Equipped with LED backlit gauges, a digital screen and push button for engine start, our new control panel allows the user to see selected engine and airend temperatures and pressure as well as features such as engine load and all trouble codes. (Standard on the P185 and C185)

Safety features

- Auto shutdowns for high discharge air temperatures, high engine temperatures, and low engine oil pressure
- Electric lift pump makes priming as simple as the push of a button
- Standard fuel/water separator

Doosan Portable Power offers power and value in the C185

The C185 portable compressor features the industry's most reliable airend. Combining advanced engineering with our most cost-effective features, the C185 offers an innovative compressor that provides the ultimate in serviceability, durability and convenience — all within your budget. C185 compressors provide efficient, reliable performance, day after day.

C185 performance features

- **Lower operating cost** - Compact design and smaller footprint make these compressors easier to tow and more maneuverable in tight areas.
- **Cool-box airflow** allows cool air to enter through the rear and wash over internal components, keeping temperatures low and prolonging component life.
- **Designed for two tool application** - The C185 is designed to provide all the power you need. With an output of 185 cfm at 100 psi, the C185 is an exceptional value that allows you to meet even the toughest jobsite demands.
- **Curbside controls and service valves** keeps operators away from traffic for added safety. One-handed startup, even with work gloves. The control panel is accessible and operational with the canopy open or closed.
- These compressors utilize engineered composite materials and a three-step paint process to provide high **corrosion resistance** and ensure longer life of the unit. The fenders and canopy are engineered with high-strength plastic. The three step paint process on the frame and tow bar includes a microzinc phosphate pretreatment, epoxy e-coat primer base and TGIC polyester powder topcoat.

① Remote separator element

Simple, spin-on design eliminates the need to enter separator tank and prevents spillage during oil changes.

② Convenient toolbox

Large, low point-of-entry toolbox can easily accommodate tools and commonly used accessories.

③ Full access canopy

2-position gas springs allow the canopy to open to one position for routine checks, inspection, and service, and a full-open position for access to all components for more involved service and maintenance.

④ Single-piece canopy design

The lockable canopy, made of a composite material, is lightweight, aerodynamic and virtually indestructible.

⑤ Superior mobility

These compressors offer go-anywhere mobility with torsional running gear, a heavy-duty 7-gauge steel frame, 54-inch track width, a fuel tank balanced over the wheels and road-ready running gear and lights.
