RE: Jefferson Parish Government – Statement of Qualifications (TEC)  
Routine Engineering Services for Water Projects  
SOQ No. 22-013 – Resolution No. 138809

Dear Sir or Madam:

C. H. Fenstermaker & Associates, L.L.C. is pleased to submit our Statement of Qualifications / TEC Professional Services Questionnaire to provide Routine Engineering Services for Water Projects relative to any upcoming projects located in the Parish of Jefferson. Fenstermaker has provided engineering services within the State of Louisiana for over 70 years. Today, the firm has nearly 300 full-time employees and continues to be a firm of choice for many of our clients across the State and region.

Joining the Fenstermaker Team are the highly respected firms of Terracon, who will provide expertise and services in geotechnical engineering, and M & E Consulting, Inc., who will provide electrical design expertise and services.

The Fenstermaker Team will provide Jefferson Parish with the following benefits to ensure successful project completion:

- ✓ *Trusted leadership*
- ✓ *Local knowledge*
- ✓ *Successful completion of past water and utilities projects*
- ✓ *Office Locations in New Orleans*

A diligent review of SOQ No. 22-013 has been performed. Know that our Fenstermaker personnel, who are a part of the local community and are familiar with the Jefferson Parish area, clearly understand the scope of services which may be required for any water and utilities projects in the Parish. Jefferson Parish Government will have our firm commitment to provide professional services on-time and on-budget.

Thank you for the opportunity to present our credentials and we look forward to hearing from you. Should you have any questions regarding our submittal or qualifications, please do not hesitate to contact Professional in Charge, Stefan Bourgeois, or Angelle Guilbeau, who is authorized to contractually obligate the firm.

**C. H. FENSTERMAKER & ASSOCIATES, L.L.C.**

LA Survey Firm Reg. No. VF.0000154. LA Engineering Firm Reg. No. EF.0000311. TX Survey Firm Reg. No. 10028500. TX Engineering Firm Reg. No. F-7855.

## **Technical Evaluation Committee (TEC) Questionnaire**

### **Instructions**

- The Technical Evaluation Committee (TEC) Questionnaire shall be used for professional services related to architecture, engineering, or survey projects.
- The TEC Questionnaire must be completely filled out. Complete ALL sections. Insert “N/A” or “None” if a section does not apply or if there is no information to provide.
- Questionnaire must be dated and signed by an authorized representative of the Firm.
- All subcontractors must be listed in the appropriate section of the Questionnaire. All subcontractors must provide a fully completed copy of this questionnaire, applicable licenses, and any other information required by the advertisement.
- If additional pages are needed, attach them to the questionnaire and include all applicable information that is required by the questionnaire.
- Failure to properly complete this TEC Professional Services Questionnaire will result in the proposal being deemed not qualified pursuant with Section 2-928(a) of the Jefferson Parish Code of Ordinances, and the proposal will not be evaluated or scored.

## TEC Professional Services Questionnaire

### A. Project Name and Advertisement Resolution Number:

Jefferson Parish Government  
 SOQ No. 22-013 Routine Engineering Services for Water Projects  
 Resolution No. 138809

### B. Firm Name & Address:

C. H. Fenstermaker & Associates, L.L.C.  
 1100 Poydras Street, Suite 1550  
 New Orleans, LA 70163

C. H. Fenstermaker & Associates, L.L.C.

### C. Name, title and contact information of Principal, as defined in Section 2-926 of the Jefferson Parish Code of Ordinances, who is a registered, licensed architect, professional engineer, or surveyor in the State of Louisiana:

Stefan Bourgeois, P.E., Manager, Engineer  
 1100 Poydras Street, Suite 1550  
 New Orleans, LA 70163  
 (504) 582-2201; [stefan@fenstermaker.com](mailto:stefan@fenstermaker.com)

### D. Name and contact information of employee who is a registered and licensed architect, professional engineer, or surveyor in the State of Louisiana in the applicable discipline. A subcontractor may be substituted here only if the advertised Project requires more than one discipline.

Stefan Bourgeois, P.E., Manager, Engineer  
 1100 Poydras Street, Suite 1550  
 New Orleans, LA 70163  
 (504) 582-2201; [stefan@fenstermaker.com](mailto:stefan@fenstermaker.com)

### E. Please provide the number of employees whose primary function corresponds with each category:

<u>39</u> Administrative	<u>0</u> Estimators	<u>0</u> Specification Writers
<u>0</u> Architects (Licensed)	<u>0</u> Geologists	<u>0</u> Structural Engineers
<u>0</u> Chemical Engineers	<u>2</u> Geotechnical Engineers	<u>0</u> Graduate Engineers
<u>24</u> Civil Engineers	<u>0</u> Interior Designers	<u>21</u> Project Managers
<u>8</u> Construction Inspectors	<u>0</u> Landscape Architects	<u>7</u> Clerical
<u>10</u> Ecologists	<u>48</u> Land Surveyor (field crew)	<u>2</u> Grant/Funding Specialist
<u>0</u> Electrical Engineers	<u>0</u> Mechanical Engineers	<u>0</u> Sanitary Engineers
<u>24</u> Engineer Intern	<u>1</u> Environmental Engineers	<u>13</u> Land Surveyors
<u>13</u> Professional Land Surveyors	<u>4</u> CADD Technicians	<u>53</u> Other Survey Staff
		<u>31</u> Other Staff
		<b><u>300</u> TOTAL</b>

### F. Is this submittal by a JOINT-VENTURE? Please check: YES NO

If marked "No" skip to Section I. If marked "yes" complete Sections G-H.

**TEC Professional Services Questionnaire**

**G. If submittal is by JOINT-VENTURE, list the firms participating and outline specific areas of responsibility (including administrative, technical, and financial) for each firm. Please attach additional pages if necessary.**

1. N/A

2.

**H. Has this JOINT-VENTURE previously worked together? Please check:  
 YES  NO**

**I. List all subcontractors anticipated for this Project. Please note that all subcontractors must submit a fully completed copy of this questionnaire, applicable licenses, and any other information required by the advertisement. See Jefferson Parish Code of Ordinances, Sec. 2-928(a)(3). Please attach additional pages if necessary.**

Name & Address:	Specialty:	Worked with Firm Before (Yes or No):
1. Terracon 524 Elmwood Park Boulevard Suite 170 New Orleans, LA 70123 	Geotechnical Engineering	Yes
2. M&E Consulting, Inc. 1304 Bertrand Drive Suite F7 Lafayette, LA 70506 	Mechanical and Electrical Engineering	Yes

**J. Please specify the total number of support personnel that may assist in the completion of this Project:**

9

## TEC Professional Services Questionnaire

**K. List the professional in charge, key persons, specialists, and individual consultants anticipated for this Project and provide their relevant information below. If necessary, please attach additional documentation (i.e. resume) that demonstrates the employment history and experience of the Firm's key persons that may assist in the completion of this Project. Please attach additional pages if necessary.**

### **PROFESSIONAL IN CHARGE OF PROJECT:**

**Name & Title:**

Stefan Bourgeois, P.E. - Manager, Engineer

**Project Assignment:**

Professional In Charge of Project

**Name of Firm with which associated:**

C. H. Fenstermaker & Associates, L.L.C.

**Years' experience with this Firm:**

12 years

**Education: Degree(s)/Year/Specialization:**

B.S. / 2009 / Civil Engineering

**Active registration: Year first registered/discipline:**

2014 / Louisiana PE #0038623

**Other experience and qualifications relevant to the proposed Project:**

**Stefan Bourgeois, P.E.** is a Senior Engineer with over 13 years of professional experience in design, planning, municipal code development and review, construction engineering, and project management. He is the Office Manager for Fenstermaker's New Orleans office. In addition to Mr. Bourgeois' experience in municipal engineering and management, he has been the engineer of record for the design of various project types such as hydrologic and hydraulic modeling and analysis, sewer lift station design, wastewater treatment design, and structural design.

**FEMA RR021 - Central City Group A, New Orleans, LA:** The City of New Orleans Department of Public Works selected Fenstermaker to provide baseline and topographic survey, roadway and utility design, and construction administration for full street reconstruction in the Central City neighborhood. Replacement of waterlines were included on several streets and waterline designs were provided by the Sewerage and Water Board. Mr. Bourgeois is leading the project team in the construction administration phase.

**FEMA RR045 – Filmore South Group D (FRC), New Orleans, LA:** Fenstermaker was contracted to provide professional engineering design and construction administration services for FEMA-eligible street reconstruction in the Filmore South neighborhood. Mr. Bourgeois is the engineer of record and project manager. The provided services include topographic and right-of-way surveys, roadway and drainage design, final design (construction documents), bid & award services, construction administration, construction close out, inspection, reporting, and verification. The design is following FEMA guidelines as well as the guidelines set forth by City of New Orleans Department of Public Works.

## TEC Professional Services Questionnaire

### **Continued - Other experience and qualifications relevant to the proposed Project:**

**Stefan Bourgeois, P.E.**

**East Pont des Mouton, Phase I: Water and Sewer Lafayette Parish, LA:** Mr. Bourgeois assisted with the design of the improvements to the sanitary sewer collection system (gravity and force main), the design of a new lift station, and improvements to the water distribution system, all construction and contract documents, production of construction plans, and construction administration for this roadway project. This sanitary sewer portion of this project entailed the design and installation of over 8,000 cumulative feet of 8", 15", 18", 21", and 24" gravity sewer lines, 1,500 feet of 10" force main, and a 2 MGD lift station. The project involved the installation of water and sewer mains while maintaining existing water and sewer service as well as continuous traffic on East Pont Des Mouton.

**Country Club Road Waterline Extension Project (Calcasieu Parish, LA):** This waterline extension project consisted of the design and layout of a water line from Weaver Road to Jensen Road in the City of Lake Charles. Mr. Bourgeois provided technical support to the design team throughout the design phase and provided QA/QC of the plans.

**N. University Avenue Water Main Extension (Lafayette Parish, LA):** The City of Carencro tasked Fenstermaker with the preparation of plans and specifications for water main improvements and construction bidding and contract. Water system improvements included replacement of an existing 2" water main with a proposed 8" water main. Mr. Bourgeois established the preliminary layout of the waterline which consisted of existing servitude evaluation, studying interaction with existing and proposed residential developments, and determining optimal roadway crossing locations.

**Post Road Water Main Phases 1 & 2 (Lafayette Parish, LA):** The City of Carencro contracted with Fenstermaker to prepare plans and specifications for the 2014 Utility Improvements along Post Road as well as oversight of construction. The Phase 1 project included the installation of approximately 450' of 8" water main due north along the east side of Post Road. The Phase 2 project included the installation of 410' of 8" water line. Both projects included meters, valves, and fire hydrants. Mr. Bourgeois assisted the team with updating water main plans.

**West Gloria Switch Water Plant - Ground Storage Tank and Pumping Facility (Lafayette Parish, LA):** Mr. Bourgeois provided design support of the preparation of plans and specifications for the construction of a new 750,000-gallon ground storage water tank, including hydraulic design of pumps, valves, and piping as well as a new sodium hypochlorite injection system, site and civil design, fencing and driveway layouts, coordination for electrical controls and any supplemental support services. The project was unique in the sense of implementing a new design system within an existing and operating system. Mr. Bourgeois was the Project Manager on this project and was responsible for all aspects such as design, construction administration, monthly billing and coordination.

**Youngsville Water Storage Tank (Youngsville, LA):** Mr. Bourgeois prepared a cost estimate, provided quality control of the design plans and specifications, bid assistance, and construction engineering for this \$1.2M 500,000-gallon (CROM) concrete water storage tank for the City of Youngsville. The project also included a new water line to the water main on Chemin Metairie Parkway, a new access road, chlorination room, and new pump system for increased water pressure and capacity.

