BID FORM
Non Public Works

All Public Work Projects are required to use the Louisiana Uniform Public Work Bid Form

All prices must be held firm unless an escalation provision is requested in this bid. Jefferson Parish will allow one escalation during the term of the contract, which may not exceed the U.S. Bureau of Labor Statistics National Index for all Urban Consumers, unadjusted 12 month figure. The most recently published figure issued at the time an adjustment is requested will be used. A request must be made in writing by the vendor, and the escalation will only be applied to purchases made after the request is made.

Are you requesting an escalation provision?

YES _____ NO X

MAXIMUM ESCALATION PERCENTAGE REQUESTED _____%

INITIAL BID PRICES WILL REMAIN FIRM THROUGH THE DATE OF 4/30/2023.

For the purposes of comparison of bids when an escalation provision is requested, Jefferson Parish will apply the maximum escalation percentage quoted by the bidder to the period to which it is applied in the bid. The initial price and the escalation will be used to calculate the total bid price. It will be assumed, for comparison of prices only, that an equal amount of material or labor is purchased each month throughout the entire contract.

HV™ SERIES

THE NEW
INTERNATIONAL® HV SERIES.

A SMARTER APPROACH TO SERIOUS WORK.

INTRODUCING THE NEW INTERNATIONAL™ HV™ SERIES.

There's a new breed of vocational truck that redefines the standard for uptime and productivity. Introducing the new International HV Series. Redesigned from the inside out, the interior was crafted with driver and body company feedback to ensure the most comfortable and productive environment possible, while the exterior continues the powerful styling of the WorkStar. The HV Series also features the intelligence of the industry-leading Diamond Logic™ electrical system for the automation of tasks and interlocks to help protect both equipment and crew. Power options include the International® A26™, an engine designed with uptime in its DNA.

The HV Series is the go-to truck for those who know that it's not just about getting the job done. It's about getting the job done right.

UPTIME

DRIVERFIRST™

INTEGRATION

HV
THE INTERNATIONAL WAY

EVERY MODEL YOU NEED. IN THE CONFIGURATION YOU WANT.

Productivity often comes down to versatility. And there's no more versatile foundation than the HV[®] Series. With configurations ranging from 4x2 to 4x4, EDC's at 107" or 117" and 40-forward or sub-base front ends, plus a variety of body styles and configurations—the HV Series has what you want for virtually every possible need.

FOR THOSE VOCATIONS WHERE UPTIME IS OF UTMOST IMPORTANCE, THE INTERNATIONAL HV™ SERIES IS THE GO-TO SOLUTION. FROM THE WORKSITE TO THE BATTLEFIELD, THE HV SERIES WAS BUILT WITH RELIABILITY, PRODUCTIVITY, EFFICIENCY AND PERFORMANCE AS ITS PRIMARY MISSION.

HV SERIES FEATURES:

- ▶ Double-sided galvanized steel cab with superior fit and finish and corrosion resistance
- ▶ Huck® Bolt chassis fasteners provide superior clamping force and will not come loose even in extreme environments
- ▶ Single 1/2" frame rail has the strength of a double rail but lighter in weight and without the chance of inter-rail corrosion
- ▶ Standard breakaway mirrors minimize cab and door damage
- ▶ Integral 20" and 22" frame extensions (not bolt-on) for superior strength and reliability
- ▶ Available stainless-steel oil pan for reduced corrosion in highly corrosive applications

The Huck Bolt chassis fasteners provide superior clamping force and will not come loose even in extreme environments.

The new 20" and 22" frame extensions provide superior strength and reliability.

The stainless-steel oil pan provides superior corrosion resistance.

When it's time for service, the HV Series is all about quick turnaround time within the service bay or at any of the nearly 700 dealer locations across the U.S. and Canada.

- ▶ In-cab electrical panel is conveniently located under spill-resistant dash panel
- ▶ 3-piece hood for lower cost replacement during crash repair
- ▶ Routine service points are clearly labeled and easily accessed under the hood
- ▶ Commonly serviced fluid reservoirs are translucent for quick inspection and many of the caps are tethered to prevent dropped and/or lost caps—saving time and frustration
- ▶ Batteries can be located in the cab for easier servicing in harsh weather and to free up rail space for mounting other components

DRIVERFIRST: DESIGNED FOR THOSE BEHIND THE WHEEL.

