Tilting Disc Check Valve w/Top Dashpot

Description

GA Industries Tilting Disc Check Valve features a streamlined design and full flow area for lower full open head loss than conventional swing check valves. Its energy efficient operation is combined with a short 40-degree disc stroke that provides quick closing valve to minimize hammer.

The valve employs offset seating technology to smoothly lift the disc off of the seat during opening and into the seat during closing without binding or sticking.

The top mounted oil dashpot is mechanically attached to the valve disc. Its self-contained hydraulic system controls the valve's opening and closing speed over its full stroke with an independently adjustable 2-stage final closing speed. Reverse flow occurs during closure which can reduce pressure surge. The top mounted dashpot is recommended when there is likelihood of extremely rapid flow reversal.