## TEC Professional Services Questionnaire

<b>KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:</b>
<b>Name &amp; Title:</b>
Luke Hebert, P.E., CFM – Director, Engineer
<b>Project Assignment:</b>
Engineer
<b>Name of Firm with which associated:</b>
C. H. Fenstermaker & Associates, L.L.C.
<b>Years' experience with this Firm:</b>
18 Year
<b>Education: Degree(s)/Year/Specialization:</b>
B.S. / 2003 / Civil Engineering
<b>Active registration: Year first registered/discipline:</b>
2009 / Louisiana PE #0034715 Certified Floodplain Manager No. US-17-09739
<b>Other experience and qualifications relevant to the proposed Project:</b>
<div style="display: flex; align-items: flex-start;">  <div style="flex-grow: 1;"> <p><b>Luke Hebert</b> is a Professional Engineer with over 19 years of experience in engineering design, planning, and project management. During his career, Mr. Hebert has been part of many different types of designs ranging from various roadway types (i.e., local, collector, arterial and freeway), surface and sub-surface drainage systems, water and sewer distribution system and water and sewer treatment. In 2013 Mr. Hebert was appointed by the Mayor of Carencro as the engineer for the City. One of his main focuses is working with developers on new commercial and residential developments. Since 2013 Mr. Hebert has been involved with over 20 new developments located within the City of Carencro and has managed them through planning, construction, and final acceptance. He has also provided Application Preparation, Program Management and Design Services to the City for Community Development Block Grants (CDBG), Facility Planning &amp; Control (FP&amp;C)–Capital Outlay, FEMA, USACE/DOTD, U.S. Dept. of Agriculture (USDA) Loan, Office of Community Development–Community Water Enrichment Fund, and Louisiana Dept. of Health. In total, Mr. Hebert has assisted the City with the acquisition and management of nearly \$18 Million in Federal and State project funding and lead the City to a FEMA Community Rating System Class 7.</p> <p><b>Andre St. New Water Treatment Plant (Lafayette Parish, LA):</b> Design Engineer: Fenstermaker designed a new water treatment facility to replace the existing water treatment plant. This new 7,820 SQFT cinder block masonry building was designed to house four greensand filters 12' in diameter, one 6,000-gallon caustic soda and one 6,000-gallon sodium permanganate tank, a complete chlorination room, and a Master Control Center (MCC). The new design included a SCADA system, which allows the plant operator to monitor and control the operations of the plant from remote locations. The proposed plant also facilitates the production of 2 MGD. Provisions were made to allow the expansion of water production volume to 4 MGD. The designs also incorporated a unique feed system for caustic soda and sodium permanganate, eliminating the need for continuous dry delivery batching. This feed system design will reduce the city's labor costs and lower the risk of possible injury to workers handling the chemicals. Fenstermaker completed all permit applications required for the construction.</p> </div> </div>

## TEC Professional Services Questionnaire

### **Continued - Other experience and qualifications relevant to the proposed Project:**

**Luke Hebert, P.E., CFM**

**Hector Connolly Road Water Treatment Plant (Lafayette Parish, LA)** Fenstermaker designed a new water treatment facility, which will reside adjacent to the existing water production facility near Hector Connolly Road and will replace the existing water production facilities. Mr. Hebert served as the Lead Engineer on the project. His team completed the project plans, specifications, and bid documents. The team also completed the construction administration and oversaw the inspection services on the project.

**Country Club Road Water Line Extension Project (Calcasieu Parish, LA)** This waterline extension project consisted of the design and layout of a waterline from Weaver Road to Jensen Road in the City of Lake Charles. Mr. Hebert served as the Lead Engineer on the project. His team completed the project plans, specifications, and bid documents. The team also completed the construction administration and oversaw the inspection services on the project.

**Youngsville Water Storage Tank (Lafayette Parish, LA)** Mr. Hebert assisted with design services for this \$1.2M water storage tank project. The project involved the construction of a new 500,000-gallon (CROM) concrete water storage tank, new water line to the water main on Chemin Metairie Parkway, a new access road, chlorination room, and a new pump system for increased water pressure and capacity to the fastest growing southern area of town.

**N. University Ave. Water Main Extension (Lafayette, LA)** The City of Carencro contracted Fenstermaker with the preparation of plans and specifications for water main improvements along N. University Ave (LA 182) as well as construction bidding and contract. Improvements to the water system will include replacing an existing 2" water main with a proposed 8" water main. Mr. Hebert served as the lead engineer on the project. His team completed the project plans, specifications, and bid documents. The team also completed the construction administration and oversaw the inspection services on the project.

**Post Road Water Main Phases 1 & 2 (Lafayette Parish, LA)** The City of Carencro selected Fenstermaker to prepare of plans and specifications for the 2014 Utility Improvements along Post Road as well as oversight of construction. The Phase 1 project included the installation of approximately 450' of 8" water main due north along the east side of Post Road. The Phase 2 project included the installation of 410' of 8" water line. Both projects included meters, valves, and fire hydrants. Mr. Hebert served as the project manager.

**West Gloria Switch Water Plant - Ground Storage Tank and Pumping Facility (Lafayette Parish, LA)** This project included the design and preparation of plans and specifications for the construction of a new 750,000-gallon ground storage water tank, including hydraulic design of 1,100 GPM pumps, valves, and piping, as well as a new sodium hypochlorite injection system, site and civil design, fencing and driveway layouts, coordination for electrical controls and any supplemental support services. The project was unique in the sense of implementing a new design system within an existing and already operating system. Fenstermaker was responsible for all aspects of this project such as design, survey, construction administration, and consultant coordination. Mr. Hebert served as the project engineer.

**Cameron Parish Waterworks No. 10 Water Tower Replacement (Cameron Parish, LA)** Cameron Parish Waterworks District No. 10 selected Fenstermaker to provide engineering services for the replacement of the water tower at Holly Beach. The water tower was destroyed during Hurricane Laura in August of 2020. Mr. Hebert is serving as the Project Manager for this project. This project is funded through FEMA HMGP.

## TEC Professional Services Questionnaire

KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:	
<b>Name &amp; Title:</b>	Paul Zappi, M.S., P.E., Senior Engineer
<b>Project Assignment:</b>	Senior Engineer
<b>Name of Firm with which associated:</b>	C. H. Fenstermaker & Associates, L.L.C.
<b>Years' experience with this Firm:</b>	2 Years
<b>Education: Degree(s)/Year/Specialization:</b>	M.S. / 1992 / Civil/Environmental Engineering B.S. / 1988 / Civil Engineering
<b>Active registration: Year first registered/discipline:</b>	1996 / Louisiana Civil PE #27031
<b>Other experience and qualifications relevant to the proposed Project:</b>	
	<p><b>Paul Zappi, P.E.</b>, has over 31 years of experience working in environmental engineering. Mr. Zappi has worked in municipal/water engineering for over 22 years. He has experience in research, testing, computer modeling, planning, design, construction, operation, and maintenance related to a wide variety of W/W facilities and pipelines. Mr. Zappi has experience working with water, wastewater, chemical, and dredged material pumping systems including centrifugal, progressive cavity, air lift, diaphragm, and other types, in both dry and submersible settings and involving several manufacturers.</p> <p><b>City of Austin – Water and Wastewater Pipeline Operations Technical Support:</b> Mr. Zappi worked as Supervisor of W/WW Pipeline Operations Technical Support Group for three years. His groups provided technical support for numerous point repairs on the City’s water transmission and distribution lines, gravity WW lines and manholes, WW force mains, and reuse water force mains. He worked closely with the City’s collection system rehabilitation group. Regarding lift stations and force mains, Mr. Zappi’s group worked closely with Austin’s lift stations group during force main repairs. Mr. Zappi was also supervisor of the City’s odor control program, which involved testing, installation, through operation and maintenance of numerous LS/FM chemical feed and air treatment systems.</p> <p><b>City of Beaumont - Water Utilities Division, Technical Manager</b> Mr. Zappi served as Technical Manager of Beaumont Water Utilities (\$10M annual CIP budget). He managed the Administration and QC groups for the water and wastewater utilities. The Administration group was responsible for planning through execution of CIP program (W/WW plants and pipelines); TCEQ SSO Initiative; O&amp;M technical support (W/WW line and plants); service and supply contracts; process optimization; residential and commercial development projects; water and wastewater service/supply agreements; water rights agreements; and other administrative responsibilities. The Quality Control group, which includes project managers and inspectors’ staff, responsible for TCEQ permits (wastewater and storm water), inspections, reporting, compliance communications, and other tasks; pretreatment program; back flow prevention program; and water quality efforts.</p>

## TEC Professional Services Questionnaire

KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:	
<b>Name &amp; Title:</b>	William Katzenmeyer, P.E., CFM - Engineer II
<b>Project Assignment:</b>	Engineer
<b>Name of Firm with which associated:</b>	C. H. Fenstermaker & Associates, L.L.C.
<b>Years' experience with this Firm:</b>	1 Year
<b>Education: Degree(s)/Year/Specialization:</b>	B.S. / 2008 / Civil Engineering
<b>Active registration: Year first registered/discipline:</b>	2011 / Louisiana PE #0036775 2021 / Certified Floodplain Manager No. US-21-11950
<b>Other experience and qualifications relevant to the proposed Project:</b>	
	<p><b>William Katzenmeyer, P.E., CFM</b> is a Professional Engineer with over 13 years' experience working in South Louisiana and the New Orleans Metropolitan area. His areas of expertise include project management, design engineering, and FEMA PA disaster grant management. His design engineering experience includes roadway and drainage design, stormwater management including green infrastructure, hydrologic and hydraulic modeling, stormwater and sewer pumping stations, utility design, heavy construction, and site development.</p> <p><b>Dillard University Improvements, Orleans Parish, LA:</b> Mr. Katzenmeyer was the civil engineer responsible for preparing plans and specifications for multiple utility and drainage projects. Dillard University selected LH&amp;J to design multiple infrastructure projects including improvement of the campus-wide drainage facilities, roadways, parks, bioswales, and the construction of low-impact design pervious parking lots for LEED certification. Additional projects included multiple building utility site plans, lift station improvements, 12" waterline improvements for fire services to new buildings. Mr. Katzenmeyer provided a gamut of consulting, scoping, design, bidding, and construction management services.</p> <p><b>\$70 M Roadway, Water and Sewer Infrastructure Combined Improvement Project – Stuart Consulting Group (St. Tammany Parish, LA):</b> Mr. Katzenmeyer served as the senior technical and program/project manager working alongside a team during project scoping, AE design phase management, preparation of Environmental and Historical Preservation submittals, forecasting and budgeting involving multiple discrete funding courses (PA, FHWA, and Local Bond), and design document review prior to construction.</p> <p><b>FEMA Public Assistance Disaster Grant Management: City of Slidell, Orleans Levee District Non Flood Authority, Lafon Nursing Home, Tangipahoa Sherriff's Office (Stuart Consulting Group/Linfield, Hunter and Junius Inc.) (Orleans, St. Tammany, and Tangipahoa Parishes, LA)</b> Mr. Katzenmeyer co-led a team of grant management personnel and engineers responsible for design phase project management of the City of Slidell's \$70M Roadway, Water and Sewer Infrastructure Consolidated Improved Project, including initial scoping and cost estimation duties, providing value engineering which was pivotal for achieving the project goals utilizing limited local funding. For the Orleans Levee District Non Flood Authority, Mr. Katzenmeyer led a team in preparing closeout documentation for over \$50M in completed work utilizing multiple funding sources and resolving hundreds of eligibility, procurement and cost reasonableness issues which were preventing reimbursement of completed work. Mr. Katzenmeyer also completed multiple closeout requests for complex projects involving post-Katrina renovations at Lafon Nursing home and new project requests for Tangipahoa Sherriff's office after severe flooding in 2016 (DR-4263). Please note that Mr. Katzenmeyer served in multiple roles over this time period as both a subcontractor and full-time employee of LH&amp;J and SCG during the period of performance.</p>