In many ways, the International® HV™ Series was designed from the inside out based on our DriverFirst™ philosophy. After all, the care, comfort and safety of your drivers is what matters most. To ensure they hit the mark, International® engineers used feedback from drivers and body companies during the planning and design process.

This collaboration is the reason behind many of the new driver-centric features like controls and switches that can be easily operated while wearing gloves. Or the available pedestal-mounted mirrors designed to reduce head-turn movement and increase visibility.

Of course, nothing contributes more to comfort than space, and the HV Series has one of the largest cabs in its class. It's these enhancements and much more that make the HV Series a true driver's truck.

TAKE A HANDS-ON APPROACH TO SUCCESS.

A comfortable cab is a good place to work. HV International® engineers worked closely with drivers and body companies in crafting the interior of the HV® Series. Clay models were reviewed and revisions were made until all parties were satisfied. The final result is a true collaboration of those who know best when it comes to being successful in the field.

1 The all-new steering wheel adds more functions at the driver's fingertips with integrated laser-etched labeling for improved durability and visibility. Plus, all the controls within the cab are designed to be glove-friendly.

2 An available first instrument panel with center-mounted vent keeps the middle passenger cool while providing space for extra legroom or a large floor-mounted body control module.

3 Factory-installed switches with custom labels are optimally positioned within the HV® Series for use with integrated equipment.

- Up to 30 customizable, interchangeable switches are available for any application.
- Large, easy-to-read backlit text.
- Warning lights can be any of seven colors.
- One common switch pack for wiring simplicity.
- Any switch can be relocated by the customer without wiring changes.
- Blank "windows" available for custom labeling by the customer.

4 The innovative new shifter is mounted on the steering column, allowing your drivers to easily reach and smoothly operate shifting and engine braking while keeping their eyes on the road and hands on the wheel.

When adding a fractional portion to the integer portion,

DIAMOND LOGIC[®]

ADVANCING THE SCIENCE OF PRODUCTIVITY.

The International[®] truck Diamond Logic[®] electrical system is considered the most advanced in the industry—and for good reason. Diamond Logic streamlines chassis and body equipment integration and allows customers to program automated tasks. This means more consistent performance and increased equipment protection and crew safety. It's easy to spec, simplifies integration, and includes on-board diagnostics that self-monitor all vehicle components to reduce downtime.

HV[®] Series features a programmable key fob that allows two Diamond Logic tasks to be activated with the push of a button.

1 Body Controller

- New microprocessor is 6 times faster
- 20 more input and output pins
- Three more J1939 data links for a total of five
- Internal clock for programming timed features like auto-start

2 Switch Packs

- All switches are controlled via 6 wires
- Blinking backlights provide equipment status
- Switches can be moved without moving wiring
- Up to seven colors of lights can be used

3 PTO Power Take Off

- Engagement and disengagement based on chassis and body conditions (engine speed, road speed, outrigger deployed before boom can raise, park brake set, transmission in neutral, etc.)
- All data links can be used as an interlock
- Engine speed can be controlled (in most cases) while using the PTO with no additional wiring needed

4 Remote Power Modules

- All 12-volt outputs are automatically fused (auto-resealable) with solid-state technology

5 Outriggers

- Diamond Logic can control deployment
- Can sense when they are not properly stowed (not letting transmission come out of neutral) and will illuminate an indicator light in the switch packs

6 Diff-lock

- Diamond Logic can control when the axle differential locks and unlocks depending on road speed, protecting the driveline from damage due to excessive speeds in a locked position

7 Work Light

- Diamond Logic can automatically turn on or off the light based on chassis functions (for example, rear-facing light could be programmed to turn on any time the transmission is in reverse, adding additional lighting)
- Automatically shut off the light based on a timer (4-min to several hours) preventing dead batteries

8 Boom Hydraulics

- Diamond Logic can prevent the transmission from shifting into drive and can illuminate an indicator light until the boom is lowered correctly

9 Pre-Trip Light Inspections

- Driver can press a button and all the exterior lights will blink in sequence, allowing daily DOT light inspection with just one person

10 Solenoid Air Packs

- Air can be turned on with a switch in the dash or controlled based on chassis and/or body functions (for example, tailgate air lock in dump applications can be programmed to not unlock unless the truck is driving below a certain speed)

WHATEVER YOUR APPLICATION, DIAMOND LOGIC® IS PROGRAMMED TO SUCCEED.

