Bid 50-00144101

Two (2) Year Contract for Certified Laboratory Analytical Services to Perform Sample Analysis for the Jefferson Parish Department of Environmental Affairs

The Jefferson Parish Department of Environmental Affairs is seeking a Laboratory to serve on a contractual basis as back-up support to perform laboratory analyses on samples including but not limited to wastewater, stormwater, groundwater, soil, and sludge. In the event the Parish Water Quality Laboratory and or Bacteriology Laboratory cannot perform required analyses due to unavailability of laboratory staff, missing or broken equipment or any other unforeseeable conditions, said support lab would perform such analyses.

Analyses shall be performed using any EPA approved method that achieves the required MQL and which is currently listed in 40 CFR Part 136 and provided that the Quality Assurance /Quality Control (QA/QC) requirements of the method that identifies the analyte are achieved. All QA/QC data shall be submitted with the analytical results. All analyses are to be completed in a standard 10 to 15-day turnaround. Analytical results must be provided no later than 21 days following receipt of the samples. Occasionally samples will be submitted with a request for expedited analysis or "rush turnaround". In this instance a 5-day turnaround for analysis completion and immediate analysis results may be requested.

Environmental laboratories submitting bids must be accredited in the state of Louisiana under the Louisiana Environmental Laboratory Accreditation Program (LELAP) for the specified parameter. The original laboratory contracted to perform the requested scope of testing must ensure that if any samples are subcontracted to a second environmental laboratory; that the second laboratory is also accredited to perform the requested scope of testing.

Any instances beyond that of a force majeure causing samples to not arrive at a subcontracted laboratory intact and within the holding time (such as a wrong address provided to the courier, FedEx, etc. by the main laboratory) shall constitute a penalty. The main contracted laboratory shall be penalized by analyzing the replacement sample free of charge.

- The penalty for a second incidence would be analyzing the replacement sample free of charge in addition to a monetary fine of twenty-five dollars (\$25).
- The penalty for a third incidence would be analyzing the replacement sample free of charge in addition to a monetary fine of fifty dollars (\$50).
- Additional incidences shall result in analyzing the replacement sample free of charge in addition to further escalating monetary fines in increments of twenty-five dollars (\$25).

Two (2) Year Contract for Certified Laboratory Analytical Services to Perform Sample Analysis for the Jefferson Parish Department of Environmental Affairs

If the successful bidder is located outside of the New Orleans metropolitan area, the bidder must furnish all containers and pay all shipping costs for these analyses or include the cost of shipping in the bid and the bidder must be able to meet the holding times for the required analytes. If the successful bidder has a local laboratory they intend to use for receipt of samples via drop off or courier service; the day(s) of the week and hours of the day for sample pick-up via courier shall be submitted with bid submission. Failure to submit this information with bid submission will result in a bid rejection.

Upon commencement of the laboratory contract, the successful bidding laboratory shall have personnel on site to receive samples directly from the Environmental field staff. The laboratory personnel shall inspect the samples as they receive them (in the presence of the Environmental staff), record the sample condition as per the Chain of custody (COC) and account for each sample bottle present prior to signing the COC.

Upon signing the COC a copy of the COC shall be presented to the Environmental field staff. If the receiving laboratory is a satellite or sub-contracted laboratory, the main contracted laboratory shall by way of email (IndustrialPretreatment@jeffparish.net) notify the Environmental Affairs Industrial Pretreatment Division of receipt of samples at the time of their receipt. The sample condition and temperature shall be included in this email. If the transport of the samples to a sub-contracted lab is by courier, FedEx, etc., the tracking number shall be provided to the Environmental Affairs Industrial Pretreatment Division in the form of an email upon shipment by the main contracted laboratory.

The attached pages are a list of testing requirements required to satisfy the Wastewater Treatment Plant NPDES permits, the Industrial Pretreatment Program, Storm Water Program, and any emergency testing to satisfy Public Service requests or Inter-departmental assistance. The approximate number of analyses per parameter is based upon the approximate number of analyses required or anticipated annually.

Payment under this contract shall be for the actual number of samples and the type of analyses requested at the agreed upon submitted unit prices. Invoices for billing shall be submitted at the same time interval as the final assembled analysis reports. Invoice pricing, once set by the contract, cannot change for the duration of the contracts term and must be honored.