## TEC Professional Services Questionnaire

KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:	
<b>Name &amp; Title:</b>	Dax Douet, P.E. – Director, Engineer
<b>Project Assignment:</b>	Engineer
<b>Name of Firm with which associated:</b>	C. H. Fenstermaker & Associates, L.L.C.
<b>Years' experience with this Firm:</b>	25 Years
<b>Education: Degree(s)/Year/Specialization:</b>	B.S. / 1997 / Civil Engineering
<b>Active registration: Year first registered/discipline:</b>	2002 / Louisiana PE #0030170
<b>Other experience and qualifications relevant to the proposed Project:</b>	
	<p><b>Dax Douet</b> is an Engineering Director with over 25 years of professional experience in design, planning, and project management. He has designed highways, roadways, drainage systems, interchanges, roundabouts, standard intersections, and various site developments. Additionally, Mr. Douet managed the preparation of over thirteen Stage 0 feasibility studies for the LADOTD. These feasibility studies were conducted for a wide range of transportation projects throughout the State of Louisiana to include roadway improvements, interstate highway interchanges, and grade-separated bridge structures. Mr. Douet has also led the preparation of geometric line and grade studies to support more than five Environmental Assessment documents in accordance with the National Environmental Policy Act (NEPA) guidelines. He has managed various multi-disciplinary projects and performed roadway corridor studies, traffic safety analyses, and feasibility studies, which encompass design, right-of-way, environmental, and utility work. He has attended the ATSSA Traffic Control Supervisor and Technician courses, the NHI Course No. 142005, "NEPA &amp; the Transportation Decision Making Process" and the LADOTD Highway Safety Manual Workshop.</p> <p><b>Youngsville Water Storage Tank (Youngsville, LA):</b> Mr. Douet served as Project Manager for the design of this \$1.2M water storage tank project, which involved the construction of a new 500,000-gallon (CROM) concrete water storage tank, new water line to the water main on Chemin Metairie Parkway, a new access road, chlorination room, and a new pump system for increased water pressure and capacity to the fastest growing southern area of town.</p> <p><b>LADOTD Permit No. 03030387: Kaliste Saloom Rd Widening, Intersection Improvements, Bridge and CE&amp;I (LA3073 to LA733) (Amb. Caffery to E. Broussard Rd) (Lafayette Parish, LA)</b> Mr. Douet was the Lead Design Engineer for the widening of approximately two miles of Kaliste Saloom Road. The project was split into three phases to include drainage outfall construction, utility relocations, and roadway construction. Mr. Douet led the design team for all three phases. The utility relocations consisted of 1,200 linear feet of distribution water mains ranging from 6 to 12 inch diameter were relocated. Mr. Douet is currently managing this \$30 million-dollar project, which includes fast-tracking all real estate appraisals, plats, and construction plans.</p>

## TEC Professional Services Questionnaire

### KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:

**Name & Title:**

Mustafa Afaneh, E.I. - Engineer Intern

**Project Assignment:**

Engineer Intern

**Name of Firm with which associated:**

C. H. Fenstermaker & Associates, L.L.C.

**Years' experience with this Firm:**

1 Year

**Education: Degree(s)/Year/Specialization:**

B.S. / 2018 / Civil Engineering

**Active registration: Year first registered/discipline:**

2019 / Louisiana EI #34198

**Other experience and qualifications relevant to the proposed Project:**

**Mr. Afaneh** is an Engineer Intern with over 2 years of professional experience in engineering design within the traffic, civil, and structural sectors. Mr. Afaneh has recently joined C.H. Fenstermaker after partaking a successful early career at a local engineering firm in New Orleans. Being early in his professional career, Mr. Afaneh demonstrates eagerness and aptitude for acquiring the necessary knowledge to complete any task and resolve any issue. Under supervision of a licensed engineer, Mr. Afaneh has performed structural and site design for numerous low and midrise structures locally. Mr. Afaneh's expertise extends into foundation, civil and structural engineering. In addition, Mr. Afaneh has successfully served as the lead project coordinator for multiple civil designs including storm water management plans to meet the City's requirements. He is currently assisting the project team with the design and construction phases for various full roadway reconstruction projects here for the City of New Orleans.

**FEMA RR045 – Filmore South Group D (FRC) (New Orleans, LA)** Mr. Afaneh is serving as the Engineer Intern and will be responsible in assisting the project team with preparation of final design, construction documents, and specifications. Fenstermaker was contracted to provide professional engineering design and construction administration services for FEMA-eligible street repairs in the Filmore South neighborhood. Services being provided include topographic and right-of-way surveys, roadway and drainage design, environmental study, final design, bid & award services, construction administration, construction close out, and inspection, reporting, and verification. The design is following FEMA guidelines, as well as the guidelines set forth by City of New Orleans Public Works.

**FEMA RR021 - Central City Group A (New Orleans, LA)** The City of New Orleans Department of Public Works selected Fenstermaker to provide baseline and topographic survey, roadway design, and construction administration for streets in the Central City neighborhood. Replacement of waterlines were included on several streets and waterline designs provided by the Sewerage and Water Board was incorporated on others. Mr. Afaneh is assisting the project team in the construction administration phase.

**FEMA RR105 – Lower Ninth Ward Group C (FRC) (New Orleans, LA)** Fenstermaker was contracted to provide professional engineering design and construction administration services for FEMA-eligible street repairs. Services being provided include topographic and right-of-way surveying, roadway and drainage design, environmental study, construction bidding services, construction administration, construction close-out and construction inspection. The design is following FEMA guidelines, as well as the guidelines set forth by City of New Orleans Public Works. Mr. Afaneh is assisting the project team in the final coordination and construction administration phase.

<ul style="list-style-type: none"> <li>NHI Bridge Inspection Certificate</li> <li>USACE Construction Quality Management for Contractors Certification</li> <li>Density Gauge (Nuclear Troxler) and ACI Trained</li> <li>OSHA 30</li> <li>LADOTD Structural Concrete Inspector/Technician</li> </ul>
<b>Other experience and qualifications relevant to the proposed Project:</b>
<div style="display: flex; align-items: flex-start;">  <div style="flex-grow: 1;"> <p><b>Mr. Henderson</b> has 21 years of construction inspection experience. His primary duties and experience are in inspecting, testing of materials and quality management of structural and reinforced steel, concrete, masonry, piles, and soils. He has years of experience assisting project managers with scheduling, budgeting, reviewing RFI's and submittals, pay apps, and managing inspectors. Before being employed at Fenstermaker, Mr. Henderson worked as a senior resident inspector for the North Terminal Airport, an inspector for LADOTD, and USACE.</p> <p><b>City of New Orleans Central City Group A (Orleans Parish, LA)</b> Fenstermaker is providing baseline and topographic survey, roadway design, and construction administration for streets in the Central City neighborhood. Fenstermaker's scope includes assessment of existing street conditions including ADA compliance, accessibility and provision for pedestrians, and design of any needed repairs. Mr. Henderson inspected drain and sewer lines for this project.</p> <p><b>RR 105 Lower Ninth Ward Northeast Group C (Orleans Parish, LA)</b> Fenstermaker was contracted to provide professional engineering design and construction administration services for FEMA-eligible street repairs in the Lower Ninth Ward neighborhood. Services being provided include topographic and right-of-way surveying, roadway and drainage design, environmental study, construction bidding services, construction administration, construction close-out and construction inspection. The design is following FEMA guidelines, as well as the guidelines set forth by City of New Orleans Public Works. Mr. Henderson performed constructability reviews for this project.</p> <p><b>LADOTD INSPECTOR (Jefferson Parish, LA):</b> Mr. Henderson assisted with inspections of new and existing off-system bridges, identifying bridge conditions and defects. He prepared condition reports documenting deficiencies and alerting engineers of findings which impacted the structure or integrity of roadways. Mr. Henderson previewed bridge structure plans, previous instructions, repairs and maintenance and recorded findings into the state and federal bridge system programs.</p> </div> </div>

## TEC Professional Services Questionnaire

<b>KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:</b>	
<b>Name &amp; Title:</b>	Mark Dubroc, P.E. - Engineer III
<b>Project Assignment:</b>	Quality Assurance / Quality Control Lead
<b>Name of Firm with which associated:</b>	C. H. Fenstermaker & Associates, L.L.C.
<b>Years' experience with this Firm:</b>	2 Years
<b>Education: Degree(s)/Year/Specialization:</b>	B.S. / 1980 / Civil Engineering
<b>Active registration: Year first registered/discipline:</b>	1987 / Louisiana PE #22618
<b>Other experience and qualifications relevant to the proposed Project:</b>	
	<p><b>Mr. Dubroc</b> is a Senior Engineer with over 39 years of professional civil engineering experience. As Principal of Dubroc Engineering, Inc. for 23 years, Mr. Dubroc gained extensive experience in civil engineering consulting, with a wide variety of clients and projects including urban and rural roadway and drainage designs, highway bridge design, solid waste transfer facilities, site planning, residential land developments, municipal water and sewer collection systems, and various other civil and structural design projects. His extensive and deeply embedded participation in every aspect of design and construction administration of such a variety of similar projects uniquely qualify him to provide the general oversight and quality assurance necessary for the project at hand. Most recently, Mr. Dubroc served as Public Works Director of Lafayette Consolidated Government, where he managed 335 Public Works employees, with an operating budget of \$58M, an annual Capital Improvement Program of \$50M, and a 5-Year Capital Plan budget of \$250M, which included 375 projects. He managed the Capital Improvements Division, that included the Design &amp; Development Section, ROW Section, Project Control Section and the Estimates and Administration Section. He also managed the Operations Divisions, which included street, drainage and vehicle maintenance divisions, and the Traffic and Transportation Division responsible for traffic engineering, traffic maintenance (signs and markings), traffic signals maintenance transit operations, and parking.</p> <p><b>Post Road Wastewater Treatment Plant and Sludge Dewatering Facility (Lafayette Parish, LA):</b> This project consists of the design of a proposed activated sludge wastewater treatment plant for the City of Carencro. The wastewater treatment plant is designed to treat an average daily flow of 2.0 MGD and a peak wet weather flow of 8.0 MGD with the ability to expand treatment capacity to an average daily flow of 4.0 MGD and a peak wet weather flow of 16 MGD. Mr. Dubroc reviewed all plans and specifications for the project.</p> <p><b>Ascension Episcopal School (Lafayette Parish, LA)</b> Mr. Dubroc served as the Principal and Project Manager for this \$4 million site civil project, for the planning, design, and construction of a \$24 million private high school. Mr. Dubroc led the design team for topographic surveys, platting, preliminary and final plans and specifications and construction administration for sewer and water utility systems, curb and gutter parking and roadways, and subsurface drainage systems. The drainage systems included multiple integrated detention basins modelled and designed with XP_SWMM. Quality assurance was an integral part of the design and administration of the work.</p>

## TEC Professional Services Questionnaire

<b>KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:</b>	
<b>Name &amp; Title:</b>	Travis Bodin, MBA, PLS, PMP Vice President, Survey
<b>Project Assignment:</b>	Survey Lead
<b>Name of Firm with which associated:</b>	C. H. Fenstermaker & Associates, L.L.C.
<b>Years' experience with this Firm:</b>	18 Years
<b>Education: Degree(s)/Year/Specialization:</b>	B.S. / 2004 / Industrial Technology MBA / 2021 / Business Administration
<b>Active registration: Year first registered/discipline:</b>	2011 / Louisiana PLS # 0005067 2018 / Project Management Professional PMI PMP No. 2269869
<b>Other experience and qualifications relevant to the proposed Project:</b>	
	<p><b>Travis Bodin, MBA, PLS, PMP</b> currently serves as Vice President of Survey at Fenstermaker and has over 18 years of surveying, management, and coordination experience. He is currently responsible for directing and overseeing the daily activities within the Fenstermaker Survey Division which consist of both the Houston and Lafayette Offices and over 35 survey crews working across multiple states. He has served as the Lead Professional Land Surveyor for projects across Louisiana. His responsibilities have included the management of surveying/ROW services, utility relocation coordination, coordinating with parish, state, and federal agencies and sub-consultants, cost estimating, scoping, scheduling and planning, resource management, and construction management services. With his background in surveying and project management, Mr. Bodin has performed and participated in multi-million-dollar projects consisting of large scale topographic and bathymetric surveys, development of high accuracy GPS networks, landowner notification and documentation, the development of DTM, infrastructure documentation, GIS integration, process and procedure development. During his tenure at Fenstermaker Mr. Bodin has conducted management duties for both field and office activities on survey and engineering projects. Software &amp; Training: With his wide range of managerial and technical experiences, Mr. Bodin was able to obtain his Project Management Professional (PMP) Certification which is acknowledged by agencies around the world as the leading certification for project managers. Mr. Bodin is experienced in the use of the newest versions of MicroStation, AutoCAD, and Trimble Business Center, Office 365, and Primavera 6.</p> <p><b>Water Treatment Plant – Hector Connolly Rd. (Lafayette Parish, LA)</b> Fenstermaker designed a new water treatment facility, which will reside adjacent to the existing water production facility near Hector Connolly Road and will replace the existing water production facilities. Mr. Bodin was responsible for right-of-way plats and utility coordination.</p> <p><b>East Pont des Mouton, Phase II – Water and Sewer Improvement and Roadway Widening (Lafayette Parish, LA)</b> This project included the widening of Approximately 1.4 miles of urban roadway reconstruction resulting in utility relocation and design of potable water distribution system and sanitary sewer collection system (gravity and force main). The sanitary sewer portion of this project entailed the design and installation of over 8,000' cumulative feet of 15", 18", 21", and 24" gravity sewer main. Mr. Bodin was the Lead Surveyor on this project. He led a full survey that was conducted to capture elevations and dimensions.</p>