Whether you're a municipality looking for an efficient, cost-effective solution, a Truck Equipment Manufacturer (TEM) looking for a rock-solid foundation to build on, or a construction company wanting the toughest truck in the business, the HV™ Series combined with the Diamond Logic System will get the job done with safety and precision others simply can't match.

UTILITY

- Utility Indicator Lights
- Factory-installed indicator lights can warn within 100 feet for Boom Out of Slow and Outriggers Down Warning.
- Protect Equipment Through Interlocks
- Require outriggers be deployed and the park brake set before allowing boom to rise.

DUMP

- Dump Bed and Gate Open Indicators
- Hydraulic System monitoring performed through custom programming.
- Lights On With Wipers
- Lights are automatically turned on when wipers are activated to meet the legal requirement of many states.

MIXER

- Programmable PTO Accommodations
- Remote livery switches can be custom-programmed for vertical concrete chutes and water valves.
- Pro-Trip Light Inspection
- Automated vehicle light check.

CRANE

- Protect Equipment Through Interlocks
- Require outriggers be deployed and the park brake set before allowing boom to rise.
- Park Brake Alarm
- Alerts driver of park brake not set using city horn.

DIAMOND LOGIC BUILDER

HV™ Series customers have the ability to write custom logic so Diamond Logic can be easily expanded, configured and updated in the field to meet specific application requirements.

FIT TO BE UPFITTED.

The International® HV™ Series provides the ideal foundation for an almost unlimited number of applications. This is the result of our extensive experience working directly with customers as well as our unsurpassed engineering capabilities. Ordering the specific foundation needed for your application upfront substantially reduces time and expense upfitting the vehicle post-production.

Every HV Series starts with a Huck® Bolted frame and cross member system to deliver maximum vocational durability as well as a number of frame rail options. Plus, air tank installations can be mounted between the frame rails, freeing up space for other equipment. The HV Series is also available with a Clean Cab-to-Axle (CA) configuration to minimize costly post-production modifications. In addition, a new 20,000 lb. off-set bow front drive axle allows for a lower ride height than a traditional center bowl.

International Truck Specialty Centers provide quick, efficient and cost-effective customization:

- ▶ Modifications covered under manufacturer's warranty
- ▶ Process supervised by International engineers to ensure factory production-level quality
- ▶ Expertise to identify and resolve problems quickly
- ▶ Optimized delivery cycle times and comprehensive factory support

Body Company Benefits—Mixer:

- ▶ New, lighter 8L engine configuration
- ▶ Specific cross-member location to accommodate mixer PTO pump
- ▶ Factory-installed transition brackets for body mounting
- ▶ Inverted after-frame cross members for booster axle rim clearance

Body Company Benefits—Crane:

- ▶ Customized frame ladder and component locations to meet body packaging requirements
- ▶ Available integral front frame extensions
- ▶ Single 1/2", 3.35 million RBM straight frame rail provides high strength for high capacity crane applications

Body Company Benefits—Dump:

- ▶ Single 1/2", 3.35 million RBM straight frame rail provides high strength without added weight or risk of corrosion
- ▶ Factory installed lift axles with many customizable chassis packaging options
- ▶ Available in-cab battery box provides increased chassis packaging flexibility

SAFETY FIRST, LAST AND ALWAYS.

Traditional Hood Blended Hood

The available blended hood increases forward ground visibility by nearly 90 inches. This makes objects closer to the vehicle more visible to the driver, improving safety.

10% Improvement

5% Improvement

The sheeted areas increase how visibility has been optimized by reshaping the doors and side windows, and repositioning the cab mirrors so drivers turn their heads less. This increased visibility reduces driver stress and neck strain to enhance productivity.

The safety of drivers and occupants is a top priority on every International® truck, and the HV™ Series is no exception. Safety often comes down to seeing potential hazards and successfully avoiding them. That's why the HV Series has been engineered to provide a clear field of view with an excellent turning radius.

