**SPECIFICATIONS
FOUR INCH SELF-PRIMING
SOLIDS HANDLING SEWER PUMPS
JEFFERSON PARISH
DEPARTMENT OF SEWERAGE**

1.01 GENERAL:

- A. Vendor shall furnish twelve (12) horizontal self-priming solids handling centrifugal sewage and trash pumps as specified herein. Pumps shall be as manufactured by Hydromatic Pumps of Ashland, Ohio, or approved equal. The pumps must be equipped with a stainless steel nametag stating that they are either made in the U.S.A or assembled in the U.S.A. The proposed pumps must be manufactured and designed by a manufacturer that can perform pump testing in a Hydraulic Institute "certified" test lab located in the same facility that the pumps are manufactured in. The proposed pumps must match the existing Hydromatic 40MP pump dimensions and performance such that no piping or motor changes will be required to install the new pumps into the existing locations. It is the bidder's responsibility to provide adequate information necessary for the complete evaluation of their proposed equipment. Jefferson Parish shall be the sole judge as to the equality of any alternate manufacturer's bid.

The specified pumps shall be Hydromatic model 40MP, or approved equal. Pumps must have 9 5/32-inch impellers, shall be capable of passing 3 inch spherical solids, have a 125 lb. flanged 4 inch suction inlet, and a 125 lb. flanged 4 inch discharge outlet. Pumps shall be bid and supplied by factory authorized sales agents for Jefferson Parish, Louisiana.

The pumps shall be installed by Jefferson Parish Personnel, at the following locations: Lake Louise & Avron (F-8-1), Andrews & Harrison (H-7-5), 6520 Airline Hwy. (E-4-4), Mounes & S. Al Davis Road (E-2-3), 1800 L&A Road (G-4-5), and Ridgelake & 41st (G-5-4). The new pumps will replace existing pumps already in service at each location.

2.01 CONSTRUCTION:

The pump volute case, suction elbow, priming port housing, suction and discharge connections, bearing frame assembly, and priming cover shall be high quality gray cast iron, ASTM A-48, Class 30 or better. In addition, the three internal wearing parts of impeller, wear plate, and lip plate shall be made of high quality 65-45-15 ductile iron. All external mating parts shall be machined and Buna-N Rubber O-ring sealed on a beveled edge. Gaskets will not be accepted.

3.01 INLET SUCTION ELBOW:

Inlet suction elbow and wear plate shall be removable as a unit so that all parts of the pump case, including the priming port, shall be accessible for cleaning and inspection without removing the suction or discharge piping. The wear plate shall be bolted to the inlet elbow. Units which do not have a replaceable suction wear plate will not be accepted.

4.01 PRIMING PORT HOUSING:

- A. A suction type flapper check valve shall be installed in the priming port housing. It shall consist of a flapper valve bracket, stainless steel shaft and bearings, and a Buna-N check valve gasket attached to the flapper bracket with a bolt, washer, weight, and nut. The priming cover handle and priming cover arm are to be cast iron.
- B. The internal flapper valve must be accessible through a top priming port plate so that the valve can be removed or installed with the pump volute full of liquid. The flap valve assembly shall be capable of being removed or replaced without draining the pump case, removing the suction elbow, or disturbing the piping connections.

5.01 SEALS:

- A. The pump shall have two identical and completely separate mechanical seals, mounted in tandem, with a separate oil chamber between the seals. The pump shall be operatable with either the inner or outer seal removed. John Crane Type 21, BF1 C1, seals shall be used with the rotating seal faces being carbon and the stationary seal faces to be ceramic. The inner seal shall be replaceable without disassembly of the seal chamber and without the use of special tools. The inner seal shall be accessible by removing the suction inlet elbow and impeller. Pump-out vanes shall be present on the backside of the impeller to keep contaminants out of the seal area. Units which use a single mechanical seal will not be accepted. Seals must be locally available.
- B. There shall be an oil chamber between the outer seal and the inner seal with a drain plug opening so that the oil consistency may be periodically checked for contamination to determine if inner seal failure has occurred.
- C. Units equipped with only one mechanical seal or dual opposed mechanical seals will not be accepted.
- D. The unit shall be equipped with a stainless steel shaft sleeve under the inner seal to prolong the shaft life by eliminating the possibility of scoring the shaft, should the inner seal fail.
- E. Replacement of the seals shall be accomplished without disturbing the suction or discharge piping.