## TEC Professional Services Questionnaire

**L. Work by Firm or Joint-Venture members which best illustrates current qualifications relevant to this Project. Please include any and all work performed for Jefferson Parish. Please attach additional pages if necessary.**

### PROJECT NO. 1

Project Name, Location and Owner's contact information:	Nature of Firm's Responsibility:	
RR045 Filmore South Group D  Orleans Parish, LA  City of New Orleans Department of Public Works  1300 Perdido Street, #6W03 New Orleans, LA 70112 Ang Nguyen (504) 658-8685 Anh.Nguyen@nola.gov	The City of New Orleans Department of Public Works contracted Fenstermaker to provide professional engineering design and construction administration services for FEMA-eligible street repairs in the Filmore South neighborhood. Plans and specifications for the site may include the following design features: full roadway pavement sections including sidewalks and curb ramps; roadway pavement base material; subsurface drainage, water, and sanitary sewer installation; modifications, adjustments, and repair as required; adjustments at driveways, intersection streets, and Project termini as required; green stormwater infrastructure such as permeable surfaces, street trees, detention/retention basins, street basins, and street-side bioswales; bicycle facilities such as bike lanes and shared lanes; and transit facilities such as bus boarding and alighting areas. Installation of ADA ramps will be included. The project includes water main point repairs on various streets within the neighborhood. These repairs include installing a new fire hydrant, valves, and waterlines.	
<b>Completion Date (Actual or estimated):</b>	<b>Estimated Cost:</b>	
	<b>Entire Project:</b>	<b>Work for which Firm was Responsible:</b>
08/2023 (estimated)	\$13,624,000	\$565,858

## TEC Professional Services Questionnaire

PROJECT NO. 3		
Project Name, Location and Owner's contact information:	Nature of Firm's Responsibility	
RR021 City of New Orleans Central City Group A RR045 Filmore South Group D  Orleans Parish, LA  City of New Orleans Department of Public Works 1300 Perdido Street, #6W03 New Orleans, LA 70112 Ang Nguyen (504) 658-8685 Anh.Nguyen@nola.gov	The City of New Orleans Department of Public Works selected Fenstermaker to provide baseline and topographic survey, roadway design, and construction administration for streets in the Central City neighborhood. The project includes a 10 yr. design to replace the existing sub-surface drainage system and replacement of all sewer structures. Replacement of waterlines is included on several streets and waterline designs provided by the Sewerage & Water Board will be incorporated on others. Fenstermaker has completed the design.	
Completion Date (Actual or estimated)	Estimated Cost:	
	Entire Project:	Work for which Firm was Responsible:
07/2022 (estimated)	\$10,155,000	\$971,875

PROJECT NO. 4		
Project Name, Location and Owner's contact information:	Nature of Firm's Responsibility:	
West Gloria Switch Water Plant Ground Storage Tank  Lafayette Parish, LA  Lafayette Utilities System PO Box 4017-C Lafayette, LA 70502 Jim Moore (337) 291-8311 jmoore@lus.org	Fenstermaker designed and construct a 750,000 gallon above ground storage tank for a potable water system owned by Lafayette Utilities System. The project also involved a full survey of the site to capture elevations and topography, design of site and drainage, and construction administration. The prime scope consisted of integrating water storage capabilities into the water treatment facility's operations, thus optimizing the facility's ability to maintain system pressure during water distribution. The existing plant's pneumatic bladder tanks were not providing adequate system pressure to the distribution system and numerous events occurred when system pressure dropped below 20 psi. The owner needed an automated system to disinfect, store and distribute water at the design pressure of 65 psi without disrupting the existing plant operation during construction. Fenstermaker was tasked with the hydraulic design of vertical turbine pumps, a pre-stressed concrete storage tank, a new sodium hypochlorite injection system for disinfection, and SCADA for system automation to meet the owner's operational needs. The ground storage tank volume was strategically sized to meet the capacity needs of the system while maintaining residual chlorine levels above DHH minimum requirements.	
Completion Date (Actual or estimated):	Estimated Cost:	
	Entire Project:	Work for which Firm was Responsible:
2013	\$1,700,000	\$190,000

## TEC Professional Services Questionnaire

<b>PROJECT NO. 5</b>		
<b>Project Name, Location and Owner's contact information:</b>	<b>Nature of Firm's Responsibility:</b>	
Andre Street Water Treatment Plant  Lafayette Parish, LA  City of Carencro 210 East St. Peter St. Carencro, LA 70520 Don Chauvin (337) 896- citymanager@carencro.org	Fenstermaker designed a new water treatment facility for the City of Carencro on Andre Street. This new facility is a 7,820 square foot building designed to house four 12-foot diameter greensand filters, a 6,000-gallon caustic soda tank, a 6,000-gallon sodium permanganate tank, a complete chlorination room, and a Master Control Center (MCC). The new treatment plant facilitates the production of 2 million gallons of drinking water per day (MGD). Fenstermaker's design provisions allow for the expansion of water production volume up to 4 MGD. The installed SCADA system enables the plant operator to monitor and control plant operations from remote locations via internet access. The plant's unique feed system for caustic soda and sodium permanganate estimates the need for continuous dry delivery batching, which will reduce the city's labor costs and lower the risk of injury to workers handling the chemicals.	
<b>Completion Date (Actual or estimated):</b>	<b>Estimated Cost:</b>	
	<b>Entire Project:</b>	<b>Work for which Firm was Responsible:</b>
2011	\$4,000,000	\$350,000

<b>PROJECT NO. 6</b>		
<b>Project Name, Location and Owner's contact information:</b>	<b>Nature of Firm's Responsibility:</b>	
Youngsville Water Storage Tank  Lafayette Parish, LA  City of Youngsville 305 Iberia Street Youngsville, LA 70592 Ken Ritter, Mayor (337) 856-4181 Mayor@youngsvillela.gov	Fenstermaker designed and installed a new water storage tank in Youngsville. The new tank and pump system increased the water pressure and helped the City with their Fire Rating. The project's design elements included a 750,000 gallon above ground concrete water storage tank; a new access road; a chlorination room; a new pump system to increase water pressure and capacity to provide service to the fast-growing southern area of town; the integration of water storage capabilities within the water treatment facility's operations in order to optimize the facility's ability to maintain system pressure during water distribution; hydraulic and electrical controls designed to fill and discharge the tank on demand; new water main connections; and a SCADA automated computer system to treat and distribute water supply remotely.	
<b>Completion Date (Actual or estimated):</b>	<b>Estimated Cost:</b>	
	<b>Entire Project:</b>	<b>Work for which Firm was Responsible:</b>
2015	\$1,200,000	\$96,000

## TEC Professional Services Questionnaire

<b>PROJECT NO. 7</b>		
<b>Project Name, Location and Owner's contact information:</b>	<b>Nature of Firm's Responsibility:</b>	
Hector Connolly Water Treatment Plant  Lafayette Parish, LA  City of Carencro 210 East St. Peter St. Carencro, LA 70520 Don Chauvin (337) 896- citymanager@carencro.org	Fenstermaker designed a new water treatment facility is located near Hector Connolly Road and will replace the existing water production facility. This new 7,820 square foot building was designed to house four, 12-foot diameter greensand filters, a 6,000-gallon caustic soda tank, a 6,000-gallon sodium permanganate tank, a complete chlorination room, and a Master Control Center (MCC). The incorporation of the existing water tower was a critical component of this project. The new design also includes a SCADA system which allows the plant operator to monitor and control the operations of the plant from remote locations via internet access. Initially, the proposed plant will facilitate the production of 2 million gallons of water per day (mgd). Provisions were made in the designs to allow the expansion of water production volume to 4 mgd.	
<b>Completion Date (Actual or estimated):</b>	<b>Estimated Cost:</b>	
	<b>Entire Project:</b>	<b>Work for which Firm was Responsible:</b>
2020	\$1,300,000	\$857,360

<b>PROJECT NO. 8</b>		
<b>Project Name, Location and Owner's contact information:</b>	<b>Nature of Firm's Responsibility:</b>	
East Pont des Mouton Roadway Widening and Water & Sewer Improvements  Lafayette Parish, LA  Lafayette Consolidated Government (LCG) 1515 E University Avenue, Lafayette, LA 70501  Jared Veazey, P.E. (337) 291-8590 javeazey@lafayettela.gov	Engineering design services were provided for the construction of a 1.4-mile, 4-lane divided curb and gutter roadway with raised median, sidewalks, subsurface drainage, and street lighting. 14,300' of subsurface drainage was installed including 1,400' of 84" RCP, over 8,000' of water distribution, 7,000' of wastewater line, a wastewater lift station, and coordination of many utility companies. Water and sewer utilities were relocated, and an upgrade of an undersized wastewater lift station to a major lift station capable of flowing 2.0 MGD. The sanitary sewer portion of this project entailed the design and installation of over 8,000' cumulative feet of 15", 18", 21", and 24" gravity sewer main, 1,500' of 10" force main with the lift station.	
<b>Completion Date (Actual or estimated):</b>	<b>Estimated Cost:</b>	
	<b>Entire Project:</b>	<b>Work for which Firm was Responsible:</b>
2014	\$16,500,000	\$1,620,000

PROJECT NO. 9		
Project Name, Location and Owner's contact information:	Nature of Firm's Responsibility:	
Kaliste Saloom Widening: Sewer & Water Relocations  Lafayette Parish, LA  Lafayette Utilities System 705 E. University Avenue Lafayette, LA 70506 Mark Lavergne (337) 291-7015 mlavergne@lafayettela.gov	Fenstermaker relocated water and sewer lines alongside Kaliste Saloom Road, a major roadway arterial in Lafayette, LA. This section of roadway is considered a densely populated, high traffic volume site. Fenstermaker designed all water and sewer relocations for all public utilities within the designated 2-mile corridor. Approximately 1,200 linear feet of distribution water mains ranging from 6 to 12-inch diameter were relocated. This project also included the installation of 4,230 linear feet a new 21" sewer main through both open cut and boring operations. This new sewer main crossed multiple existing utilities. Sewer service lines were connected to a new sewer main.	
Completion Date (Actual or estimated):	Estimated Cost:	
	Entire Project:	Work for which Firm was Responsible:
2019	\$2,700,000	\$160,000

PROJECT NO. 10

	Entire Project:	Work for which Firm was Responsible:
09/2023 (estimated)	\$287,210	\$91,720

**M. List all prior and/or on-going litigation between Firm and Jefferson Parish. Please attach additional pages if necessary.**

Parties:		Status/Result of Case:
Plaintiff:	Defendant:	

N/A

**N. Use this space to provide any additional information or description of resources supporting Firm's qualifications for the proposed project.**

**C. H. Fenstermaker & Associates, L.L.C. (Fenstermaker)** has provided engineering, environmental consulting, and surveying services in south Louisiana for over 72 years, with office locations in New Orleans, Mandeville, Baton Rouge, Lafayette, Lake Charles, Jennings, and Shreveport, Louisiana.

Fenstermaker maintains a diverse client base consisting of municipalities, state government, large, medium, and small companies in a variety of industries. Fenstermaker's highly qualified professional staff is supported by a technologically robust management system and continuity of operations, as most senior staff members have been with the firm for decades. Fenstermaker is well equipped to assist Jefferson Parish with the design of water projects. Fenstermaker stands behind our qualifications, the capabilities of our personnel, and the integrity of our work. Jefferson Parish will benefit tremendously from a Fenstermaker led project team. Fenstermaker has the personnel depth in technical experience in design of water projects that will translate into project success. Fenstermaker's Louisiana heritage, with a nearby offices in New Orleans and Mandeville, will provide the Parish with immediate responses to various project needs and an on-site presence throughout the duration of the project.

**(1) Professional training and experience in relation to the type of work required for the routine engineering service**

Fenstermaker has a dedicated utilities team who specializes in water distribution, water treatment and pump station design. Fenstermaker's key personnel and teaming partners hold many years of utility design and operation experience that will be vital in understanding the Parish's needs, perspectives, and experience as the owner/operator. Communication among the teaming partners will be one of the most important jobs of the prime consultant and Fenstermaker will lead that role with complete accountability. Project experience will prove instrumental to the successful approach of executing the Parish's project goals.

