

# JEFFERSON PARISH

Statement of Qualifications  
(TEC Professional Services Questionnaire)  
Professional Engineering Services Related to  
**Routine Engineering Services for Drainage Projects**  
**Resolution No.: 138811**

Submitted by:

**Shread-Kuyrkendall & Associates, Inc.**

March 22, 2022

**Technical Evaluation Committee (TEC) Questionnaire**  
**Instructions**

- The Technical Evaluation Committee (TEC) Questionnaire shall be used for professional services related to architecture, engineering, or survey projects.
- **The TEC Questionnaire should be completely filled out. Complete and attach ALL sections. Insert “N/A” or “None” if a section does not apply or if there is no information to provide.**
- Questionnaire must be signed by an authorized representative of the Firm. Failure to sign the questionnaire shall result in disqualification of proposer pursuant to J.P. Code of Ordinances Sec. 2-928.
- All subcontractors must be listed in the appropriate section of the Questionnaire. Each subcontractor must provide a complete copy of the TEC Questionnaire, applicable licenses, and any other information required by the advertisement. Failure to provide the subcontractors' complete questionnaire(s), applicable licenses, and any other information required by the advertisement shall result in disqualification of proposer pursuant to J.P. Code of Ordinances Sec. 2-928.
- If additional pages are needed, attach them to the questionnaire and include all applicable information that is required by the questionnaire.

## TEC Professional Services Questionnaire

**A. Project Name and Advertisement Resolution Number:**

Routine Engineering Services for Drainage Projects  
Resolution Number: 138811

**B. Firm Name & Address:**

Shread-Kuyrkendall & Associates, Inc.  
104 Campus Drive East, Suite 102  
Destrahan, Louisiana 70047

**C. Name, title and contact information of Principal, as defined in Section 2-926 of the Jefferson Parish Code of Ordinances, who is a registered, licensed architect, professional engineer, or surveyor in the State of Louisiana:**

Richard R. Shread, P.E., P.L.S.  
President  
(225) 296-1335

**D. Name and contact information of employee who is a registered and licensed architect, professional engineer, or surveyor in the State of Louisiana in the applicable discipline. A subcontractor may be substituted here only if the advertised Project requires more than one discipline.**

Richard R. Shread, P.E., P.L.S.      Louisiana Civil P.E. No. 18983  
(225) 296-1335      P.L.S. No. 4695

**E. Please provide the number of employees whose primary function corresponds with each category:**

<u>2</u> Administrative	<u>      </u> Estimators	<u>      </u> Specification Writers
<u>      </u> Architects (Licensed)	<u>      </u> Geologists	<u>      </u> Structural Engineers
<u>      </u> Chemical Engineers	<u>      </u> Geotechnical Engineers	<u>2</u> Graduate Engineers
<u>5</u> Civil Engineers	<u>      </u> Interior Designers	<u>      </u> Project Managers
<u>2</u> Construction Inspectors	<u>      </u> Landscape Architects	<u>4</u> Clerical
<u>      </u> Ecologists	<u>2</u> Land Surveyor	<u>      </u> Grant/Funding Specialist
<u>      </u> Electrical Engineers	<u>      </u> Mechanical Engineers	<u>      </u> Sanitary Engineers
<u>1</u> Engineer Intern	<u>      </u> Environmental Engineers	
<u>1</u> Professional Land Surveyors		<u>19</u> <b>TOTAL</b>

**F. Is this submittal by a JOINT-VENTURE? Please check: YES ☐ NO ☒**

**If marked "No" skip to Section I. If marked "yes" complete Sections G-H.**

## TEC Professional Services Questionnaire

**G. If submittal is by JOINT-VENTURE, list the firms participating and outline specific areas of responsibility (including administrative, technical, and financial) for each firm. Please attach additional pages if necessary.**

1.  
None

2.

