STANDARD INSURANCE REQUIREMENTS FOR BIDDING PURPOSES

All required insurance under this bid shall conform to Jefferson Parish Resolution No. 113646 or No. 113647, as applicable. Contractors may not commence any work under any ensuing contract unless and until all required insurance and associated evidentiary requirements thereto have been met, along with any additional specifications contained in the **Invitation to Bid**. Except as where otherwise precluded by law, the Parish Attorney or his designee, with the concurrence of the Director of Risk Management or his designee, may agree on a case-by-case basis, to deviate from Jefferson Parish's standard insurance requirements, as provided in this Section. Vendors requesting deviation therefrom shall submit such requests in writing, along with compelling substantiation, to the Purchasing Department prior to the bid's due date. Any changes to the insurance requirements will be reflected in the bid specifications and addenda. Prior to contract execution and at all times thereafter during the term of such contract, contractors must provide and continuously maintain all coverages as required by the foregoing Resolutions, and the contract documents. Failure to do so shall be grounds for suspension, discontinuation or termination of the contract.

For bidding purposes, bidders must submit with bid submission a current (valid) insurance certificate evidencing the required coverages. Failure to comply will cause bid to be rejected. The current insurance certificate will be used for proof of insurance at time of evaluation. Thereafter, and prior to contract execution, the low bidder will be required to provide final insurance certificates to the Parish which shall name **the Jefferson Parish, its Districts Departments and Agencies under the direction of the Parish President and the Parish Council** as additional insureds regarding negligence by the contractor for the Commercial General Liability, Workmen's Compensation Insurance and the Comprehensive Automobile Liability policies. Additionally, said certificates should reflect the name of the Parish Department receiving goods and services and reference the respective Jefferson Parish bid number.

JEFFERSON PARISH REQUIRED STANDARD INSURANCE

☒ **WORKER'S COMPENSATION INSURANCE**

As required by Louisiana State Statute, exception; Employer's Liability, Section B shall be \$1,000,000 per occurrence when Work is to be over water and involves maritime exposures to cover all employees not covered under the State Worker's Compensation Act, otherwise this limit shall be no less than \$500,000 per occurrence.

Note: If your company is not required by law to carry workmen's compensation insurance, i.e. not a Louisiana company, sole employee of the company, then bidders must request a workmen's compensation insurance declaration affidavit prior to the bid opening date. This insurance declaration affidavit must be fully completed, signed, properly notarized and submitted with the bid. A scanned copy may be submitted with the bid; however, the successful bidder must submit the original affidavit in its original format and without material alteration upon contract execution. Failure to comply will result in the bid submission being

rejected as non-responsive. The Parish reserves the right to award bid to the next lowest responsive and responsible bidder in this event.

☒ **COMMERCIAL GENERAL LIABILITY**

Shall provide limits not less than the following: \$1,000,000.00 Combined Single Limit per Occurrence for bodily injury and property damage.

☒ **COMPREHENSIVE AUTOMOBILE LIABILITY**

Bodily injury liability \$1,000,000.00 each person; \$1,000,000.00 each occurrence.
Property Damage Liability \$1,000,000.00 each occurrence.

Note: This category may be omitted if bidders do not/will not utilize company vehicles for the project or do not possess company vehicles. Bidder must request an automobile insurance declaration affidavit prior to the bid opening date. This insurance declaration affidavit must be fully completed, signed, properly notarized and submitted with the bid. A scanned copy of the completed, signed and properly notarized affidavit may be submitted with the bid; however, the successful bidder must submit the original affidavit in its original format and without material alteration upon contract execution. Failure to comply will result in the bid submission being rejected as non-responsive. The Parish reserves the right to award bid to the next lowest responsive and responsible bidder in this event.

DEDUCTIBLES

No insurance required shall include a deductible not greater than \$10,000.00. The cost of the deductible shall be borne by the contractor.

NOTE: If the vendor requires a change in deductibles, the request must be submitted in writing to the Purchasing Department prior to the due date of the bid. Such request shall be reviewed by the Parish Attorney's Office with the concurrence of the Director of Risk Management.