**PROJECT DESIGN AND CONSTRUCTION:** The Fenstermaker Team handles utility project design from start to finish. This includes topographic and boundary surveys, right of way plats, right of way coordination, wetland determinations, environmental assessments, utility design, BFE determinations (for setting facilities), preliminary and final plan design, bid and contract, and construction administration and inspection services. With all the services being completed by one firm, and our large local staff, we can expedite the design time over our competition. This was one of the successful components in the design and construction of the City of Carencro Water Treatment Plants.

**FUNDING:** In addition, Fenstermaker has grant writers on staff, who assists municipalities acquire funding through various state and federal programs. Whether a grant or loan program, we provide the needed resources to complete and manage applications. Our team has helped municipalities acquire **over \$100 million** over the last 20 years. **The projects that we've helped fund have been instrumental in the growth of some of the fastest growing communities in the state, including Youngsville, Carencro, and Calcasieu Parish.**

**PROJECT FUNDING**

**Fenstermaker has helped our clients obtain and manage over \$100 million in grants and loans from state and federal agencies.**

**PERMITTING:** With our long-standing relationship with state and federal agencies such as Louisiana Department of Health (LDH) and U. S. Army Corps of Engineers (USACE), we are well versed in their standards, policies, and requirements. This allows for shorter review times, and an expedited timeline, as we did for City of Carencro,

allowing us to complete their water treatment plant *ahead of schedule*. Fenstermaker is familiar with the challenges that municipalities may face when trying to improve, expand or rehabilitate their community's utility infrastructure.

**Stefan Bourgeois, P.E.** is a Senior Engineer with over 13 years of professional experience in design, planning, municipal code development and review, construction engineering, and project management. He is the Office Manager for Fenstermaker's New Orleans office. In addition to Mr. Bourgeois' experience in municipal engineering and management, he has been the engineer of record for the design of various project types and provided design services on multiple water main and water treatment plant projects. He is currently managing three City of New Orleans Department of Public Works street projects: FEMA RR021-Central City Group A, FEMA RR045-Filmore South Group D (FRC), and FEMA RR105-Lower Ninth Ward Group C (FRC).

**Luke Hebert, P.E., CFM** is a Professional Engineer with over 19 years of experience in engineering design, planning, and project management. He has been the Engineer of Record on various water mains and water treatment plants.

Joining the Fenstermaker team is **Terracon Consultants, Inc.**, providing geotechnical engineering and testing. Terracon is a national firm with more than 350 geotechnical engineers. Their New Orleans office, located in Jefferson Parish, will manage projects associated with this contract. They have successfully provided field exploration, laboratory testing, and engineering/project delivery services. They have worked with Fenstermaker on many projects, including the Gloria Switch water storage tank and pumping facility. Also joining Fenstermaker is **M & E Consulting, Inc.**, who has been providing mechanical and electrical engineering since 1997. M & E has successfully teamed with Fenstermaker on over 30 projects including various utility projects such as water line repairs and upgrades, Hector Connolly Water Treatment Plant, Post Rd. North Ground Storage Tank and Pumping Facility, Youngsville Water Storage Tank, Pont des Mouton Rd. utility improvements, Apollo Rd. utility improvements, and Kaliste Saloom Rd. utility improvements.

**(2) Capacity for timely completion of newly assigned work**

Our New Orleans office, with staff from our Mandeville, Baton Rouge and Lafayette offices, is available to complete these projects. Fenstermaker will make available any of its qualified and knowledgeable staff to complete the project on time and to Parish requirements. Fenstermaker has a long history of successful project management and understands the importance of timely project completion and cost control on municipal projects. Our project managers and engineers perform quality work in a timely and professional manner.

**(3) Location of the Principal business office**

Fenstermaker's Principal business office is in Orleans Parish, LA at 1100 Poydras, Suite 1550, New Orleans, LA 70163.

**(4) Adversarial legal proceedings between the Parish and the person or firm performing professional services**

Fenstermaker has never been engaged in any legal proceedings with Jefferson Parish.

**(5) Prior successful completion of projects of the type and nature of routine engineering services as defined, for which firm has provided verifiable reference**

As shown in our project examples within this proposal, Fenstermaker has experience on a multitude of public contracts for municipal clients. Our engineers have designed numerous water and other utility projects for Parish clients and is familiar with the challenges these projects face. Our design engineers are also competent in the standards and guidelines that these projects must follow, including those that must comply with state and federal funding.

The best measure of quality of work performed by Fenstermaker is observed in the number of repeat clients over the past seven decades and the numerous awards that our projects have received. Below is a list of client references and to the right is a sample of the awards that our projects have received:

- **City of New Orleans**  
Anh Nguyen, Project Manager, (504) 658-8685, [anh.nguyen@nola.gov](mailto:anh.nguyen@nola.gov)  
Mohanad Abdelfattah, Project Manager, (504) 658-8037
- **City of Carencro**  
Don Chauvin, (337) 986-0890, [citymanager@carencroorg](mailto:citymanager@carencroorg)
- **Lafayette Utilities System**  
Jim Moore, (337) 291-8311, [jmorre@lus.org](mailto:jmorre@lus.org)

**(6) Size of firm**

Across our six south Louisiana offices (New Orleans, Mandeville, Lafayette, Baton Rouge, Lake Charles, and Jennings) we currently have 26 licensed Professional Engineers on staff, supported by a strong team of 24 licensed Engineering Interns (E.I.), Subject Matter Experts, CADD technicians and Construction Inspectors. Fenstermaker has focused on improving current conditions and developing new infrastructure to provide innovative, long-term solutions for over 35 years.

**(7) Past performance by a person for firm on Parish contracts**

Fenstermaker has over 72 years of experience in South Louisiana and has performed services on projects for local governments for over 35 years, including engineering design, permitting, and agency coordination. We have provided services to the following public sector clients:

- City of New Orleans
- Lafayette Consolidated Government
- Cameron Parish Police Jury
- City of Scott
- City of Youngsville
- Lafayette Consolidated Government

**AWARD WINNING DESIGNS & CONSTRUCTION**

## Technical Evaluation Committee (TEC) Questionnaire Instructions

- The Technical Evaluation Committee (TEC) Questionnaire shall be used for professional services related to architecture, engineering, or survey projects.
- **The TEC Questionnaire should be completely filled out. Complete and attach ALL sections. Insert “N/A” or “None” if a section does not apply or if there is no information to provide.**
- Questionnaire must be signed by an authorized representative of the Firm. Failure to sign the questionnaire shall result in disqualification of proposer pursuant to J.P. Code of Ordinances Sec. 2-928.
- All subcontractors must be listed in the appropriate section of the Questionnaire. Each subcontractor must provide a complete copy of the TEC Questionnaire, applicable licenses, and any other information required by the advertisement. Failure to provide the subcontractors' complete questionnaire(s), applicable licenses, and any other information required by the advertisement shall result in disqualification of proposer pursuant to J.P. Code of Ordinances Sec. 2-928.
- If additional pages are needed, attach them to the questionnaire and include all applicable information that is required by the questionnaire.

**TEC Professional Services Questionnaire**

**A. Project Name and Advertisement Resolution Number:**

**B. Firm Name & Address:**

**C. Name, title and contact information of Principal, as defined in Section 2-926 of the Jefferson Parish Code of Ordinances, who is a registered, licensed architect, professional engineer, or surveyor in the State of Louisiana:**

**D. Name and contact information of employee who is a registered and licensed architect, professional engineer, or surveyor in the State of Louisiana in the applicable discipline. A subcontractor may be substituted here only if the advertised Project requires more than one discipline.**

**E. Please provide the number of employees whose primary function corresponds with each category:**

Please attach additional pages if necessary.**

### **PROFESSIONAL IN CHARGE OF PROJECT:**

**Name & Title:**

Lynne Roussel, PE  
Principal and Geotechnical Department Manager

**Project Assignment:**

Principal | Authorized Project Reviewer (APR)/Senior Technical Oversight

**Name of Firm with which associated:**

Terracon Consultants, Inc.

**Years' experience with this Firm:**

16.5 years

**Education: Degree(s)/Year/Specialization:**

Master of Science / 2005 / Geotechnical  
Bachelor of Science / 2003 / Civil Engineering

**Active registration: Year first registered/discipline:**

2009 / Professional Engineer: LA (35152)

**Other experience and qualifications relevant to the proposed Project:**

Ms. Roussel has experience in a wide variety of field and engineering design projects during her time with Terracon. She has extensive experience with roadway, bridge, drainage and water projects. She has managed drilling operations for the Baton Rouge, Lake Charles, and New Orleans offices for several years and has served as Engineering Supervisor over the laboratory. She has also assisted in the monitoring of pile installation activities, settlement plate installation and monitoring, deep foundation load tests, piezometer installation, and vibrating wire piezometer installation and data recording. Her software experience includes the following software: PCSTABL6, GEOSLOPE, LPILE, DRIVEN, SHAFT, Shoring Suite, WINPAS and Darwin.

## TEC Professional Services Questionnaire

<b>KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:</b>
<b>Name &amp; Title:</b>
Lizzy Stark, PE Senior Staff Engineer
<b>Project Assignment:</b>
Professional In Charge of the Project/Project Manager
<b>Name of Firm with which associated:</b>
Terracon Consultants, Inc.
<b>Years' experience with this Firm:</b>
6
<b>Education: Degree(s)/Year/Specialization:</b>
Bachelor of Science / 2015 / Civil and Environmental Engineering
<b>Active registration: Year first registered/discipline:</b>
2020 / Professional Engineer: LA (44481)
<b>Other experience and qualifications relevant to the proposed Project:</b>
<p>Ms. Stark is a Senior Staff Engineer in Terracon's New Orleans, Louisiana Office. In this role, she has prepared reports with geotechnical recommendations, assigned laboratory testing, performed engineering calculations, and utilized various design software (APile, gINT, etc.). She also manages geotechnical and materials testing projects and monitors various aspects of construction quality control (QC) and quality assurance (QA). These projects have included retail developments, levee improvements and airport expansions.</p> <p>She has also acquired construction monitoring experience which includes soil testing, pile foundation installation logging, pile foundation load testing, pile integrity testing, foundation excavation inspection, field density testing, concrete testing, pervious pavement infiltration testing, pavement evaluation using PCI/PASER scoring, DCP and SCP testing of subgrade material, and seismic monitoring.</p>

## TEC Professional Services Questionnaire

<b>KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:</b>
<b>Name &amp; Title:</b> Angelica Moran, EI Staff Engineer
<b>Project Assignment:</b> Staff Engineer
<b>Name of Firm with which associated:</b> Terracon Consultants, Inc.
<b>Years' experience with this Firm:</b> 1 year (5 years total)
<b>Education: Degree(s)/Year/Specialization:</b> Bachelor of Science / 2015 / Civil Engineering
<b>Active registration: Year first registered/discipline:</b> 2017 - Engineering Intern - LA (33229)
<b>Other experience and qualifications relevant to the proposed Project:</b> <p>Ms. Moran assists geotechnical engineers with performing subsurface explorations which includes performing in-place density tests, setting up and running static pile load tests, logging piling, and monitoring vibrations. She has worked on various types of geotechnical projects, which have varied from residential to heavy industrial. She has also prepared geotechnical reports containing recommendations for soil bearing capacity, settlement, pile capacities, rigid and flexible pavement design, material requirements, and site preparation.</p> <p>In the laboratory, she also performed aggregate and soil testing such as grain size analysis, soil classification, specific gravity, unconfined compression tests, compaction tests, Atterberg limits, hydrometer analyses, triaxial compression tests, etc. She has planned testing methodology and performed tests to determine engineering criteria to be used in analyses for determining settlement, shallow foundations and deep foundations.</p>

## TEC Professional Services Questionnaire

<b>KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:</b>
<b>Name &amp; Title:</b> Eric B. Bellard Laboratory Supervisor
<b>Project Assignment:</b> Laboratory Supervisor
<b>Name of Firm with which associated:</b> Terracon Consultants, Inc.
<b>Years' experience with this Firm:</b> 11 years
<b>Education: Degree(s)/Year/Specialization:</b> N/A
<b>Active registration: Year first registered/discipline:</b> N/A
<b>Other experience and qualifications relevant to the proposed Project:</b> <p>Eric has over 11 years of experience in the construction materials field as an American Concrete Institute (ACI) certified Construction Materials Technician. In this role, he monitors various aspects of construction quality control (QC) and quality assurance (QA). Projects have included retail developments, hospital and medical office building developments, levee improvements and school additions.</p> <p>The construction monitoring experience Eric has acquired includes earthwork observations, soil moisture content and density testing, driven pile foundation installation logging, auger-cast pile installation monitoring, grout field testing, concrete compressive strength field testing, concrete observations, sample testing and seismic monitoring.</p> <p>Mr. Bellard has over seven years of soil laboratory experience. He currently serves as Lab Supervisor where he performs testing which includes proctors, Atterberg limits, specific gravities, soil and aggregate gradations, organic contents, and moisture contents. He also performs compressive strength testing on all concrete cylinders, grout prisms, and mortar cubes.</p>

## 7. Brief Resume of Key Persons, Specialist, and Individual Consultants anticipated for this project.

### a. Name and Title

Lynne Roussel, PE  
Principal and Geotechnical Department Manager

### b. Project Assignment:

Principal In Charge | Senior Technical Oversight

### c. Name of Firm with which associated

Terracon Consultants, Inc.

