GRICE INDUSTRIES

**Manufacturer of
THE PIPE REPLACEMENT TOOL**

Splits Poly-Pipe . . . Gets the Lead Out Galvanized Pipe Gone Forever

High quality stainless steel makes this tool virtually indestructible.
Standard pipe thread allows you to pull either copper or poly-pipe.
Various lengths of 3/8" cable grip also available.

NEVER CUT A STREET AGAIN!!

You may never have to cut across a street or driveway to replace a leaking water service again. Nor will you have to dig out both sides to push another service across.

Crews are replacing $\frac{3}{4}$ " and 1" water services in 1½ hours using the **GRICE PIPE REPLACEMENT TOOL** with cost savings of thousands of dollars.

This tool was designed to split poly-pipe while pulling a new service line at the same time. However, with the help of service crews such as yours, the **PIPE REPLACEMENT TOOL** is being used to replace galvanized, lead, copper and plastic pipe.

Currently over 5000 cities across the US. and Canada are using the **GRICE PIPE REPLACEMENT TOOL**. Detroit, Michigan's Water Department Supervisor says "We have used the tool to replace over 4000 lead and galvanized services from $\frac{5}{8}$ " to 2" and as long as 55' in length and it works great." New Jersey's Water Departments think it's the best tool in the water industry today. And water departments throughout the country have saved thousands of dollars with its use.

GOOD NEWS FOR PLUMBERS AND CONTRACTORS

The **GRICE PIPE REPLACEMENT TOOL** has become a standard tool for plumbers and contractors. Not only can they avoid having to dig or remove concrete and landscaping, they can bid less, have greater profits and finish a job sooner than in the past.

The **GRICE REPLACEMENT TOOL**:

- Can replace $\frac{1}{2}$ " to 1½" water services
- Will split or push poly lines out
- Will push galvanized lines out
- Will split or push copper lines out
- Pulls in new service (copper, poly, PVC) at the same time.

POLY-PIPE REPLACEMENT

Expose corp on water main. Disconnect damaged line and remove meter stop. Thread **PIPE REPLACEMENT TOOL** cable through damaged line and connect new service to the threaded portion of tool. Pull slack out of cable line and attach cable clamp to it. As cable is pulled, the **PIPE REPLACEMENT TOOL** will split the old poly pipe and pull the new service line behind at the same time.

10 minute average replacement time after excavation.

LEAD AND GALVANIZED REPLACEMENT

Expose lead or galvanized line on both sides of street Thread cable through service line and connect new service pipe to tool. Note: **PIPE REPLACEMENT TOOL** will not split lead or galvanized, but will pull the old service line out intact, allowing new service pipe to follow in its place.

Removes existing pipe completely intact.

METHODS OF PULLING CABLE

PIPE REPLACEMENT TOOL can be pulled from main or meter side of street. A back hoe, truck or winch can be used to pull **PIPE REPLACEMENT TOOL** through the damaged service while simultaneously laying new pipe.

A SPECIAL THANKS TO OUR CUSTOMERS

For over 20 years, **The Grice Pipe Replacement Tool** has been the **#1 seller** in lead, poly and galvanized pipe replacement. It is truly your hard work and ingenuity that makes it successful.