UMBRELLA LIABILITY COVERAGE

An umbrella policy or excess may be used to meet minimum requirements.

FOR CONSTRUCTION AND RENOVATION PROJECTS:

The following are required unless otherwise specified in the bid. Such insurance is due upon contract execution.

1) OWNER'S PROTECTIVE LIABILITY

To be for the same limits of liability for bodily injury and property damage liability established for commercial general liability.

SERIOUS TRUCKS

WESTERN STAR

10 REASONS WHY

Serious trucks.

POWER CHOICES

There is no one-size-fits-all solution. So we build each truck one at a time, just how you need it.

Detroit™ and Cummins® engine options from 260HP/660 lb-ft to 600HP/2050 lb-ft

Detroit Series 60® Tier III for 100% off-road applications

Rugged cooling systems from 1250 to 1875 square inches

Only OEM-offered copper brass radiators, with bolted tanks for easier repair in the field

RIDE QUALITY

Your work is rough enough. Your ride shouldn't have to be, so we made sure it isn't.

Threaded spring pins provide greater steering response and overall handling

Rubber bump stops provide an improved ride over rugged terrain

Double door seals help maximize the efficiency of the HVAC system and provide a quieter ride

Generous insulation in cab walls and under floor mat greatly increases both thermal and acoustic performance

Floormats are nearly an inch thick, which reduces road noise and increases driver comfort

Convex, non-glare gauges improve readability for added safety and reduced driver fatigue

DRIVER COMFORT

Our cab is a great place to spend the day. Designed for overall driver comfort, you'll find more space and features in one truck than you might have thought possible.

90.55 cubic feet inside the cab with comfortable seats and more legroom

More space between the clutch pedal and side wall for increased foot room

Suspended brake and clutch pedals increase safety by preventing objects from becoming lodged behind them

Large door openings to make getting in and out easier

Increased space between the seat and steering wheel for comfort

Over two feet of space between seats

True walkthrough design with flat floor transition to sleeper

INCREDIBLE DURABILITY

We don't believe in disposable trucks. Never have. That's why we only use components that meet our standards.

Galvannealed steel cab with a 17-stage e-coat process for long-lasting corrosion resistance

Severe service cab option with extra gussets and reinforcements for added safety

Forged steel door hinges for greater strength and increased longevity

Wiring standoffs suspend wiring away from frame for long life and easy servicing

J-brackets to prevent fuel tanks from dropping

Ribbed fuel tank straps to prevent tank roll

Marine grade switches protect from water and salt, which can create shorts

BODY-BUILDER FRIENDLY

We make trucks with body-builder specific options designed to reduce installation time and ensure years of trouble-free operation.

Wiring raceway and bolt-in pass-through plate in the Western Star 4700™ eliminate unnecessary drilling and ease electrical routing

In-cab power distribution module isolates truck from the body wiring in the Western Star 4700

Point-to-point wiring to speed body electrical hookup

50mm grid system on Western Star 4700 frame rails for faster, more accurate installations

Comprehensive and easy-to-use body-builder book to speed and simplify body additions

LIGHTWEIGHT OPTIONS

Heavy duty doesn't have to be heavy. And you can spec a Western Star® truck to be one of the lightest out there.

Honeycomb sleeper walls offer strength and insulation while creating some of the lightest offerings on the market

Largest range of sleeper options in the industry to create your own space

Optional 3.2M RBM single frame rails offer excellent strength with substantial weight savings

EASIER SERVICEABILITY

Keeping your trucks up and running is important, so we make them easy to work on – even out in the field.

90-degree hood tilt for easier serviceability

In-dash electrical panels with plug-in fuses and manual reset circuit breakers for quick access

Blower motor located in the cab for greater uptime and easier repair

Point-to-point wiring for greater dependability

Color-coded and laser-etched wiring for fast circuit tracing

Copper brass radiator with bolted steel tanks for easy repair in the field

Grille bars are individually replaceable for reduced maintenance cost

RUGGED FRAMES

To build a strong truck, you need a strong foundation. The frame of your Western Star is custom built for your truck to stand up to your application.

