

Patrons can log into their account via app or web browser anywhere with internet access. Issues can be downloaded and read offline.

The entire content is available on servers hosted by Recorded Books.

The Personal Viewer Account is where downloaded magazines are stored. The patron keeps the issues they have downloaded and there are never any holds, checkout periods, or maximum quantities.

The Library Collection Account enables the patron to fully access the Zinio collection and check out any title indefinitely. This account is also where the latest issues of each magazine are located for checkout.

Both accounts are required to properly access Zinio for Libraries.
