EMPLOYMENT HISTORY:

EH&S Consultant/Owner – 06/2017 – Present

Business: Regulatory Compliance Solutions, LLC

Manage the design, development, and integration of EHS&S programs for 5 shipyards and 3 barge cleaning operations. Other clients that I provide regulatory guidance for consist of crew boat, fleet boat, and push boat operations, midstream refueling operations, oil processor/re-refiner, marine machine shop, longshoring operations, staffing agency, industrial insulation contractor and ready mix concrete facilities. Provide maintenance services on LPDES permitted wastewater systems. Licensed Life Safety & Property Protection for servicing portable fire extinguishers and fire hose. I provide interpretation of OSHA, DEQ, USCG, USACE, NFPA, FDA and DOT regulations to ensure compliance and continuous improvements for client programs. Work directly with USL&H insurers for all injury claims.

EH&S Project Manager - Consultant 10/2007 – 06/2017

Employer: MCL/Environmental Engineering Solutions, LLC

Forthright and results-driven EH&S technical expert for the maritime, construction, and general industries. Managed the design, development, and integration of EHS&S programs for five organizations. Interpreted OSHA, DEQ, USCG, USACE, NFPA, FDA and DOT regulations to ensure compliance. Conducted risk assessments, audit QMS and lead due diligence to ensure compliance and continual improvements of EHS&S programs. Developed training matrix to ensure employees maintain qualifications for employment. Programs managed consist of LPDES Permits, Operations Manuals, FRP, ICP, SWPPP, SPCC, RCP, Hazardous and Non Hazardous Waste Programs, FSP, VSP and company Safety Policies, Procedures and Training Programs. Participate in investigations, develop corrective and preventive actions and share lessons learned. Work closely with Longshore Harbor Workers' Compensation Act insurance carriers in tracking post-accident cases. Participated in industry safety committees (Gulf Safety Committee, LEPC, American Equity Underwriter Safety Forum), monitored regulatory websites, and frequently communicate with regulatory agency representatives. Achieved a \$500k rebate from customer's insurance carrier through workers injury reduction.

Project Safety Manager 10/2006 – 10/2007

Employer: Boh Bros. Construction Co., LLC

Conducted jobsite risk assessments and developed corrective measures to eliminate the hazards. Served as the Traffic Control Supervisor to ensure motorist safety on the I-10 Expansion Project and the 17th Street Canal Pumping Station Upgrade Project. Participated in project meetings with USACE and DOT to provide statistical data, identify project goals and update management on EH&S progress. Interpreted OSHA, DOT and USACE policies and regulations with project management to gain employee participation and compliance.

ES&H Lower Mississippi Region Manager 01/2006 – 10/2006

Employer: Kinder Morgan Delta Terminal

The Delta Terminal is a midstream bulk liquid storage facility with 180+ storage tanks that ranged from 300bbl – 200,000bbls of various chemicals, oils, and alcohols. Lead and mentored a staff of six employees that specialized in air, water, waste, safety, and security compliance with federal, state, and local regulations. Managed the development of EHS&S programs to ensure regulatory compliance, such as Title V Air Permits, EIS, TEDI, LPDES Permits, OPA-90, FRP, ICP, RMP, SWPPP, SPCC, DEA, RCRA, Tier II, FSP and company Safety and Training programs regulated by OSHA. Developed a PSM program for contract packaging, warehousing and distribution of class IA flammables. Provided EH&S support to terminal management for 17 dry cargo, 2 midstream liquid bulk storage, 1 liquid packaging facilities and 1 bulk coal storage facility. Managed EH&S capital projects. Compiled key performance indicators on EH&S performance to trend progress and emphasize areas requiring improvement. Managed an annual departmental budget of \$1.5M sustaining operational demands.

Senior Fire & Safety Coordinator 04/2002 – 01/2006

Employer: Kinder Morgan Delta Terminal

Managed a 30 man fire brigade and the preventive maintenance program for the terminals fire truck, water cannons, foam and sprinkler systems. Managed terminal OPA-90, ICP, PSM, OSHA, NFPA and DOT programs. Designed extensive

employee safety education programs. Managed contractor safety compliance through ISNetWorld, Conducted internal risk assessments and was the lead representative during client and regulatory audits, Conducted accident investigations utilizing Systematic Cause Analysis Technique (SCAT) and tracked corrective and preventive actions. Team leader for the facility Safety Committee, Evaluated personal protective equipment, reviewed and issued hot work and confined space entry permits. Utilized combustible gas detectors, Photoionization detectors, VOC Meters and Indicator Tubes. Participated on committees from industry, LEPC, and specialized work groups. Managed an annual budget of \$300k for employee education and safety equipment.

EH&S Director/Quality Manager DNV ISO 9001:2000 03/1997 – 04/2002

Employer: Houma Industries (Onshore & Offshore Fabrication)

Houma Industries was a steel fabrication business for the oil and gas industry. They employed approximately 80 employees as welders, fitters, and painters for onshore and offshore divisions. Designed, lead, communicated, and maintained the EH&S Program. Technical expert to support operations with compliance of OSHA, Minerals Management Service (MMS), DEQ and oilfield customers (i.e. Shell, BP, Texaco, Chevron) regulations and policies. Supervised a Safety Trainer and designed behavior based educational programs for each experience level of employee. Conducted Industrial Hygiene exposure monitoring for silica, welding fumes and PM10. Designed and managed the contractor safety program to ensure only qualified contractors were identified as approved vendors. Conducted risk assessments, performed Root Cause Analysis for all incidents, developed and tracked progress of corrective and preventative actions, and shared lessons learned with company personnel and contractors. Implemented Behavior-Based safety practices. Developed annual EH&S goals and communicated implementation strategies to the president. Led the Safety Committee and Quality Management Team and a representative of Shell Oil's safety Contractor Steering Team. Personally credited with the onshore and offshore divisions having successfully worked three consecutive years and over 700,000 man-hours without a lost time injury.

As the Quality Manager, developed quality procedures and document control required to obtain ISO 9001:2000 Quality Management Certification. Conducted quality management systems assessments to facilitate continuous improvements. Participated in production meetings with customers to ensure project quality was achieved.

Environmental Air Specialist 10/1996 – 03/1997

Employer: Environmental Regulatory Compliance, Inc.

Collected emission data from oil and gas production facilities and tank batteries for the completion of Title V Permit Applications, Emissions Inventory Survey and Toxic Emissions Data Inventory Reports.

Industrial Hygiene Technician 10/1995 – 10/1996

Employer: Avondale Industries

Developed monitoring and abatement schemes for asbestos, lead and arsenic. Conducted sound level surveys and employee noise exposure monitoring to evaluate hearing protection requirements. Conducted employee new hire safety orientations, jobsite risk assessments, and shipyard competent person training.

Environmental Specialist Civil Engineering Squadron 03/1987 – 10/1995

Employer: United States Air Force (Retired)

Monitored chlorination injection systems for base pools and potable water wells. Conducted laboratory analysis of base wastewater and industrial waste treatment facilities to ensure effluent discharges met federal permit requirements. Served as the base asbestos abatement supervisor, Conducted safety assessments and training in accordance with AFOSH regulations. Developed a database for managing hazardous waste disposal records for the Alaskan Air Command TSDF.

EDUCATION:

Rose State College, 05/94

Associate in Applied Science in Environmental Technologies
