PIPE TOOLS & VISES
SINCE 1896

WHEELS FOR EVERY CUTTER

1

Soil Pipe Cutters

The fastest way to cut cast iron soil pipe, clay pipe, and small diameter concrete pipe is with a chain pipe cutter. Great for gray water applications! Reed has improved the original manufacturer's design by providing stronger jaws and more durable adjusting screws which are interchangeable with the original tools. Reed soil pipe cutters are available in a single stroke model (SC59) and a ratcheting (SC49) model for close quarter work.

✓ **WHY REED?** The close quarter pipe cutters (SC49) are the easiest to use because the screw is captured, does not have to be manipulated into place, and takes less effort than those of the competition. American-made, multiple use ratchet wrench ships with SC49 models.

SC59-15	08063	2-15	403	43	1,092	33	15

*Ratchet Wrench (#40208) included with SC49 cutters.

**Maximum Pipe Capacities (determined by maximum pressure applied):

- Extra heavy soil pipe 2-4" (62-125mm)
- Service weight cast iron pipe 2-8" (62-212mm)
- Concrete pipe 4-6" (125-160mm)
- No-Hub® pipe Δ 1 1/2"-8" (38-212mm)
- Clay pipe 2-15" (62-403mm)

Δ On No-Hub pipe, a conversion kit (#08034) is needed to distribute force around pipe for a clean cut.

Extension chains available to increase capacity of smaller cutters.

NOTE: Jaw sets and cutter chains are interchangeable with Wheeler-Rex® models. Pressure Screw Assembly available offering heavy duty parts for current and prior Reed models, along with Wheeler-Rex 49. Order #98046 for Reed SC49 models and Wheeler-Rex 490 series; use #98047 for Reed SC59 models.

Pipe Descalers

The scrapers on the Reed pipe descender remove corrosion and other obstructions from the pipe surface to allow more effective cutting, joining, gasket seating, or other operations. Much faster and more effective than chisels or files and requires only a few inches clearance around the pipe. The tool is made entirely of steel that is zinc plated for corrosion resistance and toughness.