An optional heated windshield keeps ice and snow from collecting on the wipers, keeping them ready to go. The available air disc brakes provide shorter stops with longer lining and rotor life for less maintenance. Plus, the available electronic stability control system helps drivers maintain control during heavy braking and slick roads.

BENDIX® WINGMAN® ADVANCED

Available on select HV Series, the Bendix Wingman Advanced combines adaptive cruise control collision mitigation and stability technologies to help drivers potentially avoid a collision or reduce its severity by providing alerts and, if necessary, automatically applying the brakes.

OUTSTANDING MANEUVERABILITY

With an inside wheel cut of up to 50 degrees, the HV™ Series can easily navigate tight city streets or construction sites, saving driver time, reducing work-site collisions and boosting productivity.

INDUSTRY-LEADING HVAC

The all-new HVAC system employs advanced heating and cooling technology to deliver outstanding comfort and visibility. During testing at a frigid 0°F, the MAX defrost feature cleared 100% of the windshield in under 10 minutes from start-up — quicker than any competitor measured.

~CRSEPOWER 370-475
TORQUE @ 11 1350-1700

ENGINEERED WITH UPTIME IN ITS DNA.

THE A26 IS AN EFFICIENT AND POWERFUL WORKHORSE DESIGNED FOR THE TOUGHEST VOCATIONAL APPLICATIONS.

The big bore International A26 was engineered to set a new standard in uptime, fuel efficiency and quiet operation. Producing up to 475 HP and 1,700 lb.-ft. of torque in the HY™ Series, this 12.4L diesel includes a Variable Geometry Turbocharger (VGT) with a titanium compressor wheel for superior longevity versus aluminum designs. The A26 is also backed by the industry's best warranty and is the first engine to meet the B10 standard that requires 90% of delivered engines to travel 1,200,000 miles before a major repair.

Technical Specifications

Engine Type	Diesel 4-Cycle
Configuration	Inline 6-Cylinder
Displacement	12.4 L (758 cu. in.)
Bore & Stroke	4.96 in. x 6.54 in. (126 mm x 166 mm)
Compression Ratio	16.5:1
Aspiration	Variable Geometry Turbocharger with 2-stage Air Cooled
Combustion System	2500 bar High Pressure Common Rail
Engine Lubrication	62 Quarts (60 L)
Total Engine Weight (Dry)	2,399 lbs. (1099 kg)
Valves	4 Valves Per Cylinder, Single-Camshaft (Overhead)
B10 Design Life	1,200,000 mi (1,931,000 + 0)

The crankcase is constructed with North America's first big bore Compacted Graphite Iron (CGI) design for 75% higher tensile strength and 45% greater stiffness while reducing weight, noise and vibration.

Pistons are engineered with a low-friction skirt coating and advanced piston ring geometry to reduce parasitic losses and enhance fuel economy.

The single stage EGR cooler is constructed of laser-welded stainless steel to deliver proven reliability and performance in a compact, easy-to-service design.

Gear teeth are produced using an innovative grinding process for smoother, harder and quieter gear surfaces.

ALL-NEW CYLINDER HEAD

The innovative A26™ cylinder head achieves the perfect balance between optimal weight, strength, cooling and breathing.

- Innovative gray iron material offers the high strength and thermal conductivity needed for advanced breathing and cooling.
- Extensive computer modeling and analysis optimizes port flow geometry to substantially reduce air restriction, helping the engine breathe more consistently from cylinder to cylinder for increased fuel efficiency.
- New water jacket geometry ensures that more coolant flows to the hottest areas of the cylinder head that need it most, with less restrictive flow that reduces parasitic loss to the water pump for improved fuel economy.

Cummins® B6.7 (200-360* HP)

Every aspect of the B6.7 has been engineered for reliability, durability and fuel efficiency to deliver the lowest cost of ownership with maximum uptime. Add industry-leading service from International® and Cummins, plus a two-year, unlimited mileage engine warranty, and it's easy to see why the B6.7 is the best-selling engine in the medium-duty truck market.

