

IntoPrint Sheet/Envelope Printers

MP/SP Series Printers

MP/SP Series Product Overview

3 Configurations

- MP200: CMYK
- SP1360W: CMYK+White
- SP1360S: CMYK+White/Clear

Multiple Options

- Cabinet
- Extra Trays
- High Capacity Feeder & Conveyor (HCF HCC)

Simplicity

Simple, end user
replaceable consumables
reduce downtime and
maintenance costs

Versatile Media

Media sizes from 2.52" x 3.50"
up to 13.00" x 52.01"
Extra heavy media — 130lb Cover
(360 gsm)

MP/SP Series Product Overview

Simple Paper Path

MP Tray offers a completely straight through paper path giving unmatched media handling and reduced jams

Production Print Quality

Secondary transfer of toner to the media ensures exceptional print quality.

Flexibility

The MP/SP Series media and toner options means users can print what they want, when they want

	Face Up	Max 300 Sheets
Environmental	Dimensions	27.5" x 26.18" x 25.2" (699 mm x 665 mm x 640 mm)
	Weight	215.2 lb. (97.6 kg) including consumables
Warranty	Limited	1 Year Warranty (parts only) Onsite available (additional costs)

MP/SP Series Lineup Differences

MP200
CMYK

Base 4 color process printer. Perfect for applications that are not printing on specialty medias that require white toner

SP1360W
CMYK+White

Most popular white toner printer. Configuration allows color over white in 1 pass, opening up opportunities for colored or clear medias

SP1360S
CMYK+White/Clear

“S” is for Spot. Swappable spot channel allows the user to use white for one job, then switch to spot clear for the next for expanded print offerings