**H. Has this JOINT-VENTURE previously worked together? Please check:**  
YES ☐ NO ☒

**I. List all subcontractors anticipated for this Project. Please note that all subcontractors must submit a fully completed copy of this questionnaire, applicable licenses, and any other information required by the advertisement. See Jefferson Parish Code of Ordinances, Sec. 2-928(a)(3). Please attach additional pages if necessary.**

Name & Address:	Specialty:	Worked with Firm Before (Yes or No):
1. None		
2.		
3.		

**J. Please specify the total number of support personnel that may assist in the completion of this Project:**

4 \_\_\_\_\_

### TEC Professional Services Questionnaire

**K. List the professional in charge, key persons, specialists, and individual consultants anticipated for this Project and provide their relevant information below. If necessary, please attach additional documentation (i.e. resume) that demonstrates the employment history and experience of the Firm's key persons that may assist in the completion of this Project. Please attach additional pages if necessary.**

#### **PROFESSIONAL IN CHARGE OF PROJECT:**

##### **Name & Title:**

Richard R. Shread, P.E., P.L.S.  
President

##### **Project Assignment:**

Professional-in-Charge: Project Team

##### **Name of Firm with which associated:**

Shread-Kuyrkendall & Associates, Inc.

##### **Years' experience with this Firm:**

34

##### **Education: Degree(s)/Year/Specialization:**

B.S./1974/Civil Engineering      MBA/1979/Business Administration, L.S.U.

##### **Active registration: Year first registered/discipline:**

1980 - Civil Engineering  
1993 - Professional Land Surveyor

##### **Other experience and qualifications relevant to the proposed Project:**

Mr. Shread, owner and principal managing officer is responsible for overall financial, personnel and policy management. He also shares responsibility for business development and continues to serve as Principal-in-Charge for contract administration on specific projects. Specific drainage improvement and design experience includes serving as Project Coordinator on the following Jefferson Parish projects: 1) Lane Additions to Lapalco Blvd; 2) Lynette Drive Bridge; and 3) Edwards Avenue Widening Project. These projects include bridge and roadway design, as well as surveying and construction inspection services. Other drainage experience in Jefferson Parish includes the Canal 13 Bank Stabilization Project the Bunche Village Drainage Improvements Project, Canal No. 2 Drainage Improvements Project and Soniat Canal Bulkhead Project.

### TEC Professional Services Questionnaire

<b>KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:</b>
<b>Name &amp; Title:</b>
Ripley W. "Gary" McClure, P.E., - Design Engineer
<b>Project Assignment:</b>
Key Person: Design/Engineer/Quality Control
<b>Name of Firm with which associated:</b>
Shread-Kuyrkendall & Associates, Inc.
<b>Years' experience with this Firm:</b>
31
<b>Education: Degree(s)/Year/Specialization:</b>
B.S./1982/Civil Engineering
<b>Active registration: Year first registered/discipline:</b>
1988 - Civil Engineering 1994 - Environmental Engineering
<b>Other experience and qualifications relevant to the proposed Project:</b>
<p>Mr. McClure has over twenty years of project management and quality control experience on a variety of projects including roadways and drainage systems, bridge hydraulics, and pumping systems for both water and sewer.</p> <p>Mr. McClure served as the Project Engineer/Manager on the following projects: Canal 13 Bank Stabilization, and Bunch Village Drainage Improvements, both in Jefferson Parish. He was the Project Manager for the design of numerous roadway projects for the LADOTD, which included box culverts, CMP culverts, and con-span structures. He is very familiar with the necessary (hydrologic and hydraulic) design criteria for the design of this project.</p>