Cummins® L9 (260-450* HP)

The Cummins L9 has established a solid reputation as a dependable engine for medium duty applications. Its XPI Fuel System features multiple injection events per cycle for smoother, quieter operation. This, combined with its proprietary Variable Geometry Turbocharger (VGT), means the L9 has the highest power density of any engine in its class. In addition, replaceable wear liners help make the L9 easier and less expensive to rebuild; plus heavy-duty roller followers, bypass oil filtration and targeted piston cooling all contribute to longer service life.

ONCOMMAND[®] CONNECTION. ALL MAKES. ALL MODELS.

CONNECT YOUR ENTIRE FLEET THROUGH A SINGLE PORTAL.

If your fleet includes more than one truck make and model, chances are you're using more than one remote diagnostic system to help monitor and manage the health of your vehicles. That's the genius of OnCommand[®] Connection. It's the first and only all-makes diagnostic system that enhances your uptime by efficiently and accurately monitoring all the trucks in your fleet in real time.

ONCOMMAND CONNECTION HELPS YOU:

- Monitor and manage the hundreds of fault codes in all your trucks
- Connect your fleet with service centers and manufacturers
- Comply with safety standards by taking action on critical faults
- Make informed choices to manage your fleet for maximum productivity

ONCOMMAND CONNECTION HAS THE CAPABILITIES TO:

- Diagnose your entire fleet wherever it may be
- Get action plans for more than 18,000 engine and vehicle faults
- Prioritize needed repairs while avoiding unnecessary service visits

OnCommand[®] Connection

REMOTE DIAGNOSTICS FOR ALL MAKES OF VEHICLES.

Use OnCommand Connection to proactively identify potential problems, control maintenance, lower repair costs and maximize uptime.

ALL THE TOOLS YOU NEED AT YOUR FINGERTIPS

OnCommand[®] Connection is designed to keep your vehicles moving and your profits rising through powerful features such as **Interactive mapping**, **engineer-designed action plans** and access to your online portal through your preferred interface - computer, tablet, smartphone or email.

THE NEW INTERNATIONAL® MV™ SERIES. MORE MIGHT, MORE RIGHT — JUST RIGHT.

Time for a medium-duty truck powered and engineered to be *right* – for your job, your customers, your power needs, and your industry. To be just right, the MV Series is purpose-built to be out on the highway, at the job site, first on the scene and anywhere else work needs to get done. Its durable, spacious cab is crafted for optimal comfort and control. Its proven Cummins engines are tuned to maximize torque, dependability, and efficiency. New break-away mirrors limit potential damage. The redesigned hood is sloped to offer increased visibility and safety. And the industry-leading intelligence of its Diamond Logic® electrical system is seamlessly integrated to help protect both your crew and your equipment.

The MV Series: More uptime. More capability. More safety and styling. Done just right.

- CONNECTED

TRUCKS BUILT JUST RIGHT FOR YOUR EVERY NEED.

From torque, payload and application options to our highly advanced and versatile Diamond Logic® electrical system, MV™ Series trucks expand the ability to get big things done. When someone's stranded, something is broken, needs to be hooked up, cut down or cleaned out these trucks churn with productivity. Choose from two proven Cummins engines, three cab sizes and a 4x2 or 6x4 axle configuration. Then select the exact specifications to suit your job. The MV Series can conform to your needs.

STEEL SANCTUARY.

FOR STRENGTH, SAFETY AND COMFORT

The MV™ Series cab wraps your crew in a high-strength, low-alloy (HSLA) reinforced, cold-rolled steel construction that combines the corrosion resistance of aluminum with the workability, fit, finish and strength of steel. The result is a larger, quieter, more protective interior with no and one-light weld.

INTERCOAT CHEMGUARD

Think of it as a sandwiching layer of high-strength, low-alloy (HSLA) reinforced, cold-rolled steel. The intercoat chemguard is a corrosion-resistant coating that is applied to the exterior and interior surfaces of the steel. The intercoat chemguard provides superior corrosion protection.

OPTIONAL LINE-X FLOOR PROTECTION

This available polyurethane and polyurea formulation creates a protective layer on the cab floor that contains built-in wear and tear resistance that makes the floor easy to clean. Our safe and long-lasting, Line-X is an OSHA-approved protective coating designed to guard against abrasion, corrosion and impact, and can be found over a million other products.