Grade 8 nut and bolt fasteners instead of huckbolts for easier servicing

Custom piercing per serial number to eliminate unnecessary holes

Frames are shot peened to increase strength after piercing

Serious trucks.™

THE END OF COMPROMISE HAS BEEN ACHIEVED.

You don't want the almost right truck. You want the right truck. Which is just another way to say a Western Star®. It's designed to flat out work, every single day. No excuses. No complaints. That's because this is the work truck that was built to be a work truck. And we have a whole family of them that can be customized to do whatever you need.

In fact, a Star is so well-built, it's going to keep running long after the others stop. And the low cost of operation you get over the life of your Western Star truck makes it a true long-term investment. That's how we've been doing it since we built our first one over 40 years ago. With this kind of value, no wonder Stars are the trucks real pros turn to.

Body builder friendly.

We make trucks with the body builder-specific options that are designed to reduce installation time and ensure years of trouble-free operation. Plus, since we build each truck to your specifications, anything is possible. Pre-punched frame rails, front frame extensions, point-to-point power distribution, ample room between the seats to install controls – the list goes on. Just ask your dealer.

A NICE PLACE TO CALL WORK.

The cab of the Western Star is built to make the job easier and more comfortable. Large, waterproof switches that let you work with gloves on. A quiet, insulated cab that's easy to get in and out of. Greater visibility. More leg room. More storage. More space between seats. Your drivers might feel spoiled. Almost.

WIRING MADE EASY.

Our 4700 features a number of body builder-friendly features that make connections easier. Like in-cab wiring and interface connectors. A bolt-in pass-through plate in the cab floor to eliminate unnecessary drilling. And a dedicated floor channel with an easy-to-remove top that provides plenty of room to run your own wiring. Like we said, easy.

SET FORWARD OR SET BACK. YOUR CHOICE.

Whichever model you need, with Western Star, you decide on front axle placement. Specify set back (SB) front axles for maximum maneuverability or choose set forward (SF) to maximize bridge law formulas.

LET IT SNOW.

When you're operating a plow, you don't want snow getting into your engine. In-cab controlled snow doors with optional underhood air cleaners keep snow out in the harshest conditions, so you can stay working.

All hail the steel cab.

No aluminum or rivets here. Our galvanized steel cabs are built to keep you safe. Extra gussets and reinforcements, bonded instead of riveted, precision welded for strength, then dipped and protected with a 17-stage e-coat process for long-lasting corrosion resistance and a superior paint finish. And for extreme-duty applications, Western Star also offers a severe service cab option with additional reinforcements to withstand anything you can throw at it.

READY, WILLING AND MORE THAN ABLE.

Western Star® trucks are built to perform, with the high-quality components that stand up to the challenge of hard work. Sure, you can buy a less expensive truck. But that only costs you in the long run.

The answer is yes.

The question, well, you'll have to supply that. With thousands of options and a work force dedicated to hand building the truck you need, Western Star delivers true factory customization all backed by a single factory warranty. If there's something you need, just ask.

Close enough just isn't good enough.

When it comes to choosing an engine, close enough should never enter the conversation. So for municipal applications, we offer a variety of engines with horsepower and torque ratings to match your job. Getting what you want has never been easier.

DEMAND POWER AND EFFICIENCY.

Detroit™ engines are engineered to deliver the excellent power and fuel economy you depend on while still meeting today's efficiency requirements. That's why each engine we build is 2013 OBD (OBD13) Certified and compliant with 2014 Greenhouse Gas (GHG14) regulations. So you can count on a powerplant that will run clean and strong for many miles to come.

DETROIT

BLUETEC

ALL CONDITIONS ARE WORKING CONDITIONS.

A Western Star truck is built to perform no matter how hot or how cold. So you'll find options like heated windshields, arctic wiper blades and access hatches in the hood to keep you running even when the conditions are less than ideal.

EASY MAINTENANCE. GREATER UPTIME.

We engineer our trucks to be simple to work on. From changing air filters or replacing fuses to accessing major components, a Star is made to keep you on the road and running.