## TEC Professional Services Questionnaire

<b>KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:</b>
<b>Name &amp; Title:</b>
Steven P. Breeding, P.E.
<b>Project Assignment:</b>
Key Person: Design Engineer
<b>Name of Firm with which associated:</b>
Shread-Kuyrkendall & Associates, Inc.
<b>Years' experience with this Firm:</b>
13
<b>Education: Degree(s)/Year/Specialization:</b>
B.S./1983/Civil Engineering
<b>Active registration: Year first registered/discipline:</b>
1989 - Civil Engineering
<b>Other experience and qualifications relevant to the proposed Project:</b>
<p>As a Senior Civil Engineer, Mr. Breeding has performed engineering design, inspections, investigations, certifications, testing, and reporting on various civil/structural projects:</p> <p>1) St. James Levee District- 23 miles of levees, includes aspects of macro and micro drainage characteristics in that modeling of large drainage water sheds are coupled with the ditches and roadway drainage modeling. This is used to correct any deficiencies in the various drainage basins, streamline the basins for both storm and drainage runoff and hurricane protection. Pump stations were included in the drainage system for both storm and hurricane conditions, as well as drainage structures. (\$225,000,000). 2) Reserve Drainage- Responsible for Design, Drafting, Survey Coordination, Bidding and Construction Administration for the seven streets of subsurface drainage rehabilitation and installation. (\$2,500,000). 3) Bunche Village Drainage Improvements- Responsible for Design, Drafting, Bidding and Construction Administration for the replacement and upgrade of 3 streets of subsurface drainage in Jefferson Parish. (\$3,900,000).</p>

**TEC Professional Services Questionnaire**

<b>KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:</b>
<b>Name &amp; Title:</b>
Nicola D. Gill, P.E.
<b>Project Assignment:</b>
Key Person: Design Engineer
<b>Name of Firm with which associated:</b>
Shread-Kuyrkendall & Associates, Inc.
<b>Years' experience with this Firm:</b>
20
<b>Education: Degree(s)/Year/Specialization:</b>
B.S./2002/Civil Engineering
<b>Active registration: Year first registered/discipline:</b>
2007 - Civil Engineering
<b>Other experience and qualifications relevant to the proposed Project:</b>
<p>Ms. Gill has twenty years of experience performing hydrologic and hydraulic analyses for various projects. Ms. Gill has intimate working and applied knowledge of various programs such as HEC-RAD, HEC-HMS, ARCGIS, and other programs to evaluate hydrologic systems. Ms. Gill has performed hydraulic analyses of the minor drainage canal crossings associated with Central Thruway and determined optimum sizes required. Ms. Gill also performed and provided computer modeling of the west bank of the Mississippi River in Jefferson Parish for updating the Digital Flood Insurance Rate Maps (DFIRM). This computer model was used to perform hydrologic and hydraulic analyses of major basins to determine flood elevations.</p>

Signature: Richard R. Shread Print Name: Richard R. Shread  
Title: President Date: 3/22/22

N. Use this space to provide any additional information or description of resources (including any computer design capabilities) supporting your firm's qualifications for the proposed project.

Shread-Kuykendall and Associates, Inc. is a professional firm offering engineering, environmental, construction management, and planning services. Our civil engineering experience includes the following specialties: Highway design including planning, topographic surveys, geometric design, hydraulic design, plan preparation, environmental studies and right-of-way surveys and maps; treatment plant design, subdivision design, water and gas distribution systems, drainage system improvements, utilities relocation, industrial construction layout and building design. All of our engineers are registered professional engineers and one is a registered land surveyor.

Shread-Kuykendall is a leader in employing new technology to enhance quality and efficiency. We utilize the Intergraph Microstation System to support our design and mapping capabilities. All of our field survey parties are equipped with TDS Ranger electronic data collectors/controllers equipped with Carlson Survey Software which communicate with SOKKIA total station survey instruments to collect topographic and boundary survey data. We also are equipped with SOKKIA GSR 2300 dual frequency survey GPS receivers with RTK capability which are utilized to establish project horizontal and vertical control as well as collection of topographic and hydrographic survey data. GPS static observation for control networks is post processed using Thales Navigation's Ashtech Solution Software. Sight Survey Professional coordinate geometry software by Carlson Software is used in the calculation of project control and boundary survey data. Topographic survey data utilized for design projects is processed in the Microstation environment prior to submittal to the design group. Our survey and design capabilities are enhanced by the use of recent technology to provide accurate field to finish information for our design group as well as our client's required needs.