Reinforced H-Beam

TOP-DOWN STRENGTH

All MV™ Series regular, crew and extended cab configurations pass the rigorous SAE J2422 cab roof strength test, as well as the Europan ECE 24-01 roof strength requirement. Both tests measure uniform vertical load applied to the roof. SAE J2422 also tests for applied side loads which is a National Fire Protection Association (NFPA) requirement.

ANTI-CORROSION THAT'S ANTI-COMPROMISE

At International, longevity is the goal of the hardware. Which is why every reinforced MV™ Series cab assembly is dipped into an electrostatically applied primer as part of a rigorous paint, sealing and coating process that provides superior corrosion and rust resistance – all backed by a 5-year perforation corrosion warranty.

Corrosion Protection Process:

1. Standard subprime steel
2. Custom-engineered duct and super-bond
3. Primes the steel and joints the steel
4. Epoxy primer after final preparation
5. Acrylic primer
6. Surface treatment

MV™ SERIES FEATURES:

- A high-strength, low-alloy (HSLA) reinforced, cold-rolled steel cab delivers superior corrosion resistance as well as world-class fit and finish
- The welded cab assembly is dipped into an electrostatically applied primer as part of a paint process that provides outstanding resistance to corrosion and fading, and it's backed by a 5-year perforation corrosion warranty

**DRIVERFIRST™ — THINK OF IT
AS A 360-HP CORNER OFFICE.**

Welcome to the ultimate seat of power, inside the MY™ Series is a command center designed around the driver. Comfort, Visibility, Safety. Room for a third passenger without knocking their knees. Plus, the stalk slider allows for shifting and application of the Jacobs Brake without taking your eyes off the road ahead. It comes from talking to real drivers. Listening to their needs. And designing a truck around their priorities — a philosophy we call DriverFirst.

This driver-centric approach starts with a cavernous cab and with meticulous attention to every detail. There's a powerful HVAC system to keep you cool while on the job. Controls and switches are easy to find, reach and operate, even when wearing gloves. A redesigned hood enhances visibility. Door-mounted mirrors are positioned to see more while turning your head less to reduce fatigue. Even the air horn lanyard is placed exactly where drivers told us it should be.

POWERFUL PRODUCTIVITY. UNDERFOOT AND AT YOUR FINGERTIPS.

The steering wheel adds more functions at the driver's fingertips with integrated back-lit, laser etched labeling for improved durability and visibility. Plus, all the controls within the cab are designed to be operated easily while wearing gloves. The innovative over-tilt, shifter is mounted on the steering column, allowing the driver to easily reach and smoothly operate shifting and engine braking while keeping their eyes on the road and hands on the wheel.

A standard flat instrument panel includes a center-mounted vent to keep the middle passenger comfortable while providing space for extra legroom, optional storage components, or a large floor mounted body control module.

Factory-installed switches with custom labels are optimally positioned to use with integrated equipment:

- Up to 30 customizable, user-replaceable switches are available for any application
- Large, easy-to-read backlit text
- Warning lights can be any of seven colors
- One common switch pack for wiring simplicity
- Any switch can be allocated by the customer without wire changes using Diamond Logic
- Blank "windows" available for custom labeling by the customer

*Variable with Eaton APT and Allison 500D

Every detail inside the MY™ Series cab has been researched, designed and extensively tested working with the real experts - drivers and body companies that need to deliver on the road or on the jobsite. The final result is a true collaboration of those who know what it takes to be productive and successful.

ADVANTAGES YOU CAN SEE CLEARLY.

Uptime is much more than simply being able to work – it also requires giving drivers the tools they need to be seriously productive. It's why the MY70 Series instrument cluster is tested, refined and then tested again to ensure optimal readability, usability and positioning. It's also why color, illumination, legibility and even gauge size is designed to deliver optimal viewing in varying light conditions.

THE GOAL? HAVE THE RIGHT INFORMATION, LESS DISTRACTION, AND MORE DRIVER ALERTNESS AND CONCENTRATION.

