## EXECUTIVE SUMMARY

### About TrueCare24:

TrueCare24, Inc. (TC24) is a health tech, medical staffing and services organization that dedicates its considerable resources in helping municipalities, schools and private entities with their healthcare needs.

For years, our organization has provided on-site skilled medical professionals to manage in-home health care needs, building a nationwide platform of care providers that are fully vetted, insured and certified.

Early 2020 when the pandemic was first recognized and began to spread, we were well positioned to pivot our focus and resources to developing end-to-end return to work/school (RTW/S) solutions. RTW/S solutions include temperature checks, symptoms screening, contact tracing and administration. In addition, we perform the collection, storage and logistics management of PCR samples alongside our certified molecular lab partners for testing and results reporting to the authorities, our clients, and their employees and students.

Our attention to the operational details of managing an on-site testing program leveraging our in-house automation or our lab partners' technology is a significant TrueCare24 differentiator in the marketplace. TrueCare24 engages with human resources, environmental health and safety, and leading professionals across the United States. We excel in managing the testing of their staff/students as they execute upon their RTW/S programs

We are also an approved vaccinator in multiple states and partner with both local government entities and companies on vaccination services.

In addition to urine, some drugs and metabolites also are present in a person's saliva or oral fluid. Although not all drugs and metabolites are detectable in saliva, oral fluids analysis may be the best choice for drug detection in a person who is unable to void sufficient urine such as a person receiving dialysis treatment. In addition, where urine adulteration is a concern, obtaining an oral fluid sample is a

witnessed procedure.