### d. Years experience:

<b>With This Firm</b>	16.5	<b>With Other Firms</b>	0.0
-----------------------	------	-------------------------	-----

### e. Education: Degree(s)/Year/ Specialization

Master of Science / 2005 / Geotechnical  
Bachelor of Science / 2003 / Civil Engineering

### f. Active Registration: Year First Registered/Discipline

Year First Registered:	2009
Branch:	Professional Engineer, Civil - LA (35152)

### g. Other Experience and Qualifications relevant to the proposed project:

**Bucktown Outdoor Classroom, Jefferson Parish, LA** Ms. Roussel served as senior technical reviewer for the geotechnical project that included field exploration, laboratory testing and engineering.

**I-10 to LA-1 Connector 30% Design, Port Allen, LA** Ms. Roussel served as the Project Manager for 30% design plans for a proposed new connector between I-10 and LA-1 in West Baton Rouge Parish. The extension included two bridges and two miles of new roadway. Bridges over an existing railroad and the Intracoastal Canal were included. An evaluation of a possible retained earth embankment was included.

**LA Department of Transportation Geotechnical Retainer Contract, LA** Ms. Roussel serves as the contract manager and Project Reviewer for the retainer contract for services. The contract value is \$4 Million.

**Interstate 12 Widening, East Baton Rouge and Livingston Parishes, LA** Ms. Roussel provided engineering services for this major Interstate highway improvement. The project consists of the widening of Interstate 12 to six lanes from O'Neal Lane eastward in both East Baton Rouge and Livingston Parishes. DOTD.

#### **Cyprien Pump Station - Raceland, LA**

Ms. Roussel served as project manager for this project. Terracon was retained to conduct a geotechnical investigation for a new pump station in the city of Raceland. Terracon developed nominal capacity and established resistance factors for foundations for the design and construction of the structures.

**LA DOTD Off-System Bridge Program, Throughout Louisiana** Ms. Roussel served as the project manager for these projects. Terracon has enjoyed the opportunity to provide geotechnical drilling, laboratory testing, and engineering support for several bridges designated for replacement under the Louisiana Department of Transportation and Development Off-System Bridge Program. For each bridge, Terracon has served as a sub-consultant for a civil engineering firm selected by Louisiana DOTD to design the new bridge. In each case, the project civil engineer has provided all additional engineering and land surveying required to perform topographic surveys and hydraulic studies and prepared the preliminary and final roadway and bridge plans. Terracon has completed geotechnical investigations for bridges throughout Louisiana and in a variety of geologic settings. For each project, Terracon developed a scope of work according to the Louisiana DOTD Bridge Manual. In most cases, the scope of work included two soil borings to 100 feet per bridge, with one boring being completed at each end of the existing bridge. For longer bridges, additional borings were added at proposed abutment locations. Following DOTD specifications, continuous samples were collected in the upper 10', and on maximum 5' intervals thereafter, unless a potential non-cohesive bearing stratum was identified at depth, in which case the sequence was reduced to maximum 3' intervals. For each project, Terracon developed pile capacity charts from the data using the FHWA Driven™ computer routine. These projects serve as evidence of Terracon's experience with implementing projects using DOTD protocols and continued excellence on transportation projects for a variety of clients and in a variety of regions.

#### **Pump Station 42 Force Main - Baton Rouge, LA**

Ms. Roussel served as project manager for this project. Terracon was retained to conduct a geotechnical investigation for a new force main to be constructed in East Baton Rouge Parish, Louisiana. The project included the design of a new force main route from Pump Station 42 near the Central Wastewater Treatment Plant to the South Wastewater Treatment Plant.

#### **South Vacherie Wetlands Assimilation Project - Vacherie, LA**

Ms. Roussel served as Project Manager for St. James Parish's proposed project to install an oxidation pond South of LA 20 near Bayou Cheuvril Road in Vacherie, Louisiana. The project included four aeration and equalization basins along with associated equipment pads. The basins will be lined with an HDPE liner system.

#### **Colyell Creek Drainage Improvements - Livingston Parish, LA**

Ms. Roussel served as the project manager on this project. Terracon was retained to provide recommendations for site preparation and slope stability analysis for widening and realignment of approximately 2.2 miles of Colyell Creek from Florida Boulevard to Buddy Ellis Road. The scope included several borings along the alignment and preparation of slope stability models to validate the planned new creek bank geometry.

#### **Maringouin Outfall Drainage Improvements - Grosse Tete, La**

Ms. Roussel served as project manager on this project. Terracon was retained to provide recommendations for installation of a 72-inch culvert and catch basins within an existing open channel along Winstock lane in Bayou Grosse Tete. Project included recommendations for installation of a flexible concrete revetment system along portions of the channel.

**7. Brief Resume of Key Persons, Specialist, and Individual Consultants anticipated for this project.**

<b>a. Name and Title</b>		<p><b>Jefferson Parish - Various Locations   Jefferson Parish, Louisiana (2019-current)</b> For Jefferson Parish, Terracon provides construction materials observation and testing services of various roadway and public infrastructure projects. Ms. Stark is the Project Manager for these projects which include laboratory testing of pavement subbase and base course materials, compaction testing of pavement subbase and base courses at the site, concrete testing, and sampling during placement of pavement, curbs and sidewalks, laboratory testing of concrete test cylinders for compressive strength, and testing and pile logging during installation of deep foundations.</p> <p><b>Bucktown Outdoor Classroom, Jefferson Parish, LA (2021)</b> Ms. Stark served as project manager for the geotechnical project that included field exploration, laboratory testing and engineering. She provided project management/supervision and attended client meetings.</p> <p><b>Black River Drive Bridge, Madisonville, LA (2021)</b> Ms. Stark served as the project manager for this bridge replacement project which involved installation of PCC piles. Terracon provided consulting and construction monitoring for this project, including Pile Dynamic Analysis (PDA). The services provided included WEAP analysis, initial and restrrike PDA during driving of monitor piles, and observation of pile installation.</p> <p><b>Canal Street Development, New Orleans, LA (2021)</b> This project consisted of the proposed construction of a new 12-story building. Ms. Stark developed a subsurface profile and provided recommendations for deep foundation options including pile settlement, drag load, downdrag and group effect considerations. She also developed site preparation, excavation, and fill material recommendations.</p> <p><b>City of New Orleans - Various Locations, New Orleans, LA (2017-current)</b> For the City of New Orleans' Department of Public Works, Terracon provides construction materials observation and testing services of various roadway rehabilitation projects. Ms. Stark is the Project Manager for these projects which include laboratory testing of trench backfill and pavement subbase and base course materials, compaction testing of trench backfill and pavement subbase and base courses at the site, observation of subgrade soils during proof rolling operations, concrete testing and sampling during placement of pavement, curbs and sidewalks, laboratory testing of concrete test cylinders for compressive strength, and testing and observation of asphalt material properties on site and at the batch plant.</p> <p><b>Montz Area Pump Stations – Montz, LA, 2021-2022</b> This project consisted of construction of two new pump stations including excavation of detention basins, pile-supported structural slab sumps with cast in place walls and equipment structures, and discharge pipes crossing under the state highway and then over the USACE's Bonnet Carre' Spillway (BCS) Upper Guide Levee and finally onto a concrete discharge apron. Terracon's scope of work included deep foundation recommendations (including pile capacity curves and PY, TZ and QZ curves) pipe support foundation bearing capacities, slope stability analysis of sides of proposed embankments and excavations, global stability analysis of proposed retaining walls and excavations utilizing slope and method of planes, and seepage analysis. Ms. Stark served as project manager for these services and provided analysis and recommendations.</p>
Lizzy Stark, PE Senior Staff Engineer		
<b>b. Project Assignment:</b>		
Project Manager   Professional in Charge of Project		
<b>c. Name of Firm with which associated</b>		
Terracon Consultants, Inc.		
<b>d. Years experience:</b>		
<b>With This Firm</b> 6	<b>With Other Firms</b> 0.0

Bachelor of Science / 2015 / Civil and Environmental Engineering		
<b>f. Active Registration: Year First Registered/Discipline</b>		
Year First Registered:	2020	
Branch:	Professional Engineer, Civil – LA (44481)	
<b>g. Other Experience and Qualifications relevant to the proposed project:</b>		
<p>Ms. Stark is a Senior Staff Engineer in Terracon's New Orleans, Louisiana Office. In this role, she has prepared reports with geotechnical recommendations, assigned laboratory testing, performed engineering calculations, and utilized various design software (APile, gINT, etc.). She also manages geotechnical, and materials testing projects and monitors various aspects of construction quality control (QC) and quality assurance (QA). These projects have included retail developments, levee improvements and airport expansions.</p> <p>She has also acquired construction monitoring experience which includes soil testing, pile foundation installation logging, pile foundation load testing, pile integrity testing, foundation excavation inspection, field density testing, concrete testing, pervious pavement infiltration testing, pavement evaluation using PCI/PASER scoring, DCP and SCP testing of subgrade material, and seismic monitoring.</p> <p><b>JPRD Saints Dr. Girls Complex, Jefferson Parish, LA (2021)</b> Ms. Stark served as senior staff engineer for the subsurface exploration and geotechnical engineering for improvements to two existing softball fields.</p>		

**7. Brief Resume of Key Persons, Specialist, and Individual Consultants anticipated for this project.**

<b>a. Name and Title</b>		<b>PROJECT EXPERIENCE</b>  <b>Woodmere Playground Expansion (Phase 1), Harvey, LA (01/21 – 03/21) Geotechnical Engineer.</b> The project will consist of the expansion of the existing Woodmere Playground to include a (2) two-story Concession Stand and Press Box, two (2) Picnic Pavilions, and an Airnasium. A new Parking Lot will be constructed to have 58 parking spaces. The Parking Lot will be constructed with flexible (asphalt) pavement.  The geotechnical investigation consisted of seven (7) undisturbed soil test borings. Three (3) undisturbed soil test borings were performed to the 75 ft depth below the existing ground surface in the general area of the proposed Expansion. Four (4) undisturbed soil boring were performed to the 6 ft depth below the existing ground surface in the area of the proposed Parking Lot.  <b>Gloria Dr. Pump Station, Generator Facility and Bulkhead, Lafitte, LA (02/21 – 06/21) Geotechnical Engineer.</b> The project will consist of constructing a new Pump Station and elevated Generator Facility located between the east end of Gloria Dr. and Treasure St., in Lafitte, LA. The project will also consist of repairing or replacing the existing timber Bulkhead. The geotechnical investigation consisted of one (1) undisturbed soil boring performed to the 100 ft depth below the existing ground surface in the general area of the proposed Gloria Drive Pump Station, Generator Facility and Bulkhead. Relevant Soils Laboratory Testing included: Atterberg Limits, Unconfined Compression Tests, Unit Weight Determination and Natural Moisture Content. Geotechnical Engineering Analysis included: Deep Foundation Analysis, Allowable Pile Load Capacities, Estimates of Settlement, Flexible Pavement Recommendations and General Construction Procedures and Recommendations.  <b>Lower Harvey Canal Crossing - Harvey, LA (03/19 – 07/20) Geotechnical Engineer.</b> The project will consist of constructing dual bridge structures that will include three (3) lanes of traffic in each direction. The project will have design elements to include a fixed bridge, a bascule bridge, a roadway, various canal crossings and bridge lighting. The geotechnical investigation included forty-seven (47) undisturbed soil test borings. Four (4) undisturbed soil borings were drilled to the 165 ft. depth, twenty-four (24) undisturbed soil borings were drilled to the 150 ft. depth, two (2) undisturbed soil borings were drilled to the 120 ft. depth, two (2) undisturbed soil borings were drilled to the 100 ft. depth, one (1) undisturbed soil boring was drilled to the 70 ft. depth, and fifteen (15) undisturbed soil borings were drilled to the 6 ft. depth. All soil borings were drilled below the existing ground surface in the general area of the proposed alignment of the Lower Harvey Canal Crossing. Relevant Soils Laboratory Testing included: Atterberg Limits, Unconfined Compression Tests, Natural Moisture Content, Unit Weights. Geotechnical Engineering Analysis included: Characterize Subsurface Conditions, Highlight Constructability Issues, Pavement Recommendations, Pavement Thickness, Slope Stability Analysis, Fill Construction Near Bridge Approaches, Recommendation for Embankment Construction and General Construction Procedures and Recommendations.		
Anjelica Moran, EI Staff Engineer

