractors with a factory installed or customer installed fifth wheel. This option is not available on vehicles that will be placed into service as a truck. * This option is not available with rear axles rated over 52K or with GCWs in excess of 120K. | \$189 | -30# |
| 6600052 | Steel Angle for Customer-Installed Fifth Wheel. For outboard mounted fixed or up to 36.7in. slide fifth wheel w/ o plate drill. * Cannot be combined with options for extra drillings for additional settings. * Cannot be combined with other factory drillings for aftermarket fifth wheel. * Requesting fifth wheel angles for an aftermarket fifth wheel requires a code to describe the fifth wheel so that engineering knows how long the angles should be. * When ordering angles for aftermarket fifth wheel installations include a narrative line describing the attributes of the fifth wheel that will be used. The angles are not available on vehicles that will be placed into service as a truck. | \$387 | 77# |
| 6600053 | Steel Angle for Customer-Installed Fifth Wheel. For outboard mounted fifth wheel. Narrate fifth wheel model & slide; w/ plate drill. * Requesting fifth wheel angles for an aftermarket fifth wheel requires a code to describe the fifth wheel so that engineering knows how long the angles should be. * When ordering angles for aftermarket fifth wheel installations include a narrative line describing the attributes of the fifth wheel that will be used. The angles are not available on vehicles that will be placed into service as a truck. | \$844 | 77# |
| 6602010 | Fifth Wheel: Ramps. * Factory installed fifth wheel ramps require tractor taper end of frame with bent and welded taper ends. This option is not available with short or long tapers. * Fifth wheel ramps are only available for use with rear suspensions rated under 58K. * For use only on tractors with a factory installed or customer installed fifth wheel. This option is not available on vehicles that will be placed into service as a truck. * Not for use with Severe Service. | \$647 | 22# |
| 6603011 | Mounting Plate: Aluminum for fixed fifth wheel replacing standard steel base plate. Adds 0.25 in. to height. * Aluminum mounting plate not available with integrated plate mount fifth wheels. * For use only on tractors with a factory installed or customer installed fifth wheel. This option is not available on vehicles that will be placed into service as a truck. * This option is not available with rear axles rated over 52K or with GCWs in excess of 120K. | \$115 | -35# |

Rear Frame Equipment

Quarter Fenders

| | | | |
|---------|--|-------|-----|
| 6734005 | Quarter Fenders: Stainless Steel w/ Painted Steel brackets, single post mounted. * Frame mounted quarter fenders are not applicable with full length chassis fairings. Full fairings utilize an integral quarter fender. * Quarter fenders are located just ahead of the forward drive axle. * Single post mounted quarter fenders are incompatible with wide track rear axles when a Neway AD or Hendrickson PRIMAAX rear suspension is specified. | \$337 | 55# |
|---------|--|-------|-----|

Rear Frame Equipment

Quarter Fenders

| | | | |
|---------|--|-------|-----|
| 6734008 | Quarter Fenders: Stainless Steel Hogebuilt 30in. Nu Style w/ brackets, frame mounted. * Frame mounted quarter fenders are not applicable with full length chassis fairings. Full fairings utilize an integral quarter fender. * Hogebuilt stainless quarter fenders are not available with Kenworth AG230, AG380, AG400L, AG460 with 60 inch axle spacing, Neway , or Reyco four spring suspensions. * Quarter fenders are located just ahead of the forward drive axle. | \$999 | 63# |
| 6734016 | Quarter Fenders: Stainless Steel Hogebuilt 30in. Nu Style w/ brackets, 30in. single post mount. * Frame mounted quarter fenders are not applicable with full length chassis fairings. Full fairings utilize an integral quarter fender. * Quarter fenders are located just ahead of the forward drive axle. | \$843 | 48# |
| 6737120 | Quarter Fenders: Black Polypropylene w/ painted steel brackets, single post mounted, 21 in. white top flap with logo. * Frame mounted quarter fenders are not applicable with full length chassis fairings. Full fairings utilize an integral quarter fender. * Quarter fenders are located just ahead of the forward drive axle. * Single post mounted quarter fenders are incompatible with wide track rear axles when a Neway AD or Hendrickson PRIMAX rear suspension is specified. | \$188 | 43# |
| 6738107 | Quarter Fenders: Brackets Painted Steel For customer-installed fenders. * Frame mounted quarter fenders are not applicable with full length chassis fairings. Full fairings utilize an integral quarter fender. * Quarter fenders are located just ahead of the forward drive axle. | \$38 | 11# |

End-Of-Frame Configurations

Non-Towing Configuration

| | | | |
|---------|---|-------|-----|
| 6741011 | Square end-of-frame w/ crossmember; non-towing. * A square end of frame configuration is typically not the best solution for a tractor chassis. * Chalmers and Hendrickson beam suspensions without track rods do not have a standard rear suspension crossmember. When these suspensions are coded they require an end of frame or rear intermediate crossmember. For cutoff of 60 inches or less an EOF crossmember must be specified. There is an option for the body builder to install the crossmember, 6679995 must be used. * This end of frame style is not available with a pintle hook. Hooks for pulling trailers require a crossmember specifically designed for the hook installation, hooks for yarding dollies are installed in rear suspension crossmembers and an end of frame crossmember would interfere. | \$212 | 30# |
| 6742009 | Square end-of-frame w/o crossmember; non-towing. * A square end of frame configuration is typically not the best solution for a tractor chassis. * End of frame configurations which are applicable to hook at end of frame must code for the hook separately. * With cutoff 60" or less customer or body builder must install structural end of frame crossmember with Chalmers or Hendrickson beam rear suspensions. Use code 6679995 for full trucks when the crossmember will be installed by the body builder. | STD | 0# |