SP Series White Option Differences

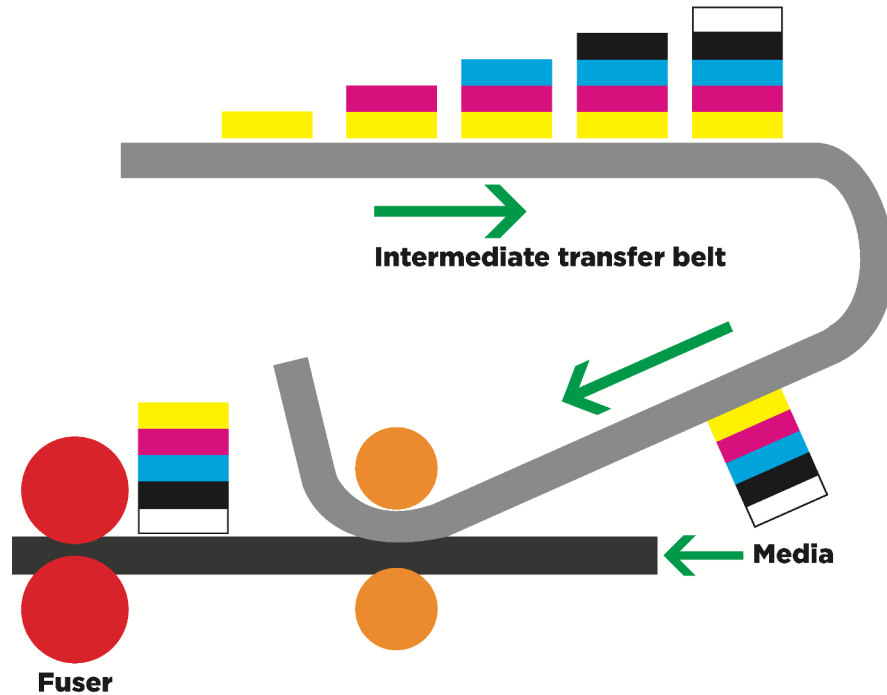

SP1360W

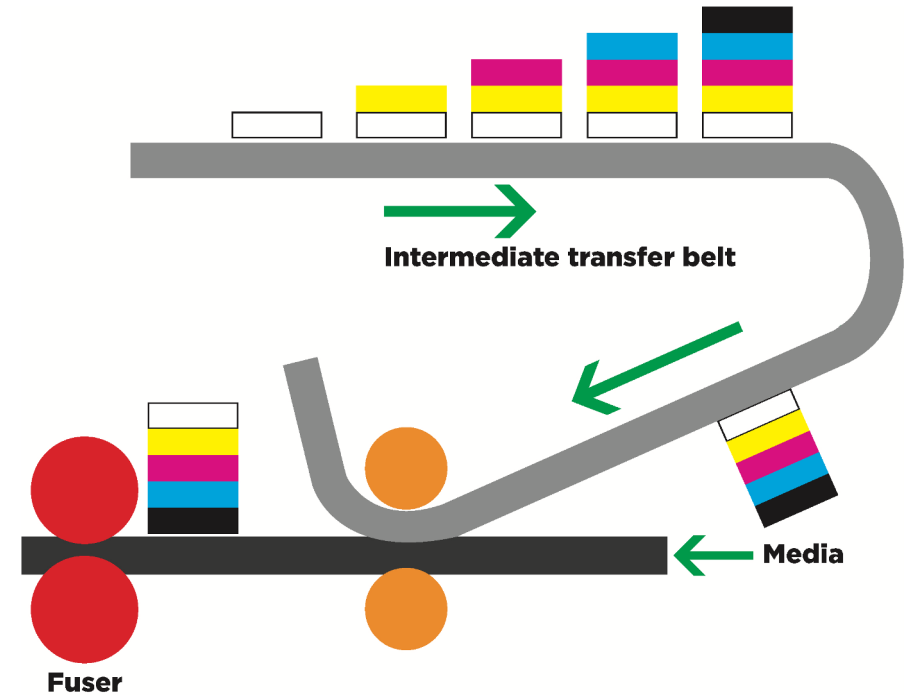

SP1360S

SP Series White Option Differences

SP1360W

SP1360S

MP/SP Series Accessories & Trays

Printer
(530 + 300)

High Cap Feeder
(530 x 3)

Printer
(530 + 300)

**Cabinet with
Casters**

** High Cap Feeder and/or Cabinet with Casters must be purchased with HCF and/or HCC*

MP/SP Series High Capacity Units

HCF

High Capacity Feeder, used in envelope and specialty media marketing to allow for long unattended runs of difficult stocks

HCC

High Capacity Conveyor, used in tandem with the HCF to allow for output media stacking for continuous printing

Throughput

The combination of the HCF and HCC allows the user to take their production capabilities to the next level

MP/SP Series Quoting Configurator

Printer *Choose 1* – MP200 / SP1360S / SP1360W

SP1360S — You Must Add a Spot Color Kit

- **Spot Color Installation Kit (White or Clear)**

- Starter Toner (10K White or 10K Clear)
- Image Drum (20K page life)
- Toner Supply Duct

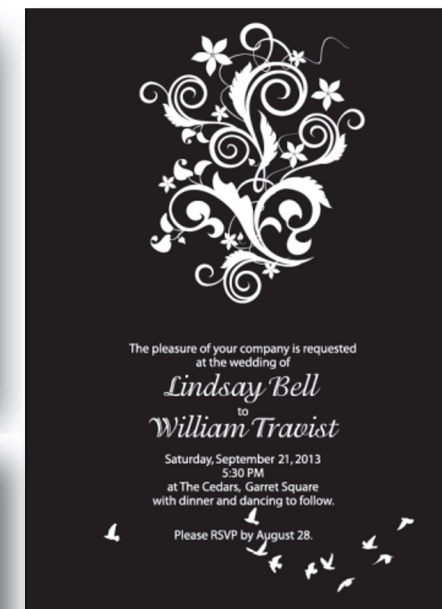

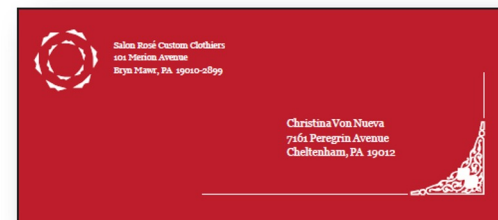

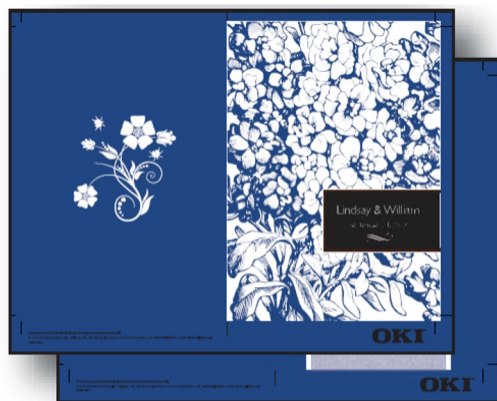

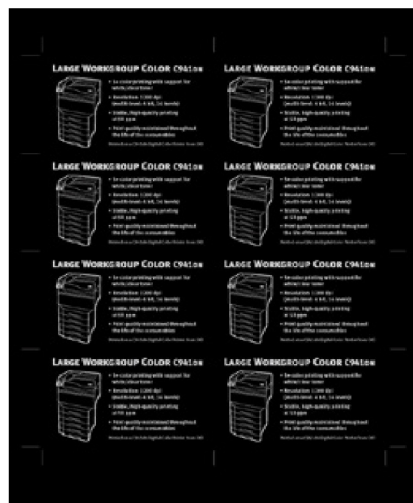

- **The SP1360S printer ships with only CMYK**

- A “Spot Color Installation kit” (Clear or White) must be purchased and installed to run the printer
- Spot Color Kit = Toner, Drum, Duct.
- An initial “duct” is required for each spot color.
- Toner and drum are replenished as needed.
- Not Required for SP1360W – White is included with SP1360W

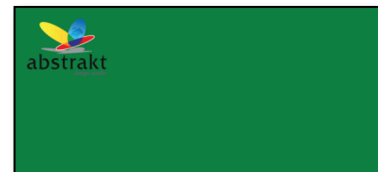

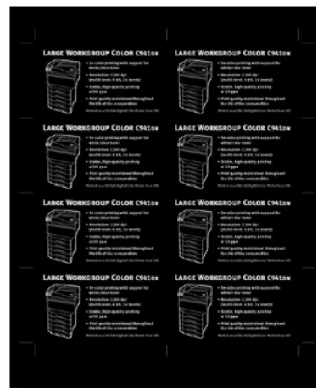

SP1360S White Samples

- Easily add solid white on dark stocks
- Highly opaque white, in a single pass/hit
- Easily add solid white on dark stocks
- Highly opaque white, in a single pass
- And Clear

SP1 360W White Samples

— Expanded White Capabilities — Color on Color!

