WaveBrake® Institutional Bucket and Wringer

With features that surpass traditional mop buckets, the new generation of WaveBrake® helps to clean floors with less effort to get the job done safer, without sacrificing quality and durability.

- **IMPROVE SAFETY AND PRODUCTIVITY:** Patented WaveBrake® baffles result in less splashing while mopping and maneuvering, helping to create a safer environment for patrons and staff. Additionally, water stays in the bucket, eliminating unnecessary trips to the storage closet to fill up the bucket, enhancing productivity.
- **80% LESS SPLASHING:** Molded-in WaveBrake® baffles disrupt wave formation, reducing splash up to 80% versus leading competitors.* (*Versus competitive U.S. 35 qt single compartment mop bucket and wringer, not including divider bucket and accessories.)
- **CONVENIENT TO EMPTY:** The new generation of the WaveBrake® mop bucket is designed to safely empty water with less effort. Integrated handles, sink ledge, and a pour spout provide control while lifting and emptying, for a safe and stable emptying process.
- **INTEGRATED HANDLES AND SINK LEDGE:** Lift and empty the mop bucket easily, with less strain.
- **POUR SPOUT:** Helps prevent water from spilling onto floors while emptying dirty water, to help floor remain dry and safe.

WaveBrake® Bucket and Casters

With features that surpass traditional mop buckets, the new generation of WaveBrake® helps to clean floors with less effort to get the job done safer, without sacrificing quality and durability.

- **IMPROVE SAFETY AND PRODUCTIVITY:** Patented WaveBrake® baffles result in less splashing while mopping and maneuvering, helping to create a safer environment for patrons and staff. Additionally, water stays in the bucket, eliminating unnecessary trips to the storage closet to fill up the bucket, enhancing productivity.
- **80% LESS SPLASHING:** Molded-in WaveBrake® baffles disrupt wave formation, reducing splash up to 80% versus leading competitors.* (*Versus competitive U.S. 35 qt single compartment mop bucket and wringer, not including divider bucket and accessories.)
- **CONVENIENT TO EMPTY:** The new generation of the WaveBrake® mop bucket is designed to safely empty water with less effort. Integrated handles, sink ledge, and a pour spout provide control while lifting and emptying, for a safe and stable emptying process.
- **INTEGRATED HANDLES AND SINK LEDGE:** Lift and empty the mop bucket easily, with less strain.
- **POUR SPOUT:** Helps prevent water from spilling onto floors while emptying dirty water, to help floor remain dry and safe.
- **SECURE WRINGER CONNECTIONS:** Integrated wringer-guides ensure a secure connection to mop bucket, providing stability while wringing and maneuvering, to help prevent spills.