Non-towing end-of-frame configuration. * Chalmers and Hendrickson beam suspensions without track rods do not have a standard rear suspension crossmember. When these suspensions are coded they require an end of frame or rear intermediate crossmember. For cutoff of 60 inches or less an EOF crossmember must be specified. There is an option for the body builder to install the crossmember, 6679995 must be used. * Long tractor taper end of frame configurations are not available with the Kenworth AG380 rear suspension. * Not available with an 11 5/8" rail. * Not for use with Severe Service. * This end of frame style is not available with a pintle hook. Hooks for pulling trailers require a crossmember specifically designed for the hook installation, hooks for yarding dollies are installed in rear suspension crossmembers and an end of frame crossmember would interfere. * This option interferes with the ECE compliant under-run required for over the road use in Russia. Not Russian compliant. * Tractor taper end of frames are applicable to tractors only. Chassis used for Severe Service require ar end of frame configuration that includes a crossmember. | \$131 | 17# |
| 6744121 | Tractor Taper w/o crossmember. Non-towing end-of-frame configuration. * End of frame configured as a tractor taper without an EOF crossmember for is use on tractors only, nc full trucks. * Not for use with Severe Service. * This option interferes with the ECE compliant under-run required for over the road use in Russia. Not Russian compliant. * Tractor taper end of frame not for use on full trucks. | \$45 | -6# |
| 6744122 | Short Tractor Taper w/o crossmember. Non-towing end-of-frame configuration. * Not for use with Severe Service. * Tractor taper end of frame not for use on full trucks. | \$35 | -4# |
| 6744123 | Short Tractor Taper bent & welded w/o cross member. Non-towing end-of-frame configuration. * Not for use with Severe Service. * Tractor taper end of frame, not for full truck. | \$35 | -2# |
| 6745270 | Top Flange of Rear Frame bent & welded w/ crossmember. Non-towing end-of-frame configuration. * Chalmers and Hendrickson beam suspensions without track rods do not have a standard rear suspension crossmember. When these suspensions are coded they require an end of frame or rear intermediate crossmember. For cutoff of 60 inches or less an EOF crossmember must be specified. There is an option for the body builder to install the crossmember, 6679995 must be used. * Not available with an 11 5/8" rail. * This end of frame style is not available with a pintle hook. Hooks for pulling trailers require a crossmember specifically designed for the hook installation, hooks for yarding dollies are installed in rear suspension crossmembers and an end of frame crossmember would interfere. * Tractor taper end of frame is not appropriate for use on full trucks. Not for use with Severe Service which requires an end of frame crossmember. | \$110 | 17# |
| 6746131 | Top Flange of Rear Frame bent & welded w/o crossmember. Non-towing end-of-frame configuration. * Tractor taper end of frame, not for full truck. | \$35 | -2# |

T440/T470: FRAME & EQUIPMENT

| Option | Description | Price | Weight |
|--------|-------------|-------|--------|
|--------|-------------|-------|--------|

Rear Frame Equipment

End-Of-Frame Configurations

Non-Towing Configuration

| | | | |
|---|--|-----|----|
| 6747000 | Shortest end-of-frame cutoff with specified end-of-frame configuration. Selecting this code will override the overhang dimension found in the Vocational Analysis of Prospector. | \$0 | 0# |
| * The code for shortest end of frame configuration does not apply to tag axles. These axles are always located to the rear of the suspension and a short cutoff is never an option. | | | |

Towing Configuration

| | | | |
|--|---|-------|------|
| 6700005 | Drop-type crossmember below frame pintle hook; square end-of-frame towing configuration. This crossmember limits hitch capacity to 68K. | \$990 | 155# |
| * A drop-type crossmember should be used when the pintle hook height will be more than 2 inches below the centerline of the frame rail. | | | |
| * A drop-type crossmember will move the pintle hook location below the frame rails. Provide a hook height sales code so that the hook can be properly located. | | | |
| * Chalmers and Hendrickson beam suspensions without track rods do not have a standard rear suspension crossmember. When these suspensions are coded they require an end of frame or rear intermediate crossmember. For cutoff of 60 inches or less an EOF crossmember must be specified. There is an option for the body builder to install the crossmember, 6679995 must be used. | | | |
| * Drop-type crossmember is only applicable with tail lamps that include a single backup light, not when two backup lights are located in the tail lamp assembly. Also not available with tail lamps mounted between rails 9070034. | | | |
| * The drop-type crossmember for use with pintle hooks is incompatible with logger-style trailer connections. | | | |
| * This end of frame configuration is for use only with a pintle hook. | | | |
| * This option interferes with the ECE compliant under-run required for over the road use in Russia. Not Russian compliant. | | | |