Uptime. With the MV® Series, you get more of it. On the road, and on the jobsite. Our trucks are built to carry the weight of your job, your reputation, and your commitment to deliver – on time, every time. Uptime-friendly features include: aligned and extended maintenance schedules that reduce service visits; on-board diagnostics that self-monitor vehicle systems; reduced manufacturing complexity for easier servicing; new aero break-away mirrors that reduce chances of cab damage – and more below.

Huckle Bolt chassis fasteners provide consistently superior clamping force without re-torquing, and won't come loose even in extreme environments.

Routine service points are clearly labeled and easily access under the hood.

Key fluid reservoirs are transparent for quick inspection and many of the caps are tethered, saving time and frustration from dropped or lost caps.

In-cab electrical panel is protected from the elements and conveniently located under split-revision dash panel.

TOUGH CHOICES

AUTOMATIC ADVANTAGE

The International® MV™ Series offers automatic, automated manual and manual transmission choices that pair perfectly with your application needs, whether you're renting trucks to inexperienced customers or seeking optimal cost efficiency and productivity from veteran drivers.

Allison Automatic with Optional FuelSense® 2.0

The Allison FuelSense 2.0 with DynaActive™ shifting features a patented torque converter that provides infinitely variable shift points based on the vehicle configuration and operating conditions. FuelSense 2.0 can improve fuel economy up to 6% compared to previous generation FuelSense packages.

International® Truck | MV SER

ITS GREATEST STRENGTH: SAFETY.

The M-Series is built with safety as a core priority. It's the result of extensive studies into how drivers can stay safe and productive in a broad range of situations on the road or around a jobsite.

Safety often comes down to seeing potential hazards, and successfully avoiding them. That's why the M-Series provides maneuverability through a new ahead-hood and optional LED headlights to help drivers stay focused, plus excellent maneuverability. An industry-leading HVAC system with MAX-Adapt can clear 100% of the windshield in under 30 minutes at 0°F. Plus there's traction control to help drivers maintain control during heavy braking and on slick roads.

Truckhead Hood | New Steer Steer

15.0"

The ahead-hood increases the driver's visibility by 15.0 inches, providing a clear view of the road ahead.

SLOPED HOOD PROVIDES IMPROVED VISIBILITY

The sloped hood design with improved forward and night visibility through a new sloped hood and breakaway mirrors.

JOB-SITE MANEUVERABILITY

The M-Series can easily navigate tight city streets or construction sites, saving time and increasing productivity.

BENDIX WINGMAN ADVANCED

The optional Bendix Wingman Advanced and Bendix Adaptive Brake system enhance regulation systems can greatly enhance operator safety. By providing adaptive brake control, Bendix Wingman Advanced can detect and respond to changing conditions, helping the driver potentially avoid a collision or help reduce its severity.

BENDIX BLINDSPOTTER

When cornering, Bendix Blindspotter, a Corner Alert System (CAS), the optional Bendix Blindspotter provides a 180° area of detection capable of detecting vehicles up to 20 feet in front and 20 feet behind the Blindspotter enter. The coverage zone is much larger than the rearview mirror of the vehicle. Blindspotter continuously takes alerts by operating in two modes: highway speeds and lower speeds.

BODY APPLICATIONS

The MV™ Series is ready to accept nearly any body—from a contractor's dump to a flatbed — usually without any special modifications or reinforcements.

TEM-READY. CUSTOMER- FOCUSED.

The more specialized your needs, the more our teams at International® Truck can deliver. We combine TEM-trendy body installation with unmatched application expertise to provide virtually unlimited uplift capabilities. Our engineers will work directly with your dealer, allowing you to order the specific foundation needed for your application up-front, substantially reducing the time and expense of uplifting your truck post-production.

Every MV™ Series truck starts with a huck-bolted frame and crossmember system to deliver maximum vocational durability and multiple frame rail options. Air tanks, fuel tanks, battery boxes and exhaust systems can all be mounted in various positions to better align with your application. Recent driver-focused features improve visibility and maneuverability. Maintenance has also been simplified with a partial open hood (instead of hatches) and an under-hood work light.

Our MV Series Trucks are also available with a Clean Cab-to-Axle (CA) configuration to help minimize costly post-production modifications.