Mr. Shread, the Principal-In-Charge, has design and construction management experience in several types of drainage design/improvement projects. Shread-Kuykendall's personnel are capable of providing the professional engineering design and management services and are familiar with the local requirements and guidelines associated with this type of project. Our past experience will be a valuable asset to the timely completion of this project. In accordance with the request for statement of qualifications, the following information is provided:

**L. Professional Training and Experience** - Shread-Kuykendall and Associates, Inc., offers six (6) registered professional civil engineers, one of whom is also a registered land surveyor. All of our employees proposed to work on this project have prior experience with our firm working on similar type projects. We think this is particularly important due to the specialized nature of this work. Specifically, Mr. Rick Shread's prior experience and intimate knowledge of drainage systems, make him well qualified to coordinate the preparation of the proposed plans.

Recently, SKA performed surveying and design engineering services for several drainage projects located in St. John the Baptist Parish. The Master Plan for Drainage Improvements, with a \$1.5 million dollar budget, is a study to develop a Parishwide Master Plan for drainage improvements. In conjunction with the Master Plan, our firm provided surveying and design services for several Drainage Construction Improvement Projects for the Parish. With a budget of \$4.5 million dollars, these projects range from the replacement of drainage structures to drainage ditch rehabilitation and pump station improvements.

Our firm has the necessary experience in drainage projects as stated in Section K of this Statement. Specific project experience includes the Lakewood Pump Station Project, which included a concrete-lined canal, and the design of the Lakewood Drive Drainage Improvements Project, both in St. Charles Parish. Additionally, we have worked on numerous drainage projects for St. Charles Parish, Jefferson Parish, East Baton Rouge Parish, the Village of Albany, and other surrounding communities. We have recently performed surveying and design services for the Booker Street Roadway Improvements Project for East Baton Rouge Parish. Other similar projects include the Mimosa Park Drainage Improvements, and Gassen, Kinler, and Paul Frederick Streets Drainage Improvements, all of which required subsurface drainage and roadway improvements. The Bains-Mississippi State Line Project involves preparing preliminary and final plans for roadway design and drainage for twelve miles of rural roadway. This project was completed in 1994 for the Louisiana Department of Transportation and Development. A number of box culverts were required for this project. We completed the Barber Road Project for St. Charles Parish in 1991 where we conducted surveying, design, and construction supervision services for the widening of the roadway. We recently completed work on the West Bank Hurricane Protection Levee Project which involves eight miles of proposed levee including surveying and mapping, real estate acquisition drawings, coastal hydraulics, soil borings, wetland preservation and permitting, and engineering planning and design of pump station capacity, gated protection structures, weirs, and sluice gates. We also recently completed the surveying and design services for the Allen Parish Street and Drainage Improvements Project. As can be seen, we have the vast amount of specialized experience that Jefferson Parish is requiring on this project.

N. Use this space to provide any additional information or description of resources (including any computer design capabilities) supporting your firm's qualifications for the proposed project.