6.01 IMPELLER:

- A. Impeller shall be of the two-vane, semi-open, solids handling design and have pump-out vanes on the backside to prevent grit and other materials from collecting in the seal area.
- B. Impeller shall be threaded on to the stainless steel shaft. A 300 series stainless steel screw and washer shall lock impeller against reverse rotation on the shaft.
- C. Impeller clearance shall be externally adjustable without the use of shims or requiring the disassembly of the pump unit. Adjustment shall be accomplished by means of adjustment bolts located at the end of the bearing housing rotating assembly. Units which utilize shims or do not allow for adjustment of the impeller by external means as specified will not be accepted.

7.01 LIP PLATE:

Impeller shall be used in combination with a replaceable volute lip plate. Where impeller is of full diameter, a flat back plate shall be provided. Where impeller trim is required, a volute lip plate shall be used in combination so as not to lose priming efficiency. Pump shall be capable of operating with various matched impeller trim/lip plate combinations without disturbing the volute case. The flat back plate or volute lip plate, shall be replaceable for renewed efficiency.

8.01 WEAR PLATE:

The replaceable wear plate is held to the suction elbow by two Allen head screws. The clearance set between the wear plate and impeller shall be maintained at 15 thousandths (.015). Replacement of the wear plate, impeller, and inner seal shall be accomplished through the removable suction elbow.

9.01 BEARING HOUSING:

- A. A cast iron bearing housing shall be utilized for the rotating assembly. The bearing housing shall support the shaft and two roller type ball bearings. Bearings shall be grease lubricated, locally available, and sized for a minimum B10 life of 40,000 hours for normal operations. Oil lubricated bearings will not be considered equal to grease. Bearing shall be sized to withstand all radial and thrust loads, which can reasonably be expected during normal operations.
- B. The fifteen-thousandths clearance between the impeller and wear plate shall be externally adjustable without the use of shims, or requiring disassembly of the pump unit. The outboard bearing is locked into a moveable end cap, so the impeller clearance can be made by adjustment of jacking bolts located at the end of the bearing housing rotating assembly.
- C. The bearing housing assembly, which includes the bearings, shaft, seals, and impeller, shall be removable as a unit without disturbing the pump volute or piping.

10.01 SERVICE AND WARRANTY:

- A. The pump manufacturer shall have an authorized factory service center capable of completely servicing the proposed pumps within one (1) hour travel time of the project site. The pump manufacturer shall have a direct factory service center/stocking facility capable of completely servicing and providing spare parts for the proposed pumps two (2) hours travel time from the project site.
- B. The pump unit or any part thereof shall be warranted against defects in material or workmanship within one year from date of installation or 18 months from date of manufacture, whichever comes first, and shall be replaced at no charge with a new or manufactured part, F.O.B. factory or authorized warranty service station. STANDARD INSURANCE REQUIREMENTS FOR BIDDING PURPOSES

All required insurance under this bid shall conform to Jefferson Parish Resolution No. 113646 or No. 113647, as applicable. Contractors may not commence any work under any ensuing contract unless and until all required insurance and associated evidentiary requirements thereto have been met, along with any additional specifications contained in the **Invitation to Bid**. Except as where otherwise precluded by law, the Parish Attorney or his designee, with the concurrence of the Director of Risk Management or his designee, may agree on a case-by-case basis, to deviate from Jefferson Parish's standard insurance requirements, as provided in this Section. Vendors requesting deviation therefrom shall submit such requests in writing, along with compelling substantiation, to the Purchasing Department prior to the bid's due date. Any changes to the insurance requirements will be reflected in the bid specifications and addenda. Prior to contract execution and at all times thereafter during the term of such contract, contractors must provide and continuously maintain all coverages as required by the foregoing Resolutions, and the contract documents. Failure to do so shall be grounds for suspension, discontinuation or termination of the contract.

For bidding purposes, bidders must submit with bid submission a current (valid) insurance certificate evidencing the required coverages. Failure to comply will cause bid to be rejected. The current insurance certificate will be used for proof of insurance at time of evaluation. Thereafter, and prior to contract execution, the low bidder will be required to provide final insurance certificates to the Parish which shall name **the Jefferson Parish, its Districts Departments and Agencies under the direction of the Parish President and the Parish Council** as additional insureds regarding negligence by the contractor for the Commercial General Liability and the Comprehensive Automobile Liability policies. Additionally, said certificates should reflect the name of the Parish Department receiving goods and services and reference the respective Jefferson Parish bid number.