She reviewed logs, samples and data and assisted with analysis and design.</p> <p><i>***All projects below were performed with a previous employer***</i></p> <p><b>Carmelite Pump Station &amp; Drainage Improvements, Jones Point, LA (03/21 – 06/21)</b> <b>Geotechnical Engineer.</b> The project will consist of constructing a new Carmelite Pump Station at the west end of Carmelite St., in Jones Point, LA. This project will also include the installation of new subsurface drainage and will extend approximately 2,000 linear feet. Relevant Soils Laboratory Testing included: Atterberg Limits, Unconfined Compression Tests, Unit Weight Determination, Natural Moisture Content, Percent Passing the No. 200 Sieve. Geotechnical Engineering Analysis included: Estimates of Settlement, Sheet Pile Wall Analysis, Bedding and Backfill Recommendations and General Construction Procedures and Recommendations.</p>				

## 7. Brief Resume of Key Persons, Specialist, and Individual Consultants anticipated for this project.

### a. Name and Title

Eric B. Bellard  
Laboratory Supervisor | Construction Materials Technician

### b. Project Assignment:

Laboratory Supervisor | Construction Materials Technician

### c. Name of Firm with which associated

Terracon Consultants, Inc.

### d. Years experience:

<b>With This Firm</b>	11	<b>With Other Firms</b>	0
-----------------------	----	-------------------------	---

### e. Education: Degree(s)/Year/ Specialization

N/A

### f. Active Registration: Year First Registered/Discipline

Year First Registered:	N/A
------------------------	-----

Branch:	N/A
---------	-----

### g. Other Experience and Qualifications relevant to the proposed project:

Mr. Bellard is a Construction Materials Technician in Terracon's New Orleans, Louisiana Office. He has over 11 years of experience in the construction materials field as an American Concrete Institute (ACI) certified Construction Materials Technician. In this role, he monitored various aspects of construction quality control (QC) and quality assurance (QA). These projects have included retail developments, hospital and medical office building developments, levee improvements and school additions.

Mr. Bellard has over 8 years of soil laboratory experience. He currently serves as Lab Supervisor where he performs testing which includes proctors, Atterberg limits, specific gravities, soil and aggregate gradations, organic contents, and moisture contents. He also performs compressive strength testing on all concrete cylinders, grout prisms, and mortar cubes.

#### **Bucktown Outdoor Classroom, Jefferson Parish, LA (2021)**

Mr. Bellard served as laboratory supervisor/technician for the laboratory testing. He performed laboratory soil tests.

#### **Bucktown Marina Boardwalk, Jefferson Parish, LA (2018)**

Mr. Bellard served as laboratory supervisor/technician for the laboratory testing and provided geotechnical recommendations for driven timber piles for the proposed new 900-foot pedestrian boardwalk.

#### **JPRD Saints Dr. Girls Complex, Jefferson Parish, LA (2021)**

Mr. Bellard served as laboratory supervisor for the subsurface exploration and geotechnical engineering for improvements to two existing softball fields.

**City of New Orleans Gravier Street Project, New Orleans, LA** For the City of New Orleans' Department of Public Works, Terracon provided construction materials observation and testing services of Gravier Street from S. Galvez to S. Broad Street. This project includes laboratory testing of trench backfill and pavement base course materials, compaction testing of trench backfill and pavement base course at the site, observation of subgrade soils during proof rolling operations, concrete testing and sampling during placement of curbs and sidewalks, laboratory testing of concrete test cylinders for compressive strength, and testing of asphalt material properties at the batch plant.

**Lakefront Airport T-Walls, New Orleans, LA:** For the \$12.5MM LPV 105.01 Lakefront Airport T-Walls contract, Terracon provided vibration monitoring, soil density testing, and concrete testing. The project was designed to upgrade hurricane protection and storm proofing for the Lakefront Airport. Approximately 1,900 feet of T-wall, plus a vehicle gate at Downman Road was included. While the technical aspects of the Lakefront project were considered routine for our experienced staff and USACE-Certified laboratory operation, the project did present certain logistical challenges. Mr. Bellard performed concrete observation and testing, earthwork observations, soil density and moisture content testing. Also performed laboratory testing including Atterbergs, organic contents, proctors, and gradations. Four technicians were performing vibration monitoring as four cranes and pile driving rigs were operating at the same time. Another technician was required for monitoring soil compaction and concrete placement.

**SELA 10 Maronne Canal Improvements, Destrehan, LA:** Mr. Bellard performed concrete observation and testing, earthwork observations, soil density and moisture content testing on this USACE project. He also provided laboratory testing which included Atterbergs, organic contents, proctors, and gradations. Terracon worked for the contractor, Fleming Construction, performing QC duties.

**Sewerage & Water Board of New Orleans, Contract 3695, New Orleans, LA:** This project consisted of the re-construction of city streets for the city of New Orleans. Mr. Bellard Performed on-going earthwork observations, soil density and moisture content testing.

**10. Use this space to provide any additional information or description of resources (including any computer design capabilities) supporting your firm's qualifications for the proposed project:**

**1. Professional training and experience in relation to the type of work required for soils investigation services**

**Geotechnical Engineering Overview**

Design and construction of functional, cost-effective structures require a thorough understanding of local soil, rock, and groundwater conditions. Terracon provides a wide range of services to support all phases of a project, from preliminary design through completion of the building process.

Each local Terracon office, with access to the extensive geotechnical experience and expertise of engineers, geologists, and soils technicians throughout our company, can help to assess the risks associated with subsurface conditions. We participate as a vital member of the project team, focusing on project objectives and using innovative technologies to provide practical design recommendations. Our culture, systems, and structure enable us to excel at both small and large projects.

Our geotechnical projects have included:

- Subsurface drilling and testing
- Foundation analysis and design
- In-situ testing and performance monitoring
- Earth structures, slopes, and retention systems
- Dynamic analysis and evaluation
- Soil stabilization and ground improvement
- Groundwater control
- Pavement design and subgrade evaluation

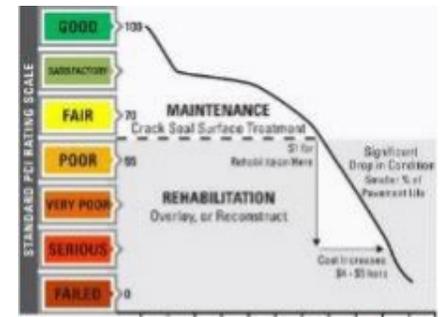

With more than 350 geotechnical engineers and one of the largest drilling fleets in the country, Terracon is well positioned to deliver quality, responsive, and cost-effective geotechnical engineering services, regardless of project size.

**Key Project Staff**

With more than 350 geotechnical engineers and one of the largest drilling fleets in the country, Terracon is well positioned to deliver quality, responsive, and cost-effective geotechnical engineering services, regardless of project size. We have assembled a local team that understands how to be responsive, reliable, and resourceful, while effectively meeting the demands of the project scope and work schedule. Our Team offers sound technical skills, a significant amount of project experience, and in addition, has successfully provided these services on similar projects with aggressive and demanding schedules. Detailed resumes for all Terracon personnel are provided in Section K of the TEC Form. Our key personnel on this proposal are listed below.

Lynne Roussel, PE will serve as the **Principal-In-Charge** and provide **Technical Oversight** for this contract. Lynne is an experienced geotechnical engineer with 16.5 years of experience in all aspects of geotechnical projects including field investigations, managing drilling operations, and serving as engineering supervisor over the geotechnical laboratory. Lynne is the Geotechnical Department Manager.

*Pavement costs represent a significant portion of the total construction and maintenance budget for many public and private projects. If delayed, relatively low-cost maintenance efforts will result in more expensive future rehabilitation.*

**10. Use this space to provide any additional information or description of resources (including any computer design capabilities) supporting your firm's qualifications for the proposed project:**

Lizzy Stark, PE will serve as the **Project Manager and Professional In Charge** for work done on this contract. With over six years of soil investigative services and geotechnical experience, Lizzy has managed various roadway and public infrastructure projects for Jefferson Parish. She has also managed other bridge and roadway projects for the City of New Orleans. She is familiar with local soils and experienced with developing subsurface profiles and providing recommendations for deep foundation options including pile settlement, drag load, downdrag and group effect considerations if the project requires it. She has also developed site preparation, excavation, and fill material recommendations. She will represent Terracon at progress meetings, oversee the coordinate drilling activities, assign laboratory testing, review and approve field reports, and coordinate field personnel for this project. She is a highly dedicated Project Manager and will ensure that Terracon exceeds the expectations of Jefferson Parish.

Eric Bellard is **Laboratory Supervisor** and engineering technician with more than 11 years of experience in materials testing and Special Inspections. He currently serves as Lab Supervisor where he performs testing which includes proctors, Atterberg limits, specific gravities, soil and aggregate gradations, organic contents, and moisture contents. He also performs compressive strength testing on all concrete cylinders, grout prisms, and mortar cubes. He will oversee all laboratory testing under this contract.

### **Pavement Engineering**

Terracon's pavement evaluation, design, preservation management, and construction management experience provides needed expertise to meet pavement lifespan challenges. From site selection, through environmental challenges, site design, and construction phases, Terracon is here to guide you each step of the way. Pavement projects typically include the following tasks:

#### Evaluation

Terracon uses technologies in field drilling and evaluation, laboratory testing, and both visual and geophysical surface condition assessments to provide accurate results. We can provide the most cost-effective recommendations intended to support decision making during the design process and long-term planning for many types of pavement projects.

- Subsurface Soil Evaluation: Soil properties are fundamental to pavement, foundation, and drainage design. Terracon offers a full range of drilling, sampling, and coring equipment.
- Material Evaluation: Dynamic Cone Penetration testing for subgrade support characterization and a suite of laboratory tests for determining material properties.
- Existing Surface Evaluation: Paving surfaces may consist of concrete, asphalt, or both. Evaluation of the existing pavement and distresses are performed using ASTM methods.

#### Design

Geotechnical design requires knowledge of the soil conditions and how they vary across the project site. We do not drill soil borings to evaluate the soil properties, but rather to assess their impact on the design of the overall project. We make the Owner, designer, and Contractor aware of the risks associated with the subsurface conditions and recommend cost efficient designs to manage those risks.

#### Preservation Management

Performing pavement condition surveys to forecast future pavement condition and lifespan are critical to reducing the impact on future budgets and reducing the need to perform disruptive re-construction. We prepare work plans to extend pavement life, optimize pavement expenditures, and manage pavement maintenance programs. The client can then make informed decisions and remove the guessing game associated with short- and long-term pavement management.

**10. Use this space to provide any additional information or description of resources (including any computer design capabilities) supporting your firm's qualifications for the proposed project:**

**Construction Management**

Once the path forward has been determined, proper pavement management plan execution is paramount. Terracon provides the owner the peace of mind the construction/maintenance of their pavement investments will be done correctly and efficiently. From construction administration to materials testing, Terracon provides construction management services from project start to finish.

**Drilling Operations**

Terracon maintains a fleet of approximately 120 drill rigs that can be mobilized from many locations throughout the United States. All drilling supervisors and drill crew members are trained in drill rig operation, safe operating procedures, and basic first aid. Drill crew members who participate in hazardous waste site operations projects are also trained in accordance with the OSHA Hazardous Waste Site Operations and Emergency Response standard (OSHA 29 CFR 1910.120) which requires an initial 40-hour safety training course and annual safety refresher training. Baseline and annual medical surveillance examinations are also required for such personnel.