2. Capacity for Timely Completion of Project - Our current workload is such that we would be able to begin work on this project upon "Notice to Proceed" and complete the design of this project on a timely basis. Regarding the services to be provided to the Parish, Shread-Kuyrkendall will have no problem completing preliminary plans and specifications on time and within budget. We can provide full time management for this project from the pre-design stage through completion of construction, including start-up, warranty, post-construction services as well as other related efforts. Our firm has an excellent reputation in regard to meeting schedules and deadlines. We realize the importance of maintaining schedules for our various drainage projects.
3. Location of office - Due to our current workload in the New Orleans area, Shread-Kuyrkendall has opened an office in St. Charles Parish. If selected for this project, it is our intention to complete this project from our St. Charles Parish office.
4. Adversarial Legal Proceedings Between the Parish and the Firm - None.
5. Prior Successful Completion on Similar Projects - Over the past thirty years, Shread-Kuyrkendall has completed numerous drainage projects for a variety of clients. These projects include subsurface drainage improvements, storm water pump stations, canal stabilization projects, levee improvements and master plans for drainage improvements. Listed below are the names of some of our clients who can verify our drainage design experience:
- 1) Mr. Daron Cooper  
Capital Improvements Director  
St. John the Baptist Parish, Louisiana  
985-652-9569
  - 2) Mr. Ken Dugas  
Director of Public Works  
Plaquemines Parish  
504-297-5343
  - 3) Mr. Donnie Bourgeois  
Capital Projects Supervisor  
St. Bernard Parish, Louisiana  
504-278-4300
6. Size of Firm - Shread-Kuyrkendall currently employs nineteen people including professionals in every discipline required by this project. We have six registered engineers with civil, structural, environmental, and sanitary engineering experience, as well as hydrologic, hydraulic and estimating capabilities. In addition, one of these professionals is also a registered land surveyor. We presently have CADD technicians on staff.
7. Past Performance on Parish Projects - Our firm has always had an excellent reputation with the engineering and surveying communities for integrity and competence. Our reputation for quality engineering services is well served by our prior work with the LA DOTD, Baton Rouge City-Parish, and various municipal governments. Shread-Kuyrkendall has completed numerous Public Works projects for the parishes of St. Charles, Jefferson and East Baton Rouge, as well as the Village of Albany, among other Louisiana communities. We have performed work on several projects of a similar size and scope to the complete satisfaction of the client.

**N. Use this space to provide any additional information or description of resources (including any computer design capabilities) supporting your firm's qualifications for the proposed project.**

The firm has developed standards of quality assurance which all staff members are required to follow on various public works projects. These standards dictate procedures by which design, quantity calculations, cost estimates, contract drawings and project correspondence are prepared, checked and followed within our organization. Below is a partial list of drainage projects which we have provided design, management and construction supervision services for in the past:

- Sonial Canal Bulkhead Improvements - Jefferson Parish
- Canal No. 2 Drainage Improvements - Jefferson Parish
- Reserve Drainage Improvements - Phase II
- Good News Drainage Improvements - Plaquemines Parish
- St. John the Baptist Parish Master Plan for Drainage Improvements
- St. John the Baptist Parish Drainage Construction Improvement Projects
- Lakewood Pump Station
- Lakewood Drive Drainage Improvements
- Sellers Canal Drainage Improvements (Pump Station, Drainage Improvements...)
- L.C.D.B.G. Albany Street Improvements Project
- Booker Street Roadway Improvements
- Allen Parish Street and Drainage Improvements
- Oak Lane Drainage Project
- Schexnayder Lane Drainage Project
- Bains-Mississippi State Line Roadway and Drainage Design
- Widening of Barber Road
- Fairfield Plantation Oaks Street Rehab
- St. Rose Drainage Improvements
- Davis/Barton Drainage Improvements
- Vicknair Canal Drainage Pump Station
- McReine Storm Water Pump Station
- Mimosa Park Drainage Improvements
- St. Charles Parish Street Rehab (Subsurface Drainage for Gassen, Kinler, Paul Frederick...Streets)

Shread-Kuyrkendall and our team of qualified professionals is well prepared to provide the expertise required for this project, complimented by our Intergraph Microstation Computer Drafting System to provide the services outlined in the advertisement in the time allotted.

In summary, we want to express our desire to work on this project and emphasize the tremendous amount of experience and abilities of our staff. Shread-Kuyrkendall can provide Jefferson Parish with the specialized experience required for this project. We will produce a quality product, on time, within budget, and to the satisfaction of Jefferson Parish. Your careful consideration of our qualifications would be greatly appreciated.