Why is White Important?

- White is required in order to reflected color–light back to your eyes
- Without a white colors appear dull, sometimes barely visible

Without White Toner

This is actually Magenta and Yellow toner on blue paper!

With White Toner

The white toner under CMYK toner mimics white paper, allowing your eyes to see the intended colors.

Media Input & Output

Straight Through Paper Path

- Face Up Stacker

- Transparency, labels, envelopes, and smaller sizes such as index cards and B6 half sizes need to exit at the face-up stacker.

- MP Tray

- Paper Weights up to 360g/m²
- (0.36mm Max.)

Use the MP Tray for...

Extra heavy stocks, Postcards, envelopes, labels Transparencies (film!), and banners up to 52" long.

Simple File Setup for White

Full Page

Underprints page size.

Data Portion (Excluding White)

Underprints all image data excluding white data

Data Portion (Including White)

Underprints all not transparent image data

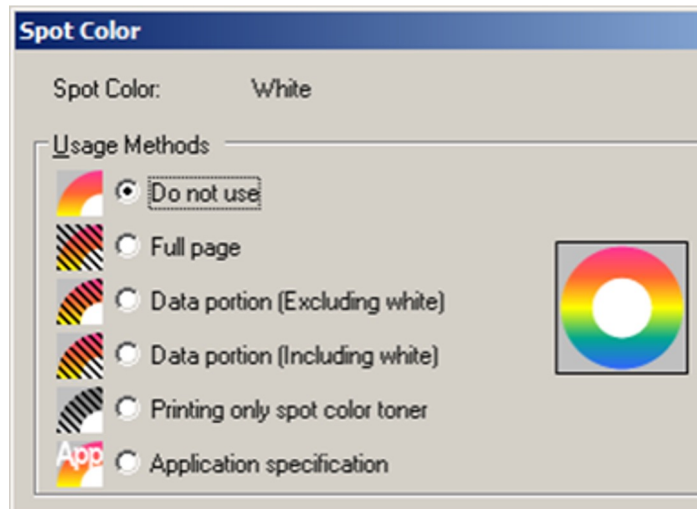

Printing Only Spot Color

Prints only white toner

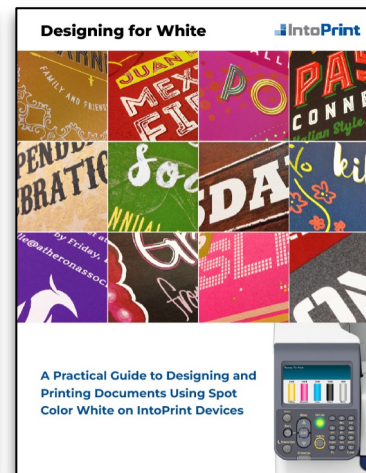

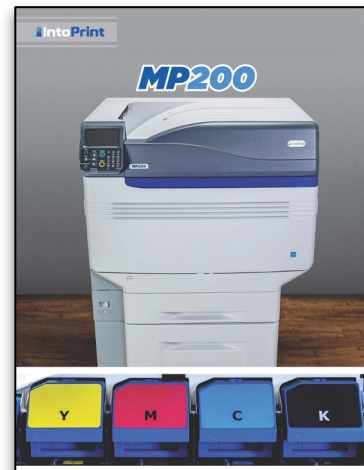

Application Specific

Prints only Spot White from the source file

Advantages Over Inkjet

Superior Reliability

Inkjet printers are prone to nozzle drop out and increased maintenance time and costs. The MP/SP toner based printers offer minimal user maintenance, and increased reliability compared to inkjet

Enhance Media Handling

PET Film is difficult to print for Inkjet. We can offer new media options for users including Paper, Labels, Film (PET), Synthetic Paper, and Foils.

Save Media Cost

Media processing is required for Inkjet printer (Ink-receiving layer). Toner can be fused without any processing, so users can choose a wider range of options reducing costs

Quick Sales Topics

Production press class print quality. LED imaging technology combined with secondary toner transfer gives the MP/SP Series unmatched quality in its marketplace

Straight through paper path provides flawless handling of trouble stock and speciality medias. Thick medias are particularly difficult for most other print engines

Simple user maintenance provides the user with minimal down time and cost. 95% of service calls do not require an onsite service technician

White toner options open up whole new markets for users. What was once a specialty print service is not accessible to all print shops, no matter the size.

Thank you!
