BUY AMERICA

The Buy American Act was enacted in 1938 and was to ensure that the federal government support or give preference to domestic companies and domestic workers by buying American made goods, The act was later enacted in 1.982 dropping the "n" of American and changing to the Buy America Act.

PURPOSE: The Buy American Act is intended to protect Americans from foreign competition by requiring the federal government, contractors, subcontractors and manufacturers to buy from sources in the United States instead of from foreign sources. It is important because it helps working men and women in the United State keep their jobs and earn decent, living wages. It also strengthens our domestic steel industry, which is critical to our national security and necessary for our ability to rebuild after a devastating natural disaster or terrorist attack.

If the domestic cost is Unreasonable meaning, the price of the lowest acceptable domestic offer exceeds the lowest foreign offer by more than 6-12%.

In the beginning 49CFR, Part 661 was enacted in 1982 and covered only surface transportation

But the amendment is due to American jobs heading overseas at an alarming rate. More than 2.4 million jobs have been lost to overseas trade since 1998. With that, our economic growth is steady declining.

BUY AMERICA REQUIREMENTS

Applicability to Contracts

The Buy America requirements apply to recipient agencies participating in the National School Lunch Program and the School Breakfast Program in the contiguous United States to buy food produced in the United States when buying with Federal funds. While the 1987 legislation allowed certain limited exceptions to the "domestic origin" requirement, the new legislation is specific in requiring schools, to the maximum extent practicable, to purchase product of domestic origin.

As defined in the legislation, a domestic food commodity is an agricultural commodity (for example, red meat, chicken, fruit, vegetable, or grain) that is produced in the Limited States. A domestic food product is processed in the United States substantially using domestic agricultural commodities. Substantially means that over 51% of the processed food comes from American produced products. Regulations implementing these requirements (at 7 CFR 210.21 and 220.16) were published on September 20, 1999.

FLOW DOWN

Occasionally, a significant price difference between U.S. and foreign product may tempt a School Food Authority to purchase the cheaper foreign product. However, this price difference could be attributable to price-distorting subsidies of a foreign government. For example, recent imports of cheap, subsidized canned peaches from the European Union have displaced sales of domestic canned peaches. The U.S. Government is considering action to address this practice, including placing canned peaches from the European Union on a list of products subject to 100% tariffs.

Mandatory Clause/Language

A report of the language accompanying the Agriculture Appropriations Act for Fiscal year 2002 requires the Department to report to Congress on its activities directed toward enforcing the Buy American provision,

Buy America - The contractor agrees to comply with the maximum extent practicable according to the buy American provisions which include:

The buy American clause on all procurement documents (product specifications, bid solicitations, requests for proposals, purchase orders, etc.

Contractor performance.

Requiring supplier to certify the origin of the product.

Produce packaging for identification of the country of origin; and.

Provide specific information about the percentage of U.S. content in the food product.

7CFR 210.21 and 220.1-6, which provide that federal funds may not be obligated unless a domestic food product is processed in the United States, unless a waiver has been granted by USDA or the product is subject to a general waiver. General waivers are as listed in Bulletin 1196, Chapter 15; 1121:

The recipients have unusual or ethnic food preferences that can be met only through purchases of products not produced in the United States.

The products are not produced or manufactured in the United States in sufficient and reasonably available quantities of a satisfactory quality.

The cost of the domestic produced food products is significantly higher than the cost of the similar foreign products.

A bidder or offeror must submit to the SFA recipient the appropriate Buy America certification (below) with all bids or offers on SFA-funded contracts, except those subject to a general waiver. Bids or offers that are not accompanied by a completed Buy America certification must be rejected as nonresponsive. This requirement does not apply to lower contractors.
