

ITSP-CSSP-10x Coax Surge Suppression Panel

ITSP-SSP-6 pictured

Description

The ITSP-SSP-x surge suppression panel features a compact “Christmas Tree” BNC layout to reduce both the strain on a BNC connector and the “footprint” required inside a cabinet. The panel supports 170/2070, NEMA and ATC cabinets. Designed to easily attach to a standard 19” EIA rack with 1 to 6 coax surge suppressors (x = 1 to 6 cameras).

A resettable high voltage circuit breaker adds AC surge protection to the cameras. Coupled with individual switches to control the AC power to each camera allows for safe, efficient installations.