Drill rigs mounted on trucks and all-terrain vehicles are available to perform subsurface exploration borings and sampling. Terracon offers many methods of subsurface sampling and data acquisition to meet client needs. Our engineers and field crews have experience with many types of specialized field testing, including pressure meter, borehole shear, and packer testing.

**In-situ Testing**

The geotechnical properties of soil and rock have conventionally been determined by drilling, sampling, and performing laboratory testing on the samples retrieved. However, advanced "in-situ" testing methods are now available. These measure various properties of subsurface materials directly in their natural "undisturbed" environment, avoiding the effects of sample disturbance, therefore providing more reliable and significantly improved soil design parameters. The test methods are also cost-effective and provide a faster, more detailed subsurface characterization than can be achieved with conventional drilling and sampling alone.

**Cone Penetration Test (CPT)**

The cone penetration test device consists of a cylindrical, high-strength steel probe with a conical tip. The probe also has a porous filter and an isolated sleeve section immediately above the tip. Electronic sensors measure tip resistance, pore water pressure, and sleeve friction as the probe is pushed into the ground at a steady rate of about an inch per second. A computerized system tracks penetration rate and depth, automatically recording sensor data at set intervals usually every 1 to 2 centimeters. The measured CPT data can be used to evaluate soil types, detailed stratigraphy, ultimate and residual shear strength, friction angle, relative density, and permeability. The digital data can be readily analyzed to predict footing and pile capacities, settlement, and slope stability. The probe can also be equipped with geophones to periodically measure down-hole arrival time of seismic shear-waves induced at the ground surface. This produces a subsurface profile of soil shear-wave velocity useful for seismic analyses.

**Menard Pressuremeter (PMT)**

The Menard pressuremeter is a cylindrical down-hole hydraulic probe that measures volumetric radial expansion versus increasing outward lateral pressure. The instrument is used for determining in-place soil and rock characteristics, directly relating strength and compressibility to foundation bearing capacity and settlement. The pressuremeter can also be used to supplement conventional testing and sampling. It is particularly beneficial in testing soil and rock formations in which standard sampling and testing procedures have been marginally effective. Testing with the pressuremeter has commonly permitted the use of higher design bearing pressures than could have been considered by analysis of data obtained from conventional testing and sampling methods. Also, more realistic settlement predictions can be provided.

Applications in which pressuremeter testing can be used include:

- Foundation bearing capacity and settlement \* Quality control tests

**10. Use this space to provide any additional information or description of resources (including any computer design capabilities) supporting your firm's qualifications for the proposed project:**

- Pile friction \* Evaluation of soil and/or rock beneath existing foundations
- Lateral resistance of foundations \* Testing in interbedded sand, silt, and clay soils
- Lateral earth pressure coefficient determinations \* Testing in soft rock and residual soils
- Uncontrolled fill evaluation \* Testing of waste as a bearing material

**In-Situ Vane Shear Test (VST)**

The vane shear test is performed by pushing a 4-bladed vane into the soil and applying torque until the soil shears cylindrically around the vane. The torque is increased at a controlled rate until the soil shears. The vane is then rotated ten times and the "re-molded" shear strength is also measured. This is one of the more representative and reliable means of evaluating the Undrained Shear Strength,  $S_u$ , of cohesive soils. The VST often shows that the true strength of the most sensitive soils is significantly higher than can be determined in the laboratory by even the best sampling methods possible. By performing the VST in combination with Cone Penetration Tests, reliable factors can determine the correlation of the continuous CPT data to shear strength.

**Laboratory Services**

Terracon owns, operates, and maintains more than 130 construction materials and geotechnical laboratories across the U.S. Our laboratories are equipped to perform a wide variety of tests while following strict internal guidelines to deliver the most thorough and reliable data possible. In addition to routine material property testing, we also provide advanced shear strength, swell/consolidation, petrographic, steel, wood, geosynthetics, and rock mechanics test data to meet testing needs for even the most complex structures. We continually apply new technologies to improve and expedite our services to solve your project challenges in a timely, reliable, and cost-effective manner. Our trained and certified staff of testing personnel are supported by fully supplied, technologically advanced laboratories that have been accredited and validated by third party agencies to include AASHTO, AMRL, CCRL, USACE, A2LA, CMEC & NVLAP. Each of our laboratories have implemented and operate under the strict guidelines set by Terracon's Quality Management System.

- **Soils:** Laboratory tests are performed to define soil properties and identify those soils that do not conform to project specifications. For moisture content, strength, and stability, the early identification of issues helps avoid future problems and allows for the correction of problems during construction. Tests include laboratory compaction characteristics of soil, plasticity index, gradation, organic content, classification, swell pressure unconfined compressive strength, and corrosion index testing.
- **Concrete and Masonry:** New criteria for concrete and masonry construction are evolving on a continual basis. Terracon routinely performs design mixes for concrete, mortar, and grout to satisfy the project specifications. Compression and flexural tests are typically performed on hardened concrete cylinders and beams, mortar and grout cubes, and masonry units. Petrographic analysis, drying shrinkage of Portland cement concrete mixes, chloride ion content, rapid chloride ion permeability, freeze-thaw durability, and efflorescence tests can also be performed.
- **Asphalt:** Modern construction practices involving asphalt require consideration of such factors as durability, adaptability to fast-track construction, and proper performance under specialized applications. Asphalt concrete mixes can be designed using local materials that best fit roadway and airport needs. The optimum mix design is determined through Superpave, Marshall, or Hveem test methods, as well as laboratory testing of aggregate properties, extraction, and gradation.
- **Aggregates:** Aggregate quality is established and monitored by performing such laboratory tests as gradation analysis, specific gravity, absorption, soundness, freeze-thaw, abrasion, deleterious substances, and acid solubility.

**2. Capacity for timely completion of newly assigned work, considering the factors of current unfinished workload, and person or firm's available professional and support personnel**

**10. Use this space to provide any additional information or description of resources (including any computer design capabilities) supporting your firm's qualifications for the proposed project:**

Currently, Terracon is operating at a capacity represented by approximately 60 percent chargeability on a company-wide basis. With our structure and company philosophy of sharing available resources, we can increase our capacity to approximately 80 percent chargeability. Terracon's ability to quickly expand our capacity relies on two practices that provide significant competitive advantages for the company.

- First, we have built-in systems to share work between all our offices. This is accomplished by rewarding both the office supporting projects and the office requesting help, creating a culture that supports a seamless sharing of employees. The team has enough professional resources to accomplish the work in the required time, including the ability to complete more than one delivery order at a time, and to react quickly and efficiently when working within an accelerated schedule. No individual office within Terracon receives a P&L statement, thus increasing the likelihood and willingness of offices to cooperate and share resources.
- Second, in short-term periods of heavy workload, our employees are willing to work overtime hours. Terracon pays our professional employees overtime based upon exceeding certain chargeable hours, making it possible to expand our capacity without the need to hire for short term increases in workload. While Terracon has a strong philosophy of providing a consistent team of professionals to ensure consistency and familiarity with the client and their projects in a geographic area, both systems allow us to provide experienced Terracon employees to the project manager on short notice to achieve the consistent quality deliverables in a timely manner when workloads and schedules require additional support
- Terracon has up to three drilling rigs available in the local region with the ability to access up to five drilling rigs within the Gulf Coast Region. This allows complete large soil investigative projects in a fast and efficient manner.

**3. Location of the principal office where work will be performed**

The local office of Terracon, which is in Jefferson Parish, will serve as the lead office for this contract, with additional offices available to provide support as necessary.

Terracon – New Orleans Office  
524 Elmwood Park Boulevard, Suite 170, New Orleans, LA 70123 (Jefferson Parish)

**4. Adversarial Legal Proceedings with the Parish**

None

**5. Prior successful completion of projects requiring soils investigation services for which firm has provided verifiable references**

Terracon has performed soils investigation services on thousands of challenging sites throughout the United States. Local, federal, and state clients depend on Terracon to help them provide a better living and working environment for their local citizens. Terracon has provided soils investigation services for not only Jefferson Parish, but many parishes and cities throughout Louisiana including the parishes surrounding Jefferson. On all projects, we strive to live up to the mantra "We go where the client wants, when the client wants, and we don't go home until we're finished."

Past projects with available references can be viewed in Section L of the TEC Questionnaire.

**6. Size of firm, considering the number of professional and support personnel required to perform soils investigation tasks, including drafting of reports, plans, and specifications**

Terracon is a 100 percent employee-owned consulting engineering firm providing quality services to clients. Since 1965, Terracon has evolved into a successful multi-discipline firm specializing in:

**10. Use this space to provide any additional information or description of resources (including any computer design capabilities) supporting your firm's qualifications for the proposed project:**

- Facilities
- Environmental
- Soil Investigative Drilling/Geotechnical Engineering
- Materials

Over its history, Terracon has achieved significant expansion through both internal growth and acquisitions. **Terracon currently has more than 5,000 employees across more than 175 offices coast to coast.** Additionally, we partner with our U.S. clients to serve their international needs.

The firm's success is further evidenced by a current ranking of 24 in *Engineering News-Record's* 2021 listing of the Top 500 Design Firms, as compared to a ranking of 38 a decade ago. Terracon's growth is due to dedicated employees who are responsive to clients, provide quality services, and take advantage of opportunities in the marketplace.

Terracon has worked on geotechnical projects throughout Louisiana. Many of these have been completed under retainer contracts or on-call contracts. We have completed drilling and laboratory work for municipalities for projects including roadways, drainage, sewer/wastewater facilities, and various types of buildings. Terracon has been hired by the City of New Orleans and Jefferson parish Department of Public Works for multiple geotechnical and/or construction materials testing projects.

Terracon is prepared to provide soil investigative services, geotechnical engineering, inspection, and materials testing services necessary for the design, construction, rehabilitation and repair of streets, drainage, and utility improvement projects in Jefferson Parish.

We serve a diverse portfolio of private and public clients. By being responsive, resourceful, and reliable, we strive to exceed our clients' expectations for service, solutions, quality, and speed of delivery. Based on a deep understanding of our clients' needs, Terracon's commitment is centered around these key objectives.

### **Our Safety Culture**

Terracon believes safety is one of the most critical aspects of a successful project. No project is worth impacting the life of any employee and their family through loss of life, limb, or livelihood. Therefore, we do not focus on safety as something separate from other critical aspects of the project: quality, schedule, and budget. Instead, we focus on weaving safety into all aspects of the project. Focusing on making sure employees go home safely every day to their family improves quality, helps the schedule, and ultimately saves costs by averting accidents, injuries and tragedies through proper planning, training, and execution of safety.

However, safety is not just about what we do with our safety program. It is about how we work with our clients and their Project Team when we become part of the project.

Our Team strives to build health and safety into all aspects of our business and into the thinking of our employees. As safety-oriented individuals, we all are dedicated to an Incident and Injury-Free (IIF) workplace. IIF is about care and concern for people; it is our personal and organizational commitment at all levels of our companies to everyone going home safe to their families every day. Working safely is an inseparable part of working correctly, just as much as other operational priorities, in particular quality, profitability, and schedule.

Our commitment to safety is demonstrated daily by project managers discussing and addressing site specific safety topics with our field representatives. Safety is a primary focus of our monthly department meetings where each meeting includes discussion of a safety topic. Safety is one of our core values and as a supplement to

**10. Use this space to provide any additional information or description of resources (including any computer design capabilities) supporting your firm's qualifications for the proposed project:**

our Team's safety culture, each employee receives safety training specific to the job function and/or project assigned through one-on-one instruction, continuing education classes or web-based training seminars. We are confident our adoption of the IIF® philosophy will have a positive impact on this project.

**7. Past Performance by person or firm on Parish contracts.**

Terracon has developed a strong history of providing soil investigation services within the State of Louisiana. Through various projects, we have worked with the numerous local and state agencies including the Louisiana Department of Transportation and Development, Facility Planning, as well as local municipalities including surrounding Parishes including Jefferson Parish.

Terracon has worked with various parishes throughout Louisiana providing all services including soil investigation services, geotechnical engineering and design, laboratory services for inspection of materials and equipment. Some of our project examples are listed in Section L.
