Overview

In accordance with this invitation to bid and subject to all Terms and Conditions thereof we quote as follows: NJK Global LLC is responding to the purchase request for (16) 55 Gal Drum of MobilGard 410 NC. To be delivered to Hero Pump Station, 4644 Peters Road, Harvey, LA 77058.

Goals

1. To deliver professional and quality customer service.
2. Continue to prepare and develop talent towards our customers' specific needs.

Specifications

Mobilgard 410 NC (No Chlorine) engine oil is a non-zinc and non-chlorine lubricant specifically formulated with an Electro Motive Diesel (EMD) and General Electric (GE) endorsed additive technology to meet requirements of heavily loaded diesel engines manufactured by EMD and used in marine applications. Its alkalinity reserve provides excellent corrosion protection when using fuels containing up to 0.05 wt.% sulfur, even though metals such as steel, copper, silver and bronze are present. It has excellent lubricating properties and has a high viscosity index to help reduce oil consumption, and is optimized for low and ultra low sulfur fuel use and is LNG, biofuel and Tier IV engine ready.

Pricing

Each 55 Gal. Drum comes at a proposed cost of \$1,695.93. For a quantity of 16 the total proposed cost, including shipping/freight, is \$27,134.88. All products will be shipped in accordance with Hazmat protocols to prevent spills or leakage. The product will be FOB. The estimated Delivery time is 7-10 business days.