Body Company Benefits:

- ▶ Optimized chassis package
- ▶ Custom frame piercing to minimize open holes and maximize frame strength
- ▶ Hooks and same loader for durability and dependability
- ▶ Customized component locations to meet body packaging requirements
- ▶ Available integral front frame extensions
- ▶ Single 276" 2.4 million RBX straight frame rail provides high strength without added weight or risk of corrosion
- ▶ A clean cab-to-axle configuration (Clean CA)

Popular Applications include:

- ▶ Dump
- ▶ Crane
- ▶ Recovery
- ▶ Utility
- ▶ Bucket Truck
- ▶ Digger Derrick
- ▶ Van Body
- ▶ Stake
- ▶ Snowplow
- ▶ Flatbed

DIAMOND PARTNER

DELIVERING MORE UPTIME BY BRINGING TEMS AND DEALERS CLOSER TOGETHER

The Diamond Partner Program creates a new conduit between International® Truck, our dealers and TEMs by providing industry leading body-builder support materials and services. This program makes it easy for TEMs to mount their equipment faster, with a higher build quality and lower costs. In addition, this program facilitates joint marketing opportunities that can help increase awareness of dealer/TEM partnerships.

DIAMOND LOGIC®

ADVANCING THE SCIENCE OF PRODUCTIVITY.

The MV™ Series includes the International® Truck Diamond Logic® electrical system, widely considered the most advanced in the industry. Diamond Logic streamlines chassis and body equipment integration and allows you to program automated tasks. This means more consistent performance and increased crew safety and equipment protection. It's easy to spec, simplifies integration, and includes on-board diagnostics that self-monitor vehicle components to reduce downtime.

You even have the ability to write custom logic for your application through Diamond Logic Builder.

- 1 Body Controller**
 - Heart of the Diamond Logic System. Performs all body integration software execution to maximize safety, performance and ease of equipment installation.
- 2 Switch Packs**
 - All switches are controlled via 6 wires.
 - Blinking switch indicators provide equipment status.
 - Switches can be moved without moving wiring.
 - Up to seven colors of lights can be used.
- 3 Pre-Trip Light Inspections**
 - Driver can inspect all of the vehicle lights will blink in sequence, allowing daily DOT light inspection with just one person.
- 4 PTO Power Take Off**
 - Engagement and disengagement based on chassis and body conditions (engine speed, road speed, outrigger/boom deployed before boom can raise, park brake set, transmission in neutral, etc.).
 - Can be used as an interlock including RPM, MPH, Park Brake, etc. to prevent an unsafe condition.
 - Engine speed can be controlled (in most cases) while using the PTO with no additional wiring needed.
- 5 Remote Power Module**
 - All 12-volt outputs are automatically fused (auto-resettable) with solid state technology.
- 6 Outriggers**
 - Diamond Logic can sense when they are not properly stowed and will illuminate an indicator light in the switch packs while sounding an audible alarm.
- 7 Differential Lock**
 - Diamond Logic can control when the axle differential locks and unlocks depending on road speed, protecting the driveline from damage due to excessive speeds in a locked position.
- 8 Work Light**
 - Diamond Logic can automatically turn on or off the light based on chassis functions (for example, rear-facing light is on reverse, adding additional lighting).
 - Automatically shut off the work light based on a set forward speed.
- 9 Boom Hydraulics**
 - Diamond Logic can sense when they are not properly stowed and will illuminate an indicator light in the switch packs with an audible alarm.
- 10 Solenoid Air Packs**
 - Air can be turned on with a switch in the dash or controlled based on chassis and/or body functions (for example, tailgate air lock in dump applications can be programmed to not unlock unless the truck is driving below a certain speed).

The MV™ Series features a programmable key fob that allows two Diamond Logic tasks (such as pre-trip light inspection) to be activated with the push of a button.

CUSTOMIZING DIAMOND LOGIC® FOR YOUR UNIQUE TASKS

1 Order from nearly 200 preprogrammed tasks

2 Work with International® Truck to create custom tasks

3 International® Truck can train and certify your technicians on Diamond Logic Builder™ software to independently program new tasks

DIAMOND LOGIC BUILDER

MY™ Series customers have the ability to write custom logic so Diamond Logic can be easily expanded, configured and updated in the field to meet specific application requirements.

SNOWPLOW
